Primary Standard Industrial Code: 6221

## 2024 ANNUAL REPORT

Shares Representing Common Units of Fractional Undivided Beneficial Interest  
No Par Value Per Share  
Unlimited Shares Authorized  
2,556,400 Shares Issued and Outstanding as of December 31, 2024

**OTCQX: GBAT**

**Grayscale Operating, LLC and Grayscale Investments Sponsors, LLC (each, a “Sponsor” or the “Co-Sponsors”), on behalf of Grayscale Basic Attention Token Trust (BAT) (the “Trust”), are responsible for the content of this annual report for the year ended December 31, 2024 (the “Annual Report”), which has been prepared to fulfill the disclosure requirements of the OTCQX U.S. marketplace. The information contained in this Annual Report has not been filed with, or approved by, the U.S. Securities and Exchange Commission (the “SEC”), or any state securities commission. Any representation to the contrary is a criminal offense.**

All references to “the Trust,” “the Sponsor,” “the Issuer,” “Grayscale Basic Attention Token Trust (BAT),” “we,” “us” or “our” refers to the Trust or the Sponsor, as the context indicates. The Trust is a passive entity with no operations, and where the context requires, we provide disclosure with respect to the Sponsor, which administers the Trust.

Indicate by check mark whether the company is a shell company (as defined in Rule 405 of the Securities Act of 1933 and Rule 12b-2 of the Exchange Act of 1934).

Yes ☐ No ☒

Indicate by check mark whether the company’s shell status has changed since the previous reporting period.

Yes ☐ No ☒

Indicate by check mark whether a change in control of the company has occurred over this reporting period.

Yes ☐ No ☒

Dated as of March 19, 2025

## **TABLE OF CONTENTS**

<b><u>PART A. GENERAL COMPANY INFORMATION</u></b>	10
Item 1. The exact name of the issuer and its predecessor (if any).	10
Item 2. The address of the issuer's principal executive offices and principal place of business.	10
Item 3. The jurisdiction(s) and date of the issuer's incorporation or organization.	10
<b><u>PART B. SHARE STRUCTURE</u></b>	10
Item 4. The exact title and class of securities outstanding.	10
Item 5. Par or stated value and description of the security.	10
Item 6. The number of shares or total amount of the securities outstanding for each class of securities authorized.	14
Item 7. The name and address of the transfer agent.	14
<b><u>PART C. BUSINESS INFORMATION</u></b>	14
Item 8. The nature of the issuer's business.	14
Item 9. The nature of products and services offered.	91
Item 10. The nature and extent of the issuer's facilities.	92
<b><u>PART D. MANAGEMENT STRUCTURE AND FINANCIAL INFORMATION</u></b>	93
Item 11. Company insiders (Officers, Directors, and Control Persons).	93
Item 12. Financial information for the issuer's most recent fiscal period.	95
Item 13. Similar financial information for such part of the two preceding fiscal years as the issuer or its predecessor has been in existence.	95
Item 14. The name, address, telephone number, and email address of each of the following outside providers that provide services to the issuer on matters relating to operations, business development and disclosure.	95
Item 15. Management's Discussion and Analysis.	96
<b><u>PART E. ISSUANCE HISTORY</u></b>	103
Item 16. List of securities offerings and shares issued for services in the past two years.	103
<b><u>PART F. EXHIBITS</u></b>	104
Item 17. Material Contracts.	104
Item 18. Articles of Incorporation and Bylaws.	113
Item 19. Purchases of Equity Securities by the Issuer and Affiliated Purchasers.	113
Item 20. Issuer's Certifications.	114
Exhibit 1 Audited Financial Statements for the Years Ended December 31, 2024 and 2023	
Exhibit 2 Amendment No. 1 to the Amended and Restated Declaration of Trust and Trust Agreement of Grayscale Basic Attention Token Trust (BAT), dated March 22, 2024.	

## Cautionary Note Regarding Forward-Looking Statements

This Annual Report contains “forward-looking statements” with respect to the Trust’s financial condition, results of operations, plans, objectives, future performance and business. Statements preceded by, followed by or that include words such as “may,” “might,” “will,” “should,” “expect,” “plan,” “anticipate,” “believe,” “estimate,” “predict,” “potential” or “continue,” the negative of these terms and other similar expressions are intended to identify some of the forward-looking statements. All statements (other than statements of historical fact) included in this Annual Report that address activities, events or developments that will or may occur in the future, including such matters as changes in market prices and conditions, the Trust’s operations, the plans of Grayscale Investments, LLC (“GSI”), the sponsor of the Trust before January 1, 2025, Grayscale Operating, LLC (“GSO”), the co-sponsor of the Trust from January 1, 2025 to May 3, 2025, and Grayscale Investments Sponsors, LLC (“GSIS”), the co-sponsor of the Trust from January 1, 2025 to May 3, 2025 and the sole remaining sponsor thereafter (each of GSI, GSO and GSIS, the “Sponsor”, as the context may require, and GSO and GSIS, together, the “Co-Sponsors”) and references to the Trust’s future success and other similar matters are forward-looking statements. These statements are only predictions. Actual events or results may differ materially from such statements. These statements are based upon certain assumptions and analyses the Sponsor made based on its perception of historical trends, current conditions and expected future developments, as well as other factors appropriate in the circumstances. You should specifically consider the numerous risks outlined under “Risk Factors.” Whether or not actual results and developments will conform to the Sponsor’s expectations and predictions, however, is subject to a number of risks and uncertainties, including:

- the risk factors discussed in this Annual Report, including the particular risks associated with new technologies such as Basic Attention Token and blockchain technology;
- the Trust’s inability to redeem Shares;
- the inability of the Trust to meet its investment objective;
- economic conditions in the BAT industry and market;
- general economic, market and business conditions;
- global or regional political, economic or financial conditions, events and situations;
- the use of technology by us and our vendors, including the Custodian, in conducting our business, including disruptions in our computer systems and data centers and our transition to, and quality of, new technology platforms;
- changes in laws or regulations, including those concerning taxes, made by governmental authorities or regulatory bodies;
- the costs and effect of any litigation or regulatory investigations;
- our ability to maintain a positive reputation; and
- other world economic and political developments.

Consequently, all of the forward-looking statements made in this Annual Report are qualified by these cautionary statements, and there can be no assurance that the actual results or developments the Sponsor anticipates will be realized or, even if substantially realized, that they will result in the expected consequences to, or have the expected effects on, the Trust’s operations or the value of the Shares. Should one or more of the risks discussed under “Risk Factors” or other uncertainties materialize, or should underlying assumptions prove incorrect, actual outcomes may vary materially from those described in forward-looking statements. Forward-looking statements are made based on the Sponsor’s beliefs, estimates and opinions on the date the statements are made and neither the Trust nor the Sponsor is under a duty or undertakes an obligation to update forward-looking statements if these beliefs, estimates and opinions or other circumstances should change, other than as required by applicable laws. Moreover, neither the Trust, the Sponsor, nor any other person assumes responsibility for the accuracy and completeness of any of these forward-looking statements. Investors are therefore cautioned against relying on forward-looking statements.

## Glossary

In this Annual Report, each of the following quoted terms has the meanings set forth after such term:

“Actual Exchange Rate”—With respect to any particular asset, at any time, the price per single unit of such asset (determined net of any associated fees) at which the Trust is able to sell such asset for U.S. dollars (or other applicable fiat currency) at such time to enable the Trust to timely pay any Additional Trust Expenses, through use of the Sponsor’s commercially reasonable efforts to obtain the highest such price.

“Additional Trust Expenses”—Together, any expenses incurred by the Trust in addition to the Sponsor’s Fee that are not Sponsor-paid Expenses, including, but not limited to, (i) taxes and governmental charges, (ii) expenses and costs of any extraordinary services performed by the Sponsor (or any other service provider) on behalf of the Trust to protect the Trust or the interests of shareholders (including in connection with any Incidental Rights and any IR Virtual Currency), (iii) any indemnification of the Custodian or other agents, service providers or counterparties of the Trust, (iv) the fees and expenses related to the listing, quotation or trading of the Shares on any Secondary Market (including legal, marketing and audit fees and expenses) to the extent exceeding \$600,000 in any given fiscal year and (v) extraordinary legal fees and expenses, including any legal fees and expenses incurred in connection with litigation, regulatory enforcement or investigation matters.

“Administrator Fee”—The fee payable to any administrator of the Trust for services it provides to the Trust, which the Sponsor will pay such administrator as a Sponsor-paid Expense.

“Affirmative Action”—A decision by the Trust to acquire or abandon specific Incidental Rights and IR Virtual Currency at any time prior to the time of a creation of Shares.

“Agent”—A Person appointed by the Trust to act on behalf of the shareholders in connection with any distribution of Incidental Rights and/or IR Virtual Currency.

“AML”—Anti-money laundering.

“Annual Report”—This Annual Report for the fiscal year ended December 31, 2024.

“Authorized Participant”—Certain eligible financial institutions that have entered into an agreement with the Trust and the Sponsor concerning the creation of Shares. Each Authorized Participant (i) is a registered broker-dealer, (ii) has entered into a Participant Agreement with the Sponsor and (iii) owns a digital wallet address that is known to the Custodian as belonging to the Authorized Participant or a Liquidity Provider.

“Basic Attention Token Network”—A set of smart contracts deployed on a decentralized public transaction ledger known as the blockchain. The Basic Attention Token Network leverages the cryptographic and algorithmic protocols of the underlying blockchain to govern its application.

“Basket”—A block of 100 Shares.

“Basket Amount”—On any trade date, the amount of BAT required as of such trade date for each Creation Basket, as determined by dividing (x) the amount of BAT owned by the Trust at 4:00 p.m., New York time, on such trade date, after deducting the amount of BAT representing the U.S. dollar value of accrued but unpaid fees and expenses of the Trust (converted using the Index Price at such time, and carried to the eighth decimal place), by (y) the number of Shares outstanding at such time (with the quotient so obtained calculated to one one-hundred-millionth of one BAT (i.e., carried to the eighth decimal place)), and multiplying such quotient by 100.

“Binance”—Binance Holdings Ltd.

“BAT” or “Basic Attention Token”—Basic Attention Token tokens, which are a type of digital asset based on an open-source cryptographic protocol existing on the Ethereum Network, comprising units that constitute the assets underlying the Trust’s Shares. See “Overview of the BAT Industry and Market.”

“Bitcoin”—A type of digital asset based on an open-source cryptographic protocol existing on the Bitcoin network.

“Blockchain” or “Ethereum Blockchain”—The public transaction ledger of the Ethereum Network on which transactions in Ether and BAT are recorded.

“CDI”—CoinDesk Indices, Inc., with its affiliates, including CC Data Limited.

“CEA”—Commodity Exchange Act of 1936, as amended.

“CFPB”—The Consumer Financial Protection Bureau.

“CFTC”—The U.S. Commodity Futures Trading Commission, an independent agency with the mandate to regulate commodity futures and option markets in the United States.

“Code”—The U.S. Internal Revenue Code of 1986, as amended.

“Coinbase”—Coinbase, Inc.

“Covered Person”—The Sponsor and its affiliates. See “Material Contracts—Description of the Trust Agreement—The Sponsor—Liability of the Sponsor and Indemnification.”

“Creation Basket”—Basket of Shares issued by the Trust in exchange for deposits of the Basket Amount required for each such Creation Basket.

“Creation Time”—With respect to the creation of any Shares by the Trust, the time at which the Trust creates such Shares.

“Custodial Services”—The Custodian’s services that (i) allow BAT to be deposited from a public blockchain address to the Trust’s Digital Asset Account and (ii) allow the Trust and the Sponsor to withdraw BAT from the Trust’s Digital Asset Account to a public blockchain address the Trust or the Sponsor controls pursuant to instructions the Trust or the Sponsor provides to the Custodian.

“Custodian”—Coinbase Custody Trust Company, LLC.

“Custodian Agreement”—The Amended and Restated Custodial Services Agreement, dated as of June 29, 2022, by and between the Trust and the Sponsor and Custodian that governs the Trust’s and the Sponsor’s use of the Custodial Services provided by the Custodian as a fiduciary with respect to the Trust’s assets.

“Custodian Fee”—Fee payable to the Custodian for services it provides to the Trust, which the Sponsor shall pay to the Custodian as a Sponsor-paid Expense.

“DAOs”—Decentralized autonomous organizations.

“DCG”—Digital Currency Group, Inc.

“Digital Asset Account”—A segregated custody account controlled and secured by the Custodian to store private keys, which allow for the transfer of ownership or control of the Trust’s BAT on the Trust’s behalf.

“Digital Asset Market”—A “Brokered Market,” “Dealer Market,” “Principal-to-Principal Market” or “Exchange Market” (referred to as “Trading Platform Market” in this Annual Report), as each such term is defined in the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Master Glossary.

“Digital Asset Trading Platform”—An electronic marketplace where trading platform participants may trade, buy and sell BAT based on bid-ask trading. The largest Digital Asset Trading Platforms are online and typically trade on a 24-hour basis, publishing transaction price and volume data.

“Digital Asset Trading Platform Market”—The global trading platform market for the trading of BAT, which consists of transactions on electronic Digital Asset Trading Platforms.

“DSTA”—The Delaware Statutory Trust Act, as amended.

“DTC”—The Depository Trust Company. DTC is a limited purpose trust company organized under New York law, a member of the U.S. Federal Reserve System and a clearing agency registered with the SEC. DTC will act as the securities depository for the Shares.

“ERC-20”—A technical standard used to create new fungible, digital assets on the Ethereum Network, created as a result of Ethereum Request for Comment-20.

“ERC-20 tokens”—Fungible, digital assets created using the ERC-20 standard.

“Ether”—Ethereum tokens, which are a type of digital asset based on an open-source cryptographic protocol existing on the Ethereum Network.

“Ethereum Network”—The online, end-user-to-end-user network hosting a public transaction ledger, known as the Ethereum Blockchain, and the source code comprising the basis for the cryptographic and algorithmic protocols governing the Ethereum Network. See “Overview of the BAT Industry and Market.”

“Exchange Act”—The Securities Exchange Act of 1934, as amended.

“FDIC”—The Federal Deposit Insurance Corporation.

“FinCEN”—The Financial Crimes Enforcement Network, a bureau of the U.S. Department of the Treasury.

“FINRA”—The Financial Industry Regulatory Authority, Inc., which is the primary regulator in the United States for broker-dealers, including Authorized Participants.

“FSMA”—The Financial Services and Markets Act 2023.

“FTX”—FTX Trading, Ltd.

“Genesis”—Genesis Global Trading, Inc., a wholly owned subsidiary of Digital Currency Group, Inc.

“Grayscale Securities”—Grayscale Securities, LLC, a wholly owned subsidiary of GSI until December 31, 2024, and GSO thereafter, which as of the date of this Annual Report, is the only acting Authorized Participant.

“GSI”—Grayscale Investments, LLC, the Sponsor of the Trust until December 31, 2024.

“GSIS”—Grayscale Investments Sponsors, LLC, a Delaware limited liability company, the Sponsor of the Trust from and after January 1, 2025, and a wholly owned direct subsidiary of Grayscale Operating, LLC.

“GSO”—Grayscale Operating, LLC, a Delaware limited liability company and a wholly owned indirect subsidiary of Digital Currency Group, Inc.

“ICE”—Intercontinental Exchange.

“Incidental Rights”—Rights to acquire, or otherwise establish dominion and control over, any virtual currency or other asset or right, which rights are incident to the Trust’s ownership of BAT and arise without any action of the Trust, or of the Sponsor or Trustee on behalf of the Trust.

“Index”—The CoinDesk Basic Attention Token Price Index (BTX).

“Index License Agreement”—The license agreement, dated as of February 1, 2022, between the Index Provider and the Sponsor governing the Sponsor’s use of the Index for calculation of the Index Price, as amended from time to time.

“Index Price”—The U.S. dollar value of a BAT derived from the Digital Asset Trading Platforms that are reflected in the Index, calculated at 4:00 p.m., New York time, on each business day. See “Grayscale Basic Attention Token Trust (BAT)—The Index and the Index Price” for a description of how the Index Price is calculated. For purposes of the Trust Agreement, the term BAT Index Price shall mean the Index Price as defined herein.

“Index Provider”—CoinDesk Indices, Inc., a Delaware corporation that publishes the Index.

“Investment Advisers Act”—Investment Advisers Act of 1940, as amended.

“Investment Company Act”—Investment Company Act of 1940, as amended.

“Investor”—Any investor that has entered into a subscription agreement with an Authorized Participant, pursuant to which such Authorized Participant will act as agent for the investor.

“IR Virtual Currency”—Any virtual currency tokens, or other asset or right, acquired by the Trust through the exercise (subject to the applicable provisions of the Trust Agreement) of any Incidental Right.

“IRS”—The U.S. Internal Revenue Service, a bureau of the U.S. Department of the Treasury.

“KYC”—Know-your-customer.

“Layer 1”—The underlying smart contract platform blockchain on which a digital asset functions.

“Layer 2”—Protocols built on top of an underlying smart contract platform blockchain intended to provide scalability to the underlying blockchain by increasing transaction efficiency.

“Liquidity Provider”—A service provider that facilitates the purchase of BAT in connection with the creation of Baskets.

“Marketing Fee”—Fee payable to the marketer for services it provides to the Trust, which the Sponsor will pay to the marketer as a Sponsor-paid Expense.

“Merge”—The Ethereum Network, which was initially known as “Ethereum 2.0.” and was completed on September 15, 2022.

“Merger”—The merger of Grayscale Investments, LLC with and into Grayscale Operating, LLC, with Grayscale Operating, LLC continuing as the surviving company.

“MiCA”—The Markets in Crypto-Assets Regulation, which was approved by the Parliament of the European Union in 2023.

“MSB”—A money services business.

“NAV”—The aggregate value, expressed in U.S. dollars, of the Trust’s assets (other than U.S. dollars or other fiat currency), less its liabilities (which include estimated accrued but unpaid fees and expenses), a non-GAAP metric, calculated in the manner set forth under “Grayscale Basic Attention Token Trust (BAT)—Description of the Trust—Valuation of BAT and Determination of NAV.” See also “Management’s Discussion and Analysis—Critical Accounting Policies—Principal Market and Fair Value Determination” for a description of the Trust’s Principal Market NAV, as calculated in accordance with U.S. GAAP. Prior to March 8, 2024, NAV was referred to as Digital Asset Holdings. For purposes of the Trust Agreement, the term Digital Asset Holdings shall mean the NAV as defined herein.

“NAV Fee Basis Amount”—The amount on which the Sponsor’s Fee for the Trust is based, as calculated in the manner set forth under “Grayscale Basic Attention Token Trust (BAT)—Description of the Trust—Valuation of BAT and Determination of NAV.” For purposes of the Trust Agreement, the term Digital Asset Holdings Fee Basis Amount shall mean the NAV Fee Basis Amount as defined herein.

“OTCQX”—The OTCQX Best Market® of OTC Markets Group Inc.

“Participant Agreement”—An agreement entered into by an Authorized Participant with the Sponsor that provides the procedures for the creation of Baskets and for the delivery of BAT required for Creation Baskets.

“Pre-Creation Abandonment”—The abandonment by the Trust, irrevocably for no direct or indirect consideration, all Incidental Rights and IR Virtual Currency to which the Trust would otherwise be entitled, effective immediately prior to a Creation Time for the Trust.

“Pre-Creation Abandonment Notice”—A notice delivered by the Sponsor to the Custodian, on behalf of the Trust, stating that the Trust is abandoning irrevocably for no direct or indirect consideration, effective immediately prior to each Creation Time, all Incidental Rights and IR Virtual Currency to which it would otherwise be entitled as of such time and with respect to which the Trust has not taken any Affirmative Action at or prior to such time.

“Principal Market NAV”—The net asset value of the Trust determined on a U.S. GAAP basis. Prior to March 8, 2024, Principal Market NAV was referred to as NAV.

“Reorganization”—The internal corporate reorganization of Grayscale Investments, LLC consummated on January 1, 2025.

“Rule 144”—Rule 144 under the Securities Act.

“SEC”—The U.S. Securities and Exchange Commission.

“Secondary Index”—The Coin Metrics Real-Time Rate.

“Secondary Index Price”—The price set by Coin Metrics Real-Time Rate as of 4:00 p.m., New York time, on the valuation date. See “Description of the Trust—The Index and the Index Price—Determination of the Index Price When Index Price is Unavailable” for a description of how the Secondary Index Price is utilized when the Index Price is unavailable.

“Secondary Index Provider”—Coin Metrics Inc., a Delaware corporation that publishes the Secondary Index.

“Secondary Market”—Any marketplace or other alternative trading system, as determined by the Sponsor, on which the Shares may then be listed, quoted or traded, including but not limited to, the OTCQX Best Market® of OTC Markets Group Inc.

“Securities Act”—The Securities Act of 1933, as amended.

“Shares”—Common units of fractional undivided beneficial interest in, and ownership of, the Trust.

“SIPC”—The Securities Investor Protection Corporation.

“Sponsor” or “Co-Sponsor”—The sponsor of the Trust. Grayscale Investments, LLC was the sponsor of the Trust before January 1, 2025, Grayscale Operating, LLC is a co-sponsor of the Trust from January 1, 2025 to May 3, 2025, and Grayscale Investments Sponsors, LLC is a co-sponsor of the Trust from January 1, 2025 to May 3, 2025 and will be the sole remaining sponsor thereafter.

“Sponsor Contracts”—Certain contracts assigned by GSO pertaining to its role as Sponsor (as such term is defined in the Trust Agreement) of the Trust to GSIS in connection with the Reorganization.

“Sponsor-paid Expenses”—The fees and expenses incurred by the Trust in the ordinary course of its affairs that the Sponsor is obligated to assume and pay, excluding taxes, but including: (i) the Marketing Fee, (ii) the Administrator Fee, (iii) the Custodian Fee and fees for any other security vendor engaged by the Trust, (iv) the Transfer Agent fee, (v) the Trustee fee, (vi) the fees and expenses related to the listing, quotation or trading of the Shares on any Secondary Market (including customary legal, marketing and audit fees and expenses) in an amount up to \$600,000 in any given fiscal year, (vii) ordinary course legal fees and expenses, (viii) audit fees, (ix) regulatory fees, including, if applicable, any fees relating to the registration of the Shares under the Securities Act or the Exchange Act, (x) printing and mailing costs, (xi) costs of maintaining the Trust’s website and (xii) applicable license fees, provided that any expense that qualifies as an Additional Trust Expense will be deemed to be an Additional Trust Expense and not a Sponsor-paid Expense.

“Sponsor’s Fee”—A fee, payable in BAT, which accrues daily in U.S. dollars at an annual rate of 2.5% of the NAV Fee Basis Amount of the Trust as of 4:00 p.m., New York time, on each day, provided that for a day that is not a business day, the calculation of the Sponsor’s Fee will be based on the NAV Fee Basis Amount from the most recent business day, reduced by the accrued and unpaid Sponsor’s Fee for such most recent business day and for each day after such most recent business day and prior to the relevant calculation date.

“Tertiary Pricing Option”—The price set by the Trust’s principal market.

“Total Basket Amount”—With respect to any creation order, the applicable Basket Amount multiplied by the number of Baskets being created.

“Transfer Agency and Service Agreement”—The agreement between the Sponsor and the Transfer Agent which sets forth the obligations and responsibilities of the Transfer Agent with respect to transfer agency services and related matters.

“Transfer Agent”—Continental Stock Transfer & Trust Company, a Delaware corporation.

“Transfer Agent Fee”—Fee payable to the Transfer Agent for services it provides to the Trust, which the Sponsor will pay to the Transfer Agent as a Sponsor-paid Expense.

“Treasury Regulations”—The regulations, including proposed or temporary regulations, promulgated under the Code.

“Trust”—Grayscale Basic Attention Token Trust (BAT), a Delaware statutory trust, formed on December 18, 2020 under the DSTA and pursuant to the Trust Agreement.

“Trust Agreement”—The Amended and Restated Declaration of Trust and Trust Agreement between the Trustee and the Sponsor establishing and governing the operations of the Trust, as amended by Amendment No. 1 thereto and as the same may be further amended from time to time.

“Trustee”—CSC Delaware Trust Company (formerly known as Delaware Trust Company), a Delaware trust company, is the Delaware trustee of the Trust.

“U.S.”—United States.

“U.S. dollar,” “USD” or “\$”—United States dollar or dollars.

“U.S. GAAP”—United States generally accepted accounting principles.

## **PART A. GENERAL COMPANY INFORMATION**

### **Item 1. The exact name of the issuer and its predecessor (if any).**

The name of the Trust is Grayscale Basic Attention Token Trust (BAT).

### **Item 2. The address of the issuer's principal executive offices and principal place of business.**

The address of the Sponsor is: Grayscale Investments Sponsors, LLC  
290 Harbor Drive, 4<sup>th</sup> Floor  
Stamford, Connecticut 06902

The Sponsor's telephone number is: (212) 668-1427

The Sponsor's facsimile number is: (212) 937-3645

The Sponsor's website: The Sponsor maintains a corporate website, [www.grayscale.com](http://www.grayscale.com), which contains general information about the Trust and the Sponsor. The reference to our website is an interactive textual reference only, and the information contained on our website shall not be deemed incorporated by reference herein.

Investor relations contact: Peter Mintzberg  
c/o Grayscale Investments Sponsors, LLC  
290 Harbor Drive, 4<sup>th</sup> Floor  
Stamford, Connecticut 06902  
Telephone: (212) 668-1427  
Facsimile: (212) 937-3645  
Email: [info@grayscale.com](mailto:info@grayscale.com)

### **Item 3. The jurisdiction(s) and date of the issuer's incorporation or organization.**

The Trust was formed as a statutory trust in the State of Delaware on December 18, 2020. The Trust is currently active in the State of Delaware.

## **PART B. SHARE STRUCTURE**

### **Item 4. The exact title and class of securities outstanding.**

The only class of securities outstanding is common units of fractional undivided beneficial interest ("Shares"), which represent ownership in the Trust. The Trust's trading symbol on the OTCQX Best Market® ("OTCQX") of the OTC Markets Group Inc. is "GBAT" and the CUSIP number for the Trust's Shares is 38963U108.

### **Item 5. Par or stated value and description of the security.**

#### **A. Par or Stated Value**

The Shares represent units of fractional undivided beneficial interest in and ownership of the Trust and have no par value.

#### **B. Common or Preferred Stock**

##### *General*

The Trust is authorized under the Trust Agreement to create and issue an unlimited number of Shares. The Trust issues Shares only in Baskets (a Basket equals a block of 100 Shares) in connection with creation orders. The Shares represent common units of fractional undivided beneficial interest in and ownership of the Trust and have no par value. The Shares are quoted on OTCQX under the ticker symbol "GBAT."

The Shares may be purchased from the Trust on an ongoing basis, but only upon the order of Authorized Participants and only in blocks of 100 Shares, which are referred to as Baskets. The Trust creates Shares on an ongoing basis, but only in Baskets. Initially, each Share represented approximately 10.0 BAT. As of December 31, 2024, each Share represented approximately 9.0837 BAT. Shareholders that are not Authorized Participants may not purchase (or, if then permitted, redeem) Shares or Baskets from the Trust. At this time, the Trust is not operating a redemption program for Shares and therefore the Shares are not redeemable by the Trust.

#### *Description of Limited Rights*

The Shares do not represent a traditional investment and should not be viewed as similar to “shares” of a corporation operating a business enterprise with management and a board of directors. A shareholder will not have the statutory rights normally associated with the ownership of shares of a corporation. Each Share is transferable, is fully paid and non-assessable and entitles the holder to vote on the limited matters upon which shareholders may vote under the Trust Agreement. For example, shareholders do not have the right to elect or remove directors and will not receive dividends. The Shares do not entitle their holders to any conversion or pre-emptive rights or, except as discussed below, any redemption rights or rights to distributions.

#### *Voting and Approvals*

The shareholders take no part in the management or control of the Trust. Under the Trust Agreement, shareholders have limited voting rights. For example, in the event that the Sponsor withdraws, a majority of the shareholders may elect and appoint a successor sponsor to carry out the affairs of the Trust. In addition, no amendments to the Trust Agreement that materially adversely affect the interests of shareholders may be made without the vote of at least a majority (over 50%) of the Shares (not including any Shares held by the Sponsor or its affiliates). However, the Sponsor may make any other amendments to the Trust Agreement in its sole discretion without shareholder consent provided that the Sponsor provides 20 days’ notice of any such amendment.

#### *Distributions*

Pursuant to the terms of the Trust Agreement, the Trust may make distributions on the Shares in-cash or in-kind, including in such form as is necessary or permissible for the Trust to facilitate its shareholders’ access to any Incidental Rights or to IR Virtual Currency.

In addition, if the Trust is terminated and liquidated, the Sponsor will distribute to the shareholders any amounts of the cash proceeds of the liquidation remaining after the satisfaction of all outstanding liabilities of the Trust and the establishment of reserves for applicable taxes, other governmental charges and contingent or future liabilities as the Sponsor will determine. See “Material Contracts—Description of the Trust Agreement—Termination of the Trust.” Shareholders of record on the record date fixed by the Transfer Agent for a distribution will be entitled to receive their pro rata portions of any distribution.

#### *Appointment of Agent*

Pursuant to the terms of the Trust Agreement, by holding the Shares, shareholders will be deemed to agree that the Sponsor may cause the Trust to appoint an agent (any person appointed in such capacity, an “Agent”) to act on their behalf in connection with any distribution of Incidental Rights and/or IR Virtual Currency if the Sponsor has determined in good faith that such appointment is reasonably necessary or in the best interests of the Trust and the shareholders in order to facilitate the distribution of any Incidental Rights and/or IR Virtual Currency. The Sponsor may cause the Trust to appoint Grayscale Investments Sponsors, LLC (acting other than in its capacity as Sponsor) or any of its affiliates to act in such capacity.

Any Agent appointed to facilitate a distribution of Incidental Rights and/or IR Virtual Currency will receive an in-kind distribution of Incidental Rights and/or IR Virtual Currency on behalf of the shareholders of record with respect to such distribution, and following receipt of such distribution, will determine, in its sole discretion and without any direction from the Trust, or the Sponsor, in its capacity as Sponsor of the Trust, whether and when to sell the distributed Incidental Rights and/or IR Virtual Currency on behalf of the record date shareholders. If the Agent is able to do so, it will remit the cash proceeds to the record date shareholders. There can be no assurance as to the price or prices for any Incidental Rights and/or IR Virtual Currency that the Agent may realize, and the value of the Incidental Rights and/or IR Virtual Currency may increase or decrease after any sale by the Agent.

Any Agent appointed pursuant to the Trust Agreement will not receive any compensation in connection with its role as agent. However, any Agent will be entitled to receive from the record-date shareholders, out of the distributed Incidental Rights and/or IR Virtual Currency, an amount of Incidental Rights and/or IR Virtual Currency with an aggregate fair market value equal to the amount of administrative and other reasonable expenses incurred by the Agent in connection with its activities as agent of the record-date shareholders, including expenses incurred by the Agent in connection with any post-distribution sale of such Incidental Rights and/or IR Virtual Currency.

The Sponsor currently expects to cause the Trust to appoint Grayscale Investments Sponsors, LLC, acting other than in its capacity as Sponsor, as Agent to facilitate any distribution of Incidental Rights and/or IR Virtual Currency to shareholders. The Trust has no right to receive any information about any distributed Incidental Rights and/or IR Virtual Currency or the disposition thereof from the record date shareholders, their Agent or any other person.

### *Creation of Shares*

The Trust creates Shares at such times and for such periods as determined by the Sponsor, but only in one or more whole Baskets. A Basket equals 100 Shares. As of December 31, 2024, each Share represented approximately 9.0837 BAT. See “Creation and Redemption of Shares.” The creation of a Basket requires the delivery to the Trust of the amount of BAT represented by one Share immediately prior to such creation multiplied by 100. The Trust may from time to time halt creations, including for extended periods of time, for a variety of reasons, including in connection with forks, airdrops and other similar occurrences.

### *Redemption of Shares*

Redemptions of Shares are currently not permitted and the Trust is unable to redeem Shares. Subject to receipt of regulatory approval from the SEC and approval by the Sponsor in its sole discretion, the Trust may in the future operate a redemption program. ***However, because the Sponsor does not believe that the SEC would, at this time, entertain an application for the waiver of rules needed in order to operate an ongoing redemption program, the Sponsor currently has no intention of seeking regulatory approval from the SEC for the Trust to operate an ongoing redemption program.***

Even if such relief is sought in the future, no assurance can be given as to the timing of such relief or that such relief will be granted. If such relief is granted and the Sponsor approves a redemption program, the Shares will be redeemable only in accordance with the provisions of the Trust Agreement and the relevant Participant Agreement. See “Risk Factors—Risk Factors Related to the Trust and the Shares—Because of the holding period under Rule 144, the lack of an ongoing redemption program and the Trust’s ability to halt creations from time to time, there is no arbitrage mechanism to keep the value of the Shares closely linked to the Index Price and the Shares have historically traded at a substantial premium over, or a substantial discount to, the NAV per Share”, “Risk Factors—Risk Factors Related to the Trust and the Shares—The Shares may trade at a price that is at, above or below the Trust’s NAV per Share as a result of the non-current trading hours between OTCQX and the Digital Asset Trading Platform Market” and “Risk Factors—Risk Factors Related to the Trust and the Shares—The restrictions on transfer and redemption may result in losses on the value of the Shares.”

### *Transfer Restrictions*

Shares purchased in a private placement are restricted securities that may not be resold except in transactions exempt from registration under the Securities Act and state securities laws and any such transaction must be approved by the Sponsor. In determining whether to grant approval, the Sponsor will specifically look at whether the conditions of Rule 144 under the Securities Act and any other applicable laws have been met. Any attempt to sell Shares without the approval of the Sponsor in its sole discretion will be void *ab initio*. ***A minimum one year holding period will apply to all Shares purchased from the Trust.***

***Because of the one-year holding period and the lack of an ongoing redemption program, Shares should not be purchased by any investor who is not willing and able to bear the risk of investment and lack of liquidity for at least one year. No assurances are given that after the one year holding period, there will be any market for the resale of Shares, or, if there is such a market, as to the price at which such Shares may be sold into such a market.***

On a bi-weekly basis, the Trust aggregates the Shares that have been held for the requisite holding period under Rule 144 by non-affiliates of the Trust to assess whether the Rule 144 transfer restriction legends may be removed. Any Shares that qualify for the removal of the Rule 144 transfer restriction legends are presented to outside counsel, who may instruct the Transfer Agent to remove the transfer restriction legends from the Shares, allowing the Shares to then be resold without restriction, including on OTCQX Best Market. The outside counsel requires that certain representations be made, providing that:

- the Shares subject to each sale have been held for more than a year by the selling shareholder;
- the shareholder is the sole beneficial owner of the Shares;
- the Sponsor is aware of no circumstances in which the shareholder would be considered an underwriter or engaged in the distribution of securities for the Trust;
- none of the Shares are subject to any agreement granting any pledge, lien, mortgage, hypothecation, security interest, charge, option or encumbrance;
- none of the identified selling shareholders is an affiliate of the Sponsor;
- the Sponsor consents to the transfer of the Shares; and
- outside counsel and the Transfer Agent can rely on the representations.

In addition, because the Trust Agreement prohibits the transfer or sale of Shares without the prior written consent of the Sponsor, the Sponsor must provide a written consent that explicitly states that it irrevocably consents to the transfer and resale of the Shares. Once the transfer restriction legends have been removed from a Share and the Sponsor has provided its written consent to the transfer of that Share, no consent of the Sponsor is required for future transfers of that particular Share.

#### *Book-Entry Form*

Shares are held primarily in book-entry form by the Transfer Agent. The Sponsor or its delegate will direct the Transfer Agent to credit the number of Creation Baskets to the applicable Authorized Participant. The Transfer Agent will issue Creation Baskets. Transfers will be made in accordance with standard securities industry practice. The Sponsor may cause the Trust to issue Shares in certificated form in limited circumstances in its sole discretion.

#### *Share Splits*

In its discretion, the Sponsor may direct the Transfer Agent to declare a split or reverse split in the number of Shares outstanding and to make a corresponding change in the number of Shares constituting a Basket. For example, if the Sponsor believes that the per Share price in the secondary market for Shares has risen or fallen outside a desirable trading price range, it may declare such a split or reverse split.

**Item 6. The number of shares or total amount of the securities outstanding for each class of securities authorized.**

As of December 31, 2024 and 2023, the Trust had unlimited Shares authorized. As of December 31, 2024 and 2023, there were 2,556,400 and 620,300 Shares issued and outstanding, respectively.

The following table shows the number of the Shares outstanding:

	<b>As of December 31,</b>	
	<b>2024</b>	<b>2023</b>
<b>(i) Number of Shares authorized</b>	Unlimited	Unlimited
<b>(ii) Number of Shares outstanding</b>	2,556,400	620,300
<b>(iii) Number of Shares freely tradable<sup>(1)</sup></b>	319,907	246,161
<b>(iv) Number of beneficial holders owning at least 100 Shares<sup>(2)</sup></b>	33	19
<b>(v) Number of holders of record<sup>(2)</sup></b>	34	21

(1) Public float means the total number of unrestricted shares not held directly or indirectly by an officer, director, any person who is the beneficial owner of more than 10% of the total shares outstanding, or anyone who controls, is controlled by or is under common control with such person, or any immediate family members of officers, directors and control persons. Freely tradable Shares inclusive of holders with more than 10% of total Shares outstanding was 330,548 and 246,161 as of December 31, 2024 and 2023, respectively.

(2) Includes Cede & Co. nominee for DTC for the Shares traded on OTCQX, but not its direct participants. Therefore, this number does not include the individual holders who have bought/sold Shares on OTCQX or transferred their eligible Shares to their brokerage accounts.

**Item 7. The name and address of the transfer agent.**

The Trust's transfer agent is Continental Stock Transfer & Trust Company (the "Transfer Agent"). The Transfer Agent's address is 1 State Street, 30<sup>th</sup> Floor, New York, New York 10004, and its telephone number is (212) 509-4000. Continental Stock Transfer & Trust Company is registered under the Securities Exchange Act and is regulated by the SEC.

**PART C. BUSINESS INFORMATION****Item 8. The nature of the issuer's business.****A. Business Development**

The activities of the Trust are limited to (i) issuing Baskets in exchange for BAT transferred to the Trust as consideration in connection with the creations, (ii) transferring or selling BAT, Incidental Rights and IR Virtual Currency as necessary to cover the Sponsor's Fee and/or any Additional Trust Expenses, (iii) transferring BAT in exchange for Baskets surrendered for redemption (subject to obtaining regulatory approval from the SEC and approval from the Sponsor), (iv) causing the Sponsor to sell BAT, Incidental Rights and IR Virtual Currency on the termination of the Trust, (v) making distributions of Incidental Rights and/or IR Virtual Currency or cash from the sale thereof and (vi) engaging in all administrative and security procedures necessary to accomplish such activities in accordance with the provisions of the Trust Agreement, the Custodian Agreement, the Index License Agreement and the Participant Agreements.

In addition, the Trust may engage in any lawful activity necessary or desirable in order to facilitate shareholders' access to Incidental Rights or IR Virtual Currency, provided that such activities do not conflict with the terms of the Trust Agreement. The Trust will not be actively managed. It will not engage in any activities designed to obtain a profit from, or to ameliorate losses caused by, changes in the market prices of BAT.

The Sponsor entered into an agreement with Coinbase Custody Trust Company, LLC (the "Custodian") to serve as custodian for the underlying asset of the Trust (the "Custodian Agreement"). The Custodian Agreement establishes the rights and responsibilities of the Custodian, Sponsor, Trust and Authorized Participants with respect to the Trust's BAT in the Digital Asset Account, which is maintained and operated by the Custodian on behalf of the Trust. For additional information, see "Custody of the Trust's BAT."

The Custodian is responsible for safeguarding the BAT, Incidental Rights, and IR Virtual Currency held by the Trust, and holding the private key(s) that provide access to the Trust's digital wallets and vaults.

## Trust Objective

The Trust's investment objective is for the value of the Shares (based on BAT per Share) to reflect the value of the BAT held by the Trust, determined by reference to the Index Price, less the Trust's expenses and other liabilities. While an investment in the Shares is not a direct investment in BAT, the Shares are designed to provide investors with a cost-effective and convenient way to gain investment exposure to BAT. A substantial direct investment in BAT may require expensive and sometimes complicated arrangements in connection with the acquisition, security and safekeeping of the BAT and may involve the payment of substantial fees to acquire such BAT from third-party facilitators through cash payments of U.S. dollars. Because the value of the Shares is correlated with the value of the BAT held by the Trust, it is important to understand the investment attributes of, and the market for, BAT. To date, the Trust has not met its investment objective and the Shares quoted on OTCQX have not reflected the value of the BAT held by the Trust, less the Trust's expenses and other liabilities, but instead have traded at both premiums and discounts to such value, which at times have been substantial.

In the event the Shares trade at a substantial premium, investors who purchase Shares on OTCQX will pay substantially more for their Shares than investors who purchase Shares in a private placement. The value of the Shares may not reflect the value of the Trust's BAT, less the Trust's expenses and other liabilities, for a variety of reasons, including the holding period under Rule 144 for Shares purchased in a private placement, the lack of an ongoing redemption program, any halting of creations by the Trust, BAT price volatility, trading volumes on, or closures of, trading platforms where digital assets trade due to fraud, failure, security breaches or otherwise, and the non-current trading hours between OTCQX and the global trading platform market for trading BAT. As a result, the Shares may continue to trade at a substantial premium over, or a substantial discount to, the value of the Trust's BAT, less the Trust's expenses and other liabilities, and the Trust may be unable to meet its investment objective from time to time.

***At this time, the Trust is not operating a redemption program for Shares and therefore Shares are not redeemable by the Trust. In addition, the Trust may halt creations for extended periods of time for a variety of reasons, including in connection with forks, airdrops and other similar occurrences.*** As a result, Authorized Participants are not able to take advantage of arbitrage opportunities created when the market value of the Shares deviates from the value of the Trust's NAV per Share, which may cause the Shares to trade at a substantial premium over, or a substantial discount to, the value of the Trust's NAV per Share.

Subject to receipt of regulatory approval from the SEC and approval by the Sponsor in its sole discretion, the Trust may in the future operate a redemption program. However, because the Sponsor does not believe that the SEC would, at this time, entertain an application for the waiver of rules needed in order to operate an ongoing redemption program, the Sponsor currently has no intention of seeking regulatory approval from the SEC for the Trust to operate an ongoing redemption program. Even if such relief is sought in the future, no assurance can be given as to the timing of such relief or that such relief will be granted. If such relief is granted and the Sponsor approves a redemption program, the Shares will be redeemable in accordance with the provisions of the Trust Agreement and the relevant Participant Agreement. Although the Sponsor cannot predict with certainty what effect, if any, the operation of a redemption program would have on the trading price of the Shares, a redemption program would allow Authorized Participants to take advantage of arbitrage opportunities created when the market value of the Shares deviates from the value of the Trust's BAT, less the Trust's expenses and other liabilities, which may have the effect of reducing any premium or discount at which the Shares trade on OTCQX over or below such value, respectively, which at times has been substantial.

For a discussion of risks relating to the deviation in the trading price of the Shares from the NAV per Share, see "Risk Factors—Risk Factors Related to the Trust and the Shares—Because of the holding period under Rule 144, the lack of an ongoing redemption program and the Trust's ability to halt creations from time to time, there is no arbitrage mechanism to keep the value of the Shares closely linked to the Index Price and the Shares have historically traded at a substantial premium over, or substantial discount to, the NAV per Share," "Risk Factors—Risk Factors Related to the Trust and the Shares—The Shares may trade at a price that is at, above or below the Trust's NAV per Share as a result of the non-current trading hours between OTCQX and the Digital Asset Trading Platform Market," "Risk Factors—Risk Factors Related to the Trust and the Shares—Shareholders may suffer a loss on their investment if the Shares trade above or below the Trust's NAV per Share" and "Risk Factors—Risk Factors Related to the Trust and the Shares—The restrictions on transfer and redemption may result in losses on the value of the Shares."

## Characteristics of the Shares

The Shares are intended to offer investors an opportunity to gain exposure to digital assets through an investment in securities. As of December 31, 2024, each Share represented approximately 9.0837 BAT. The logistics of accepting, transferring and safekeeping of BAT are dealt with by the Sponsor and Custodian, and the related expenses are built into the value of the Shares. Therefore, shareholders do not have additional tasks or costs over and above those generally associated with investing in any other privately placed security.

The Shares have certain other key characteristics, including the following:

- *Easily Accessible and Relatively Cost Efficient.* Investors in the Shares can also directly access the Digital Asset Markets. The Sponsor believes that investors will be able to more effectively implement strategic and tactical asset allocation strategies that use BAT by using the Shares instead of directly purchasing and holding BAT, and for many investors, transaction costs related to the Shares will be lower than those associated with the direct purchase, storage and safekeeping of BAT.
- *Market Traded and Transparent.* The Shares are quoted on OTCQX. Shareholders that purchased Shares directly from the Trust and have held them for the requisite holding period under Rule 144 may sell their Shares on OTCQX upon receiving approval from the Sponsor. Investors may also choose to purchase Shares on OTCQX. Shares purchased on OTCQX are not restricted. The Sponsor believes the quotation of the Shares on OTCQX provides investors with an efficient means to implement various investment strategies. The Trust will not hold or employ any derivative securities. Furthermore, the value of the Trust's assets will be reported each day on [www.grayscale.com/crypto-products/grayscale-basic-attention-token-trust/](http://www.grayscale.com/crypto-products/grayscale-basic-attention-token-trust/).
- *Minimal Credit Risk.* The Shares represent an interest in actual BAT owned by the Trust. The Trust's BAT are not subject to borrowing arrangements with third parties and are subject to counterparty and minimal credit risk with respect to the Custodian. This contrasts with the other financial products such as CoinShares exchange-traded notes, TeraExchange swaps and futures traded on the Chicago Mercantile Exchange ("CME") and the Intercontinental Exchange ("ICE") through which investors gain exposure to digital assets through the use of derivatives that are subject to counterparty and credit risks.
- *Safekeeping System.* The Custodian has been appointed to control and secure the BAT for the Trust using offline storage, or "cold storage", mechanisms to secure the Trust's private key "shards". The hardware, software, administration and continued technological development that are used by the Custodian may not be available or cost-effective for many investors.

The Trust differentiates itself from many competing digital asset financial vehicles, in the following ways:

- *Custodian.* The Custodian that holds the private key shards associated with the Trust's BAT is Coinbase Custody Trust Company, LLC. Other digital asset financial vehicles that use cold storage may not use a custodian to hold their private keys.
- *Cold Storage of Private Keys.* The private key shards associated with the Trust's BAT are kept in cold storage, which means that the Trust's BAT are disconnected and/or deleted entirely from the internet. See "—Custody of the Trust's BAT" for more information relating to the storage and retrieval of the Trust's private keys to and from cold storage. Other digital asset financial vehicles may not utilize cold storage or may utilize less effective cold storage-related hardware and security protocols.
- *Location of Private Vaults.* Private key shards associated with the Trust's BAT are distributed geographically by the Custodian in secure vaults around the world, including in the United States. The locations of the secure vaults may change regularly and are kept confidential by the Custodian for security purposes.
- *Enhanced Security.* Transfers from the Trust's Digital Asset Account require certain security procedures, including but not limited to, multiple encrypted private key shards, usernames, passwords and 2-step verification. Multiple private key shards held by the Custodian must be combined to reconstitute the private key to sign any transaction in order to transfer the Trust's BAT. Private key shards are distributed geographically in secure vaults around the world, including in the United States. As a result, if any one

secure vault is ever compromised, this event will have no impact on the ability of the Trust to access its assets, other than a possible delay in operations, while one or more of the other secure vaults is used instead. These security procedures are intended to remove single points of failure in the protection of the Trust's BAT.

- *Custodian Inspections.* The Custodian has agreed to allow the Trust and the Sponsor to take such steps as necessary to verify that satisfactory internal control systems and procedures are in place.
- *Directly Held BAT.* The Trust directly owns actual BAT held through the Custodian. This may differ from other digital asset financial vehicles that provide BAT exposure through other means, such as the use of financial or derivative instruments.
- *Sponsor's Fee.* The Sponsor's Fee is a competitive factor that may influence the value of the Shares.

## **Secondary Market Trading**

While the Trust's investment objective is for the value of the Shares (based on BAT per Share) to reflect the value of the BAT held by the Trust, determined by reference to the Index Price, less the Trust's expenses and other liabilities, the Shares may trade in the Secondary Market on OTCQX (or on another Secondary Market in the future) at prices that are lower or higher than the NAV per Share. The amount of the discount or premium in the trading price relative to the NAV per Share may be influenced by non-concurrent trading hours and liquidity between OTCQX and larger Digital Asset Trading Platforms. While the Shares trade on OTCQX from 6:00 a.m. until 5:00 p.m., New York time, liquidity in the Digital Asset Markets may fluctuate depending upon the volume and availability of larger Digital Asset Trading Platforms. As a result, during periods in which Digital Asset Market liquidity is limited or a major Digital Asset Trading Platform is off-line, trading spreads, and the resulting premium or discount, on the Shares may widen.

### **1. The form of organization of the issuer.**

The Trust is a Delaware statutory trust.

### **2. The year that the issuer (or any predecessor) was organized.**

The Trust was formed on December 18, 2020.

### **3. The issuer's fiscal year end date.**

The Trust's fiscal year end date is December 31.

### **4. Whether the issuer (or any predecessor) has been in bankruptcy, receivership or any similar proceeding.**

The Trust has not been in, and is not in the process of, any bankruptcy, receivership or any similar proceeding since its inception.

### **5. Any material reclassification, merger, consolidation, or purchase or sale of a significant amount of assets.**

The Trust has not undergone any material reclassification, merger, consolidation, or purchase or sale of a significant amount of assets since its inception.

### **6. Any default of the terms of any note, loan, lease, or other indebtedness or financing arrangement requiring the issuer to make payments.**

The Trust has not experienced any default of the terms of any note, loan, lease, or other indebtedness or financing arrangement requiring the Trust to make payments since its inception.

### **7. Any change of control.**

The Trust has not experienced any change of control since its inception.

**8. Any increase of 10% or more of the same class of outstanding equity securities.**

The Trust has only one class of outstanding equity securities. The Trust has experienced increases of more than 10% of the Shares since inception of the Trust (December 18, 2020). The Trust is an investment trust that has no limit on the number of Shares that can be issued. The Trust publishes the total number of Shares outstanding as of the end of each month on the Sponsor's website at [www.grayscale.com](http://www.grayscale.com).

**9. Any past, pending or anticipated stock split, stock dividend, recapitalization, merger, acquisition, spin-off, or reorganization.**

There are no past or pending share splits, dividends, recapitalizations, mergers, acquisitions, spin-offs, or reorganizations since the Trust's inception.

**10. Any delisting of the issuer's securities by any securities exchange or deletion from the OTC Bulletin Board.**

There has not been any delisting of the Shares by any securities exchange or deletion from the OTC Bulletin Board.

**11. Any current, past, pending or threatened legal proceedings or administrative actions either by or against the issuer that could have a material effect on the issuer's business, financial condition, or operations and any current, past or pending trading suspensions by a securities regulator. State the names of the principal parties, the nature and current status of the matters, and the amounts involved.**

The Sponsor and an affiliate of the Trust, Grayscale Bitcoin Trust ETF ("Grayscale Bitcoin Trust"), are currently parties to certain legal proceedings. Although the Trust is not a party to these proceedings, the Trust may in the future be subject to legal proceedings or disputes.

On January 30, 2023, Osprey Funds, LLC ("Osprey") filed a suit in Connecticut Superior Court against the Sponsor alleging that statements the Sponsor made in its advertising and promotion of Grayscale Bitcoin Trust violated the Connecticut Unfair Trade Practices Act ("CUTPA"), and seeking statutory damages and injunctive relief. On April 17, 2023, the Sponsor filed a motion to dismiss the complaint and, following briefing, a hearing on the motion to dismiss was held on June 26, 2023. On October 23, 2023, the Court denied the Sponsor's motion to dismiss. On November 6, 2023, the Sponsor filed a motion for reargument of the Court's order denying the Sponsor's motion to dismiss. On November 16, 2023, Osprey filed an opposition to the Sponsor's motion for reargument, and on November 30, 2023, the Sponsor filed a reply in further support of its motion for reargument. On March 11, 2024, the Court denied the Sponsor's motion for reargument. On March 25, 2024, the Sponsor filed an application for interlocutory appeal. On March 28, 2024, Osprey filed an opposition to the Sponsor's application for interlocutory appeal. On April 1, 2024, the Court denied the Sponsor's application for interlocutory appeal. On April 10, 2024, Osprey filed a motion to amend the complaint. The amended complaint went into effect on April 25, 2024. A scheduling order was entered by the Court with trial scheduled to begin on July 15, 2025. On July 31, 2024, the Sponsor filed a motion to strike the amended complaint. On August 30, 2024, Osprey filed an opposition to the Sponsor's motion to strike the amended complaint. On October 11, 2024, the Court denied the Sponsor's motion to strike. On November 22, 2024, the Sponsor filed a motion for summary judgment on the grounds that CUTPA does not apply to practices undertaken in connection with the purchase and sale of securities, and the Court granted the Sponsor's motion for summary judgment on February 7, 2025. On February 10, 2025, Osprey filed a motion for reargument. The Sponsor and Grayscale Bitcoin Trust believe that judgment was properly granted in their favor and intend to vigorously defend against any attempts to overturn the judgment.

As of the date of this Annual Report, the Sponsor does not expect the foregoing proceedings to have a material adverse effect on the Trust's business, financial condition or results of operations.

The Sponsor and/or the Trust may be subject to additional legal proceedings and disputes in the future.

## **B. Business of Issuer.**

### **OVERVIEW OF THE BAT INDUSTRY AND MARKET**

#### **Introduction to Ether and the Ethereum Network**

BAT was created using ERC-20 and relies on the Ethereum Network for key functionality such as storage, transfer and usage. As a result, it is important to understand the characteristics of the Ethereum Network in order to understand how BAT and the Basic Attention Token Network operate.

Ether is a digital asset that is created and transmitted through the operations of the peer-to-peer Ethereum Network, a decentralized network of computers that operates on cryptographic protocols. No single entity owns or operates the Ethereum Network, the infrastructure of which is collectively maintained by a decentralized user base. The Ethereum Network allows people to exchange tokens of value, called Ether, which are recorded on a public transaction ledger known as a blockchain. Ether can be used to pay for goods and services, including computational power on the Ethereum Network, or it can be converted to fiat currencies, such as the U.S. dollar, at rates determined on Digital Asset Trading Platforms or in individual end-user-to-end-user transactions under a barter system. Furthermore, the Ethereum Network also allows users to write and implement smart contracts—that is, general-purpose code that executes on every computer in the network and can instruct the transmission of information and value based on a sophisticated set of logical conditions. Using smart contracts, users can create markets, store registries of debts or promises, represent the ownership of property, move funds in accordance with conditional instructions and create digital assets other than Ether on the Ethereum Network. Smart contract operations are executed on the Ethereum Blockchain in exchange for payment of Ether.

#### *Smart Contracts and Development on the Ethereum Network*

Smart contracts are programs that run on a blockchain that can execute automatically when certain conditions are met. Smart contracts facilitate the exchange of anything representative of value, such as money, information, property, or voting rights. Using smart contracts, users can send or receive digital assets, create markets, store registries of debts or promises, represent ownership of property or a company, move funds in accordance with conditional instructions and create new digital assets.

Development on the Ethereum Network involves building more complex tools on top of smart contracts, such as decentralized apps (“DApps”) and organizations that are autonomous, known as decentralized autonomous organizations (“DAOs”). For example, a company that distributes charitable donations on behalf of users could hold donated funds in smart contracts that are paid to charities only if the charity satisfies certain pre-defined conditions.

Moreover, the Ethereum Network has also been used as a platform for creating new digital assets and conducting their associated initial coin offerings (“ICOs”), including BAT. Digital assets built on the Ethereum Network represent a significant amount of the total market value of all digital assets.

More recently, the Ethereum Network has been used for decentralized finance (“DeFi”) or open finance platforms, which seek to democratize access to financial services, such as borrowing, lending, custody, trading, derivatives and insurance, by removing third-party intermediaries. DeFi can allow users to lend and earn interest on their digital assets, exchange one digital asset for another and create derivative digital assets such as stablecoins, which are digital assets pegged to a reserve asset such as fiat currency. During the twelve months ended December 31, 2024, between approximately \$29 billion and \$79 billion worth of digital assets were locked up as collateral on DeFi platforms on the Ethereum Network.

#### **ERC-20 and ERC-20 Tokens**

The Ethereum Network is one of a number of projects intended to expand blockchain use beyond just a peer-to-peer money system. For example, using smart contracts, users can create digital assets other than Ether on the Ethereum Network using a technical standard known as ERC-20. ERC-20 defines a common list of rules for digital assets created on the Ethereum Network to follow, such as the total supply and functionality. The unique combinations of different rules allow developers to create new digital assets and thus new applications on the Ethereum Network. Digital assets created from the ERC-20 standard are known as “ERC-20 tokens.”

#### **Introduction to BAT and the Basic Attention Token Network**

Basic Attention Token, or BAT, is an ERC-20 token that serves as the native digital currency for the Basic Attention Token Network, a digital advertising and services platform. BAT and the Basic Attention Token Network were launched by the

team behind the “Brave” browser, which was founded in 2015 by Brendan Eich, the creator of the JavaScript programming language and Mozilla Firefox. The formal development of Brave began through a company Eich established called Brave Software Inc. (the “Company”), which also raised money to oversee the browser’s development. The purpose of Brave is to address user privacy, fraud and opaqueness in web browsing and digital advertising, including cross-party data sharing and lost revenue to middlemen. The Company aims to solve these issues by offering Brave, which is designed to enhance user privacy, disintermediate middlemen, and distribute revenue more equitably across the digital advertising ecosystem. BAT was developed to serve as a disintermediated method to transfer value between Brave users and online services who incorporated Brave’s features.

The Basic Attention Token Network consists of the following features:

*Brave Browser:* An open-source, privacy-focused and secure web browser that is designed to block trackers and malware often associated with digital advertisements.

*Brave Ledger System:* The Basic Attention Token Network leverages blockchain technology that allows users to reward publishers for their content and advertisers to reward users for their attention in a safe and secure manner using BAT.

*BAT:* the token for the Basic Attention Token Network that connects advertisers, publishers, and users to create a more efficient marketplace. While Brave was initially powered by Bitcoin, the browser pivoted to using its own digital currency, BAT, due to scalability concerns with Bitcoin. Within Brave, BAT serves as the unit of account between advertisers, publishers, and users.

*Brave Rewards:* a feature within Brave that allows users to contribute BAT to sites they visit. When a user turns on Brave Rewards, their browser measures the time and attention they spend on each site and divides that user’s monthly BAT contribution among the sites they visit.

*Brave Ads:* a feature within Brave that allows users to opt in to earn BAT based on their attention. When a user turns Brave Ads on, their browser will begin learning their preferences in order to show relevant ads. However, neither feature ever reveals a user’s browsing history, preferences or BAT rewards.

The initial funding for Brave occurred in August 2016 when the Company raised \$7 million from prominent venture firms, including Founders Fund, Pantera Capital, and Digital Currency Group, Inc., the indirect parent company of the Sponsor.

Although the Company continues to exert significant influence over the direction of the development of Brave, the Basic Attention Token Network, like the Ethereum Network, is believed to be decentralized in that it does not require governmental authorities or financial institution intermediaries to create, transmit or determine the value of BAT.

#### *Overview of the Basic Attention Token Network’s Operations*

As an ERC-20 token on the Ethereum Network, the transfer of BAT occurs on the Ethereum Network.

In order to own, transfer or use BAT directly on the Ethereum Network (as opposed to through an intermediary, such as a custodian), a person generally must have internet access to connect to the Ethereum Network, and thus the BAT on the network. BAT transactions may be made directly between end-users without the need for a third-party intermediary. To prevent the possibility of double-spending BAT, a user must notify the Ethereum Network of the transaction by broadcasting the transaction data to its network peers. The Ethereum Network provides confirmation against double-spending by memorializing every transaction in the Ethereum Blockchain, which is publicly accessible and transparent. This memorialization and verification against double-spending is accomplished through the Ethereum Network validation process, which adds “blocks” of data, including recent transaction information, to the Ethereum Blockchain.

#### *Summary of a BAT Transaction*

Prior to engaging in BAT transactions directly on the Ethereum Network, since the Basic Attention Token Network operates on the Ethereum Network, a user generally must first install on its computer or mobile device an Ethereum Network software program that will allow the user to generate a private and public key pair associated with an Ethereum Network wallet address. Ethereum wallet addresses are capable of holding Ether, as well as BAT. The Ethereum Network software program and address also enable the user to connect to the Ethereum Network and transfer BAT to, and receive BAT from, other users.

Each Ethereum Network address, or wallet, is associated with a unique “public key” and “private key” pair. To receive BAT, the BAT recipient must provide its public key to the party initiating the transfer. This activity is analogous to a recipient for a transaction in U.S. dollars providing a routing address in wire instructions to the payor so that cash may be wired to the recipient’s account. The payor approves the transfer to the address provided by the recipient by “signing” a transaction that consists of the recipient’s public key with the private key of the address from where the payor is transferring the BAT. The recipient, however, does not make public or provide to the sender its related private key.

Neither the recipient nor the sender reveal their private keys in a transaction, because the private key authorizes transfer of the funds in that address to other users. Therefore, if a user loses his or her private key, the user may permanently lose access to the BAT contained in the associated address. Likewise, BAT is irretrievably lost if the private key associated with them is deleted and no backup has been made. When sending BAT, a user’s Ethereum Network software program must validate the transaction with the associated private key. In addition, since every computation on the Ethereum Network requires validation power, there is a transaction fee involved with the transfer that is paid by the payor. The resulting digitally validated transaction is sent by the user’s Ethereum Network software program to the Ethereum Network validators to allow transaction confirmation.

Ethereum Network validators record and confirm transactions of BAT when they add and validate blocks of information to the Ethereum Blockchain. When a validator is selected to validate a block, it creates that block, which includes data relating to (i) the verification of newly submitted and accepted transactions and (ii) a reference to the prior block in the Ethereum Blockchain to which the new block is being added. The validator becomes aware of outstanding, unrecorded transactions through the data packet transmission and distribution discussed above.

Upon the addition of a block of transactions, including BAT transactions, the Ethereum Network software program of both the spending party and the receiving party will show confirmation of the transaction on the Ethereum Blockchain and reflect an adjustment to the BAT balance in each party’s Ethereum Network public key, completing the BAT transaction. Once a transaction is confirmed on the Ethereum Blockchain, it is irreversible.

Some BAT transactions are conducted “off-blockchain” and are therefore not recorded in the Ethereum Blockchain. These “off-blockchain transactions” involve the transfer of control over, or ownership of, a specific digital wallet holding BAT or the reallocation of ownership of certain BAT in a pooled-ownership digital wallet, such as a digital wallet owned by a Digital Asset Trading Platform. In contrast to on-blockchain transactions, which are publicly recorded on the Ethereum Blockchain, information and data regarding off-blockchain transactions are generally not publicly available. Therefore, off-blockchain transactions are not truly BAT transactions in that they do not involve the transfer of transaction data on the Ethereum Network and do not reflect a movement of BAT between addresses recorded in the Blockchain. For these reasons, off-blockchain transactions are subject to risks as any such transfer of BAT ownership is not protected by the protocol behind the Ethereum Network or recorded in, and validated through, the blockchain mechanism.

## **Creation of BAT**

Unlike other digital assets such as Bitcoin, which are solely created through a progressive mining process, 1.5 billion BAT were created in connection with the launch of the Basic Attention Token Network. No further BAT can be created. BAT were distributed as follows in connection with the launch of the Basic Attention Token Network:

- (i) Initial Distribution: 1.0 billion BAT, or 66.66% of the supply, was sold in a public token sale in 2017 that raised approximately \$36 million.
- (ii) User Growth Pool: 300 million BAT, or 20% of the supply, was reserved by the Company to incentivize users to participate in the ecosystem.
- (iii) Development Team Pool: 200 million BAT, or 13.33% of the supply, was allocated to a development team pool to incentivize developers to develop the ecosystem.

## **Modifications to the Basic Attention Token Network**

While Brave is a centralized web browser, the Basic Attention Token Network is an open-source project with no official developer or group of developers that controls it. However, the Basic Attention Token Network’s development has historically been overseen by the Company and other core developers. The Company and core developers for the project periodically release updates for the Brave roadmap which may impact the use of the Brave Browser and subsequently, the

use of the BAT token. The Company and core developers are able to access and alter the Basic Attention Token Network source code and, as a result, they are responsible for quasi-official releases of updates and other changes to Basic Attention Token Network's source code.

Because the smart contract underlying the BAT token is immutable, it would be difficult to make any modifications to the BAT protocol. However, changes to the wider Basic Attention Token Network and related ecosystem may be introduced through changes to the Brave Browser or through new smart contract capabilities that utilize the token. For example, the company published "BAT Roadmap 3.0," which articulated a focus for "on-chain growth. BAT Roadmap 3.0 includes an updated Brave Rewards experience as well as expanded opportunities to use BAT.

The development of BAT is also impacted by the development of the Ethereum Network. Core development of the Ethereum source code has increasingly focused on modifications of the Ethereum protocol to increase speed and scalability and also allow for financial and non-financial, next generation uses. The Trust's activities will not directly relate to such projects. Such projects that operate and are built within the Ethereum Blockchain may increase the data flow on the Ethereum Network and could either "bloat" the size of the Ethereum Blockchain, increase the cost of transacting on the Ethereum Blockchain, or slow confirmation times, thus impacting BAT. If a modification to the Ethereum Network is accepted by only a percentage of validators, a division in the Ethereum ecosystem may occur such that one network will run the pre-modification source code and the other network will run the modified source code. Such a division is known as a "fork" that might affect the Basic Attention Token Network. See "Risk Factors—Risk Factors Related to Digital Assets—A temporary or permanent "fork" or a "clone" could adversely affect the value of the Shares".

### **Forms of Attack Against the Ethereum Network**

As an ERC-20 token on the Ethereum Blockchain, BAT is vulnerable to attacks on the Ethereum Network. All networked systems are vulnerable to various kinds of attacks. As with any computer network, the Ethereum Network contains certain flaws. For example, the Ethereum Network is currently vulnerable to attacks where, if a validator or group of validators acting in concert were to gain control of more than certain thresholds of staked Ether, a malicious actor would be able to gain full control of the network and the ability to manipulate the Blockchain. As of the date of this Annual Report, the top three largest staking pools controlled approximately 42% of the Ether staked on the Ethereum Network.

In addition, many digital asset networks have been subjected to a number of denial of service attacks, which has led to temporary delays in block creation and the transfer of digital assets. Any similar attacks on the Ethereum Network that impact the ability to transfer BAT could have a material adverse effect on the price of BAT and the value of the Shares.

### **Market Participants**

#### *Users, Publishers and Advertisers*

Within Brave, BAT serves as the unit of account between advertisers, publishers, and users. Using Brave Rewards, Brave users are able to reward publishers for their content. Advertisers pay publishers for each user's attention they attract. Through Brave Ads, advertisers reward users for their attention in a safe and secure manner.

#### *Validators*

Validators range from Ethereum enthusiasts to professional operations that design and build dedicated machines and data centers. When a validator solves a new block, the validator operator receives Ether. See "—Brief Description of BAT Transfers" above.

#### *Investment and Speculative Sector*

This sector includes the investment and trading activities of both private and professional investors and speculators. Historically, larger financial services institutions are publicly reported to have limited involvement in investment and trading in digital assets, although the participation landscape is beginning to change. Currently, there is relatively limited use of digital assets in the retail and commercial marketplace in comparison to relatively extensive use by speculators, and a significant portion of demand for digital assets is generated by speculators and investors seeking to profit from the short- or long-term holding of digital assets.

#### *Retail Sector*

The retail sector includes users transacting in direct peer-to-peer BAT transactions through the direct sending of BAT over the Ethereum Network. The retail sector also includes transactions in which consumers pay for goods or services with BAT from commercial or service businesses through direct transactions or third-party service providers, although the use of BAT as a means of payment is still developing and has not been accepted in the same manner as Bitcoin or Ether due to its infancy and because BAT has a different purpose than Bitcoin and Ether.

### *Service Sector*

This sector includes companies that provide a variety of services including the buying, selling, payment processing and storing of BAT. For buying and selling BAT, Coinbase, Gemini, and Kraken are some of the largest Digital Asset Trading Platforms by volume traded. For storing BAT, Coinbase Custody Trust Company, LLC, the Custodian for the Trust, is a digital asset custodian that provides custodial accounts that store BAT for users. As BAT continues to grow in acceptance, it is anticipated that service providers will expand the currently available range of services and that additional parties will enter the service sector for BAT.

## **Competition**

Thousands of digital assets have been developed since the inception of Bitcoin, which is currently the most developed digital asset because of the length of time it has been in existence, the investment in the infrastructure that supports it, and the network of individuals and entities that are using Bitcoin in transactions. While BAT has enjoyed some success in its limited history, the aggregate value of outstanding BAT is much smaller than that of Bitcoin and Ether and may be further eclipsed by the more rapid development of other digital assets. Brave faces competition from other web browsers and BAT faces competition from the growing array of digital payment tokens.

## **BAT Value**

### *Digital Asset Trading Platform Valuation*

The value of BAT is determined by the value that various market participants place on BAT through their transactions. The most common means of determining the value of a BAT is by surveying one or more Digital Asset Trading Platforms where BAT is traded publicly and transparently. Additionally, there are over-the-counter dealers or market makers that transact in BAT.

### *Digital Asset Trading Platform Public Market Data*

On each online Digital Asset Trading Platform, BAT is traded with publicly disclosed valuations for each executed trade, measured by one or more fiat currencies such as the U.S. dollar or euro, or stablecoins such as U.S. Dollar Coin (“USDC”). Over-the-counter dealers or market makers do not typically disclose their trade data.

As of December 31, 2024, the Digital Asset Trading Platforms included in the Index were Coinbase, Gemini and Kraken. As further described below, the Sponsor and the Trust reasonably believe each of these Digital Asset Trading Platforms are in material compliance with applicable licensing requirements based on the Trading Platform Category and Jurisdiction, as detailed below, and maintain practices and policies designed to comply with anti-money laundering (“AML”) and know-your-customer (“KYC”) regulations.

*Coinbase:* A U.S.-based trading platform registered as a money services business (“MSB”) with the Financial Crimes Enforcement Network (“FinCEN”) and licensed as a virtual currency business under the New York State Department of Financial Services (“NYDFS”) BitLicense as well as a money transmitter in various U.S. states.

*Gemini:* A U.S.-based trading platform registered as an MSB with FinCEN and licensed as a money transmitter in various U.S. states. Gemini is exempt from applying for a BitLicense under the framework established by NYDFS because of their trust charter under NY Banking Law.

*Kraken:* A U.S.-based trading platform registered as an MSB with FinCEN and licensed as a money transmitter in various U.S. states. Kraken does not hold a BitLicense.

Currently, there are several Digital Asset Trading Platforms operating worldwide and online Digital Asset Trading Platforms represent a substantial percentage of BAT buying and selling activity and provide the most data with respect to prevailing valuations of BAT. These trading platforms include established trading platforms such as trading platforms included in the

Index which provide a number of options for buying and selling BAT. The below table reflects the trading volume in BAT and market share of the BAT-U.S. dollar trading pairs of each of the Digital Asset Trading Platforms included in the Index as of December 31, 2024 (collectively, “Constituent Trading Platforms”), using data since the inception of the Trust’s operations:

**Digital Asset Trading Platforms included in the Index as of December 31, 2024**

	<b>Volume (BAT)</b>	<b>Market Share<sup>(1)</sup></b>
Coinbase	4,002,405,282	63.08%
Kraken	836,061,726	13.18%
Gemini	223,756,518	3.53%
<b>Total BAT-U.S. dollar trading pair</b>	<b>5,062,223,526</b>	<b>79.79%</b>

(1) Market share is calculated using trading volume (in BAT) for certain Digital Asset Trading Platforms including, Coinbase, Gemini and Kraken, as well as certain other large U.S.-dollar denominated Digital Asset Trading Platforms that were not included in the Index as of December 31, 2024, including Binance.US, Bitfinex, Bitstamp, Bittrex, CEX.IO, Crypto.com and FTX.US.

## Government Oversight

As digital assets have grown in both popularity and market size, the U.S. Congress and a number of U.S. federal and state agencies (including FinCEN, the Treasury Department Office of Foreign Assets Control (“OFAC”), SEC, the U.S. Commodity Futures Trading Commission (“CFTC”), the Financial Industry Regulatory Authority (“FINRA”), the Consumer Financial Protection Bureau (“CFPB”), the Department of Justice, the Department of Homeland Security, the Federal Bureau of Investigation, the U.S. Internal Revenue Service, a bureau of the U.S. Department of the Treasury (the “IRS”), the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, the Federal Reserve and state financial institution and securities regulators) have been examining the operations of digital asset networks, digital asset users and the Digital Asset Markets, with particular focus on the extent to which digital assets can be used to launder the proceeds of illegal activities, evade sanctions or fund criminal or terrorist enterprises and the safety and soundness of trading platforms and other service providers that hold or custody digital assets for users. Many of these state and federal agencies have issued consumer advisories regarding the risks posed by digital assets to investors. In addition, federal and state agencies, and other countries and international bodies have issued rules or guidance about the treatment of digital asset transactions or requirements for businesses engaged in digital asset activity. Moreover, the failure of FTX Trading Ltd. (“FTX”) in November 2022 and the resulting market turmoil substantially increased regulatory scrutiny in the United States and globally and led to SEC and criminal investigations, enforcement actions and other regulatory activity across the digital asset ecosystem. On January 23, 2025, President Trump issued an executive order titled “Strengthening American Leadership in Digital Financial Technology” aimed at supporting “the responsible growth and use of digital assets, blockchain technology, and related technologies across all sectors of the economy.”

In addition, the SEC, U.S. state securities regulators and several foreign governments have issued warnings and instituted legal proceedings in which they argue that certain digital assets may be classified as securities and that both those digital assets and any related initial coin offerings or other primary and secondary market transactions are subject to securities regulations. For example, in June 2023, the SEC brought charges against Binance Holdings Ltd. (“Binance”) and Coinbase, Inc. (“Coinbase”), and in November 2023, the SEC brought charges against Kraken, alleging that they operated unregistered securities exchanges, brokerages and clearing agencies. In its complaints, the SEC asserted that several digital assets are securities under the federal securities laws. The outcomes of these proceedings, as well as ongoing and future regulatory actions, have had a material adverse effect on the digital asset industry as a whole and on the price of BAT, and may alter, perhaps to a materially adverse extent, the nature of an investment in the Shares and/or the ability of the Trust to continue to operate. Additionally, U.S. state and federal, and foreign regulators and legislatures have taken action against virtual currency businesses or enacted restrictive regimes in response to adverse publicity arising from hacks, consumer harm, or criminal activity stemming from virtual currency activity.

In August 2021, the former chair of the SEC stated that he believed investors using Digital Asset Trading Platforms are not adequately protected, and that activities on the platforms can implicate the securities laws, commodities laws and banking laws, raising a number of issues related to protecting investors and consumers, guarding against illicit activity, and ensuring financial stability. The former chair expressed a need for the SEC to have additional authorities to prevent transactions, products, and platforms from “falling between regulatory cracks,” as well as for more resources to protect investors in “this growing and volatile sector.” The former chair called for federal legislation centering on digital asset trading, lending, and decentralized finance platforms, seeking “additional plenary authority” to write rules for digital asset trading and lending. However, the former chair has subsequently stated that the SEC already has explicit authority under existing laws to regulate

the digital asset sector and several enforcement actions were filed against Digital Asset Trading Platforms during the first half of 2023. In particular, in June 2023, the SEC brought enforcement actions against Binance and Coinbase, two of the largest Digital Asset Trading Platforms, alleging that they operated unregistered securities exchanges, brokerages, and clearing agencies.

The SEC has taken steps to interpret its existing authorities as covering various digital asset activities. For example, the SEC has previously proposed amendments to the custody rules under Rule 206(4)-2 of the Investment Advisers Act. The proposed rule changes would amend the definition of a “qualified custodian” under Rule 206(4)-2(d)(6) and expand the current custody rule under Rule 206(4)-2 to cover digital assets and related advisory activities. If enacted as proposed, these rules would likely impose additional regulatory requirements with respect to the custody and storage of digital assets and could lead to additional regulatory oversight of the digital asset ecosystem more broadly. It is also possible that a new Administration and a new Congress in the United States propose new laws and regulations related to digital assets. See “Risk Factors—Risk Factors Related to the Regulation of Digital Assets, the Trust and the Shares—Regulatory changes or actions by the U.S. Congress or any U.S. federal or state agencies may affect the value of the Shares or restrict the use of BAT, Ethereum Network validating activity or the operation of the Basic Attention Token Network or the Digital Asset Trading Platform Market in a manner that adversely affects the value of the Shares,” “Risk Factors—Risk Factors Related to the Regulation of Digital Assets, the Trust and the Shares. A determination that BAT or any other digital asset is a “security” may adversely affect the value of BAT and the value of the Shares, and result in potentially extraordinary, nonrecurring expenses to, or termination of, the Trust” and “Risk Factors—Risk Factors Related to the Regulation of Digital Assets, the Trust and the Shares—Changes in SEC policy could adversely impact the value of the Shares.”

Various foreign jurisdictions have, and may continue to, in the near future, adopt laws, regulations or directives that affect a digital asset network, the Digital Asset Markets, and their users, particularly Digital Asset Trading Platforms and service providers that fall within such jurisdictions’ regulatory scope. For example:

- China has made transacting in cryptocurrencies illegal for Chinese citizens in mainland China, and additional restrictions may follow. China has banned initial coin offerings and there have been reports that Chinese regulators have taken action to shut down a number of China-based Digital Asset Trading Platforms.
- South Korea determined to amend its Financial Information Act in March 2020 to require virtual asset service providers to register and comply with its AML and counter-terrorism funding framework. These measures also provide the government with the authority to close Digital Asset Trading Platforms that do not comply with specified processes. South Korea has also banned initial coin offerings.
- The Reserve Bank of India in April 2018 banned the entities it regulates from providing services to any individuals or business entities dealing with or settling digital assets. In March 2020, this ban was overturned in the Indian Supreme Court, although the Reserve Bank of India is currently challenging this ruling.
- The United Kingdom’s Financial Conduct Authority published final rules in October 2020 banning the sale of derivatives and exchange-traded notes that reference certain types of digital assets, contending that they are “ill-suited” to retail investors citing extreme volatility, valuation challenges and association with financial crime. A new law, the Financial Services and Markets Act 2023 (“FSMA”), received royal assent in June 2023. The FSMA brings digital asset activities within the scope of existing laws governing financial institutions, markets and assets.
- The Parliament of the European Union approved the text of the Markets in Crypto-Assets Regulation (“MiCA”) in April 2023, establishing a regulatory framework for digital asset services across the European Union. MiCA is intended to serve as a comprehensive regulation of digital asset markets and imposes various obligations on digital asset issuers and service providers. The main aims of MiCA are industry regulation, consumer protection, prevention of market abuse and upholding the integrity of digital asset markets. MiCA was formally approved by the European Union’s member states in 2023. Certain parts of MiCA became effective as of June 2024 and the remainder applied as of December 2024.

There remains significant uncertainty regarding foreign governments’ future actions with respect to the regulation of digital assets and Digital Asset Trading Platforms. Such laws, regulations or directives may conflict with those of the United States and may negatively impact the acceptance of BAT by users, merchants and service providers outside the United States and may therefore impede the growth or sustainability of the Basic Attention Token ecosystem in the United States and globally, or otherwise negatively affect the value of the BAT held by the Trust. The effect of any future regulatory change on the

Trust or the BAT held by the Trust is impossible to predict, but such change could be substantial and adverse to the Trust and the value of the Shares.

See “Risk Factors—Risk Factors Related to the Regulation of Digital Assets, the Trust and the Shares—Regulatory changes or actions by the U.S. Congress or any U.S. federal or state agencies may affect the value of the Shares or restrict the use of BAT, Ethereum Network validating activity or the operation of the Basic Attention Token Network or the Digital Asset Markets in a manner that adversely affects the value of the Shares.”

## GRAYSCALE BASIC ATTENTION TOKEN TRUST (BAT)

### Description of the Trust

The Trust is a Delaware Statutory Trust that was formed on December 18, 2020 by the filing of the Certificate of Trust with the Delaware Secretary of State in accordance with the provisions of the Delaware Statutory Trust Act (“DSTA”). The Trust operates pursuant to the Trust Agreement.

The Shares represent units of fractional undivided beneficial interest in, and ownership of, the Trust. The Trust is passive and is not managed like a corporation or an active investment vehicle. The Trust’s BAT are held by the Custodian on behalf of the Trust. The Trust’s BAT will be transferred out of the Digital Asset Account only in the following circumstances: (i) transferred to pay the Sponsor’s Fee or any Additional Trust Expenses, (ii) sold on an as-needed basis to pay Additional Trust Expenses or (iii) sold on behalf of the Trust in the event the Trust terminates and liquidates its assets or as otherwise required by law or regulation. Assuming that the Trust is treated as a grantor trust for U.S. federal income tax purposes, each delivery or sale of BAT by the Trust to pay the Sponsor’s Fee or any Additional Trust Expenses will be a taxable event for shareholders. See “Material U.S. Federal Income Tax Consequences—Tax Consequences to U.S. Holders.”

The Trust is not a registered investment company under the Investment Company Act and the Sponsor believes that the Trust is not required to register under the Investment Company Act. The Trust will not trade, buy, sell, or hold BAT derivatives, including BAT futures contracts, on any futures exchange. The Trust is authorized solely to take immediate delivery of actual BAT. The Sponsor does not believe the Trust’s activities are required to be regulated by the CFTC under the CEA as a “commodity pool” under current law, regulation and interpretation. The Trust will not be operated by a CFTC-regulated commodity pool operator because it will not trade, buy, sell or hold BAT derivatives, including BAT futures contracts, on any futures exchange. Investors in the Trust will not receive the regulatory protections afforded to investors in regulated commodity pools, nor may the COMEX division of the New York Mercantile Exchange or any futures exchange enforce its rules with respect to the Trust’s activities. In addition, investors in the Trust will not benefit from the protections afforded to investors in BAT futures contracts on regulated futures exchanges.

The Trust creates Shares from time to time but only in Baskets. A Basket equals a block of 100 Shares. The number of outstanding Shares is expected to increase from time to time as a result of the creation of Baskets. The creation of Baskets will require the delivery to the Trust of the amount of BAT represented by the Baskets being created. The creation of a Basket will be made only in exchange for the delivery to the Trust of the amount of whole and fractional BAT represented by each Basket being created, the number of which is determined by dividing (x) the amount of BAT owned by the Trust at 4:00 p.m., New York time, on the relevant trade date, after deducting the amount of BAT representing the U.S. dollar value of accrued but unpaid fees and expenses of the Trust (converted using the Index Price at such time, and carried to the eighth decimal place) by (y) the number of Shares outstanding at such time (with the quotient so obtained calculated to one one-hundred-millionth of one BAT (i.e., carried to the eighth decimal place)), and multiplying such quotient by 100.

Although the redemption of Shares is provided for in the Trust Agreement, the redemption of Shares is not currently permitted and the Trust does not currently operate a redemption program. Subject to receipt of regulatory approval from the SEC and approval by the Sponsor in its sole discretion, the Trust may in the future operate a redemption program. However, because the Sponsor does not believe that the SEC would, at this time, entertain an application for the waiver of rules needed in order to operate an ongoing redemption program, the Sponsor currently has no intention of seeking regulatory approval from the SEC for the Trust to operate an ongoing redemption program. Even if such relief is sought in the future, no assurance can be given as to the timing of such relief or that such relief will be granted. If such relief is granted and the Sponsor approves a redemption program, the Shares will be redeemable in accordance with the provisions of the Trust Agreement and the relevant Participant Agreement. Although the Sponsor cannot predict with certainty what effect, if any, the operation of a redemption program would have on the trading price of the Shares, this will allow Authorized Participants to take advantage of arbitrage opportunities created when the market value of the Shares deviates from the value of the Trust’s BAT, less the Trust’s expenses and other liabilities, which may have the effect of reducing any premium at which the Shares trade on OTCQX over such value or cause the Shares to trade at a discount to such value, which at times could be substantial.

Each Share represented approximately 9.0837 BAT as of December 31, 2024. Each Share in the initial Baskets represented approximately 10.0 BAT. The amount of BAT required to create a Basket is expected to continue to gradually decrease over time due to the transfer or sale of the Trust's BAT to pay the Sponsor's Fee and any Additional Trust Expenses. The Trust will not accept or distribute cash in exchange for Baskets other than upon its dissolution. Authorized Participants may sell to other investors the Shares they purchase from the Trust only in transactions exempt from registration under the Securities Act. For a discussion of risks relating to the unavailability of a redemption program, see "Risk Factors—Risk Factors Related to the Trust and the Shares—Because of the holding period under Rule 144, the lack of an ongoing redemption program and the Trust's ability to halt creations from time to time, there is no arbitrage mechanism to keep the value of the Shares closely linked to the Index Price and the Shares have historically traded at a substantial premium over, or a substantial discount to, the NAV per Share" and "Risk Factors—Risk Factors Related to the Trust and the Shares—The restrictions on transfer and redemption may result in losses on the value of the Shares."

The Sponsor will determine the Trust's NAV on each business day as of 4:00 p.m., New York time, or as soon thereafter as practicable. The Sponsor will also determine the NAV per Share, which equals the NAV of the Trust divided by the number of outstanding Shares. Each business day, the Sponsor will publish the Trust's NAV and NAV per Share on the Trust's website, [www.grayscale.com/crypto-products/grayscale-basic-attention-token-trust/](http://www.grayscale.com/crypto-products/grayscale-basic-attention-token-trust/), as soon as practicable after the Trust's NAV and NAV per Share have been determined by the Sponsor. See "—Valuation of BAT and Determination of NAV."

The Trust's assets consist solely of BAT, Incidental Rights, IR Virtual Currency, proceeds from the sale of BAT, Incidental Rights and IR Virtual Currency pending use of such cash for payment of Additional Trust Expenses or distribution to the shareholders and any rights of the Trust pursuant to any agreements, other than the Trust Agreement, to which the Trust is a party. Each Share represents a proportional interest, based on the total number of Shares outstanding, in each of the Trust's assets as determined in the case of BAT by reference to the Index Price, less the Trust's expenses and other liabilities (which include accrued but unpaid fees and expenses). The Sponsor expects that the market price of the Shares will fluctuate over time in response to the market prices of BAT. In addition, because the Shares reflect the estimated accrued but unpaid expenses of the Trust, the amount of BAT represented by a Share will gradually decrease over time as the Trust's BAT are used to pay the Trust's expenses. The Trust does not expect to take any Incidental Rights or IR Virtual Currency it may hold into account for purposes of determining the Trust's NAV or the NAV per Share.

BAT pricing information is available on a 24-hour basis from various financial information service providers or Basic Attention Token Network information sites, such as CoinMarketCap.com. The spot price and bid/ask spreads may also be available directly from Digital Asset Trading Platforms. As of December 31, 2024, the Constituent Trading Platforms included in the Index were Coinbase, Gemini and Kraken. The Index Provider may remove or add Digital Asset Trading Platforms to the Index in the future at its discretion. Market prices for the Shares will be available from a variety of sources, including brokerage firms, information websites and other information service providers. In addition, on each business day the Trust's website will provide pricing information for the Shares.

BAT is carried at fair value for financial reporting purposes. Unlike the procedure used for determining the Index Price and the Trust's NAV, which are calculated using a volume weighted average calculated across multiple Digital Asset Trading Platforms, the fair value of BAT and Principal Market NAV presented in the financial statements are calculated in accordance with U.S. GAAP based on the price provided by the Digital Asset Trading Platform that the Trust considers its principal market as of 4:00 p.m., New York time, on the valuation date. Prior to March 8, 2024, Principal Market NAV was referred to as NAV and Principal Market NAV per Share was referred to as NAV per Share. The Trust determines its principal market (or in the absence of a principal market the most advantageous market) annually and conducts a quarterly analysis to determine (i) if there have been recent changes to each Digital Asset Market's trading volume and level of activity in the trailing twelve months, (ii) if any Digital Asset Markets have developed that the Trust has access to, or (iii) if recent changes to each Digital Asset Market's price stability have occurred that would materially impact the selection of the principal market and necessitate a change in the Trust's determination of its principal market. The Trust determined that as of December 31, 2024, the principal market for purposes of determining the value of the BAT held by the Trust was Coinbase.

The Trust has no fixed termination date.

### *Valuation of BAT and Determination of NAV*

The Sponsor will evaluate the BAT held by the Trust and determine the NAV of the Trust in accordance with the relevant provisions of the Trust Agreement. The following is a description of the material terms of the Trust Agreement as they relate to valuation of the Trust's BAT and the NAV calculations, which is calculated using non-GAAP methodology and is not used in the Trust's financial statements.

On each business day at 4:00 p.m., New York time, or as soon thereafter as practicable (the "Evaluation Time"), the Sponsor will evaluate the BAT held by the Trust and calculate and publish the NAV of the Trust. To calculate the NAV, the Sponsor will:

1. Determine the Index Price as of such business day;
2. Multiply the Index Price by the Trust's aggregate amount of BAT owned by the Trust as of 4:00 p.m., New York time, on the immediately preceding day, less the aggregate amount of BAT payable as the accrued and unpaid Sponsor's Fee as of 4:00 p.m., New York time, on the immediately preceding day;
3. Add the U.S. dollar value of BAT, calculated using the Index Price, receivable under pending creation orders, if any, determined by multiplying the number of the Creation Baskets represented by such creation orders by the Basket Amount and then multiplying such product by the Index Price;
4. Subtract the U.S. dollar amount of accrued and unpaid Additional Trust Expenses, if any;
5. Subtract the U.S. dollar value of the BAT, calculated using the Index Price, to be distributed under pending redemption orders, if any, determined by multiplying the number of Baskets to be redeemed represented by such redemption orders by the Basket Amount and then multiplying such product by the Index Price (the amount derived from steps 1 through 5 above, the "NAV Fee Basis Amount"); and
6. Subtract the U.S. dollar amount of the Sponsor's Fee that accrues for such business day, as calculated based on the NAV Fee Basis Amount for such business day.

In the event that the Sponsor determines that the primary methodology used to determine the Index Price is not an appropriate basis for valuation of the Trust's BAT, the Sponsor will utilize the cascading set of rules as described in "—Grayscale Basic Attention Token Trust (BAT)—The Index and the Index Price." In addition, in the event that the Trust holds any Incidental Rights and/or IR Virtual Currency, the Sponsor may, at its discretion, include the value of such Incidental Rights and/or IR Virtual Currency in the determination of the NAV, provided that the Sponsor has determined in good faith a method for assigning an objective value to such Incidental Rights and/or IR Virtual Currency. At this time, the Trust does not expect to take any Incidental Rights or IR Virtual Currency it may hold into account for the purposes of determining the NAV or the NAV per Share.

The Sponsor will publish the Index Price, the Trust's NAV and the NAV per Share on the Trust's website as soon as practicable after its determination. If the NAV and NAV per Share have been calculated using a price per BAT other than the Index Price for such Evaluation Time, the publication on the Trust's website will note the valuation methodology used and the price per BAT resulting from such calculation.

In the event of a hard fork of the Ethereum Network, the Sponsor will, if permitted by the terms of the Trust Agreement, use its discretion to determine, in good faith, which peer-to-peer network, among a group of incompatible forks of the Ethereum Network, is generally accepted as the network for BAT and should therefore be considered the appropriate network for the Trust's purposes. The Sponsor will base its determination on a variety of then relevant factors, including (but not limited to) the following: (i) the Sponsor's beliefs regarding expectations of the core developers of BAT, users, services, businesses, validators and other constituencies and (ii) the actual continued acceptance of, validating power on, and community engagement with, the Basic Attention Token Network.

For example, the Ethereum Network completed the final stages of an upgrade referred to as the "Merge," which is a stage of what was previously referred to as Ethereum 2.0, on September 15, 2022, and the Ethereum Network transitioned to a proof-of-stake model. Following the Merge, a hard fork of the Ethereum Network occurred, as certain Ether miners and network participants planned to maintain the proof-of-work consensus mechanism that was removed as part of the Merge. This version of the Ethereum Network was rebranded as Ethereum Proof-of-Work. Following the Merge, the Sponsor determined that BAT on the Ethereum Network is generally accepted as the network for BAT and therefore should be considered the appropriate network for the Trust's purposes.

The shareholders may rely on any evaluation furnished by the Sponsor. The determinations that the Sponsor makes will be made in good faith upon the basis of, and the Sponsor will not be liable for any errors contained in, information reasonably available to it. The Sponsor will not be liable to the Authorized Participants, the shareholders or any other person for errors in judgment. However, the preceding liability exclusion will not protect the Sponsor against any liability resulting from gross negligence, willful misconduct or bad faith in the performance of its duties.

### **Incidental Rights and IR Virtual Currency**

The Trust may from time to time come into possession of Incidental Rights and/or IR Virtual Currency by virtue of its ownership of BAT, generally through a fork in the Blockchain, an airdrop offered to holders of BAT or other similar event. Pursuant to the terms of the Trust Agreement, the Trust may take any lawful action necessary or desirable in connection with the Trust's ownership of Incidental Rights, including the acquisition of IR Virtual Currency, unless such action would adversely affect the status of the Trust as a grantor trust for U.S. federal income tax purposes or otherwise be prohibited by the Trust Agreement. These actions include (i) selling Incidental Rights and/or IR Virtual Currency in the Digital Asset Market and distributing the cash proceeds to shareholders, (ii) distributing Incidental Rights and/or IR Virtual Currency in-kind to the shareholders or to an agent acting on behalf of the shareholders for sale by such agent if an in-kind distribution would otherwise be infeasible and (iii) irrevocably abandoning Incidental Rights or IR Virtual Currency. The Trust may also use Incidental Rights and/or IR Virtual Currency to pay the Sponsor's Fee and Additional Trust Expenses, if any, as discussed below under "—Trust Expenses." However, the Trust does not expect to take any Incidental Rights or IR Virtual Currency it may hold into account for purposes of determining the Trust's NAV, the NAV per Share, Principal Market NAV, or the Principal Market NAV per Share.

With respect to any fork, airdrop or similar event, the Sponsor may, in its discretion, decide to cause the Trust to distribute the Incidental Rights or IR Virtual Currency in-kind to an agent of the shareholders for resale by such agent, or to irrevocably abandon the Incidental Rights or IR Virtual Currency. In the case of a distribution in-kind to an agent acting on behalf of the shareholders, the shareholders' agent will attempt to sell the Incidental Rights or IR Virtual Currency, and if the agent is able to do so, will remit the cash proceeds to shareholders, net of expenses and any applicable withholding taxes. There can be no assurance as to the price or prices for any Incidental Rights or IR Virtual Currency that the agent may realize, and the value of the Incidental Rights or IR Virtual Currency may increase or decrease after any sale by the agent. In the case of abandonment of Incidental Rights or IR Virtual Currency, the Trust would not receive any direct or indirect consideration for the Incidental Rights or IR Virtual Currency and thus the value of the Shares will not reflect the value of the Incidental Rights or IR Virtual Currency.

On December 18, 2020, the Sponsor delivered to the Custodian a notice (the "Pre-Creation Abandonment Notice") stating that the Trust is abandoning irrevocably for no direct or indirect consideration, effective immediately prior to each time at which the Trust creates Shares (any such time, a "Creation Time"), all Incidental Rights and IR Virtual Currency to which it would otherwise be entitled as of such time (any such abandonment, a "Pre-Creation Abandonment"); provided that a Pre-Creation Abandonment will not apply to any Incidental Rights and/or IR Virtual Currency if (i) the Trust has taken, or is taking at such time, an Affirmative Action to acquire or abandon such Incidental Rights and/or IR Virtual Currency at any time prior to such Creation Time or (ii) such Incidental Rights and/or IR Virtual Currency has been subject to a previous Pre-Creation Abandonment. An Affirmative Action refers to a written notification from the Sponsor to the Custodian of the Trust's intention (i) to acquire and/or retain any Incidental Rights and/or IR Virtual Currency or (ii) to abandon, with effect prior to the relevant Creation Time, any Incidental Rights and/or IR Virtual Currency.

In determining whether to take an Affirmative Action to acquire and/or retain an Incidental Right and/or IR Virtual Currency, the Trust takes into consideration a number of factors, including:

- the Custodian's agreement to provide access to the IR Virtual Currency;
- the availability of a safe and practical way to custody the IR Virtual Currency;
- the costs of taking possession and/or maintaining ownership of the IR Virtual Currency and whether such costs exceed the benefits of owning such IR Virtual Currency;
- whether there are any legal restrictions on, or tax implications with respect to, the ownership, sale or disposition of the Incidental Right or IR Virtual Currency, regardless of whether there is a safe and practical way to custody and secure such Incidental Right or IR Virtual Currency;

- the existence of a suitable market into which the Incidental Right or IR Virtual Currency may be sold; and
- whether the Incidental Right or IR Virtual Currency is, or may be, a security under federal securities laws.

In determining whether the IR Virtual Currency is, or may be, a security under federal securities laws, the Sponsor takes into account a number of factors, including the various definitions of “security” under the federal securities laws and federal court decisions interpreting elements of these definitions, such as the U.S. Supreme Court’s decisions in the *Howey* and *Reves* cases, as well as reports, orders, press releases, public statements and speeches by the SEC and its staff providing guidance on when a digital asset may be a security for purposes of the federal securities laws.

As a result of the Pre-Creation Abandonment Notice, since December 18, 2020, the Trust has irrevocably abandoned, prior to the Creation Time of any Shares, any Incidental Right or IR Virtual Currency that it may have any right to receive at such time. The Trust has no right to receive any Incidental Right or IR Virtual Currency abandoned pursuant to either the Pre-Creation Abandonment Notice or Affirmative Actions. Furthermore, the Custodian has no authority, pursuant to the Custodian Agreement or otherwise, to exercise, obtain or hold, as the case may be, any such abandoned Incidental Right or IR Virtual Currency on behalf of the Trust or to transfer any such abandoned Incidental Right or IR Virtual Currency to the Trust if the Trust terminates its custodial agreement with the Custodian.

The Sponsor intends to evaluate each fork, airdrop or similar occurrence on a case-by-case basis in consultation with the Trust’s legal advisers, tax consultants, and Custodian, and may decide to abandon any Incidental Rights or IR Virtual Currency resulting from a hard fork, airdrop or similar occurrence should the Sponsor conclude, in its discretion, that such abandonment is in the best interests of the Trust. In the event the Sponsor decides to sell any Incidental Right or IR Virtual Currency, it would expect to execute the sale to or through an eligible financial institution that is subject to federal and state licensing requirements and practices regarding AML and KYC regulations, which may include an Authorized Participant, a Liquidity Provider (as defined below in “—Authorized Participants”), or one or more of their affiliates. In either case, the Sponsor expects that an Authorized Participant or Liquidity Provider would only be willing to transact with the Sponsor on behalf of the Trust if an Authorized Participant or Liquidity Provider considered it possible to trade the Incidental Right or IR Virtual Currency on a Digital Asset Trading Platform or other venue to which the Authorized Participant or Liquidity Provider has access. Generally, any such Authorized Participant or Liquidity Provider would have access only to Digital Asset Trading Platforms or other venues that it reasonably believes are operating in compliance with applicable law, including federal and state licensing requirements, based upon information and assurances provided to it by each venue.

## **Secondary Market Trading**

While the Trust’s investment objective is for the value of the Shares (based on BAT per Share) to reflect the value of the BAT held by the Trust, determined by reference to the Index Price, less the Trust’s expenses and other liabilities, the Shares may trade in the Secondary Market on OTCQX (or on another Secondary Market in the future) at prices that are lower or higher than the NAV per Share. The amount of the discount or premium in the trading price relative to the NAV per Share may be influenced by non-concurrent trading hours and liquidity between OTCQX and larger Digital Asset Trading Platforms. While the Shares trade on OTCQX from 6:00 a.m. until 5:00 p.m., New York time, liquidity in the Digital Asset Markets may fluctuate depending upon the volume and availability of larger Digital Asset Trading Platforms. As a result, during periods in which Digital Asset Market liquidity is limited or a major Digital Asset Trading Platform is off-line, trading spreads, and the resulting premium or discount, on the Shares may widen.

## **The Index and the Index Price**

The Index is a U.S. dollar-denominated composite reference rate for the price of BAT. The Index is designed to (1) mitigate the effects of fraud, manipulation and other anomalous trading activity from impacting the BAT reference rate, (2) provide a real-time, volume-weighted fair value of BAT and (3) appropriately handle and adjust for non-market related events.

The Index Price is determined by the Index Provider through a process in which trade data is cleansed and compiled in such a manner as to algorithmically reduce the impact of anomalous or manipulative trading. This is accomplished by adjusting the weight of each data input based on price deviation relative to the observable set, as well as recent and long-term trading volume at each venue relative to the observable set. The Index Price is calculated using non-GAAP methodology and is not used in the Trust’s financial statements.

All references to the NAV and NAV per Share of the Trust in this report have been calculated using the Index Price unless indicated otherwise. Prior to March 8, 2024, NAV was referred to as Digital Asset Holdings and NAV per Share was referred to as Digital Asset Holdings per Share.

### ***Constituent Trading Platform Selection***

The Digital Asset Trading Platforms that are included in the Index are selected by the Index Provider utilizing a methodology that is guided by the International Organization of Securities Commissions (“IOSCO”) principles for financial benchmarks. For a trading platform to become a Constituent Trading Platform, it must satisfy the criteria listed below (the “Inclusion Criteria”):

- No evidence in the past 12 months of trading restrictions on individuals or entities that would otherwise meet the trading platform’s eligibility requirements to trade;
- No evidence in the past 12 months of undisclosed restrictions on deposits or withdrawals from user accounts;
- Real-time price discovery;
- Limited or no capital controls;
- Transparent ownership including a publicly-known ownership entity;
- Publicly available language and policies addressing legal and regulatory compliance, including KYC (Know Your Customer), AML (Anti-Money Laundering) and other policies designed to comply with relevant regulations that might apply to it; and
- Offer programmatic spot trading of the trading pair, and reliably publish trade prices and volumes on a real-time basis through Rest and Websocket APIs.

All trading platforms that meet these Inclusion Criteria will be assigned to one trading platform Category as defined by the additional criteria below:

- Category 1
  - o Licensed and/or able to serve investors, retail or professional, in the U.S.; and
  - o Maintain sufficient USD or USDC liquidity relative to the size of the listed assets.
- Category 2
  - o Licensed (including in-principal licensure) and/or able to serve investors, retail or professional, in one or more of the following jurisdictions:
    - United Kingdom
    - European Union
      - In the event a trading platform is only licensed or able to serve investors in select European Union countries and none of the other listed jurisdictions, the Index Provider reserves the right to evaluate its eligibility on a case-by-case basis.
    - Hong Kong
    - Singapore; and
  - o Maintain sufficient USD or USDC liquidity relative to the size of the listed assets.

A Digital Asset Trading Platform is removed from the Constituent Trading Platforms when it no longer satisfies the Inclusion Criteria. The Index Provider does not currently include data from over-the-counter markets or derivatives platforms among the Constituent Trading Platforms. Over-the-counter data is not currently included because of the potential for trades to include a significant premium or discount paid for larger liquidity, which creates an uneven comparison relative to more active markets. There is also a higher potential for over-the-counter transactions to not be arms-length, and thus not be representative of a true market price. BAT derivative markets are also not currently included as the markets remain relatively thin. While the Index Provider has no plans to include data from over-the-counter markets or derivative platforms at this time, the Index Provider will consider IOSCO principles for financial benchmarks, the management of trading venues of BAT derivatives and the aforementioned Inclusion Criteria when considering whether to include over-the-counter or derivative platform data in the future.

The Index Provider and the Sponsor have entered into the index license agreement, dated as of February 1, 2022 (as amended, the “Index License Agreement”), governing the Sponsor’s use of the Index Price. Pursuant to the terms of the Index License Agreement, the Index Provider may adjust the calculation methodology for the Index Price without notice to, or consent of, the Trust or its shareholders. The Index Provider may decide to change the calculation methodology to maintain the integrity of the Index Price calculation should it identify or become aware of previously unknown variables or issues with the existing methodology that it believes could materially impact its performance and/or reliability. The Index Provider has sole discretion over the determination of the Index Price and may change the methodologies for determining the Index Price from time to time. Shareholders will be notified of any material changes to the calculation methodology or the Index Price in the Trust’s current reports and will be notified of all other changes that the Sponsor considers significant in the Trust’s periodic or current reports. The Sponsor will determine the materiality of any changes to the Index Price on a case-by-case basis, in consultation with external counsel.

The Index Provider may change the trading venues that are included in the Index or otherwise change the way in which the Index is calculated at any time. For example, the Index Provider has scheduled quarterly reviews in which it may add or remove Constituent Trading Platforms that satisfy or fail the Inclusion Criteria. The Index Provider does not have any obligation to consider the interests of the Sponsor, the Trust, the shareholders, or anyone else in connection with such changes. While the Index Provider is not required to publicize or explain the changes or to alert the Sponsor to such changes, it has historically notified the Trust of any material changes to the Constituent Trading Platforms, including any additions or removals of the Constituent Trading Platforms, in addition to issuing press releases in connection with the same. The Sponsor will notify investors of any such material event by filing a press release. Although the Index methodology is designed to operate without any manual intervention, rare events would justify manual intervention. Intervention of this kind would be in response to non-market-related events, such as the halting of deposits or withdrawals of funds on a Digital Asset Trading Platform, the unannounced closure of operations on a Digital Asset Trading Platform, insolvency or the compromise of user funds. In the event that such an intervention is necessary, the Index Provider would issue a public announcement through its website, API and other established communication channels with its clients.

### ***Determination of the Index Price***

The Index applies an algorithm to the price of BAT on the Constituent Trading Platforms calculated on a per second basis over a 24-hour period. The Index’s algorithm is expected to reflect a four-pronged methodology to calculate the Index Price from the Constituent Trading Platforms:

- **Volume Weighting:** Constituent Trading Platforms with greater liquidity receive a higher weighting in the Index, increasing the ability to execute against (i.e., replicate) the Index in the underlying spot markets.
- **Price-Variance Weighting:** The Index Price reflects data points that are discretely weighted in proportion to their variance from the rest of the Constituent Trading Platforms. As the price at a particular trading platform diverges from the prices at the rest of the Constituent Trading Platforms, its weight in the Index Price consequently decreases.
- **Inactivity Adjustment:** The Index Price algorithm penalizes stale activity from any given Constituent Trading Platform. When a Constituent Trading Platform does not have recent trading data, its weighting in the Index Price is gradually reduced until it is de-weighted entirely. Similarly, once trading activity at a Constituent Trading Platform resumes, the corresponding weighting for that Constituent Trading Platform is gradually increased until it reaches the appropriate level.
- **Manipulation Resistance:** In order to mitigate the effects of wash-trading and order book spoofing, the Index only includes executed trades in its calculation. Additionally, the Index only includes Constituent Trading Platforms that charge trading fees to its users in order to attach a real, quantifiable cost to any manipulation attempts.

The Index Provider re-evaluates the weighting algorithm on a periodic basis, but maintains discretion to change the way in which an Index Price is calculated based on its periodic review or in extreme circumstances. The exact methodology to calculate the Index Price is not publicly available. Still, the Index is designed to limit exposure to trading or price distortion of any individual Digital Asset Trading Platform that experiences periods of unusual activity or limited liquidity by discounting, in real-time, anomalous price movements at individual Digital Asset Trading Platforms.

The Sponsor believes the Index Provider's selection process for Constituent Trading Platforms as well as the methodology of the Index Price's algorithm provides a more accurate picture of BAT price movements than a simple average of Digital Asset Trading Platform spot prices, and that the weighting of BAT prices on the Constituent Trading Platforms limits the inclusion of data that is influenced by temporary price dislocations that may result from technical problems, limited liquidity or fraudulent activity elsewhere in the BAT spot market. By referencing multiple trading venues and weighting them based on trade activity, the Sponsor believes that the impact of any potential fraud, manipulation or anomalous trading activity occurring on any single venue is reduced.

If the Index Price becomes unavailable, or if the Sponsor determines in good faith that such Index Price does not reflect an accurate price for BAT, then the Sponsor will, on a best efforts basis, contact the Index Provider to obtain the Index Price directly from the Index Provider. If after such contact such Index Price remains unavailable or the Sponsor continues to believe in good faith that such Index Price does not reflect an accurate price for BAT, then the Sponsor will employ a cascading set of rules to determine the Index Price, as described below in "—Determination of the Index Price When Index Price is Unavailable."

The Trust values its BAT for operational purposes by reference to the Index Price. The Index Price is the value of a BAT as represented by the Index, calculated at 4:00 p.m., New York time, on each business day.

#### Illustrative Example

For the purposes of illustration, outlined below are examples of how the attributes that impact weighting and adjustments in the aforementioned methodology may be utilized to generate the Index Price for a digital asset. For example, the Constituent Trading Platforms used to calculate the Index Price of the digital asset may include trading platforms such as Coinbase, Kraken, LMAX Digital and Bitstamp:

- Volume Weighting: Each Constituent Trading Platform will be weighted to appropriately reflect the trading volume share of the Constituent Trading Platform relative to all the Constituent Trading Platforms during this same period. For example, for each calculation of the Index Price, the initial weight of each Constituent Trading Platform used to calculate the Index Price will be based on its share of the volume over the past 24-hour period as a percentage of the aggregate 24-hour volume for all Constituent Trading Platforms. The initial weight may be adjusted based on inactivity and price variance as described below.
- Inactivity Adjustment: Assume that a Constituent Trading Platform represented a 14% weighting on the Index Price of the digital asset, which is based on the per-second calculations of its trading volume and price-variance relative to the cohort of Constituent Trading Platforms included in such Index, and then went offline for approximately two hours. The index algorithm would automatically recognize inactivity and start de-weighting the Constituent Trading Platform after a specified period and continue to do so until its influence was effectively zero. As soon as trading activity resumed at the Constituent Trading Platform, the index algorithm would re-weight it to the appropriate weighting factoring in the period of inactivity.
- Price-Variance Weighting: The price-variance weighting adjustment is a relative measure of each trading platform versus the cohort of trading platforms. The further the price at a constituent trading platform is from the mean price of the cohort, the less influence that trading platform's price will have on the algorithm that produces the Index Price, as the trading platform data is discretely weighted in proportion to their variance from the rest of the trading platforms on a per-second basis.

#### ***Determination of the Index Price When Index Price is Unavailable***

On January 11, 2022, the Sponsor changed the cascading set of rules used to determine the Index Price. The Sponsor uses the following cascading set of rules to calculate the Index Price. For the avoidance of doubt, the Sponsor will employ the below rules sequentially and in the order as presented below, should one or more specific rule(s) fail:

1. **Index Price** = The price set by the Index as of 4:00 p.m., New York time, on the valuation date. If the Index becomes unavailable, or if the Sponsor determines in good faith that the Index does not reflect an accurate price, then the Sponsor will, on a best efforts basis, contact the Index Provider to obtain the Index Price directly from the Index Provider. If after such contact the Index remains unavailable or the Sponsor continues to believe in good faith that the Index does not reflect an accurate price, then the Sponsor will employ the next rule to determine the Index Price. There are no predefined criteria to make a good faith assessment and it will be made by the Sponsor in its sole discretion.

2. Index Price = The price set by Coin Metrics Real-Time Rate (the “Secondary Index”) as of 4:00 p.m., New York time, on the valuation date (the “Secondary Index Price”). The Secondary Index Price is a real-time reference rate price, calculated using trade data from constituent markets selected by Coin Metrics, Inc. (the “Secondary Index Provider”). The Secondary Index Price is calculated by applying weighted-median techniques to such trade data where half the weight is derived from the trading volume on each constituent market and half is derived from inverse price variance, where a constituent market with high price variance as a result of outliers or market anomalies compared to other constituent markets is assigned a smaller weight. The Secondary Index Provider and the Sponsor have entered into the master services agreement, dated as of August 4, 2020, and order form thereunder, pursuant to which the Sponsor may obtain and use the Secondary Index and the Secondary Index Price from the Secondary Index Provider. If the Secondary Index becomes unavailable, or if the Sponsor determines in good faith that the Secondary Index does not reflect an accurate price, then the Sponsor will, on a best efforts basis, contact the Secondary Index Provider to obtain the Secondary Index Price directly from the Secondary Index Provider. If after such contact the Secondary Index remains unavailable or the Sponsor continues to believe in good faith that the Secondary Index does not reflect an accurate price, then the Sponsor will employ the next rule to determine the Index Price. There are no predefined criteria to make a good faith assessment and it will be made by the Sponsor in its sole discretion.
3. Index Price = The price set by the Trust’s principal market (the “Tertiary Pricing Option”) as of 4:00 p.m., New York time, on the valuation date. The Tertiary Pricing Option is a spot price derived from the principal market’s public data feed that is believed to be consistently publishing pricing information as of 4:00 p.m., New York time, and is provided to the Sponsor via an application programming interface. If the Tertiary Pricing Option becomes unavailable, or if the Sponsor determines in good faith that the Tertiary Pricing Option does not reflect an accurate price, then the Sponsor will, on a best efforts basis, contact the Tertiary Pricing Provider to obtain the Tertiary Pricing Option directly from the Tertiary Pricing Provider. If after such contact the Tertiary Pricing Option remains unavailable or the Sponsor continues to believe in good faith that the Tertiary Pricing Option does not reflect an accurate price, then the Sponsor will employ the next rule to determine the Index Price. There are no predefined criteria to make a good faith assessment and it will be made by the Sponsor in its sole discretion.
4. Index Price = The Sponsor will use its best judgment to determine a good faith estimate of the Index Price. There are no predefined criteria to make a good faith assessment and it will be made by the Sponsor in its sole discretion.

In the event of a fork, the Index Provider may calculate the Index Price based on a digital asset that the Sponsor does not believe to be the appropriate asset that is held by the Trust. In this event, the Sponsor has full discretion to use a different index provider or calculate the Index Price itself using its best judgment.

The Sponsor may, in its sole discretion, select a different index provider, select a different index price provided by the Index Provider, calculate the Index Price by using the cascading set of rules set forth above, or change the cascading set of rules set forth above at any time.

#### *Creation and Redemption of Shares*

The Trust Agreement also provides procedures for the redemption of Shares. However, the Trust does not currently operate a redemption program and the Shares are not currently redeemable. Subject to receipt of regulatory approval from the SEC and approval by the Sponsor in its sole discretion, the Trust may in the future operate a redemption program. ***However, because the Sponsor does not believe that the SEC would, at this time, entertain an application for the waiver of rules needed in order to operate an ongoing redemption program, the Sponsor currently has no intention of seeking regulatory approval from the SEC for the Trust to operate an ongoing redemption program.***

The Trust will issue Shares to Authorized Participants from time to time, but only in one or more Baskets (with a Basket being a block of 100 Shares). The Trust will not issue fractions of a Basket. The creation (and, should the Trust commence a redemption program, redemption) of Baskets will be made only in exchange for the delivery to the Trust, or the distribution by the Trust, of the number of whole and fractional BAT represented by each Basket being created (or, should the Trust commence a redemption program, redeemed), which is determined by dividing (x) the amount of BAT owned by the Trust at 4:00 p.m., New York time, on the trade date of a creation or redemption order, after deducting the amount of BAT representing the U.S. dollar value of accrued but unpaid fees and expenses of the Trust (converted using the Index Price at such time, and carried to the eighth decimal place), by (y) the number of Shares outstanding at such time (with the quotient so obtained calculated to one one-hundred-millionth of one BAT (i.e., carried to the eighth decimal place)), and multiplying such quotient by 100 (the “Basket Amount”). All questions as to the calculation of the Basket Amount will be conclusively determined by the Sponsor and will be final and binding on all persons interested in the Trust. The Basket Amount multiplied by the number of Baskets being created or redeemed is the “Total Basket Amount.” The amount of BAT represented by a Share will gradually decrease over time as the Trust’s BAT are used to pay the Trust’s expenses. Each Share represented approximately 9.0837 and 9.3137 BAT as of December 31, 2024 and 2023, respectively. Information regarding the amount of BAT represented by each Share is posted to the Trust’s website daily at [www.grayscale.com/crypto-products/grayscale-basic-attention-token-trust/](http://www.grayscale.com/crypto-products/grayscale-basic-attention-token-trust/).

Authorized Participants are the only persons that may place orders to create Baskets. Each Authorized Participant must (i) be a registered broker-dealer, (ii) enter into a Participant Agreement with the Sponsor and (iii) own a BAT wallet address that is known to the Custodian as belonging to the Authorized Participant, or another entity that has been engaged to source digital assets (any such representative, a “Liquidity Provider”). An Authorized Participant may act for its own account or as agent for investors who have entered into a subscription agreement with the Authorized Participant (each such investor, an “Investor”). An Investor that enters into a subscription agreement with an Authorized Participant subscribes for Shares by submitting a purchase order and paying a subscription amount, either in U.S. dollars or in BAT, to the Authorized Participant.

An Investor may pay the subscription amount in cash or BAT. In the event that the Investor pays the subscription amount in cash, the Authorized Participant, or Liquidity Provider, purchases BAT in a Digital Asset Market or, to the extent the Authorized Participant, or Liquidity Provider, already holds BAT, the Authorized Participant, or Liquidity Provider, may contribute such BAT to the Trust. Depending on whether the Investor wires cash to the Authorized Participant before or after 4:00 p.m. New York time, the Investor’s Shares will be created based on the same or next business day’s NAV and the risk of any price volatility in BAT during this time will be borne by the Authorized Participant, or Liquidity Provider. The Authorized Participant will receive Shares of the Trust, and the Shares will then be registered in the name of the Investor. In the event that the Investor pays the subscription amount in BAT, the Investor will transfer such BAT to the Authorized Participant or a Liquidity Provider, which will contribute such BAT in kind to the Trust, and receive Shares of the Trust, and the Shares will then be registered in the name of the Investor. For the avoidance of doubt, in either case, the Authorized Participant or Liquidity Provider will act as the agent of the Investor with respect to the contribution of BAT to the Trust in exchange for Shares.

The creation of Baskets requires the delivery to the Trust of the Total Basket Amount.

The Participant Agreement provides the procedures for the creation and, if permitted, redemption of Baskets and for the delivery of the whole and fractional BAT required for such creations and, if permitted, redemptions. The Participant Agreement and the related procedures attached thereto may be amended by the Sponsor and the relevant Authorized Participant. Under the Participant Agreement, the Sponsor has agreed to indemnify each Authorized Participant against certain liabilities, including liabilities under the Securities Act.

Authorized Participants do not pay a transaction fee to the Trust in connection with the creation or, if permitted, redemption of Baskets, but there may be transaction fees associated with the validation of the transfer of BAT by the Ethereum Network. Authorized Participants or Liquidity Providers who deposit BAT with the Trust in exchange for Baskets will receive no fees, commissions or other form of compensation or inducement of any kind from either the Sponsor or the Trust, and no such person has any obligation or responsibility to the Sponsor or the Trust to effect any sale or resale of Shares.

The following description of the procedures for the creation and redemption of Baskets is only a summary and shareholders should refer to the relevant provisions of the Trust Agreement and the form of Participant Agreement for more detail.

### *Creation Procedures*

On any business day, an Authorized Participant may order one or more Creation Baskets from the Trust by placing a creation order with the Sponsor no later than 4:00 p.m., New York time, which the Sponsor will accept or reject. By placing a creation order, an Authorized Participant agrees to transfer the Total Basket Amount from the BAT wallet address that is known to the Custodian as belonging to the Authorized Participant, or a Liquidity Provider, to the Digital Asset Account.

All creation orders are accepted (or rejected) by the Sponsor on the business day on which the relevant creation order is placed. If a creation order is accepted, the Sponsor will calculate the Total Basket Amount on the same business day, which will be the trade date, and will communicate the Total Basket Amount to the Authorized Participant. The Authorized Participant, or Liquidity Provider, must transfer the Total Basket Amount to the Trust no later than 6:00 p.m., New York time, on the trade date. The expense and risk of delivery, ownership and safekeeping of BAT will be borne solely by the Authorized Participant or Liquidity Provider, until such BAT has been received by the Trust.

Following receipt of the Total Basket Amount by the Custodian, the Transfer Agent will credit the number of Shares to the account of the Investor on behalf of which the Authorized Participant placed the creation order by no later than 6:00 p.m., New York time, on the trade date. The Authorized Participant may then transfer the Shares directly to the relevant Investor.

### *Redemption Procedures*

Redemptions of Shares are currently not permitted and the Trust is unable to redeem Shares. Subject to receipt of regulatory approval from the SEC and approval by the Sponsor in its sole discretion, the Trust may in the future operate a redemption program. ***However, because the Sponsor does not believe that the SEC would, at this time, entertain an application for the waiver of rules needed in order to operate an ongoing redemption program, the Sponsor currently has no intention of seeking regulatory approval from the SEC for the Trust to operate an ongoing redemption program.*** For a discussion of risks relating to the Trust's inability to redeem Shares, see "Risk Factors—Risk Factors Related to the Trust and the Shares—Because of the holding period under Rule 144, the lack of an ongoing redemption program and the Trust's ability to halt creations from time to time, there is no arbitrage mechanism to keep the value of the Shares closely linked to the Index Price and the Shares have historically traded at a substantial premium over, or a substantial discount to, the NAV per Share" and "Risk Factors—Risk Factors Related to the Trust and the Shares—The restrictions on transfer and redemption may result in losses on the value of the Shares."

If permitted, the procedures by which an Authorized Participant can redeem one or more Baskets will mirror the procedures for the creation of Baskets. On any business day, an Authorized Participant may place a redemption order no later than 4:00 p.m., New York time, which the Sponsor will accept or reject. By placing a redemption order, an Authorized Participant agrees to deliver to the Sponsor the Baskets to be redeemed through the book-entry system to the Trust. The redemption procedures do not allow a shareholder other than an Authorized Participant to redeem Shares.

All redemption orders are accepted (or rejected) by the Sponsor on the business day on which the relevant redemption order is placed. If a redemption order is accepted, the Sponsor will calculate the Total Basket Amount on the same business day, which will be the trade date, and will communicate the Total Basket Amount to the Authorized Participant. The Sponsor will then direct the Transfer Agent to debit the account of the Investor on behalf of which the Authorized Participant placed the redemption order the number of Redemption Baskets ordered no later than 6:00 p.m., New York time, on the trade date.

Following receipt of confirmation by the Transfer Agent that the Redemption Baskets have been debited, the Sponsor or its delegates will instruct the Custodian to send the Authorized Participant the Total Basket Amount by no later than 6:00 p.m., New York time, on the trade date.

### *Suspension or Rejection of Orders and Total Basket Amount*

The creation or, if permitted, redemption of Shares may be suspended generally, or refused with respect to particular requested creations or redemptions, during any period when the transfer books of the Transfer Agent are closed or if circumstances outside the control of the Sponsor or its delegates make it for all practical purposes not feasible to process such creation orders or redemption orders. The Sponsor may reject an order or, after accepting an order, may cancel such order by rejecting the Total Basket Amount, in the case of creations, or the Baskets to be redeemed, in the case of redemptions, if (i) such order is not presented in proper form as described in the Participant Agreement, (ii) the transfer of the Total Basket Amount, in the case of creations, comes from an account other than a BAT wallet address that is known to the Custodian as belonging to the Authorized Participant, or a Liquidity Provider, or (iii) the fulfillment of the order, in the opinion of counsel, might be unlawful, among other reasons. None of the Sponsor or its delegates will be liable for the suspension, rejection or acceptance of any creation order, redemption order or Total Basket Amount.

In particular, upon the Trust's receipt of any Incidental Rights and/or IR Virtual Currency in connection with a fork, airdrop or similar event, the Sponsor will suspend creations and redemptions until it is able to cause the Trust to sell or distribute such Incidental Rights and/or IR Virtual Currency.

None of the Sponsor or its delegates will be liable for the suspension, rejection or acceptance of any creation order, redemption order or Total Basket Amount.

### *Tax Responsibility*

Authorized Participants are responsible for any transfer tax, sales or use tax, stamp tax, recording tax, value-added tax or similar tax or governmental charge applicable to the creation (or, should the Trust commence a redemption program, redemption) of Baskets, regardless of whether such tax or charge is imposed directly on the Authorized Participant, and agree to indemnify the Sponsor and the Trust if the Sponsor or the Trust is required by law to pay any such tax, together with any applicable penalties, additions to tax or interest thereon.

### *Trust Expenses*

The Trust's only ordinary recurring expense is expected to be the Sponsor's Fee. The Sponsor's Fee will accrue daily in U.S. dollars at an annual rate of 2.5% of the NAV Fee Basis Amount of the Trust as of 4:00 p.m., New York time, on each day; provided that for a day that is not a business day, the calculation will be based on the NAV Fee Basis Amount from the most recent business day, reduced by the accrued and unpaid Sponsor's Fee for such most recent business day and for each day after such most recent business day and prior to the relevant calculation date. This dollar amount for each daily accrual will then be converted into BAT by reference to the same Index Price used to determine such accrual. The Sponsor's Fee is payable in BAT to the Sponsor monthly in arrears.

To cause the Trust to pay the Sponsor's Fee, the Sponsor will instruct the Custodian to (i) withdraw from the Digital Asset Account the amount of BAT equal to the accrued but unpaid Sponsor's Fee and (ii) transfer such BAT to the Sponsor's account at such times as the Sponsor determines in its absolute discretion.

If the Trust holds any Incidental Rights and/or IR Virtual Currency at any time, the Trust may also pay the Sponsor's Fee, in whole or in part, with such Incidental Rights and/or IR Virtual Currency by entering into an agreement with the Sponsor and transferring such Incidental Rights and/or IR Virtual Currency to the Sponsor at a value to be determined pursuant to such agreement. However, the Trust may use Incidental Rights and/or IR Virtual Currency to pay the Sponsor's Fee only if such agreement and transfer do not otherwise conflict with the terms of the Trust Agreement. The value of any such Incidental Rights and/or IR Virtual Currency will be determined on an arm's-length basis. The Trust currently expects that the value of any such Incidental Rights and/or IR Virtual Currency would be determined by reference to an index provided by the Index Provider or, in the absence of such an index, by reference to the cascading set of rules described in "Grayscale Basic Attention Token Trust (BAT)—Description of the Trust—Valuation of BAT and Determination of NAV." If the Trust pays the Sponsor's Fee in Incidental Rights and/or IR Virtual Currency, in whole or in part, the amount of BAT that would otherwise have been used to satisfy such payment will be correspondingly reduced. The Sponsor, from time to time, may temporarily waive all or a portion of the Sponsor's Fee in its discretion for stated periods of time. Presently, the Sponsor does not intend to waive any of the Sponsor's Fee and there are no circumstances under which the Sponsor has determined it will definitely waive the fee.

After the Trust's payment of the Sponsor's Fee to the Sponsor, the Sponsor may elect to convert the BAT, Incidental Rights and/or IR Virtual Currency received as payment of the Sponsor's Fee into U.S. dollars. The rate at which the Sponsor converts such BAT, Incidental Rights and/or IR Virtual Currency to U.S. dollars may differ from the rate at which the relevant Sponsor's Fee was determined. The Trust will not be responsible for any fees and expenses incurred by the Sponsor to convert BAT, Incidental Rights and/or IR Virtual Currency received in payment of the Sponsor's Fee into U.S. dollars.

As partial consideration for its receipt of the Sponsor's Fee, the Sponsor has assumed the obligation to pay the Sponsor-paid Expenses. There is no cap on such Sponsor-Paid Expenses. The Sponsor has not assumed the obligation to pay Additional Trust Expenses. Any expense that qualifies as an Additional Trust Expense will be deemed to be an Additional Trust Expense and not a Sponsor-paid Expense. If Additional Trust Expenses are incurred, the Sponsor (i) will instruct the Custodian to withdraw from the Digital Asset Account BAT, Incidental Rights and/or IR Virtual Currency in such quantity as may be necessary to permit payment of such Additional Trust Expenses and (ii) may either (x) cause the Trust to convert such BAT, Incidental Rights and/or IR Virtual Currency into U.S. dollars or other fiat currencies at the Actual Exchange Rate or (y) when the Sponsor incurs such expenses on behalf of the Trust, cause the Trust (or its delegate) to deliver such BAT, Incidental Rights and/or IR Virtual Currency in kind to the Sponsor in satisfaction of such Additional Trust Expenses. However, the Trust may use Incidental Rights and/or IR Virtual Currency to pay Additional Trust Expenses only if doing so does not conflict with the terms of the Trust Agreement. The value of any such Incidental Rights and/or IR Virtual Currency will be determined on an arm's-length basis. The Trust currently expects that the value of any such Incidental Rights and/or IR Virtual Currency would be determined by reference to an index provided by the Index Provider or, in the absence of such an index, by reference to the cascading set of rules described in "Grayscale Basic Attention Token Trust (BAT)—The Index and the Index Price." If the Trust pays the Additional Trust Expenses in Incidental Rights and/or IR Virtual Currency, in whole or in part, the amount of BAT that would otherwise have been used to satisfy such payment will be correspondingly reduced.

The amount of BAT represented by a Share will decline each time the Trust pays the Sponsor's Fee or any Additional Trust Expenses by transferring or selling BAT. The quantity of BAT, Incidental Rights or IR Virtual Currency to be delivered to the Sponsor or other relevant payee in payment of the Sponsor's Fee or any Additional Trust Expenses, or sold to permit payment of Additional Trust Expenses, will vary from time to time depending on the level of the Trust's expenses and the value of BAT, Incidental Rights or IR Virtual Currency held by the Trust. See "Trust Expenses." Assuming that the Trust is a grantor trust for U.S. federal income tax purposes, each delivery or sale of BAT, Incidental Rights and IR Virtual Currency by the Trust for the payment of expenses will be a taxable event to shareholders. See "Material U.S. Federal Income Tax Consequences—Tax Consequences to U.S. Holders."

#### *Impact of Trust Expenses on the Trust's NAV*

The Trust will pay the Sponsor's Fee to the Sponsor in BAT, Incidental Rights and/or IR Virtual Currency. In addition, the Trust will sell BAT, Incidental Rights and/or IR Virtual Currency to raise the funds needed for the payment of any Additional Trust Expenses or will pay Additional Trust Expenses in BAT, Incidental Rights and/or IR Virtual Currency. The Trust's BAT, Incidental Rights and IR Virtual Currency, and the purchase price received as consideration for such sales of BAT, Incidental Rights and IR Virtual Currency, will be the Trust's sole source of funds to cover the Sponsor's Fee and any Additional Trust Expenses. Because the amount of BAT held by the Trust will decrease when BAT is used to pay the Sponsor's Fee or Additional Trust Expenses or are sold to permit the payment of Additional Trust Expenses, it is expected that the fractional amount of BAT represented by each Share will gradually decrease over the life of the Trust. Accordingly, the shareholders will bear the cost of the Sponsor's Fee and Additional Trust Expenses. New BAT deposited into the Digital Asset Account in exchange for additional new Baskets issued by the Trust will not reverse this trend.

## RISK FACTORS

*An investment in the Shares involves certain risks as described below. These risks should also be read in conjunction with the other information included in this Annual Report, including the Trust's financial statements and related notes thereto. See "Glossary of Defined Terms" for the definition of certain capitalized terms used in this Annual Report. All other capitalized terms used, but not defined, herein have the meanings given to them in the Trust Agreement.*

### **Risk Factors Related to Digital Assets**

***The trading prices of many digital assets, including BAT, have experienced extreme volatility in recent periods and may continue to do so. Extreme volatility in the future, including declines in the trading prices of BAT, could have a material adverse effect on the value of the Shares and the Shares could lose all or substantially all of their value.***

The trading prices of many digital assets, including BAT, have experienced extreme volatility throughout their existence, including in recent periods and may continue to do so. For instance, following significant increases throughout the majority of 2020, digital asset prices, including BAT, experienced significant volatility throughout 2021 and 2022. This volatility became extreme in November 2022 when FTX, then a major Digital Asset Trading Platform, halted customer withdrawals. See "—Recent developments in the digital asset economy have led to extreme volatility and disruption in digital asset markets, a loss of confidence in participants of the digital asset ecosystem, significant negative publicity surrounding digital assets broadly and market-wide declines in liquidity." Digital asset prices, including BAT, have continued to fluctuate widely through the date of this Annual Report.

Extreme volatility in the future, including declines in the trading prices of BAT, could have a material adverse effect on the value of the Shares and the Shares could lose all or substantially all of their value. Furthermore, negative perception, a lack of stability and standardized regulation in the digital asset economy may reduce confidence in the digital asset economy and may result in greater volatility in the price of BAT and other digital assets, including a depreciation in value. The Trust is not actively managed and will not take any actions to take advantage, or mitigate the impacts, of volatility in the price of BAT. For additional information that quantifies the volatility of BAT prices and the value of the Shares, see "Management's Discussion and Analysis—Historical Basic Attention Token Prices."

***Digital assets such as BAT were only introduced within the past two decades, and the medium-to-long term value of the Shares is subject to a number of factors relating to the capabilities and development of blockchain technologies and to the fundamental investment characteristics of digital assets.***

Digital assets such as BAT were only introduced within the past two decades, and the medium-to-long term value of the Shares is subject to a number of factors relating to the capabilities and development of blockchain technologies, such as the recentness of their development, their dependence on the internet and other technologies, their dependence on the role played by users, developers and validators and the potential for malicious activity. For example, the realization of one or more of the following risks could materially adversely affect the value of the Shares:

- Digital asset networks and related protocols are in the early stages of development. Given the recency of the development of digital asset networks and related protocols, digital assets and the underlying digital asset networks and related protocols may not function as intended and parties may be unwilling to use digital assets, which would dampen the growth, if any, of digital asset networks and related protocols.
- The loss of access to a private key required to access a digital asset may be irreversible. If a private key is lost and no backup of the private key is accessible, or if the private key is otherwise compromised, the owner would be unable to access the digital asset corresponding to that private key.
- Digital asset networks and related protocols are dependent upon the internet. A disruption of the internet or a digital asset network or related protocol, such as the Basic Attention Token Network, would affect the ability to transfer digital assets, including BAT, and, consequently, their value.
- The acceptance of software patches or upgrades to a digital asset network by a significant, but not overwhelming, percentage of the users and validators in a digital asset network, such as the Ethereum Network, could result in a "fork" in such network's blockchain, resulting in the operation of multiple separate blockchain networks.

- Digital asset validating operations can consume significant amounts of electricity, which may have a negative environmental impact and give rise to public opinion against allowing, or government regulations restricting, the use of electricity for validating operations. Additionally, validators may be forced to cease operations during an electricity shortage or power outage.
- Many digital asset networks face significant scaling challenges and are being upgraded with various features to increase the speed and throughput of digital asset transactions. These attempts to increase the volume of transactions may not be effective.
- The open-source structure of many digital asset network protocols, such as the protocol for the Basic Attention Token Network, means that developers and other contributors are generally not directly compensated for their contributions in maintaining and developing such protocols. As a result, the developers and other contributors of a particular digital asset may lack a financial incentive to maintain or develop the network, or may lack the resources to adequately address emerging issues. Alternatively, some developers may be funded by companies whose interests are at odds with other participants in a particular digital asset network. A failure to properly monitor and upgrade the protocol of the Basic Attention Token Network could damage that network.
- Moreover, in the past, flaws in the source code for digital asset networks and related protocols have been exposed and exploited, including flaws that disabled some functionality for users, exposed users' personal information and/or resulted in the theft of users' digital assets. The cryptography underlying BAT could prove to be flawed or ineffective, or developments in mathematics and/or technology, including advances in digital computing, algebraic geometry and quantum computing, could result in such cryptography becoming ineffective. In any of these circumstances, a malicious actor may be able to take the Trust's BAT, which would adversely affect the value of the Shares. Moreover, functionality of the Basic Attention Token Network may be negatively affected by such an exploit such that it is no longer attractive to users, thereby dampening demand for BAT. Even if another digital asset other than BAT were affected by similar circumstances, any reduction in confidence in the source code or cryptography underlying digital asset networks and related protocols generally could negatively affect the demand for digital assets and therefore adversely affect the value of the Shares.

Moreover, because digital assets, including BAT, have existed for a short period of time and are continuing to be developed, there may be additional risks to digital asset networks and related protocols that are impossible to predict as of the date of this Annual Report.

***Digital assets represent a new and rapidly evolving industry, and the value of the Shares depends on the acceptance of BAT.***

The first digital asset, Bitcoin, was launched in 2009. BAT launched in 2017. In general, digital asset networks, including the Ethereum Network and related protocols represent a new and rapidly evolving industry that is subject to a variety of factors that are difficult to evaluate. For example, the realization of one or more of the following risks could materially adversely affect the value of the Shares:

- Banks and other established financial institutions, whether voluntarily or in response to regulatory feedback, may refuse to process funds for BAT transactions; process wire transfers to or from Digital Asset Trading Platforms, BAT-related companies or service providers; or maintain accounts for persons or entities transacting in BAT. As a result, the prices of BAT are largely determined by speculators and validators, thus contributing to price volatility that makes retailers less likely to accept BAT in the future.
- Banks may not provide banking services, or may cut off banking services, to businesses that provide digital asset-related services or that accept digital assets as payment, which could dampen liquidity in the market and damage the public perception of digital assets generally or any one digital asset in particular, such as BAT, and their or its utility as a payment system, which could decrease the price of digital assets generally or individually.
- The prices of digital assets may be determined on a relatively small number of Digital Asset Trading Platforms by a relatively small number of market participants, many of whom are speculators or those intimately involved with the issuance of such digital assets, such as validators or developers, which could contribute to price volatility that makes retailers less likely to accept digital assets in the future.

- Certain privacy-preserving features have been or are expected to be introduced to a number of digital asset networks. If any such features are introduced to the Basic Attention Token Network, any trading platforms or businesses that facilitate transactions in BAT may be at an increased risk of criminal or civil lawsuits, or of having banking services cut off if there is a concern that these features interfere with the performance of anti-money laundering duties and economic sanctions checks. As of the date of this Annual Report, the Sponsor is not aware of any ongoing efforts to introduce privacy-preserving features to the Basic Attention Token Network.
- Users, developers and validators may switch to or adopt certain digital asset networks or protocols at the expense of their engagement with other digital asset networks and protocols, which may negatively impact those networks and protocols, including the Basic Attention Token Network.

***The Basic Attention Token Network only launched in 2017 and the Brave Browser is a new technology that could fail to attract users, which could have an adverse impact on the value of BAT and an investment in the Shares.***

The Basic Attention Token Network, the peer-to-peer platform on which BAT is the native digital currency, is a blockchain-based digital advertising and services platform. The Basic Attention Token Network includes the Brave Browser, an open-source, privacy-focused and secure web browser that is designed to block trackers and malware often associated with digital advertisements. The Basic Attention Token Network only launched in 2017 and as a result, has a limited operating history. There can be no guarantee that BAT will achieve market acceptance as a digital asset. Any failure by BAT to gain broad market acceptance may have a negative impact on the value of the shares. In addition, although the technology on which BAT relies has been in use for several years and gained some traction, it remains a relatively novel technology and operating such technology requires significant expertise. Any failure to attract or retain users including due to reduced interest in such technology could have an adverse impact on the value of BAT and an investment in the Shares.

***ERC-20 tokens rely on the ERC-20 standard and the Ethereum Network to function, any adverse impact on the ERC-20 and/or the Ethereum Network could have an adverse impact on the value of BAT and an investment in the Shares.***

BAT was created using Ethereum Request for Comment-20 (“ERC-20”), a type of smart contract standard on the Ethereum Network that allows users to create new digital assets. ERC-20 tokens are distinct from Ethereum because they can have their own unique set of features. However, because ERC-20 tokens are created on the Ethereum Network, they rely on the Ethereum Network for key functionality such as storage, transfer and usage. As a result, vulnerabilities or attacks on the ERC-20 standard and/or the Ethereum Network more generally can cause vulnerabilities or attacks on ERC-20 tokens such as BAT. For example, in February 2018, a vulnerability in the transfer of ERC-20 tokens was discovered that led to the loss of certain ERC-20 tokens, such as EOS, QTUM and Golem. In addition, in April 2018, many digital asset trading platforms halted trading of all ERC-20 tokens because of newly discovered vulnerabilities in the ERC-20 standard. Any future similar adverse impacts on the ERC-20 standard and/or the Ethereum Network could have an adverse impact on the value of BAT and an investment in the Shares.

***Smart contracts are a new technology and ongoing development may magnify initial problems, cause volatility on the networks that use smart contracts and reduce interest in them, which could have an adverse impact on the value of BAT.***

Smart contracts are programs that run on a blockchain that execute automatically when certain conditions are met. Since smart contracts typically cannot be stopped or reversed, vulnerabilities in their programming can have damaging effects. For example, in June 2016, a vulnerability in the smart contracts underlying The DAO, a distributed autonomous organization for venture capital funding, allowed an attack by a hacker to syphon approximately \$60 million worth of Ether from The DAO’s accounts into a segregated account. In the aftermath of the theft, certain developers and core contributors pursued a “hard fork” of the Ethereum Network in order to erase any record of the theft. Despite these efforts, the price of Ether dropped approximately 35% in the aftermath of the attack and subsequent hard fork. In addition, in July 2017, a vulnerability in a smart contract for a multi-signature wallet software developed by Parity led to a \$30 million theft of Ether, and in November 2017, a new vulnerability in Parity’s wallet software led to roughly \$160 million worth of Ether being indefinitely frozen in an account. Other smart contracts, such as bridges between blockchain networks and DeFi protocols have also been manipulated, exploited or used in ways that were not intended or envisioned by their creators such that attackers syphoned over \$3.8 billion worth of digital assets from smart contracts in 2022. Initial problems and continued problems with the development, design and deployment of smart contracts may have an adverse effect on the value of BAT, which could have a negative impact on the value of the Shares.

***Changes in the governance of a digital asset network or protocol may not receive sufficient support from users and validators, which may negatively affect that digital asset network's or protocol's ability to grow and respond to challenges.***

The governance of some digital asset networks and protocols, such as the Basic Attention Token Network, is generally by voluntary consensus and open competition. For such networks and protocols, there may be a lack of consensus or clarity on that network's or protocol's governance, which may stymie such network's or protocol's utility, adaptability, and ability to grow and face challenges.

The foregoing notwithstanding, the underlying software for some digital asset networks and protocols, such as the Basic Attention Token Network, is informally or formally managed or developed by a group of core developers that propose amendments to the relevant network's or protocol's source code. Core developers' roles may evolve over time, generally based on self-determined participation. If a significant majority of users and validators were to adopt amendments to the Basic Attention Token Network based on the proposals of such core developers, the Basic Attention Token Network would be subject to new source code that may adversely affect the value of BAT.

As a result of the foregoing, it may be difficult to find solutions or marshal sufficient effort to overcome any future problems, especially long-term problems, on digital asset networks.

***Digital asset networks face significant scaling challenges and efforts to increase the volume and speed of transactions may not be successful.***

Many digital asset networks face significant scaling challenges due to the fact that public permissionless blockchains generally face a tradeoff between security and scalability. One means through which digital asset networks that utilize public, permissionless blockchains achieve security is decentralization, meaning that no intermediary is responsible for securing and maintaining these systems. For example, a greater degree of decentralization of a public, permissionless blockchain generally means a given digital asset network is less susceptible to manipulation or capture. In practice, this typically means that every single node on a given digital asset network is responsible for securing the system by processing every transaction and maintaining a copy of the entire state of the network. As a result, a digital asset network that utilizes a public, permissionless blockchain may be limited in the number of transactions it can process by the computing capabilities of each single fully participating node. Many developers are actively researching and testing scalability solutions for public blockchains that do not necessarily result in lower levels of security or decentralization, such as off-chain payment channels and Layer 2 networks. Off-chain payment channels would allow parties to transact without requiring the full processing power of a blockchain. Layer 2 networks can increase the scalability of a blockchain, by allowing users to transact on a second blockchain deployed on top of a "Layer 1" network.

As of December 31, 2024, the Ethereum Network handled approximately 14 transactions per second. In an effort to increase the volume of transactions that can be processed on a given digital asset network, many digital assets are being upgraded with various features to increase the speed and throughput of digital asset transactions.

As corresponding increases in throughput lag behind growth in the use of digital asset networks, average transaction fees and settlement times may increase considerably. For example, the Ethereum Network has been, at times, at capacity, which has led to increased transaction fees. Since January 1, 2022, Ether average daily transaction fees have ranged from \$0.56 per transaction, on August 31, 2024, to as high as \$200.27 per transaction, on May 1, 2022. As of December 31, 2024, Ether average daily transaction fees stood at \$3.52 per transaction. Increased fees and decreased settlement speeds could preclude certain uses for BAT (e.g., micropayments), and could reduce demand for, and the price of, BAT, which could adversely impact the value of the Shares.

There is no guarantee that any of the mechanisms in place or being explored for increasing the scale of settlement or throughput of Ethereum Network transactions will be effective, or how long these mechanisms will take to become effective, which could adversely impact the value of the Shares.

***Digital asset networks are developed by a diverse set of contributors and the perception that certain high-profile contributors will no longer contribute to the network could have an adverse effect on the market price of the related digital asset.***

Digital asset networks and related protocols are often developed by a diverse set of contributors, but are also often developed by identifiable and high-profile contributors. The perception that certain high-profile contributors may no longer contribute to the applicable digital asset network or protocol may have an adverse effect on the market price of any related digital

assets. For example, in June 2017, an unfounded rumor circulated that Ethereum protocol developer Vitalik Buterin had died. Following the rumor, the price of Ether decreased approximately 20% before recovering after Buterin himself dispelled the rumor. Some have speculated that the rumor led to the decrease in the price of Ether. In the event a high-profile contributor to the Ethereum Network, such as Vitalik Buterin, is perceived as no longer contributing to the Ethereum Network due to death, retirement, withdrawal, incapacity, or otherwise, whether or not such perception is valid, it could negatively affect the price of BAT, which could adversely impact the value of the Shares.

***Digital assets may have concentrated ownership and large sales or distributions by holders of such digital assets, or any ability to participate in or otherwise influence a digital asset's underlying network, could have an adverse effect on the market price of such digital asset.***

As of December 31, 2024, the largest 100 BAT wallets held approximately 78% of the BAT in circulation. Moreover, it is possible that other persons or entities control multiple wallets that collectively hold a significant amount of BAT, even if they individually only hold a small amount, and it is possible that some of these wallets are controlled by the same person or entity. As a result of this concentration of ownership, large sales or distributions by such holders could have an adverse effect on the market price of BAT.

***If the digital asset award or transaction fees for recording transactions on the Ethereum Network are not sufficiently high to incentivize validators, or if certain jurisdictions continue to limit or otherwise regulate validating activities, validators may cease expanding validating power or demand high transaction fees, which could negatively impact the value of BAT and the value of the Shares.***

In 2021, the Ethereum Network implemented the EIP-1559 upgrade. EIP-1559 changed the methodology used to calculate transaction fees paid to Ether validators (then called “miners”) in such a manner that reduced the total net issuance of Ether fees paid to miners. If the digital asset awards for validating blocks or the transaction fees for recording transactions on the Ethereum Network are not sufficiently high to incentivize validators, or if certain jurisdictions continue to limit or otherwise regulate validating activities, validators may cease expending validating power to validate blocks and confirmations of transactions on the Ethereum Blockchain could be slowed. For example, the realization of one or more of the following risks could materially adversely affect the value of the Shares:

- Over the past several years, digital asset validating operations have evolved from individual users validating with computer processors, graphics processing units and first generation application specific integrated circuit machines to “professionalized” validating operations using proprietary hardware or sophisticated machines. If the profit margins of digital asset validating operations are not sufficiently high, including due to an increase in electricity costs, digital asset validators are more likely to immediately sell digital assets earned by validating, resulting in an increase in liquid supply of that digital asset, which would generally tend to reduce that digital asset’s market price.
- A reduction in digital assets staked by validators on the Ethereum Network could increase the likelihood of a malicious actor or botnet obtaining control. See “—If a malicious actor or botnet obtains control of more than 50% of the validating power on the Ethereum Network, or otherwise obtains control over the Ethereum Network through its influence over core developers or otherwise, such actor or botnet could manipulate the Blockchain to adversely affect the value of the Shares or the ability of the Trust to operate.”
- Validators have historically accepted relatively low transaction confirmation fees on most digital asset networks. If validators demand higher transaction fees for recording transactions in the Blockchain or a software upgrade automatically charges fees for all transactions on the Ethereum Network, the cost of using BAT may increase and the marketplace may be reluctant to accept BAT as a means of payment. Alternatively, validators could collude in an anti-competitive manner to reject low transaction fees on the Ethereum Network and force users to pay higher fees, thus reducing the attractiveness of the Basic Attention Token Network. Higher transaction confirmation fees resulting through collusion or otherwise may adversely affect the attractiveness of the Basic Attention Token Network, the value of BAT and the value of the Shares.
- To the extent that any validators cease to record transactions that do not include the payment of a transaction fee in validated blocks or do not record a transaction because the transaction fee is too low, such transactions will not be recorded on the Blockchain until a block is validated by a validator who does not require the payment of transaction fees or is willing to accept a lower fee. Any widespread delays in the recording of transactions could result in a loss of confidence in the digital asset network.

- During the course of ordering transactions and validating blocks, validators may be able to prioritize certain transactions in return for increased transaction fees, an incentive system known as “Maximal Extractable Value” or MEV. For example, in blockchain networks that facilitate DeFi protocols in particular, such as the Ethereum Network, users may attempt to gain an advantage over other users by increasing offered transaction fees. Certain software solutions, such as Flashbots, have been developed which facilitate validators in capturing MEV produced by these increased fees. The MEV incentive system may lead to an increase in transaction fees on the Ethereum Network, which may diminish its use. Users or other stakeholders on the Ethereum Network could also view the existence of MEV as unfair manipulation of decentralized digital asset networks, and refrain from using DeFi protocols or the Ethereum Network generally. In addition, it’s possible regulators or legislators could enact rules which restrict the use of MEV, which could diminish the popularity of the Ethereum Network among users and validators. Any of these or other outcomes related to MEV may adversely affect the value of BAT and the value of the Shares.

***If a malicious actor or botnet obtains control of more than 50% of the validating power on the Ethereum Network, or otherwise obtains control over the Basic Attention Token Network through its influence over core developers or otherwise, such actor or botnet could manipulate the Blockchain to adversely affect the value of the Shares or the ability of the Trust to operate.***

If a malicious actor or botnet (a volunteer or hacked collection of computers controlled by networked software coordinating the actions of the computers) obtains a majority of the validating power on the Ethereum Network, it may be able to alter the Blockchain on which transactions in BAT rely by constructing fraudulent blocks or preventing certain transactions from completing in a timely manner, or at all. The malicious actor or botnet could also control, exclude or modify the ordering of transactions. Although the malicious actor or botnet may not be able to generate new digital assets or transactions using such control, it could “double-spend” its own digital assets (i.e., spend the same tokens in more than one transaction) and prevent the confirmation of other users’ transactions for so long as it maintained control. To the extent that such malicious actor or botnet did not yield its control of the validating power on the Ethereum Network or the BAT community did not reject the fraudulent blocks as malicious, reversing any changes made to the Blockchain may not be possible. Further, a malicious actor or botnet could create a flood of transactions in order to slow down the Basic Attention Token Network.

For example, in August 2020, the Ethereum Classic network was the target of two double-spend attacks by an unknown actor or actors that gained more than 50% of the processing power of the Ethereum Classic network. The attacks resulted in reorganizations of the Ethereum Classic blockchain that allowed the attacker or attackers to reverse previously recorded transactions in excess of \$5.0 million and \$1.0 million.

In addition, in May 2019, the Bitcoin Cash network experienced a 50% attack when two large mining pools reversed a series of transactions in order to stop an unknown miner from taking advantage of a flaw in a recent Bitcoin Cash protocol upgrade. Although this particular attack was arguably benevolent, the fact that such coordinated activity was able to occur may negatively impact perceptions of the Bitcoin Cash network. Although the two attacks described above took place on proof-of-work-based networks, it is possible that a similar attack may occur on the Ethereum Network, which could negatively impact the value of BAT and the value of the Shares.

Although there are no known reports of malicious activity on, or control of the Ethereum Network, if groups of coordinating or connected Ether holders that together have more than 50% of outstanding Ether, were to stake that Ether and run validators, they could exert authority over the validation of BAT transactions. This risk is heightened if over 50% of the validating power on the network falls within the jurisdiction of a single governmental authority. If network participants, including the core developers and the administrators of validating pools, do not act to ensure greater decentralization of Ethereum Network validators, the feasibility of a malicious actor obtaining control of the validating power on the Ethereum Network will increase, which may adversely affect the value of BAT and the value of the Shares.

A malicious actor may also obtain control over the Ethereum Network through its influence over core developers by gaining direct control over a core developer or an otherwise influential programmer. To the extent that the Ethereum ecosystem does not grow, the possibility that a malicious actor may be able to maliciously influence the Ethereum Network in this manner will remain heightened. Moreover, it is possible that a group of Ether holders that together control more than 50% of outstanding Ether are in fact part of the initial or current core developer group, or are otherwise influential members of the Ethereum community. To the extent that the initial or current core developer groups also control more than 50% of outstanding Ether, as some believe, the risk of and arising from this particular group of users obtaining control of the

validating power on the Ethereum Network will be even greater, and should this materialize, it may adversely affect the value of the Shares.

***A temporary or permanent “fork” or a “clone” could adversely affect the value of the Shares.***

The Ethereum Network, the network on which the Basic Attention Token Network operates, operates using open-source protocols, meaning that any user can download the software, modify it and then propose that the users and validators adopt the modification. When a modification is introduced and a substantial majority of users and validators’ consent to the modification, the change is implemented and the network remains uninterrupted. However, if less than a substantial majority of users and validators’ consent to the proposed modification, and the modification is not compatible with the software prior to its modification, the consequence would be what is known as a “hard fork” of the Ethereum Network, with one group running the pre-modified software and the other running the modified software. The effect of such a fork would be the existence of two versions of BAT running in parallel, yet lacking interchangeability. For example, in September 2022, the Ethereum Network transitioned to a proof-of-stake model, in an upgrade referred to as the “Merge.” Following the Merge, a hard fork of the Ethereum Network occurred, as certain Ethereum miners and network participants planned to maintain the proof-of-work consensus mechanism that was removed as part of the Merge. This version of the network was rebranded as “Ethereum Proof-of-Work.”

Forks may also occur as a digital asset network’s community’s response to a significant security breach. For example, in July 2016, Ethereum “forked” into Ethereum and a new digital asset, Ethereum Classic, as a result of the Ethereum Network community’s response to a significant security breach. In June 2016, an anonymous hacker exploited a smart contract running on the Ethereum Network to syphon approximately \$60 million of Ether held by The DAO, a distributed autonomous organization, into a segregated account. In response to the exploit, most participants in the Ethereum community elected to adopt a “fork” that effectively reversed the exploit. However, a minority of users continued to develop the original blockchain, referred to as “Ethereum Classic” with the digital asset on that blockchain now referred to as ETC. ETC now trades on several Digital Asset Trading Platforms. A fork may also occur as a result of an unintentional or unanticipated software flaw in the various versions of otherwise compatible software that users run. Such a fork could lead to users and validators abandoning the digital asset with the flawed software. It is possible, however, that a substantial number of users and validators could adopt an incompatible version of the digital asset while resisting community-led efforts to merge the two chains. This could result in a permanent fork, as in the case of Ethereum and Ethereum Classic.

Furthermore, a hard fork can lead to new security concerns. For example, when the Ethereum and Ethereum Classic networks, two other digital asset networks, split in July 2016, replay attacks, in which transactions from one network were rebroadcast to nefarious effect on the other network, plagued Ethereum trading platforms through at least October 2016. An Ethereum trading platform announced in July 2016 that it had lost 40,000 Ethereum Classic, worth about \$100,000 at that time, as a result of replay attacks. Similar replay attack concerns occurred in connection with the Bitcoin Cash and Bitcoin Satoshi’s Vision networks split in November 2018. Another possible result of a hard fork is an inherent decrease in the level of security due to significant amounts of validating power remaining on one network or migrating instead to the new forked network. After a hard fork, it may become easier for an individual validator or validating pool’s validating power to exceed 50% of the validating power of a digital asset network that retained or attracted less validating power, thereby making digital asset networks that rely on proof-of-stake more susceptible to attack.

Digital asset networks and related protocols may also be cloned. Unlike a fork of a digital asset network, which modifies an existing blockchain, and results in two competing digital asset networks, each with the same genesis block, a “clone” is a copy of a protocol’s codebase, but results in an entirely new blockchain and new genesis block. For tokens built on top of another network, such as BAT, the result of a clone would be a new protocol with a new transactional history rather than an entirely new blockchain. Tokens are created solely from the new “clone” network and, in contrast to forks, holders of tokens of the existing network that was cloned do not receive any tokens of the new network. A “clone” results in a competing network that has characteristics substantially similar to the network it was based on, subject to any changes as determined by the developer(s) that initiated the clone.

A hard fork may adversely affect the price of BAT at the time of announcement or adoption. For example, the announcement of a hard fork could lead to increased demand for the pre-fork digital asset, in anticipation that ownership of the pre-fork digital asset would entitle holders to a new digital asset following the fork. The increased demand for the pre-fork digital asset may cause the price of the digital asset to rise. After the hard fork, it is possible the aggregate price of the two versions of the digital asset running in parallel would be less than the price of the digital asset immediately prior to the fork. Furthermore, while the Trust would be entitled to both versions of the digital asset running in parallel, the Sponsor will, as

permitted by the terms of the Trust Agreement, determine which version of the digital asset is generally accepted as the Basic Attention Token Network and should therefore be considered the appropriate network for the Trust's purposes, and there is no guarantee that the Sponsor will choose the digital asset that is ultimately the most valuable fork. Either of these events could therefore adversely impact the value of the Shares. As an illustrative example of a digital asset hard fork, following the DAO hack in July 2016, holders of Ether voted on-chain to reverse the hack, effectively causing a hard fork. For the days following the vote, the price of Ether rose from \$11.65 on July 15, 2016 to \$14.66 on July 21, 2016, the day after the first Ethereum Classic block was mined. A clone may also adversely affect the price of BAT at the time of announcement or adoption. For example, on November 6, 2016, Rhett Creighton, a Zcash developer, cloned the Zcash network to launch Zclassic, a substantially identical version of the Zcash network that eliminated the Founders' Reward. For the days following the date the first Zclassic block was mined, the price of ZEC fell from \$504.57 on November 5, 2016 to \$236.01 on November 7, 2016 in the midst of a broader sell off of ZEC beginning immediately after the Zcash network launch on October 28, 2016. A clone may also adversely affect the price of BAT at the time of announcement or adoption.

A future fork in or clone of the Basic Attention Token Network could adversely affect the value of the Shares or the ability of the Trust to operate.

***In the event of a hard fork of the Ethereum Network, the Sponsor will, if permitted by the terms of the Trust Agreement, use its discretion to determine which network should be considered the appropriate network for the Trust's purposes, and in doing so may adversely affect the value of the Shares.***

In the event of a hard fork of the Ethereum Network, the Sponsor will, as permitted by the terms of the Trust Agreement, use its discretion to determine, in good faith, which digital asset network, among a group of incompatible forks of the Ethereum Network, is generally accepted as the Basic Attention Token Network and should therefore be considered the appropriate digital asset network for the Trust's purposes. The Sponsor will base its determination on a variety of then relevant factors, including, but not limited to, the Sponsor's beliefs regarding expectations of the core developers of BAT, users, services, businesses, validators and other constituencies, as well as the actual continued acceptance of, validating power on, and community engagement with, the Basic Attention Token Network. There is no guarantee that the Sponsor will choose the digital asset network or digital asset that is ultimately the most valuable fork, and the Sponsor's decision may adversely affect the value of the Shares as a result. The Sponsor may also disagree with shareholders, security vendors and the Index Provider on what is generally accepted as BAT and should therefore be considered "BAT" for the Trust's purposes, which may also adversely affect the value of the Shares as a result.

***Any name change and any associated rebranding initiative by the core developers of BAT may not be favorably received by the digital asset community, which could negatively impact the value of BAT and the value of the Shares.***

From time to time, digital assets may undergo name changes and associated rebranding initiatives. For example, Bitcoin Cash may sometimes be referred to as Bitcoin ABC in an effort to differentiate itself from any Bitcoin Cash hard forks, such as Bitcoin Satoshi's Vision, and in the third quarter of 2018, the team behind ZEN rebranded and changed the name of ZenCash to "Horizen." We cannot predict the impact of any name change and any associated rebranding initiative on BAT. After a name change and an associated rebranding initiative, a digital asset may not be able to achieve or maintain brand name recognition or status that is comparable to the recognition and status previously enjoyed by such digital asset. The failure of any name change and any associated rebranding initiative by a digital asset may result in such digital asset not realizing some or all of the anticipated benefits contemplated by the name change and associated rebranding initiative, and could negatively impact the value of BAT and the value of the Shares.

***If the Basic Attention Token Network is used to facilitate illicit activities, businesses that facilitate transactions in BAT could be at increased risk of criminal or civil lawsuits, or of having services cut off, which could negatively affect the price of BAT and the value of the Shares.***

Digital asset networks have in the past been, and may continue to be, used to facilitate illicit activities. If the Basic Attention Token Network is used to facilitate illicit activities, businesses that facilitate transactions in BAT may be at increased risk of potential criminal or civil lawsuits, or of having banking or other services cut off, BAT could interfere with the performance of anti-money laundering duties and economic sanctions checks. There is also a risk that Digital Asset Trading Platforms may remove BAT from their platforms as a result of these concerns. Other service providers of such businesses may also cut off services if there is a concern that the Basic Attention Token Network is being used to facilitate crime. Any of the aforementioned occurrences could increase regulatory scrutiny of the Basic Attention Token Network and/or

adversely affect the price of BAT, the attractiveness of the Basic Attention Token Network and an investment in the Shares of the Trust.

When the Trust and the Sponsor, acting on behalf of the Trust, sell or deliver, as applicable, BAT, Incidental Rights and/or IR Virtual Currency, they generally do not transact directly with counterparties other than the Authorized Participant, a Liquidity Provider or other similarly eligible financial institutions that are subject to federal and state licensing requirements and maintain practices and policies designed to comply with AML and KYC regulations. When an Authorized Participant, or Liquidity Provider sources BAT in connection with the creation of the Shares or facilitates transactions in BAT at the direction of the Trust or the Sponsor, it directly faces its counterparty and, in all instances, the Authorized Participant or Liquidity Provider, as applicable, follow policies and procedures designed to ensure that it knows the identity of its counterparty. The Authorized Participant is a registered broker-dealer and therefore subject to AML and countering the financing of terrorism obligations under the Bank Secrecy Act as administered by FinCEN and further overseen by the SEC and FINRA.

In accordance with its regulatory obligations, the Authorized Participant, or Liquidity Provider, conducts customer due diligence and enhanced due diligence on its counterparties, which enables it to determine each counterparty's AML and other risks and assign an appropriate risk rating.

As part of its counterparty onboarding process, each of the Authorized Participant and the Liquidity Provider uses third-party services to screen prospective counterparties against various watch lists, including the Specially Designated Nationals List of OFAC and countries and territories identified as non-cooperative by the Financial Action Task Force. If the Sponsor, the Trust, the Authorized Participant or the Liquidity Provider were nevertheless to transact with such a sanctioned entity, the Sponsor, the Trust, the Authorized Participant and the Liquidity Provider would be at increased risk of potential criminal or civil lawsuits.

## **Risk Factors Related to the Digital Asset Markets**

***Recent developments in the digital asset economy have led to extreme volatility and disruption in digital asset markets, a loss of confidence in participants of the digital asset ecosystem, significant negative publicity surrounding digital assets broadly and market-wide declines in liquidity.***

Since the fourth quarter of 2021 and to date, digital asset prices have fluctuated widely. This has led to volatility and disruption in the digital asset markets and financial difficulties for several prominent industry participants, including Digital Asset Trading Platforms, hedge funds and lending platforms. For example, in the first half of 2022, digital asset lenders Celsius Network LLC and Voyager Digital Ltd. and digital asset hedge fund Three Arrows Capital each entered into insolvency proceedings. This resulted in a loss of confidence in participants in the digital asset ecosystem, negative publicity surrounding digital assets more broadly and market-wide declines in digital asset trading prices and liquidity.

Thereafter, in November 2022, FTX, the third largest Digital Asset Trading Platform by volume at the time, halted customer withdrawals amid rumors of the company's liquidity issues and likely insolvency. Shortly thereafter, FTX's CEO resigned and FTX and several affiliates of FTX filed for bankruptcy. The U.S. Department of Justice subsequently brought criminal charges, including charges of fraud, violations of federal securities laws, money laundering, and campaign finance offenses, against FTX's former CEO and others. In November 2023, FTX's former CEO was convicted of fraud and money laundering. Similar charges related to violations of anti-money laundering laws were brought in November 2023 against Binance and its former CEO. FTX is also under investigation by the SEC, the Justice Department, and the Commodity Futures Trading Commission, as well as by various regulatory authorities in the Bahamas, Europe and other jurisdictions. In response to these events, the digital asset markets have experienced extreme price volatility and declines in liquidity. In addition, several other entities in the digital asset industry filed for bankruptcy following FTX's bankruptcy filing, such as BlockFi Inc. and Genesis Global Capital, LLC ("Genesis Capital"), a subsidiary of Genesis Global Holdco, LLC ("Genesis Holdco"). The SEC also brought charges against Genesis Capital and Gemini Trust Company, LLC ("Gemini") in January 2023 for their alleged unregistered offer and sale of securities to retail investors. In October 2023, the New York Attorney General ("NYAG") brought charges against Gemini, Genesis Capital, Genesis Asia Pacific PTE. LTD. ("Genesis Asia Pacific"), Genesis Holdco (together with Genesis Capital and Genesis Asia Pacific, the "Genesis Entities"), Genesis Capital's former CEO, DCG, and DCG's CEO alleging violations of the New York Penal Law, the New York General Business Law and the New York Executive Law. In February 2024, the NYAG amended its complaint to expand the charges against Gemini, the Genesis Entities, Genesis Capital's former CEO, DCG, and DCG's CEO to include harm to additional investors. Also in February 2024, the Genesis Entities entered into a settlement agreement with the NYAG to resolve the

NYAG's allegations against the Genesis Entities, which settlement was subsequently approved by the Bankruptcy Court of the Southern District of New York.

Furthermore, Genesis Holdco, together with certain of its subsidiaries, filed a voluntary petition for reorganization under Chapter 11 of the U.S. Bankruptcy Code in January 2023. While Genesis Holdco is not a service provider to the Trust, it is a wholly owned subsidiary of DCG, and is an affiliate of the Trust and the Sponsor.

These events have led to a substantial increase in regulatory and enforcement scrutiny of the industry as a whole and of Digital Asset Trading Platforms in particular, including from the Department of Justice, the SEC, the CFTC, the White House and Congress. For example, in June 2023, the SEC brought charges against Binance (the "Binance Complaint") and Coinbase (the "Coinbase Complaint"), two of the largest Digital Asset Trading Platforms, alleging that they solicited U.S. investors to buy, sell, and trade "crypto asset securities" through their unregistered trading platforms and operated unregistered securities exchanges, brokerages and clearing agencies. Binance subsequently announced that it would be suspending USD deposits and withdrawals on Binance.US and that it plans to delist its USD trading pairs. In addition, in November 2023, the SEC brought similar charges against Kraken (the "Kraken Complaint"), alleging that it operated as an unregistered securities exchange, brokerage and clearing agency. Binance and Kraken continue to litigate these charges against the SEC; in February 2025, the SEC announced it had filed a joint stipulation with Coinbase to dismiss the enforcement action against it. The Binance Complaint and the Kraken Complaint have led, and may in the future lead, to further volatility in digital asset prices.

These events have also led to significant negative publicity around digital asset market participants including DCG, Genesis and DCG's other affiliated entities. This publicity could negatively impact the reputation of the Sponsor and have an adverse effect on the trading price and/or the value of the Shares. Moreover, sales of a significant number of Shares of the Trust as a result of these events could have a negative impact on the trading price of the Shares.

Digital asset markets have also been negatively impacted by the failure of entities perceived to be integral to the digital asset ecosystem. For example, in March 2023, state banking regulators placed Silicon Valley Bank and Signature Bank into Federal Deposit Insurance Corporation ("FDIC") receiverships. Also, in March 2023, Silvergate Bank announced plans to wind down and liquidate its operations. Because these banks were perceived to be the banks most open to providing services for the digital asset ecosystem in the United States, their failures may impact the willingness of banks (based on regulatory pressure or otherwise) to provide banking services to digital asset market participants. In addition, because these banks were perceived to be the banks most open to providing services for the digital asset ecosystem, their failure has caused a number of companies that provide digital asset-related services to be unable to find banks that are willing to provide them with such banking services. The inability to access banking services could negatively impact digital asset market participants and therefore the value of digital assets, including BAT, and thus the Shares. In addition, although these events did not have an impact directly on the Trust or the Sponsor when these bank failures occurred, it is possible that a future closing of a bank with which the Trust or the Sponsor has a financial relationship could subject the Trust or the Sponsor to adverse conditions and pose challenges in finding an alternative suitable bank to provide the Trust or the Sponsor with bank accounts and banking services.

In January 2025, the SEC launched a crypto task force dedicated to developing a comprehensive and clear regulatory framework for digital assets led by Commissioner Hester Peirce. Subsequently, Commissioner Peirce announced a list of specific priorities to further that initiative, which included pursuing final rules related to a digital asset's security status, a revised path to registered offerings and listings for digital asset-based investment vehicles, and clarity regarding digital asset custody, lending and staking.

Events such as these that impact the wider digital asset ecosystem are continuing to develop and change at a rapid pace and it is not possible to predict at this time all of the risks that they may pose to the Sponsor, the Trust, their affiliates and/or the Trust's third-party service providers, or on the digital asset industry as a whole.

Continued disruption and instability in the digital asset markets as these events develop, including declines in the trading prices and liquidity of BAT, or the failure of service providers to the Trust could have a material adverse effect on the value of the Shares and the Shares could lose all or substantially all of their value.

***The value of the Shares relates directly to the value of BAT, the value of which may be highly volatile and subject to fluctuations due to a number of factors.***

The value of the Shares relates directly to the value of the BAT held by the Trust and fluctuations in the price of BAT could adversely affect the value of the Shares. The market price of BAT may be highly volatile, and subject to a number of factors, including:

- An increase in the global BAT supply;
- Manipulative trading activity on Digital Asset Trading Platforms, which, in many cases, are largely unregulated;
- The adoption of BAT as a medium of exchange, store-of-value or other consumptive asset and the maintenance and development of the open-source software protocol of the Basic Attention Token Network;
- Forks in the Ethereum Network;
- Investors' expectations with respect to interest rates, the rates of inflation of fiat currencies or BAT, and Digital Asset Trading Platform rates;
- Consumer preferences and perceptions of BAT specifically and digital assets generally;
- Fiat currency withdrawal and deposit policies on Digital Asset Trading Platforms;
- The liquidity of Digital Asset Markets and any increase or decrease in trading volume on Digital Asset Markets;
- Investment and trading activities of large investors that invest directly or indirectly in BAT;
- An active derivatives market for BAT or for digital assets generally;
- A determination that BAT is a security or changes in BAT's status under the federal securities laws;
- Monetary policies of governments, trade restrictions, currency devaluations and revaluations and regulatory measures or enforcement actions, if any, that restrict the use of BAT as a form of payment or the purchase of BAT on the Digital Asset Markets;
- Global or regional political, economic or financial conditions, events and situations, such as the novel coronavirus outbreak;
- Fees associated with processing a BAT transaction and the speed at which transactions are settled on the Ethereum Network;
- Interruptions in service from or closures or failures of major Digital Asset Trading Platforms;
- Decreased confidence in Digital Asset Trading Platforms due to the largely unregulated nature and lack of transparency surrounding the operations of Digital Asset Trading Platforms;
- Increased competition from other forms of digital assets or payment services; and
- The Trust's own acquisitions or dispositions of BAT, since there is no limit on the amount of BAT that the Trust may acquire.

In addition, there is no assurance that BAT will maintain its value in the long or intermediate term. In the event that the price of BAT declines, the Sponsor expects the value of the Shares to decline proportionately.

The value of a BAT as represented by the Index Price or by the Trust's principal market may also be subject to momentum pricing due to speculation regarding future appreciation in value, leading to greater volatility that could adversely affect the value of the Shares. Momentum pricing typically is associated with growth stocks and other assets whose valuation, as determined by the investing public, accounts for future appreciation in value, if any. The Sponsor believes that momentum pricing of BAT has resulted, and may continue to result, in speculation regarding future appreciation in the value of BAT, inflating and making the Index Price more volatile. As a result, BAT may be more likely to fluctuate in value due to changing investor confidence, which could impact future appreciation or depreciation in the Index Price and could adversely affect the value of the Shares.

***Due to the largely unregulated nature and lack of transparency surrounding the operations of Digital Asset Trading Platforms, they may experience fraud, market manipulation, business failures, security failures or operational problems, which may adversely affect the value of BAT and, consequently, the value of the Shares.***

Digital Asset Trading Platforms are relatively new and, in many ways, are not subject to, or may not comply with, regulation in relevant jurisdictions in a manner similar to other regulated trading platforms, such as national securities exchanges or designated contract markets. While many prominent Digital Asset Trading Platforms provide the public with significant information regarding their on-chain activities, ownership structure, management teams, corporate practices, cybersecurity practices and regulatory compliance, many other Digital Asset Trading Platforms do not provide this information. Furthermore, while Digital Asset Trading Platforms are and may continue to be subject to federal and state licensing requirements in the United States, Digital Asset Trading Platforms do not currently appear to be subject to regulation in a similar manner as other regulated trading platforms, such as national securities exchanges or designated contract markets. As a result, the marketplace may lose confidence in Digital Asset Trading Platforms, including prominent trading platforms that handle a significant volume of BAT trading.

Many Digital Asset Trading Platforms, both in the United States and abroad, are unlicensed, not subject to, or not in compliance with, regulation in relevant jurisdictions, or operate without extensive supervision by governmental authorities. In particular, those located outside the United States may be subject to significantly less stringent regulatory and compliance requirements in their local jurisdictions and may take the position that they are not subject to laws and regulations that would apply to a national securities exchange or designated contract market in the United States, or may, as a practical matter, be beyond the ambit of U.S. regulators. As a result, trading activity on or reported by these Digital Asset Trading Platforms is generally significantly less regulated than trading activity on or reported by regulated U.S. securities and commodities markets, and may reflect behavior that would be prohibited in regulated U.S. trading venues. For example, in 2022, one report claimed that trading volumes on Digital Asset Trading Platforms were inflated by over 70% due to false or non-economic trades, with specific focus on unlicensed trading platforms located outside of the United States. Such reports may indicate that the Digital Asset Trading Platform Market is significantly smaller than expected and that the U.S. makes up a significantly larger percentage of the Digital Asset Trading Platform Market than is commonly understood, or that a much larger portion of digital asset market activity takes place on decentralized finance platforms than is commonly understood. Nonetheless, any actual or perceived false trading in the Digital Asset Trading Platform Market, and any other fraudulent or manipulative acts and practices, could adversely affect the value of BAT and/or negatively affect the market perception of BAT which could in turn adversely impact the value of the Shares.

The SEC has also identified possible sources of fraud and manipulation in the Digital Asset Markets generally, including, among others (1) “wash-trading”; (2) persons with a dominant position in a digital asset manipulating pricing in such digital asset; (3) hacking of the underlying digital asset network and trading platforms; (4) malicious control of the underlying digital asset network; (5) trading based on material, non-public information (for example, plans of market participants to significantly increase or decrease their holdings in a digital asset, new sources of demand for a digital asset) or based on the dissemination of false and misleading information; (6) manipulative activity involving purported “stablecoins,” including Tether; and (7) fraud and manipulation at Digital Asset Markets. The use or presence of such acts and practices in the Digital Asset Markets could, for example, falsely inflate the volume of BAT present in the Digital Asset Markets or cause distortions in the price of BAT, among other things that could adversely affect the Trust or cause losses to shareholders. Moreover, tools to detect and deter fraudulent or manipulative trading activities, such as market manipulation, front-running of trades, and wash-trading, may not be available to or employed by Digital Asset Markets, or may not exist at all. Many Digital Asset Markets also lack certain safeguards put in place by exchanges for more traditional assets to enhance the stability of trading on the exchanges and prevent “flash crashes,” such as limit-down circuit breakers. As a result, the prices of BAT on Digital Asset Markets may be subject to larger and/or more frequent sudden declines than assets traded on more traditional exchanges.

In addition, over the past several years, some Digital Asset Trading Platforms have been closed, been subject to criminal and civil litigation and have entered into bankruptcy proceedings due to fraud and manipulative activity, business failure and/or security breaches. In many of these instances, the customers of such Digital Asset Trading Platforms were not compensated or made whole for the partial or complete losses of their account balances in such Digital Asset Trading Platforms. In some instances, customers are made whole only in dollar terms as of the Digital Asset Trading Platform’s date of failure, rather than on a digital asset basis, meaning customers may still lose out on any price increase in digital assets.

While smaller Digital Asset Trading Platforms are less likely to have the infrastructure and capitalization that make larger Digital Asset Trading Platforms more stable, larger Digital Asset Trading Platforms are more likely to be appealing targets for hackers and malware and their shortcomings or ultimate failures are more likely to have contagion effects on the digital asset ecosystem, including on the price of BAT, and therefore may be more likely to be targets of regulatory enforcement action. For example, in November 2022, FTX, another of the world's largest Digital Asset Trading Platforms, filed for bankruptcy protection and subsequently halted customer withdrawals as well as trading on its FTX.US platform. Fraud, security failures, and operational problems all played a role in FTX's issues and downfall. Moreover, Digital Asset Trading Platforms have been a subject of enhanced regulatory and enforcement scrutiny, and Digital Asset Markets have experienced continued instability, following the failure of FTX. In particular, in June 2023, the SEC brought the Binance Complaint and Coinbase Complaint, alleging that Binance and Coinbase operated unregistered securities exchanges, brokerages and clearing agencies. In addition, in November 2023, the SEC brought the Kraken Complaint, alleging that Kraken operated as an unregistered securities exchange, brokerage and clearing agency.

Negative perception, a lack of stability and standardized regulation in the Digital Asset Markets and/or the closure or temporary shutdown of Digital Asset Trading Platforms due to fraud, business failure, security breaches or government mandated regulation, and associated losses by customers, may reduce confidence in the Basic Attention Token Network and result in greater volatility in the prices of BAT. Furthermore, the closure or temporary shutdown of a Digital Asset Trading Platform used in calculating the Index Price may result in a loss of confidence in the Trust's ability to determine its NAV on a daily basis. These potential consequences of such a Digital Asset Trading Platform's failure could adversely affect the value of the Shares.

***Digital Asset Trading Platforms may be exposed to front-running.***

Digital Asset Trading Platforms may be susceptible to "front-running," which refers to the process when someone uses technology or market advantage to get prior knowledge of upcoming transactions. Front-running is a frequent activity on centralized as well as decentralized trading platforms. By using bots functioning on a millisecond-scale timeframe, bad actors are able to take advantage of the forthcoming price movement and make economic gains at the cost of those who had introduced these transactions. The objective of a front runner is to buy tokens at a low price and later sell them at a higher price while simultaneously exiting the position. To the extent that front-running occurs, it may result in investor frustrations and concerns as to the price integrity of Digital Asset Trading Platforms and digital assets more generally.

***Digital Asset Trading Platforms may be exposed to wash-trading.***

Digital Asset Trading Platforms may be susceptible to wash-trading. Wash-trading occurs when offsetting trades are entered into for other than bona fide reasons, such as the desire to inflate reported trading volumes. Wash-trading may be motivated by non-economic reasons, such as a desire for increased visibility on popular websites that monitor markets for digital assets so as to improve a trading platform's attractiveness to investors who look for maximum liquidity, or it may be motivated by the ability to attract listing fees from token issuers who seek the most liquid and high-volume trading platforms on which to list their tokens. Results of wash-trading may include unexpected obstacles to trade and erroneous investment decisions based on false information.

Even in the United States, there have been allegations of wash-trading even on regulated venues. Any actual or perceived false trading on Digital Asset Trading Platforms, and any other fraudulent or manipulative acts and practices, could adversely affect the value of BAT and/or negatively affect the market perception of BAT.

To the extent that wash-trading either occurs or appears to occur in Digital Asset Trading Platforms, investors may develop negative perceptions about BAT and the digital assets industry more broadly, which could adversely impact the price of BAT and, therefore, the price of the Shares. Wash-trading also may place more legitimate Digital Asset Trading Platforms at a relative competitive disadvantage.

***The Index has a limited history and a failure of the Index Price could adversely affect the value of the Shares.***

The Index has a limited history and the Index Price is a composite reference rate calculated using trading price data from various Digital Asset Trading Platforms chosen by the Index Provider. The Digital Asset Trading Platforms chosen by the Index Provider have also changed over time. The Index Provider may remove or add Digital Asset Trading Platforms to the Index in the future at its discretion. For more information on the inclusion criteria for Digital Asset Trading Platforms in the Index, see "Grayscale Basic Attention Token Trust (BAT)—The Index and the Index Price."

Although the Index is designed to accurately capture the market price of BAT, third parties may be able to purchase and sell BAT on public or private markets not included among the Constituent Trading Platforms of the Index, and such transactions may take place at prices materially higher or lower than the Index Price. Moreover, there may be variances in the prices of BAT on the various Digital Asset Trading Platforms, including as a result of differences in fee structures or administrative procedures on different Digital Asset Trading Platforms. For example, based on data provided by the Index Provider, on any given day during the year ended December 31, 2024, the maximum differential between the 4:00 p.m., New York time spot price of any single Digital Asset Trading Platform included in the Index and the Index Price was 3.25% and the average of the maximum differentials of the 4:00 p.m., New York time spot price of each Digital Asset Trading Platform included in the Index and the Index Price was 2.10%. During this same period, the average differential between the 4:00 p.m., New York time spot prices of all the Digital Asset Trading Platforms included in the Index and the Index Price was 0.17%. All Digital Asset Trading Platforms that were included in the Index throughout the period were considered in this analysis. To the extent such prices differ materially from the Index Price, investors may lose confidence in the Shares' ability to track the market price of BAT, which could adversely affect the value of the Shares.

***The Index Price used to calculate the value of the Trust's BAT may be volatile, and purchasing activity in the Digital Asset Markets associated with Basket creations may affect the Index Price and Share trading prices, adversely affecting the value of the Shares.***

The price of BAT on public Digital Asset Trading Platforms has a very limited history, and during this history, BAT prices on the Digital Asset Markets more generally, and on Digital Asset Trading Platforms individually, have been volatile and subject to influence by many factors, including operational interruptions. While the Index is designed to limit exposure to the interruption of individual Digital Asset Trading Platforms, the Index Price, and the price of BAT generally, remains subject to volatility experienced by Digital Asset Trading Platforms, and such volatility could adversely affect the value of the Shares. For example, since the inception of the Trust's operations, the Index Price ranged from \$0.15 to \$1.73, with the straight average being \$0.44 through December 31, 2024. In addition, during the year ended December 31, 2024, the Index Price ranged from \$0.15 to \$0.37. The Sponsor has not observed a material difference between the Index Price and average prices from the Constituent Trading Platforms individually or as a group. The price of BAT more generally has experienced volatility similar to the Index Price during these periods. For additional information on movement of the Index Price and the price of BAT, see "Management's Discussion and Analysis—Historical Basic Attention Token Prices."

Furthermore, because the number of Digital Asset Trading Platforms is limited, the Index will necessarily be composed of a limited number of Digital Asset Trading Platforms. If a Digital Asset Trading Platform were subjected to regulatory, volatility or other pricing issues, the Index Provider would have limited ability to remove such Digital Asset Trading Platform from the Index, which could skew the price of BAT as represented by the Index. Trading on a limited number of Digital Asset Trading Platforms may result in less favorable prices and decreased liquidity of BAT and, therefore, could have an adverse effect on the value of the Shares.

Purchasing activity associated with acquiring BAT required for the creation of Baskets may increase the market price of BAT on the Digital Asset Markets, which will result in higher prices for the Shares. Increases in the market price of BAT may also occur as a result of the purchasing activity of other market participants. Other market participants may attempt to benefit from an increase in the market price of BAT that may result from increased purchasing activity of BAT connected with the issuance of Baskets. Consequently, the market price of BAT may decline immediately after Baskets are created. Decreases in the market price of BAT may also occur as a result of sales in Secondary Markets by other market participants. If the Index Price declines, the value of the Shares will generally also decline.

***Competition from the emergence or growth of other digital assets could have a negative impact on the price of BAT and adversely affect the value of the Shares.***

As of December 31, 2024, BAT was the 195th largest digital asset by market capitalization, as tracked by CoinMarketCap.com. As of December 31, 2024, the digital assets tracked by CoinMarketCap.com, had a total market capitalization of approximately \$3,291.9 billion (including the approximately \$347.5 million market cap of BAT), as calculated using market prices and total available supply of each digital asset, excluding tokens pegged to other assets. BAT faces competition from a wide range of digital assets, including Bitcoin and Ether. In addition BAT is also supported by fewer trading platforms than more established digital assets, such as Bitcoin and Ether, which could impact its liquidity. In addition, BAT is in direct competition to other digital payment tokens. The Brave Browser may also face competition from centralized internet browsers, such as Google Chrome and Mozilla Firefox. Competition from the emergence or growth of

alternative digital assets or other blockchain-based digital advertising and services platforms could have a negative impact on the demand for, and price of, BAT and thereby adversely affect the value of the Shares.

Investors may invest in BAT through means other than the Shares, including through direct investments in BAT and other potential financial vehicles, possibly including securities backed by or linked to BAT and digital asset financial vehicles similar to the Trust. Market and financial conditions, and other conditions beyond the Sponsor's control, may make it more attractive to invest in other financial vehicles or to invest in BAT directly, which could limit the market for, and reduce the liquidity of, the Shares. In addition, to the extent digital asset financial vehicles other than the Trust tracking the price of BAT are formed and represent a significant proportion of the demand for BAT, large purchases or redemptions of the securities of these digital asset financial vehicles, or private funds holding BAT, could negatively affect the Index Price, the NAV, the NAV per Share, the value of the Shares, the Principal Market NAV and the Principal Market NAV per Share. Moreover, any reduced demand for Shares of the Trust may cause the Shares of the Trust to trade at a discount to the NAV per Share.

***The SEC may approve applications under Rule 19b-4 of the Exchange Act to list competing digital assets as exchange-traded products, which could reduce demand for, and the price of, BAT and adversely impact the value of the Shares.***

To date, the SEC has only approved applications under Rule 19b-4 of the Exchange Act to list spot digital asset exchange-traded products which hold Bitcoin and Ether. However, applications for competing digital assets have been filed and are currently pending, and there can be no guarantee the SEC will not one day approve any such application. If applications to list spot digital asset exchange-traded products are approved, to the extent such competing digital asset exchange-traded products come to represent a significant proportion of the demand for digital assets generally, demand for, and the price of, BAT could be reduced. Such reduced demand could in turn negatively affect the Index Price, the NAV, the NAV per Share, the value of the Shares, the Principal Market NAV and the Principal Market NAV per Share. Accordingly, there can be no assurance that the Trust will be able to maintain its scale and achieve its intended competitive positioning relative to competitors, which could adversely affect the performance of the Trust and the value of the Shares.

***Prices of BAT may be affected due to stablecoins (including Tether and U.S. Dollar Coin ("USDC")), the activities of stablecoin issuers and their regulatory treatment.***

While the Trust does not invest in stablecoins, it may nonetheless be exposed to these and other risks that stablecoins pose for the market for BAT and other digital assets. Stablecoins are digital assets designed to have a stable value over time as compared to typically volatile digital assets, and are typically marketed as being pegged to the value of a referenced asset, normally a fiat currency, such as the U.S. dollar. Although the prices of stablecoins are intended to be stable compared to their referenced asset, in many cases their prices fluctuate, sometimes significantly. This volatility has in the past impacted the prices of certain digital assets, and has at times caused certain stablecoins to lose their "peg" to the underlying fiat currency. Stablecoins are a relatively new phenomenon, and it is impossible to know all of the risks that they could pose to participants in the digital asset markets. In addition, some have argued that some stablecoins, particularly Tether, are improperly issued without sufficient backing in a way that could cause artificial rather than genuine demand for digital assets, raising their prices. Regulators have also charged stablecoin issuers with violations of law or otherwise required certain stablecoin issuers to cease certain operations. For example, on February 17, 2021, the New York Attorney General entered into an agreement with Tether's operators, requiring them to cease any further trading activity with New York persons and pay \$18.5 million in penalties for false and misleading statements made regarding the assets backing Tether. On October 15, 2021, the CFTC announced a settlement with Tether's operators in which they agreed to pay \$42.5 million in fines to settle charges that, among others, Tether's claims that it maintained sufficient U.S. dollar reserves to back every Tether stablecoin in circulation with the "equivalent amount of corresponding fiat currency" held by Tether were untrue.

USDC is a reserve-backed stablecoin issued by Circle Internet Financial that is commonly used as a method of payment in digital asset markets, including the Basic Attention Token market. The issuer of USDC uses the Circle Reserve Fund to hold cash, U.S. Treasury bills, notes and other obligations issued or guaranteed as to principal and interest by the U.S. Treasury, and repurchase agreements secured by such obligations or cash, which serve as reserves backing USDC stablecoins. While USDC is designed to maintain a stable value at 1 U.S. dollar at all times, on March 10, 2023, the value of USDC fell below \$1.00 (and remained below for multiple days) after Circle Internet Financial disclosed that \$3.3 billion of the USDC reserves were held at Silicon Valley Bank, which had entered FDIC receivership earlier that day. Popular stablecoins are reliant on the U.S. banking system and U.S. treasuries, and the failure of either to function normally could impede the function of stablecoins or lead to outsized redemption requests, and therefore could adversely affect the value of the Shares.

Some stablecoins have been asserted to be securities under the federal securities laws. For example, on June 5, 2023, the SEC alleged in a complaint that the stablecoin BUSD, a U.S. dollar stablecoin issued by Binance, was a “crypto asset security” and that Binance “offered and sold to U.S. investors as part of a profit-earning scheme within the Binance ecosystem,” although the court dismissed this claim. In another example, the District Court for the Southern District of New York held that the stablecoin UST, an algorithmic stablecoin intended to maintain a value of one U.S. dollar and issued by Terraform Labs, is a security. Further public concern about the possible security status of stablecoins manifested in November 2023, when the financial technology company PayPal disclosed in a filing that it had received a subpoena from the SEC relating to the PayPal USD stablecoin that requested the production of documents. A determination that a popular stablecoin is a security could lead to outsized redemption requests, and therefore could adversely affect the value of the Shares.

Given the role that stablecoins play in global digital asset markets, their fundamental liquidity can have a dramatic impact on the broader digital asset market, including the market for BAT. Because a large portion of the digital asset market still depends on stablecoins such as Tether and USDC, there is a risk that a disorderly de-pegging or a run on Tether or USDC could lead to dramatic market volatility in, and/or materially and adversely affect the prices of, digital assets more broadly.

Volatility in stablecoins, operational issues with stablecoins (for example, technical issues that prevent settlement), concerns about the sufficiency of any reserves that support stablecoins, or regulatory concerns about stablecoin issuers or intermediaries, such as Bitcoin spot markets, that support stablecoins, could impact individuals’ willingness to trade on trading venues that rely on stablecoins and could impact the price of BAT, and in turn, an investment in the Shares.

***Failure of funds that hold digital assets or that have exposure to digital assets through derivatives to receive SEC approval to list their shares on exchanges could adversely affect the value of the Shares.***

There have been a growing number of attempts to list on national securities exchanges the shares of funds that hold digital assets or that have exposure to digital assets through derivatives. These investment vehicles attempt to provide institutional and retail investors exposure to markets for digital assets and related products. Until recently, the SEC had repeatedly denied such requests. In January 2018, the SEC’s Division of Investment Management outlined several questions that sponsors would be expected to address before the SEC will consider granting approval for funds holding “substantial amounts” of cryptocurrencies or “cryptocurrency-related products.” The questions, which focus on specific requirements of the Investment Company Act, generally fall into one of five key areas: valuation, liquidity, custody, arbitrage and potential manipulation. The SEC has not explicitly stated whether each of the questions set forth would also need to be addressed by entities with similar products and investment strategies that instead pursue registered offerings under the Securities Act, although such entities would need to comply with the registration and prospectus disclosure requirements of the Securities Act. After several years of the SEC denying requests to list shares of various digital asset funds holding Bitcoin on national securities exchanges, including the request to list the shares of Grayscale Bitcoin Trust ETF on NYSE Arca in June 2022, the Sponsor petitioned the United States Court of Appeals for the District of Columbia Circuit for review of the SEC’s final order denying approval to list shares of Grayscale Bitcoin Trust ETF on NYSE Arca as an exchange-traded product. In August 2023, the D.C. Circuit Court of Appeals granted the Sponsor’s petition and vacated the SEC’s order as arbitrary and capricious. The SEC did not seek panel rehearing or rehearing en banc. In October 2023, the D.C. Circuit Court of Appeals remanded the matter to the SEC. Ultimately, on January 10, 2024, the SEC approved NYSE Arca’s 19b-4 application to list the shares of the Grayscale Bitcoin Trust ETF on NYSE Arca as an exchange-traded product, as well as requests to list shares of various other digital asset funds holding spot Bitcoin on national securities exchanges. Subsequently, the SEC approved NYSE Arca’s similar 19b-4 applications to list the shares of the Grayscale Ethereum Trust ETF and Grayscale Ethereum Mini Trust ETF, as well as requests to list the shares of various other investment vehicles that hold spot Ether on national securities exchanges.

Moreover, even though NYSE Arca’s requests with respect to Grayscale Bitcoin Trust ETF, Grayscale Bitcoin Mini Trust ETF, Grayscale Ethereum Trust ETF and Grayscale Ethereum Mini Trust ETF were approved, there is no guarantee that a similar application to list Shares of the Trust on NYSE Arca, or another national securities exchange, would be approved. In particular, Bitcoin is the only digital asset that the SEC has publicly indicated it does not currently view as a security, although the SEC, by action through delegated authority approving exchange rule filings to list shares of trusts holding Ether as commodity-based exchange-traded products, has implicitly taken the view that Ether is not a security. The Sponsor believes that the SEC is unlikely to approve a request to list the shares of a spot exchange-traded product that holds a digital asset that the SEC believes is a security. Moreover, even if the SEC took the view that a digital asset was not a security, based on prior spot exchange-traded product disapprovals, the existence of a CFTC-regulated futures market for the relevant

digital asset would be central to the SEC's approval of any request to list the shares of a spot exchange-traded product holding such digital asset. As of the date hereof, there are only CFTC-regulated futures markets for a limited number of digital assets, including Bitcoin, Ether, Litecoin, Bitcoin Cash, and Dogecoin. As such, there exist significant barriers to obtaining regulatory approval to list the shares of other digital asset investment vehicles, including the Shares of the Trust. Investors should not assume that recent approvals of spot Bitcoin and spot Ether exchange-traded products will subsequently lead to approval of spot exchange-traded products holding other digital assets, such as the Trust. Accordingly, there is no guarantee that the Sponsor will be successful in listing the Shares of the Trust on NYSE Arca even if the Sponsor decides to do so.

The exchange listing of shares of digital asset funds would create more opportunities for institutional and retail investors to invest in the digital asset market. If exchange-listing requests beyond those for funds holding Bitcoin or Ether continue to be denied by the SEC, increased investment interest by institutional or retail investors could fail to materialize, which could reduce the demand for digital assets generally and therefore adversely affect the value of the Shares.

### **Risk Factors Related to the Trust and the Shares**

***The Trust relies on third-party service providers to perform certain functions essential to the affairs of the Trust and the replacement of such service providers could pose challenges to the safekeeping of the Trust's BAT and to the operations of the Trust.***

The Trust relies on the Custodian, the Authorized Participant and other third-party service providers to perform certain functions essential to managing the affairs of the Trust. In addition, the Authorized Participant may rely on one or more Liquidity Providers to source BAT in connection with the creation of Shares. Any disruptions to such service providers' business operations, resulting from business failures, financial instability, security failures, government mandated regulation or operational problems could have an adverse impact on the Trust's ability to access critical services and be disruptive to the operations of the Trust and require the Sponsor to replace such service provider. Moreover, the Sponsor could decide to replace a service provider to the Trust, or a Liquidity Provider could be replaced for other reasons.

If the Sponsor decides, or is required, to replace Coinbase Custody Trust Company, LLC as the custodian of the Trust's BAT, transferring maintenance responsibilities of the Digital Asset Account to another party will likely be complex and could subject the Trust's BAT to the risk of loss during the transfer, which could have a negative impact on the performance of the Shares or result in loss of the Trust's assets.

Moreover, the legal rights of customers with respect to digital assets held on their behalf by a third-party custodian, such as the Custodian, in insolvency proceedings are currently uncertain. The Custodian Agreement contains an agreement by the parties to treat the digital assets credited to the Trust's Digital Asset Account as financial assets under Article 8 of the New York Uniform Commercial Code ("Article 8"), in addition to stating that the Custodian will serve as fiduciary and custodian on the Trust's behalf. The Custodian's parent, Coinbase Global Inc., has stated in its public securities filings that in light of the inclusion in its custody agreements of provisions relating to Article 8 it believes that a court would not treat custodied digital assets as part of its general estate in the event the Custodian were to experience insolvency. However, due to the novelty of digital asset custodial arrangements courts have not yet considered this type of treatment for custodied digital assets and it is not possible to predict with certainty how they would rule in such a scenario. If the Custodian became subject to insolvency proceedings and a court were to rule that the custodied digital assets were part of the Custodian's general estate and not the property of the Trust, then the Trust would be treated as a general unsecured creditor in the Custodian's insolvency proceedings and the Trust could be subject to the loss of all or a significant portion of its assets.

To the extent that Sponsor is not able to find a suitable party willing to serve as the custodian, the Sponsor may be required to terminate the Trust and liquidate the Trust's BAT. In addition, to the extent that the Sponsor finds a suitable party and must enter into a modified Custodian Agreement that is less favorable for the Trust or Sponsor and/or transfer the Trust's assets in a relatively short time period, the safekeeping of the Trust's BAT may be adversely affected, which may in turn adversely affect value of the Shares. Likewise, if the Sponsor and/or the Authorized Participant is required to replace any other service provider, they may not be able to find a party willing to serve in such capacity in a timely manner or at all. If the Sponsor decides, or is required, to replace the Authorized Participant and/or if a Liquidity Provider is replaced or required to be replaced, this could negatively impact the Trust's ability to create new Shares, which would impact the Shares' liquidity and could have a negative impact on the value of the Shares.

***Because of the holding period under Rule 144, the lack of an ongoing redemption program and the Trust's ability to halt creations from time to time, there is no arbitrage mechanism to keep the value of the Shares closely linked to the Index Price and the Shares have historically traded at a substantial premium over, or a substantial discount to, the NAV per Share.***

Shares purchased in a private placement are subject to a holding period under Rule 144. Pursuant to Rule 144, the minimum holding period for Shares purchased in a private placement is one year. In addition, the Trust does not currently operate an ongoing redemption program and may halt creations from time to time. As a result, the Trust cannot rely on arbitrage opportunities resulting from differences between the value of the Shares and the price of BAT to keep the value of the Shares closely linked to the Index Price. As a result, the value of the Shares of the Trust may not approximate the value of the Trust's NAV per Share or meet the Trust's investment objective, and may trade at a substantial premium over, or substantial discount to, the value of the Trust's NAV per Share. For example, in the past, the price of the Shares as quoted on OTCQX varied significantly from the NAV per Share due to these factors, among others, and has historically traded at a substantial premium over, or a substantial discount to, the NAV per Share.

***The Shares may trade at a price that is at, above or below the Trust's NAV per Share as a result of the non-current trading hours between OTCQX and the Digital Asset Trading Platform Market.***

The Trust's NAV per Share will fluctuate with changes in the market value of BAT, and the Sponsor expects the trading price of the Shares to fluctuate in accordance with changes in the Trust's NAV per Share, as well as market supply and demand. However, the Shares may trade on OTCQX at a price that is at, above or below the Trust's NAV per Share for a variety of reasons. For example, OTCQX is open for trading in the Shares for a limited period each day, but the Digital Asset Trading Platform Market is a 24-hour marketplace. During periods when OTCQX is closed but Digital Asset Trading Platforms are open, significant changes in the price of BAT on the Digital Asset Trading Platform Market could result in a difference in performance between the value of BAT as measured by the Index and the most recent NAV per Share or closing trading price. For example, if the price of BAT on the Digital Asset Trading Platform Market, and the value of BAT as measured by the Index, move significantly in a negative direction after the close of OTCQX, the trading price of the Shares may "gap" down to the full extent of such negative price shift when OTCQX reopens. If the price of BAT on the Digital Asset Trading Platform Market drops significantly during hours OTCQX is closed, shareholders may not be able to sell their Shares until after the "gap" down has been fully realized, resulting in an inability to mitigate losses in a rapidly negative market. Even during periods when OTCQX is open, large Digital Asset Trading Platforms (or a substantial number of smaller Digital Asset Trading Platforms) may be lightly traded or closed for any number of reasons, which could increase trading spreads and widen any premium or discount on the Shares.

***Shareholders may suffer a loss on their investment if the Shares trade above or below the Trust's NAV per Share.***

Historically, the Shares have traded at a both premiums and discounts to the NAV per Share, which at times have been substantial. If the Shares trade at a premium, investors who purchase Shares on OTCQX will pay more for their Shares than investors who purchase Shares directly from Authorized Participants. In contrast, if the Shares trade on OTCQX at a discount, investors who purchase Shares directly from Authorized Participants will pay more for their Shares than investors who purchase Shares on OTCQX. The premium or discount at which the Shares have traded has fluctuated over time. From May 16, 2022 to December 31, 2024, the maximum premium of the closing price of the Shares quoted on OTCQX over the value of the Trust's NAV per Share was 821%, and the average premium was 243%, the maximum discount of the closing price of the Shares quoted on OTCQX below the value of the Trust's NAV per Share was 67% and the average discount was 28%. The closing price of the Shares, as quoted on OTCQX at 4:00 p.m., New York time, on each business day between May 16, 2022 to December 31, 2024, has been quoted at a discount on 274 days. As of December 31, 2024, the last business day of the period, the Trust's Shares were quoted on OTCQX at a premium of 232% to the Trust's NAV per Share. As a result, shareholders who purchase Shares on OTCQX may suffer a loss on their investment if they sell their Shares at a time when the premium has decreased from the premium at which they purchased the Shares even if the NAV per Share remains the same. Likewise, shareholders that purchase Shares directly from the Trust may suffer a loss on their investment if they sell their Shares at a time when the Shares are trading at a discount on OTCQX. Furthermore, shareholders may suffer a loss on their investment even if the NAV per Share increases because the decrease in any premium or increase in any discount may offset any increase in the NAV per Share.

***The amount of the Trust's assets represented by each Share will decline over time as the Trust pays the Sponsor's Fee and Additional Trust Expenses, and as a result, the value of the Shares may decrease over time.***

The Sponsor's Fee accrues daily in U.S. dollars at an annual rate based on the NAV Fee Basis Amount, which is based on the NAV of the Trust, and is paid to the Sponsor in BAT. See "Description of the Trust—Impact of Trust Expenses on the Trust's NAV." As a result, the amount of Trust's assets represented by each Share declines as the Trust pays the Sponsor's Fee (or sells BAT in order to raise cash to pay any Additional Trust Expenses), which may cause the Shares to decrease in value over time or dampen any increase in value.

***The value of the Shares may be influenced by a variety of factors unrelated to the value of BAT.***

The value of the Shares may be influenced by a variety of factors unrelated to the price of BAT and the Digital Asset Trading Platforms included in the Index that may have an adverse effect on the value of the Shares. These factors include the following factors:

- Unanticipated problems or issues with respect to the mechanics of the Trust's operations and the trading of the Shares may arise, in particular due to the fact that the mechanisms and procedures governing the creation and offering of the Shares and storage of BAT have been developed specifically for this product;
- The Trust could experience difficulties in operating and maintaining its technical infrastructure, including in connection with expansions or updates to such infrastructure, which are likely to be complex and could lead to unanticipated delays, unforeseen expenses and security vulnerabilities;
- The Trust could experience unforeseen issues relating to the performance and effectiveness of the security procedures used to protect the Digital Asset Account, or the security procedures may not protect against all errors, software flaws or other vulnerabilities in the Trust's technical infrastructure, which could result in theft, loss or damage of its assets; or
- Although the Basic Attention Token Network does not have any privacy enhancing features at this time, if any such features are introduced to the Basic Attention Token Network in the future, service providers may decide to terminate their relationships with the Trust due to concerns that the introduction of privacy enhancing features to the Basic Attention Token Network may increase the potential for BAT to be used to facilitate crime, exposing such service providers to potential reputational harm.

Any of these factors could affect the value of the Shares, either directly or indirectly through their effect on the Trust's assets.

***Shareholders do not have the protections associated with ownership of shares in an investment company registered under the Investment Company Act or the protections afforded by the CEA.***

The Investment Company Act is designed to protect investors by preventing insiders from managing investment companies to their benefit and to the detriment of public investors, such as: the issuance of securities having inequitable or discriminatory provisions; the management of investment companies by irresponsible persons; the use of unsound or misleading methods of computing earnings and asset value; changes in the character of investment companies without the consent of investors; and investment companies from engaging in excessive leveraging. To accomplish these ends, the Investment Company Act requires the safekeeping and proper valuation of fund assets, restricts greatly transactions with affiliates, limits leveraging, and imposes governance requirements as a check on fund management.

The Trust is not a registered investment company under the Investment Company Act, and the Sponsor believes that the Trust is not required to register under such act. Consequently, shareholders do not have the regulatory protections provided to investors in investment companies.

The Trust will not hold or trade in commodity interests regulated by the CEA, as administered by the CFTC. Furthermore, the Sponsor believes that the Trust is not a commodity pool for purposes of the CEA, and that neither the Sponsor nor the Trustee is subject to regulation by the CFTC as a commodity pool operator or a commodity trading adviser in connection with the operation of the Trust. Consequently, shareholders will not have the regulatory protections provided to investors in CEA-regulated instruments or commodity pools.

***The restrictions on transfer and redemption may result in losses on the value of the Shares.***

Shares purchased in a private placement may not be resold except in transactions exempt from registration under the Securities Act and state securities laws, and any such transaction must be approved in advance by the Sponsor. In determining whether to grant approval, the Sponsor will specifically look at whether the conditions of Rule 144 under the Securities Act and any other applicable laws have been met. Any attempt to sell Shares without the approval of the Sponsor in its sole discretion will be void ab initio. See “Description of the Shares—Transfer Restrictions” for more information.

At this time the Sponsor is not accepting redemption requests from shareholders. Because the Sponsor does not believe that the SEC would, at this time, entertain an application for the waiver of rules needed in order to operate an ongoing redemption program, the Sponsor currently has no intention of seeking regulatory approval from the SEC for the Trust to operate an ongoing redemption program and significant barriers to regulatory approval for any request to list the shares of other digital asset investment vehicles, including the Shares of the Trust, remain. Absent the institution of such redemption program, the Shares may trade at a discount in the future, and may do so indefinitely. Therefore, unless the Trust is permitted to, and does, establish a Share redemption program, shareholders will be unable to (or could be significantly impeded in attempting to) sell or otherwise liquidate investments in the Shares, which could have a material adverse impact on demand for the Shares and their value.

***Affiliates of the Trust previously entered into a settlement agreement with the SEC concerning the operation of one such affiliate’s former redemption programs.***

On April 1, 2014, Grayscale Bitcoin Trust ETF, an affiliate of the Trust, launched a program pursuant to which its shareholders could request redemptions from Genesis, an affiliate of the Trust and the sole Authorized Participant of Grayscale Bitcoin Trust ETF at that time. On September 23, 2014, Genesis received a letter from the staff of the SEC’s Office of Compliance Inspections and Examinations summarizing the staff’s findings from an onsite review of Genesis’s broker-dealer activities conducted in June 2014. In its exit report, the staff stated that it had concluded that Grayscale Bitcoin Trust ETF’s redemption program, in which its shareholders were permitted to request the redemption of their shares through Genesis, appeared to violate Regulation M under the Exchange Act because such redemptions of shares took place at the same time Grayscale Bitcoin Trust ETF was in the process of creating shares. On July 11, 2016, Genesis and Grayscale Bitcoin Trust ETF entered into a settlement agreement with the SEC whereby they agreed to a cease-and-desist order against future violations of Rules 101 and 102 of Regulation M under the Exchange Act. Genesis also agreed to pay disgorgement of \$51,650.11 in redemption fees it collected, plus prejudgment interest of \$2,105.68, for a total of \$53,755.79. The Trust currently has no intention of seeking an exemption from the SEC under Regulation M in order to institute a redemption program.

***There is no guarantee that an active trading market for the Shares will continue to develop.***

The Shares are qualified for public trading on OTCQX and an active trading market for the Shares has developed. However, there can be no assurance that such trading market will be maintained or continue to develop. In addition, OTCQX can halt the trading of the Shares for a variety of reasons. To the extent that OTCQX halts trading in the Shares, whether on a temporary or permanent basis, investors may not be able to buy or sell Shares, which could adversely affect the value of the Shares. If an active trading market for the Shares does not continue to exist, the market prices and liquidity of the Shares may be adversely affected.

The Sponsor may also seek to list the Shares on NYSE Arca sometime in the future, and NYSE Arca must receive approval from the SEC in order to list the Shares, but is not currently seeking approval for required rule changes and currently has no intention to do so. Even if such approval were sought in the future, there can be no guarantee that the Shares will ever be listed on NYSE Arca. See “—Failure of funds that hold digital assets or that have exposure to digital assets through derivatives to receive SEC approval to list their shares on exchanges could adversely affect the value of the Shares.”

***As the Sponsor and its management have limited history of operating investment vehicles like the Trust, their experience may be inadequate or unsuitable to manage the Trust.***

The past performances of the Sponsor’s management in other investment vehicles, including their experiences in the digital asset and venture capital industries, are no indication of their ability to manage an investment vehicle such as the Trust. If the experience of the Sponsor and its management is inadequate or unsuitable to manage an investment vehicle such as the Trust, the operations of the Trust may be adversely affected.

Furthermore, the Sponsor is currently engaged in the management of other investment vehicles which could divert their attention and resources. If the Sponsor were to experience difficulties in the management of such other investment vehicles that damaged the Sponsor or its reputation, it could have an adverse impact on the Sponsor's ability to continue to serve as Sponsor for the Trust.

***Security threats to the Digital Asset Account could result in the halting of Trust operations and a loss of Trust assets or damage to the reputation of the Trust, each of which could result in a reduction in the value of the Shares.***

Security breaches, computer malware and computer hacking attacks have been a prevalent concern in relation to digital assets. The Sponsor believes that the Trust's BAT held in the Digital Asset Account will be an appealing target to hackers or malware distributors seeking to destroy, damage or steal the Trust's BAT and will only become more appealing as the Trust's assets grow. To the extent that the Trust, the Sponsor or the Custodian is unable to identify and mitigate or stop new security threats or otherwise adapt to technological changes in the digital asset industry, the Trust's BAT may be subject to theft, loss, destruction or other attack.

The Sponsor believes that the security procedures in place for the Trust, including, but not limited to, offline storage, or "cold storage", multiple encrypted private key "shards", usernames, passwords and 2-step verification, are reasonably designed to safeguard the Trust's BAT. Nevertheless, the security procedures cannot guarantee the prevention of any loss due to a security breach, software defect or act of God that may be borne by the Trust.

The security procedures and operational infrastructure may be breached due to the actions of outside parties, error or malfeasance of an employee of the Sponsor, the Custodian, or otherwise, and, as a result, an unauthorized party may obtain access to a Digital Asset Account, the relevant private keys (and therefore BAT) or other data of the Trust. Additionally, outside parties may attempt to fraudulently induce employees of the Sponsor or the Custodian to disclose sensitive information in order to gain access to the Trust's infrastructure. As the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently, or may be designed to remain dormant until a predetermined event and often are not recognized until launched against a target, the Sponsor and the Custodian may be unable to anticipate these techniques or implement adequate preventative measures.

An actual or perceived breach of a Digital Asset Account could harm the Trust's operations, result in loss of the Trust's assets, damage the Trust's reputation and negatively affect the market perception of the effectiveness of the Trust, all of which could in turn reduce demand for the Shares, resulting in a reduction in the value of the Shares. The Trust may also cease operations, the occurrence of which could similarly result in a reduction in the value of the Shares.

***BAT transactions are irrevocable and stolen or incorrectly transferred BAT may be irretrievable. As a result, any incorrectly executed BAT transactions could adversely affect the value of the Shares.***

BAT transactions are typically not reversible without the consent and active participation of the recipient of the transaction. Once a transaction has been verified and recorded in a block that is added to the Blockchain, an incorrect transfer or theft of BAT generally will not be reversible and the Trust may not be capable of seeking compensation for any such transfer or theft. Although the Trust's transfers of BAT will regularly be made to or from the Digital Asset Account, it is possible that, through computer or human error, or through theft or criminal action, the Trust's BAT could be transferred from the Trust's Digital Asset Account in incorrect amounts or to unauthorized third parties, or to uncontrolled accounts.

Such events have occurred in connection with digital assets in the past. To the extent that the Trust is unable to seek a corrective transaction with such third party or is incapable of identifying the third party which has received the Trust's BAT through error or theft, the Trust will be unable to revert or otherwise recover incorrectly transferred BAT. The Trust will also be unable to convert or recover its BAT transferred to uncontrolled accounts. To the extent that the Trust is unable to seek redress for such error or theft, such loss could adversely affect the value of the Shares.

***The lack of full insurance and shareholders' limited rights of legal recourse against the Trust, Trustee, Sponsor, Transfer Agent and Custodian expose the Trust and its shareholders to the risk of loss of the Trust's BAT for which no person or entity is liable.***

The Trust is not a banking institution or otherwise a member of the FDIC or Securities Investor Protection Corporation ("SIPC") and, therefore, deposits held with or assets held by the Trust are not subject to the protections enjoyed by depositors with FDIC or SIPC member institutions. In addition, neither the Trust nor the Sponsor insures the Trust's BAT.

While the Custodian is required under the Custodian Agreement to maintain insurance coverage that is commercially reasonable for the custodial services it provides, and the Custodian has advised the Sponsor that it maintains insurance coverage at commercially reasonable amounts for the digital assets custodied on behalf of clients, including the Trust's BAT, shareholders cannot be assured that the Custodian will maintain adequate insurance or that such coverage will cover losses with respect to the Trust's BAT. Moreover, while the Custodian maintains certain capital reserve requirements depending on the assets under custody and to the extent required by applicable law, and such capital reserves may provide additional means to cover client asset losses, the Sponsor does not know the amount of such capital reserves, and neither the Trust nor the Sponsor have access to such information. The Trust cannot be assured that the Custodian will maintain capital reserves sufficient to cover losses with respect to the Trust's digital assets. Furthermore, Coinbase has represented in securities filings that the total value of crypto assets in its possession and control is significantly greater than the total value of insurance coverage that would compensate Coinbase in the event of theft or other loss of funds.

Furthermore, under the Custodian Agreement, the Custodian's liability with respect to the Trust will never exceed the value of the BAT on deposit in the Digital Asset Account at the time of, and directly relating to, the events giving rise to the liability occurred, as determined in accordance with the Custodian Agreement. In addition, for as long as a cold storage address holds BAT with a value in excess of the Cold Storage Threshold for a period of five consecutive business days or more without being reduced to the Cold Storage Threshold or lower, the Custodian's maximum liability for such cold storage address shall be limited to the Cold Storage Threshold. The Sponsor monitors the value of BAT deposited in cold storage addresses for whether the Cold Storage Threshold has been met by determining the U.S. dollar value of BAT deposited in each cold storage address on business days. The Custodian is not liable for any lost profits or any special, incidental, indirect, intangible, or consequential damages, whether based in contract, tort, negligence, strict liability or otherwise, and whether or not the Custodian has been advised of such losses or the Custodian knew or should have known of the possibility of such damages. Notwithstanding the foregoing, the Custodian is liable to the Sponsor and the Trust for the loss of any BAT to the extent that the Custodian directly caused such loss through a breach of the Custodian Agreement, even if the Custodian meets its duty of exercising best efforts, and the Custodian is required to return to the Trust a quantity equal to the quantity of any such lost BAT. Although the Cold Storage Threshold has never been met for a given cold storage address, to the extent it is met and not reduced within five business days, the Trust would not have a claim against the Custodian with respect to the digital assets held in such address to the extent the value exceeds the Cold Storage Threshold.

The shareholders' recourse against the Sponsor and the Trust's other service providers for the services they provide to the Trust, including those relating to the provision of instructions relating to the movement of BAT, is limited. Consequently, a loss may be suffered with respect to the Trust's BAT that is not covered by insurance and for which no person is liable in damages. As a result, the recourse of the Trust or the shareholders, under New York law, is limited.

***The Trust may be required, or the Sponsor may deem it appropriate, to terminate and liquidate at a time that is disadvantageous to shareholders.***

Pursuant to the terms of the Trust Agreement, the Trust is required to dissolve under certain circumstances. In addition, the Sponsor may, in its sole discretion, dissolve the Trust for a number of reasons, including if the Sponsor determines, in its sole discretion, that it is desirable or advisable for any reason to discontinue the affairs of the Trust. For example, the Sponsor expects that it may be advisable to discontinue the affairs of the Trust if a federal court upholds an allegation that BAT is a security under the federal securities laws, among other reasons. See "Material Contracts—Description of the Trust Agreement—Termination of the Trust."

If the Trust is required to terminate and liquidate, or the Sponsor determines in accordance with the terms of the Trust Agreement that it is appropriate to terminate and liquidate the Trust, such termination and liquidation could occur at a time that is disadvantageous to shareholders, such as when the Actual Exchange Rate of BAT is lower than the Index Price was at the time when shareholders purchased their Shares. In such a case, when the Trust's BAT is sold as part of its liquidation, the resulting proceeds distributed to shareholders will be less than if the Actual Exchange Rate were higher at the time of sale. See "Material Contracts—Description of the Trust Agreement—Termination of the Trust" for more information about the termination of the Trust, including when the termination of the Trust may be triggered by events outside the direct control of the Sponsor, the Trustee or the shareholders.

***The Trust Agreement includes provisions that limit shareholders' voting rights and restrict shareholders' right to bring a derivative action.***

Under the Trust Agreement, shareholders have limited voting rights and the Trust will not have regular shareholder meetings. Shareholders take no part in the management or control of the Trust. Accordingly, shareholders do not have the right to authorize actions, appoint service providers or take other actions as may be taken by shareholders of other trusts or companies where shares carry such rights. The shareholders' limited voting rights give almost all control under the Trust Agreement to the Sponsor and the Trustee. The Sponsor may take actions in the operation of the Trust that may be adverse to the interests of shareholders and may adversely affect the value of the Shares.

Moreover, pursuant to the terms of the Trust Agreement, shareholders' statutory right under Delaware law to bring a derivative action (i.e., to initiate a lawsuit in the name of the Trust in order to assert a claim belonging to the Trust against a fiduciary of the Trust or against a third party when the Trust's management has refused to do so) is restricted. Under Delaware law, a shareholder may bring a derivative action if the shareholder is a shareholder at the time the action is brought and either (i) was a shareholder at the time of the transaction at issue or (ii) acquired the status of shareholder by operation of law or the Trust's governing instrument from a person who was a shareholder at the time of the transaction at issue. Additionally, Section 3816(e) of the Delaware Statutory Trust Act specifically provides that a "beneficial owner's right to bring a derivative action may be subject to such additional standards and restrictions, if any, as are set forth in the governing instrument of the statutory trust, including, without limitation, the requirement that beneficial owners owning a specified beneficial interest in the statutory trust join in the bringing of the derivative action." In addition to the requirements of applicable law and in accordance with Section 3816(e), the Trust Agreement provides that no shareholder will have the right, power or authority to bring or maintain a derivative action, suit or other proceeding on behalf of the Trust unless two or more shareholders who (i) are not "Affiliates" (as defined in the Trust Agreement and below) of one another and (ii) collectively hold at least 10.0% of the outstanding Shares join in the bringing or maintaining of such action, suit or other proceeding. This provision applies to any derivative actions brought in the name of the Trust other than claims under the federal securities laws and the rules and regulations thereunder.

Due to this additional requirement, a shareholder attempting to bring or maintain a derivative action in the name of the Trust will be required to locate other shareholders with which it is not affiliated and that have sufficient Shares to meet the 10.0% threshold based on the number of Shares outstanding on the date the claim is brought and thereafter throughout the duration of the action, suit or proceeding. This may be difficult and may result in increased costs to a shareholder attempting to seek redress in the name of the Trust in court. Moreover, if shareholders bringing a derivative action, suit or proceeding pursuant to this provision of the Trust Agreement do not hold 10.0% of the outstanding Shares on the date such an action, suit or proceeding is brought, or such shareholders are unable to maintain Share ownership meeting the 10.0% threshold throughout the duration of the action, suit or proceeding, such shareholders' derivative action may be subject to dismissal. As a result, the Trust Agreement limits the likelihood that a shareholder will be able to successfully assert a derivative action in the name of the Trust, even if such shareholder believes that he or she has a valid derivative action, suit or other proceeding to bring on behalf of the Trust. See "Material Contracts—Description of the Trust Agreement—The Sponsor—Fiduciary and Regulatory Duties of the Sponsor" for more detail.

***The Sponsor is solely responsible for determining the value of the NAV and NAV per Share and any errors, discontinuance or changes in such valuation calculations may have an adverse effect on the value of the Shares.***

The Sponsor will determine the Trust's NAV and NAV per Share on a daily basis as soon as practicable after 4:00 p.m., New York time, on each business day. The Sponsor's determination is made utilizing data from the operations of the Trust and the Index Price, calculated at 4:00 p.m., New York time, on such day. If the Sponsor determines in good faith that the Index does not reflect an accurate BAT price, then the Sponsor will employ an alternative method to determine the Index Price under the cascading set of rules set forth in "Grayscale Basic Attention Token Trust (BAT)—The Index and the Index Price—Determination of the Index Price When Index Price is Unavailable." In the context of applying such rules, the Sponsor may determine in good faith that the alternative method applied does not reflect an accurate BAT price and apply the next alternative method under the cascading set of rules. If the Sponsor determines after employing all of the alternative methods that the Index Price does not reflect an accurate BAT price, the Sponsor will use its best judgment to determine a good faith estimate of the Index Price.

There are no predefined criteria to make a good faith assessment in these scenarios and such decisions will be made by the Sponsor in its sole discretion. The Sponsor may calculate the Index Price in a manner that ultimately inaccurately reflects the price of BAT. To the extent that the NAV, NAV per Share or the Index Price are incorrectly calculated, the Sponsor

may not be liable for any error and such misreporting of valuation data could adversely affect the value of the Shares and investors could suffer a substantial loss on their investment in the Trust. Moreover, the terms of the Trust Agreement do not prohibit the Sponsor from changing the Index Price used to calculate the NAV and NAV per Share of the Trust. Any such change in the Index Price could affect the value of the Shares and investors could suffer a substantial loss on their investment in the Trust.

***Extraordinary expenses resulting from unanticipated events may become payable by the Trust, adversely affecting the value of the Shares.***

In consideration for the Sponsor's Fee, the Sponsor has contractually assumed all ordinary-course operational and periodic expenses of the Trust. See "Grayscale Basic Attention Token Trust (BAT)—Description of the Trust—Trust Expenses." Extraordinary expenses incurred by the Trust, such as taxes and governmental charges; expenses and costs of any extraordinary services performed by the Sponsor (or any other service provider) on behalf of the Trust to protect the Trust or the interests of shareholders (including in connection with any Incidental Rights and any IR Virtual Currency); or extraordinary legal fees and expenses are not assumed by the Sponsor and are borne by the Trust. The Sponsor will cause the Trust to either (i) sell BAT, Incidental Rights and/or IR Virtual Currency held by the Trust or (ii) deliver BAT, Incidental Rights and/or IR Virtual Currency in-kind to the Sponsor to pay Trust expenses not assumed by the Sponsor on an as-needed basis. Accordingly, the Trust may be required to sell or otherwise dispose of BAT, Incidental Rights or IR Virtual Currency at a time when the trading prices for those assets are depressed.

The sale or other disposition of assets of the Trust in order to pay extraordinary expenses could have a negative impact on the value of the Shares for several reasons. These include the following factors:

- The Trust is not actively managed and no attempt will be made to protect against or to take advantage of fluctuations in the prices of BAT, Incidental Rights or IR Virtual Currency. Consequently, if the Trust incurs expenses in U.S. dollars, the Trust's BAT, Incidental Rights or IR Virtual Currency may be sold at a time when the values of the disposed assets are low, resulting in a negative impact on the value of the Shares.
- Because the Trust does not generate any income, every time that the Trust pays expenses, it will deliver BAT, Incidental Rights or IR Virtual Currency to the Sponsor or sell BAT, Incidental Rights or IR Virtual Currency. Any sales of the Trust's assets in connection with the payment of expenses will decrease the amount of the Trust's assets represented by each Share each time its assets are sold or transferred to the Sponsor.
- Assuming that the Trust is a grantor trust for U.S. federal income tax purposes, each delivery or sale of BAT, Incidental Rights or IR Virtual Currency by the Trust to pay the Sponsor's Fee and/or Additional Trust Expenses will be a taxable event to beneficial owners of Shares. Thus, the Trust's payment of expenses could result in beneficial owners of Shares incurring tax liability without an associated distribution from the Trust. Any such tax liability could adversely affect an investment in the Shares. See "Material U.S. Federal Income Tax Consequences."

***The Trust's delivery or sale of BAT to pay expenses or other operations of the Trust could result in shareholders' incurring tax liability without an associated distribution from the Trust.***

Assuming that the Trust is treated as a grantor trust for U.S. federal income tax purposes, each delivery of BAT by the Trust to pay the Sponsor's Fee or other expenses and each sale of BAT by the Trust to pay Additional Trust Expenses will be a taxable event to beneficial owners of Shares. Thus, the Trust's payment of expenses could result in beneficial owners of Shares incurring tax liability without an associated distribution from the Trust. Any such tax liability could adversely affect an investment in the Shares. See "Material U.S. Federal Income Tax Consequences."

***The value of the Shares will be adversely affected if the Trust is required to indemnify the Sponsor, the Trustee, the Transfer Agent or the Custodian under the Trust Documents.***

Under the Trust Documents, each of the Sponsor, the Trustee, the Transfer Agent and the Custodian has a right to be indemnified by the Trust for certain liabilities or expenses that it incurs without gross negligence, bad faith or willful misconduct on its part. Therefore, the Sponsor, Trustee, Transfer Agent or the Custodian may require that the assets of the Trust be sold in order to cover losses or liability suffered by it. Any sale of that kind would reduce the NAV of the Trust and the value of the Shares.

***Intellectual property rights claims may adversely affect the Trust and the value of the Shares.***

The Sponsor is not aware of any intellectual property rights claims that may prevent the Trust from operating and holding BAT, Incidental Rights or IR Virtual Currency. However, third parties may assert intellectual property rights claims relating to the operation of the Trust and the mechanics instituted for the investment in, holding of and transfer of BAT, Incidental Rights or IR Virtual Currency. Regardless of the merit of an intellectual property or other legal action, any legal expenses to defend or payments to settle such claims would be extraordinary expenses that would be borne by the Trust through the sale or transfer of its BAT, Incidental Rights or IR Virtual Currency. Additionally, a meritorious intellectual property rights claim could prevent the Trust from operating and force the Sponsor to terminate the Trust and liquidate its BAT, Incidental Rights or IR Virtual Currency. As a result, an intellectual property rights claim against the Trust could adversely affect the value of the Shares.

***Pandemics, epidemics and other natural and man-made disasters could negatively impact the value of the Trust's holdings and/or significantly disrupt its affairs.***

Pandemics, epidemics and other natural and man-made disasters could negatively impact demand for digital assets, including BAT, and disrupt the operations of many businesses, including the businesses of the Trust's service providers. For example, the COVID-19 pandemic had serious adverse effects on the economies and financial markets of many countries, resulting in increased volatility and uncertainty in economies and financial markets of many countries and in the Digital Asset Markets. Moreover, governmental authorities and regulators throughout the world have in the past responded to major economic disruptions, including as a result of the COVID-19 pandemic, with a variety of fiscal and monetary policy changes, such as quantitative easing, new monetary programs and lower interest rates. An unexpected or quick reversal of any such policies, or the ineffectiveness of such policies, could increase volatility in economies and financial market generally, and could specifically increase volatility in the Digital Asset Markets, which could adversely affect the value of BAT and the value of the Shares.

In addition, pandemics, epidemics and other natural and man-made disasters could disrupt the operations of many businesses. For example, in response to the COVID-19 pandemic, many governments imposed travel restrictions and prolonged, closed international borders and enhanced health screenings at ports of entry and elsewhere, which disrupted businesses around the world. While the Sponsor and the Trust were not materially impacted by these events, any disruptions to the Sponsor's, the Trust's or the Trust's service providers' business operations resulting from business restrictions, quarantines or restrictions on the ability of personnel to perform their jobs as a result of any future pandemic, epidemic or other disaster could have an adverse impact on the Trust's ability to access critical services and could be disruptive to the affairs of the Trust.

***Shareholders may not receive the benefits of any forks or airdrops.***

In addition to forks, a digital asset may become subject to a similar occurrence known as an "airdrop." In an airdrop, the promoters of a new digital asset announce to some group of users, such as the group that are holders of another digital asset that such group will be entitled to claim a certain amount of the new digital asset for free, based on the fact that they are part of that group.

Shareholders may not receive the benefits of any forks, the Trust may not choose, or be able, to participate in an airdrop, and the timing of receiving any benefits from a fork, airdrop or similar event is uncertain. We refer to the right to receive any such benefit as an "Incidental Right" and any such virtual currency acquired through an Incidental Right as "IR Virtual Currency." There are likely to be operational, tax, securities law, regulatory, legal and practical issues that significantly limit, or prevent entirely, shareholders' ability to realize a benefit, through their Shares in the Trust, from any such Incidental Rights or IR Virtual Currency. For instance, the Custodian may not agree to provide access to the IR Virtual Currency. In addition, the Sponsor may determine that there is no safe or practical way to custody the IR Virtual Currency, or that trying to do so may pose an unacceptable risk to the Trust's holdings in BAT, or that the costs of taking possession and/or maintaining ownership of the IR Virtual Currency exceed the benefits of owning the IR Virtual Currency. Additionally, laws, regulation or other factors may prevent shareholders from benefiting from the Incidental Right or IR Virtual Currency even if there is a safe and practical way to custody and secure the IR Virtual Currency. For example, it may be illegal to sell or otherwise dispose of the Incidental Right or IR Virtual Currency, or there may not be a suitable market into which the Incidental Right or IR Virtual Currency can be sold (immediately after the fork or airdrop, or ever). The Sponsor may also determine, in consultation with its legal advisers, that the Incidental Right or IR Virtual Currency is, or is likely to be deemed, a security under federal or state securities laws. In such a case, the Sponsor would irrevocably abandon, as of any

date on which the Trust creates Shares, such Incidental Right or IR Virtual Currency if holding it would have an adverse effect on the Trust and it would not be practicable to avoid such effect by disposing of the Incidental Right or IR Virtual Currency in a manner that would result in shareholders receiving more than insignificant value thereof. In making such a determination, the Sponsor expects to take into account a number of factors, including the various definitions of a “security” under the federal securities laws and federal court decisions interpreting elements of these definitions, such as the U.S. Supreme Court’s decisions in the *Howey* and *Reves* cases, as well as reports, orders, press releases, public statements and speeches by the SEC and its staff providing guidance on when a digital asset may be a security for purposes of the federal securities laws.

The Trust has informed the Custodian that it is irrevocably abandoning, as of any date on which the Trust creates Shares, any Incidental Rights or IR Virtual Currency to which it would otherwise be entitled as of such date and with respect to which it has not taken any Affirmative Action at or prior to such date. In order to avert abandonment of an Incidental Right or IR Virtual Currency, the Trust will send a notice to the Custodian of its intention to retain such Incidental Right or IR Virtual Currency. The Sponsor intends to evaluate each future fork or airdrop on a case-by-case basis in consultation with the Trust’s legal advisers, tax consultants and Custodian. Any inability to recognize the economic benefit of a hard fork or airdrop could adversely affect the value of the Shares. See “Grayscale Basic Attention Token Trust (BAT)—Description of the Trust—Incidental Rights and IR Virtual Currency.”

***Under the terms of the Trust Agreement, the Trust will not be permitted to engage in Staking unless (and, then, only to the extent that) the Staking Condition is satisfied, which could negatively affect the value of the Shares.***

The Trust Agreement provides that the Trust may engage in Staking, but only if (and, then, only to the extent that) the Staking Condition has been satisfied. As of the date of this Annual Report, the Staking Condition has not been met for the Trust and it is not anticipated that the Staking Condition will be met for the Trust in the foreseeable future. Thus, the Trust currently is prohibited from engaging in Staking and there can be no assurance that the Trust will be permitted to engage in Staking in the future. As long as the Trust is prohibited under the terms of the Trust Agreement from engaging in Staking, the Trust will not earn any rewards. The current inability of the Trust to participate in Staking and earn such rewards could place the Shares at a comparative disadvantage relative to an investment in BAT directly or through a vehicle that is not subject to such a prohibition, which could negatively affect the value of the Shares.

## **Risk Factors Related to the Regulation of Digital Assets, the Trust and the Shares**

***A determination that BAT or any other digital asset is a “security” may adversely affect the value of BAT and the value of the Shares, and result in potentially extraordinary, nonrecurring expenses to, or termination of, the Trust.***

Depending on its characteristics, a digital asset may be considered a “security” under the federal securities laws. The test for determining whether a particular digital asset is a “security” is complex and difficult to apply, and the outcome is difficult to predict. Public, though non-binding, statements by senior officials at the SEC have indicated that the SEC does not consider Bitcoin or Ether to be securities. In addition, the SEC, by action through delegated authority approving the exchange rule filings to list shares of trusts holding Ether as commodity-based ETPs, appears to have implicitly taken the view that Ether is not a security. The SEC staff has also provided informal assurances via no-action letter to a handful of promoters that their digital assets are not securities. On the other hand, the SEC has brought enforcement actions against the issuers and promoters of several other digital assets on the basis that the digital assets in question are securities. More recently, the SEC has also brought enforcement actions against Digital Asset Trading Platforms for allegedly operating unregistered securities exchanges on the basis that certain of the digital assets traded on their platforms are securities.

Whether a digital asset is a security, or offers and sales of a digital asset are securities transactions under the federal securities laws depends on whether it is included in the lists of instruments making up the definition of “security” in the Securities Act, the Exchange Act and the Investment Company Act. Digital assets as such do not appear in any of these lists, although each list includes the terms “investment contract” and “note,” and the SEC has typically analyzed whether a particular digital asset is a security or the offer and sale of a digital asset is a securities transaction by reference to whether it meets the tests developed by the federal courts interpreting these terms, known as the *Howey* and *Reves* tests, respectively. For many digital assets, whether or not the *Howey* or *Reves* tests are met is difficult to resolve definitively, and substantial legal arguments can often be made both in favor of and against a particular digital asset qualifying as a security or a particular offer and sale of a digital asset qualifying as a securities transaction under one or both of the *Howey* and *Reves* tests. Adding to the complexity, the SEC staff has indicated that the security status of a particular digital asset can change over time as

the relevant facts evolve, though recent arguments advanced in ongoing litigation may suggest that the SEC no longer believes the status of a digital asset can change over time.

As part of determining whether BAT is a security or a transaction in BAT by the Sponsor is a securities transaction, for purposes of the federal securities laws, the Sponsor takes into account a number of factors, including the various definitions of “security” under the federal securities laws and federal court decisions interpreting elements of these definitions, such as the U.S. Supreme Court’s decisions in the *Howey* and *Reves* cases, and their progeny, as well as reports, orders, press releases, public statements and speeches by the SEC, its commissioners and its staff providing guidance on when a digital asset may be a security or when an offer and sale of a digital asset may be a securities transaction for purposes of the federal securities laws. Finally, the Sponsor discusses the security status of BAT and the Sponsor’s transactions in BAT with external counsel, and has received a memorandum regarding the status of BAT and the Sponsor’s transactions in BAT under the federal securities laws from external counsel. Through this process the Sponsor believes that it is applying the proper legal standards in determining that BAT is not a security in light of the uncertainties inherent in the *Howey* and *Reves* tests. The Sponsor has been contacted by staff from the SEC’s Division of Enforcement with respect to securities law compliance matters involving BAT and has responded to the SEC staff. The Sponsor subsequently received a termination notice from the SEC staff with respect to this inquiry.

In light of these uncertainties and the fact-based nature of the analysis, the Sponsor acknowledges that the SEC may take a contrary position; and the Sponsor’s conclusion, even if reasonable under the circumstances, would not preclude legal or regulatory action based on the presence of a security.

As is the case with BAT, analyses from counsel typically review the often-complex facts surrounding a particular digital asset’s underlying technology, creation, use case and usage development, distribution and secondary-market trading characteristics as well as contributions of and marketing or promotional efforts by the individuals or organizations who appear to be involved in these activities, among other relevant facts, usually drawing on publicly available information. This information, usually found on the internet, often includes both information that originated with or is attributed to such individuals or organizations, as well as information from third-party sources and databases that may or may not have a connection to such individuals or organizations, and the availability and nature of such information can change over time. The Sponsor and counsel often have no independent means of verifying the accuracy or completeness of such information, and therefore of necessity usually must assume that such information is materially accurate and complete for purposes of the *Howey* and *Reves* analyses. After having gathered this information, counsel typically analyzes it in light of the *Howey* and *Reves* tests, in order to inform a judgment as to whether or not a federal court would conclude that the digital asset, or transactions in the digital asset, in question is or is not a security, or are or are not securities transactions, respectively, for purposes of the federal securities laws. Often, certain factors appear to support a conclusion that the digital asset, or transactions in the digital asset, in question is a security, or are or are not securities transactions, respectively, while other factors appear to support the opposite conclusion, and in such a case counsel endeavors to weigh the importance and relevance of the competing factors. This analytical process is further complicated by the fact that, at present, federal judicial case law applying the relevant tests to digital assets is limited and in some situations inconsistent, with no federal appellate court having considered the question on the merits, as well as the fact that because each digital asset presents its own unique set of relevant facts, it is not always possible to directly analogize the analysis of one digital asset to another. Because of this factual complexity and the current lack of a well-developed body of federal case law applying the relevant tests to a variety of different fact patterns, the Sponsor has not in the past received, and currently does not expect that it would be able to receive, “opinions” of counsel stating that a particular digital asset, or transactions in the digital asset, is or is not a security, or are or are not securities transactions, respectively, for federal securities law purposes. The Sponsor understands that as a matter of practice, counsel is generally able to render a legal “opinion” only when the relevant facts are substantially ascertainable and the applicable law is both well-developed and settled. As a result, given the relative novelty of digital assets, the challenges inherent in fact-gathering for particular digital assets, and the fact that federal courts have only recently been tasked with adjudicating the applicability of federal securities law to digital assets, the Sponsor understands that at present counsel is generally not in a position to render a legal “opinion” on the securities law status of BAT or any other particular digital asset.

As such, notwithstanding the Sponsor’s receipt of a memorandum regarding the status of BAT under the federal securities laws from external counsel and the Sponsor’s view that BAT is not a security and the Sponsor’s transactions in BAT are

not securities transactions, the SEC or a federal court may in the future take a different view as to the security status of BAT.

If the Sponsor determines that BAT, or transactions in BAT, are a security or securities transactions, respectively, under the federal securities laws, whether that determination is initially made by the Sponsor itself, or because a federal court upholds an allegation that BAT is a security, the Sponsor does not intend to permit the Trust to continue holding BAT in a way that would violate the federal securities laws (and therefore would either dissolve the Trust or potentially seek to operate the Trust in a manner that complies with the federal securities laws, including the Investment Company Act). Because the legal tests for determining whether a digital asset or transactions in the digital asset, are or are not a security or securities transactions, respectively, often leave room for interpretation, for so long as the Sponsor believes there to be good faith grounds to conclude that the Trust's BAT is not a security or securities transactions, respectively, the Sponsor does not intend to dissolve the Trust on the basis that BAT could at some future point be finally determined to be a security.

Any enforcement action by the SEC or a state securities regulator asserting that BAT, or transactions in BAT, are a security, or securities transactions, respectively, or a court decision to that effect, would be expected to have an immediate material adverse impact on the trading value of BAT, as well as the Shares. This is because the business models behind most digital assets are incompatible with regulations applying to transactions in securities. If a digital asset or transactions in that digital asset are determined to be a security or securities transactions, respectively, it is likely to become difficult or impossible for the digital asset to be traded, cleared or custodied in the United States through the same channels used by non-security digital assets, which in addition to materially and adversely affecting the trading value of the digital asset is likely to significantly impact its liquidity and market participants' ability to convert the digital asset into U.S. dollars. Any assertion that a digital asset or transactions in that digital asset are a security or securities transactions, respectively, by the SEC or another regulatory authority may have similar effects.

For example, in 2020 the SEC filed a complaint against the issuer of XRP, Ripple Labs, Inc., and two of its executives, alleging that they raised more than \$1.3 billion through XRP sales that should have been registered under the federal securities laws, but were not. In the years prior to the SEC's action, XRP's market capitalization at times reached over \$140 billion. However, in the weeks following the SEC's complaint, XRP's market capitalization fell to less than \$10 billion, which was less than half of its market capitalization in the days prior to the complaint.

Subsequently, in July 2023, the District Court for the Southern District of New York held that while XRP is not a security, certain sales of XRP to certain buyers (but not other types of sales to other buyers) amounted to "investment contracts" under the *Howey* test. The District Court entered a final judgment in the case on August 7, 2024. On January 15, 2025 the SEC filed an appeal against the judgment with the United States Court of Appeals for the Second Circuit.

Likewise, in the days following the announcement of SEC enforcement actions against certain digital asset issuers and trading platforms, the prices of various digital assets declined significantly and may continue to decline as such cases advance through the federal court system. Furthermore, the decisions in cases involving digital assets have resulted in seemingly inconsistent views of different district court judges, including one that explicitly disagreed with the analysis underlying the decision regarding XRP, which underscore the continuing uncertainty around which digital assets, or transactions in digital assets, are securities and what the correct analysis is to determine each digital asset's status. For example, the conflicting district court opinions and analyses demonstrate that factors such as how long a digital asset has been in existence, how widely held it is, how large its market capitalization is, the manner in which it is offered, sold or promoted, and whether it has actual use in commercial transactions, ultimately may have limited to no bearing on whether the SEC, a state securities regulator or any particular court will find it to be a security.

In addition, if BAT, or transactions in BAT, are in fact a security, the Trust could be considered an unregistered "investment company" under the Investment Company Act, which could necessitate the Trust's liquidation. In this case, the Trust and the Sponsor may be deemed to have participated in an illegal offering of investment company securities and there is no guarantee that the Sponsor will be able to register the Trust under the Investment Company Act at such time or take such other actions as may be necessary to ensure the Trust's activities comply with applicable law, which could force the Sponsor to liquidate the Trust.

Moreover, whether or not the Sponsor or the Trust were subject to additional regulatory requirements as a result of any determination that the Trust's assets include securities or the Trust's transactions in digital assets constitute securities transactions, the Sponsor may nevertheless decide to terminate the Trust, in order, if possible, to liquidate the Trust's assets while a liquid market still exists. For example, in response to the SEC's action against the issuer of the digital asset XRP, certain significant market participants announced they would no longer support XRP and announced measures, including

the delisting of XRP from major Digital Asset Trading Platforms, resulting in the Sponsor's conclusion that it was likely to be increasingly difficult for U.S. investors, including Grayscale XRP Trust (XRP), an affiliate of the Trust, to convert XRP into U.S. dollars. The Sponsor subsequently dissolved Grayscale XRP Trust (XRP) and liquidated its assets. The Sponsor has since established a new investment vehicle that holds XRP, Grayscale XRP Trust. If the SEC or a federal court were to determine that BAT is a security or transactions in BAT are securities transactions, it is likely that the value of the Shares of the Trust would decline significantly. Furthermore, if a federal court upholds an allegation that BAT is a security or transactions in BAT are securities transactions, the Trust itself may be terminated and, if practical, its assets liquidated.

***Regulatory changes or actions by the U.S. Congress or any U.S. federal or state agencies may affect the value of the Shares or restrict the use of BAT, Ethereum Network validating activity or the operation of the Basic Attention Token Network or the Digital Asset Markets in a manner that adversely affects the value of the Shares.***

As digital assets have grown in both popularity and market size, the U.S. Congress and a number of U.S. federal and state agencies (including FinCEN, OFAC, SEC, CFTC, FINRA, CFPB, the Department of Justice, the Department of Homeland Security, the Federal Bureau of Investigation, the IRS, the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, the Federal Reserve and state financial institution and securities regulators) have been examining the operations of digital asset networks, digital asset users and the Digital Asset Markets, with particular focus on the extent to which digital assets can be used to launder the proceeds of illegal activities, evade sanctions, or fund criminal or terrorist enterprises and the safety and soundness of trading platforms and other service providers that hold or custody digital assets for users. Many of these state and federal agencies have issued consumer advisories regarding the risks posed by digital assets to investors. Ongoing and future regulatory actions with respect to digital assets generally or BAT in particular may alter, perhaps to a materially adverse extent, the nature of an investment in the Shares or the ability of the Trust to continue to operate.

In August 2021, the former chair of the SEC stated that he believed investors using Digital Asset Trading Platforms are not adequately protected, and that activities on the platforms can implicate the securities laws, commodities laws and banking laws, raising a number of issues related to protecting investors and consumers, guarding against illicit activity, and ensuring financial stability. The former chair expressed a need for the SEC to have additional authorities to prevent transactions, products, and platforms from “falling between regulatory cracks,” as well as for more resources to protect investors in “this growing and volatile sector.” The former chair called for federal legislation centering on digital asset trading, lending, and decentralized finance platforms, seeking “additional plenary authority” to write rules for digital asset trading and lending. There have also been several bills introduced in Congress that propose to establish additional regulation and oversight of the digital asset markets. In connection with these developments, the SEC has taken a number of actions. For example, in February 2023, the SEC proposed amendments to the custody rules under Rule 206(4)-2 of the Investment Advisers Act. The proposed rule changes would amend the definition of a “qualified custodian” under Rule 206(4)-2(d)(6) and expand the current custody rule in 206(4)-2 to cover digital assets and related advisory activities. If enacted as proposed, these rules would likely impose additional regulatory requirements with respect to the custody and storage of digital assets and could lead to additional regulatory oversight of the digital asset ecosystem more broadly. It is also possible that a new Administration and a new Congress in the United States propose new laws and regulations related to digital assets. Moreover, the failure of FTX in November 2022 and the resulting market turmoil substantially increased regulatory scrutiny in the United States and globally and led to SEC and criminal investigations, enforcement actions and other regulatory activity across the digital asset ecosystem. For example, in June 2023, the SEC brought enforcement actions against Binance and Coinbase, two of the largest Digital Asset Trading Platforms, alleging that Binance and Coinbase operated unregistered securities exchanges, brokerages and clearing agencies. In addition, in November 2023, the SEC brought similar charges against Kraken, alleging that it operated as an unregistered securities exchange, brokerage and clearing agency. On January 23, 2025, President Trump issued an executive order titled “Strengthening American Leadership in Digital Financial Technology” aimed at supporting “the responsible growth and use of digital assets, blockchain technology, and related technologies across all sectors of the economy.”

It is difficult to predict whether, or when, any of these developments will lead to Congress granting additional authorities to the SEC or other regulators, what the nature of such additional authorities might be, how additional legislation and/or regulatory oversight might impact the ability of Digital Asset Markets to function or how any new regulations or changes to existing regulations might impact the value of digital assets generally and BAT held by the Trust specifically. The consequences of increased federal regulation of digital assets and digital asset activities could have a material adverse effect on the Trust and the Shares.

Law enforcement agencies have often relied on the transparency of blockchains to facilitate investigations. However, certain privacy-enhancing features have been, or are expected to be, introduced to a number of digital asset networks, including the Basic Attention Token Network. These features, including those adopted by the Basic Attention Token Network or which may be introduced on the Basic Attention Token Network in the future, may provide law enforcement agencies with less visibility into transaction-level data. Europol, the European Union’s law enforcement agency, released a report in October 2017 noting the increased use of privacy-enhancing digital assets like Zcash and Monero in criminal activity on the internet. In August 2022, OFAC banned all transactions by U.S. persons or in the United States involving Tornado Cash, a digital asset protocol designed to obfuscate blockchain transactions, by adding Tornado Cash and certain Ethereum wallet addresses associated with the protocol to its Specially Designated Nationals and Blocked Persons List. A large portion of validators globally, as well as notable industry participants such as Centre, the issuer of the USDC stablecoin, have reportedly complied with the sanctions and blacklisted the sanctioned addresses from interacting with their networks. Although no regulatory action has been taken to treat privacy-enhancing digital assets differently, this may change in the future.

***BAT’s initial manner of sale closely resembles that of certain digital assets found to be securities, and a determination that BAT is a “security” may adversely affect the value of BAT and an investment in the Shares, and result in potentially extraordinary, nonrecurring expenses to, or termination of, such Trust.***

Depending on its characteristics, a digital asset may be considered a “security” under the federal securities laws. The test for determining whether a particular digital asset is a “security” is complex and difficult to apply, and the outcome is difficult to predict. Public, though non-binding, statements by senior officials at the SEC, have indicated that the SEC does not consider Bitcoin or Ethereum to be securities. In addition, the SEC, by action through delegated authority approving the exchange rule filings to list shares of trusts holding Ether as commodity-based ETPs, appears to have implicitly taken the view that Ether is not a security. The SEC staff has also provided informal assurances via no-action letter to a handful of promoters that their digital assets are not securities. On the other hand, the SEC has brought enforcement actions against the issuers and promoters of several other digital assets on the basis that the digital assets in question are securities. More recently, the SEC has also brought enforcement actions against Digital Asset Trading Platforms for allegedly operating unregistered securities exchanges on the basis that certain of the digital assets traded on their platforms are securities.

Through enforcement actions and other statements, the SEC and its staff have taken the position that a digital asset’s initial manner of sale may be a key factor in determining whether that digital asset was a security, at least at the time of the digital asset’s delivery as part of that sale. This has meant that many blockchain startups that have offered digital assets to the public in the form of initial coin offerings, also known as ICOs, have been found to have engaged in illegal unregistered distributions of securities.

The SEC has litigated in federal court multiple enforcement actions involving digital assets sold under ICOs, arguing in each case that the digital assets sold under the ICOs, were securities. In March 2020, the SEC obtained a preliminary injunction barring Telegram Group, Inc. from conducting an unregistered distribution of digital assets known as Grams, on the grounds that Grams were securities under the federal securities laws, notwithstanding the fact that they had been sold under one variant of an ICO involving a digital asset being sold through a Simple Agreement for Future Tokens, or a SAFT. Telegram Group ultimately agreed to return \$1.2 billion to investors and to pay a \$18.5 million civil penalty. Similarly, in September 2020 the SEC won a motion for summary judgment against Kik Interactive, Inc., persuading the court that Kik Interactive’s sale of digital assets, called Kin, through a SAFT structure should be integrated with Kik Interactive’s separate public sale of Kin (which the court held to be illegal), as the sales were conducted using the same marketing efforts, involved the same asset, and were conducted very close in time to one another. Kik Interactive ultimately agreed to pay a \$5 million civil penalty. The SEC in December 2020 filed a complaint against the issuer of XRP, Ripple Labs, Inc., and two of its executives, alleging that Ripple Labs and its executives raised over \$1.3 billion through XRP sales that should have been registered under the federal securities laws, but were not. Multiple digital assets the SEC alleged to be securities in the Coinbase, Binance and Kraken Complaints were first sold to the public in similar circumstances or ICOs. Subsequently, in July 2023, the District Court for the Southern District of New York held that while XRP is not a security, certain sales of XRP to certain buyers amounted to “investment contracts” under the *Howey* test. For a discussion of the evolution of the SEC’s complaint against Ripple Labs, see “Risk Factors—Risk Factors Related to the Regulation of Digital Assets, the Trust and the Shares—A determination that BAT or any other digital asset is a “security” may adversely affect the value of BAT and the value of the Shares, and result in potentially extraordinary, nonrecurring expenses to, or termination of, the Trust.”

Brave Software International SEZC, the developer of the Basic Attention Token Network and the creator of BAT, used an ICO to distribute 66.66% of the total supply of BAT. See “Overview of the BAT Industry and Market—Creation of BAT” and certain individuals and entities associated with the Company continue to distribute BAT. BAT’s distribution shares several characteristics with other offerings of digital assets, including those conducted by Telegram Group, Kik Interactive, and Ripple Labs that the SEC has argued were used to effect the illegal unregistered public distribution of a security. While there are reasonable grounds on which BAT may be distinguished from Grams, Kin, and XRP, BAT therefore has certain characteristics that mean that the risk of the SEC or a court finding BAT to be a security is greater than the risk that digital assets like Bitcoin or Ethereum would be found to be securities. For example, although BAT is decentralized in certain respects, a significant amount of BAT remains under the control of Brave Software International. Even though BAT does not have an official developer, the degree of control retained by Brave Software International is such that either may be viewed by a regulator as continuing to play a material role in the development of BAT, which could adversely affect any argument that BAT is not a security. In addition, even setting aside BAT’s initial manner of offering, as noted under “Overview of the BAT Industry and Market,” a significant portion of demand for digital assets is generated by speculators and investors, not necessarily by those looking to use digital assets for consumptive purposes. If the Basic Attention Token Network cannot retain users and demonstrate that its primary consumptive use case for BAT is serious and viable, this could also increase the risk that BAT is determined to be a security.

If BAT is determined to be a “security” or transactions in BAT are determined to be securities transactions under federal or state securities laws by the SEC or a state regulatory agency, or in a proceeding in a court of law or otherwise, it will have material adverse consequences for BAT and an investment in the Shares. If BAT or transactions in BAT are determined to be a security, or a securities transaction, it is likely to become difficult or impossible for BAT to be traded, cleared or custodied in the United States through the same channels used by non-security digital assets, which could in turn materially and adversely affect the trading value, liquidity, market participants’ ability to convert BAT into U.S. dollars and general acceptance of BAT and cause users to migrate to other digital assets. As such, any determination that BAT or transactions in that digital asset are a security under federal or state securities laws may adversely affect the value of BAT and, as a result, an investment in the Shares.

To the extent that BAT is determined to be a security or transactions in BAT are determined to be securities transactions, the Trust could be considered an unregistered “investment company” under the Investment Company Act, which could necessitate the Trust’s liquidation. In this case, the Trust and the Sponsor may be deemed to have participated in an illegal offering of investment company securities and there is no guarantee that the Sponsor will be able to register the Trust under the Investment Company Act at such time or take such other actions as may be necessary to ensure the Trust’s activities comply with applicable law, which could force the Sponsor to liquidate the Trust. The Sponsor could also be subject to an SEC enforcement action. If the Sponsor determines not to comply with, or is unable to comply with, such additional regulatory and registration requirements, the Sponsor will terminate the Trust. Any such termination could result in the liquidation of the Trust’s BAT at a time that is disadvantageous to Shareholders.

***Changes in SEC policy could adversely impact the value of the Shares.***

The effect of any future regulatory change on the Trust or the digital assets held by the Trust is impossible to predict, but such change could be substantial and adverse to the Trust and the value of the Shares. In particular, with the exception of funds that hold Bitcoin, Ether and certain Bitcoin-based derivatives or Ether-based derivatives, the SEC has not yet approved the listing on a national securities exchange of any non-futures based digital-asset focused exchange-traded fund or exchange-traded product (such product, an “ETF”). If the SEC were to approve any such ETF other than ours in the future, such an ETF may be perceived to be a superior investment product offering exposure to digital assets compared to the Trust because the value of the shares issued by such an ETF would be expected to more closely track the ETF’s net asset value than do Shares of the Trust, and investors may therefore favor investments in such ETFs over investments in the Trust. Any weakening in demand for the Shares compared to digital asset ETF shares could cause the value of the Shares to decline.

***Competing industries may have more influence with policymakers than the digital asset industry, which could lead to the adoption of laws and regulations that are harmful to the digital asset industry.***

The digital asset industry is relatively new, although its influence over public policy is increasing, and it does not have the same access to policymakers and lobbying organizations in many jurisdictions compared to industries with which digital assets may be seen to compete, such as banking, payments and consumer finance. Competitors from other, more established industries may have greater access to and influence with governmental officials and regulators and may be successful in persuading these policymakers that digital assets require heightened levels of regulation compared to the regulation of

traditional financial services. As a result, new laws and regulations may be proposed and adopted in the United States and elsewhere, or existing laws and regulations may be interpreted in new ways, that disfavor or impose compliance burdens on the digital asset industry or digital asset platforms, which could adversely impact the value of BAT and therefore the value of the Shares.

***Regulatory changes or other events in foreign jurisdictions may affect the value of the Shares or restrict the use of one or more digital assets, validating activity or the operation of their networks or the Digital Asset Trading Platform Market in a manner that adversely affects the value of the Shares.***

Various foreign jurisdictions have, and may continue to adopt laws, regulations or directives that affect the digital asset network, the Digital Asset Markets, and their users, particularly Digital Asset Trading Platforms and service providers that fall within such jurisdictions' regulatory scope. For example, if foreign jurisdictions, in addition to China, were to ban or otherwise restrict validating activity, including by regulating or limiting manufacturers' ability to produce or sell semiconductors or hard drives in connection with validating, it would have a material adverse effect on digital asset networks (including the Basic Attention Token Network), the Digital Asset Market, and as a result, impact the value of the Shares.

A number of foreign jurisdictions have recently taken regulatory action aimed at digital asset activities. China has made transacting in cryptocurrencies illegal for Chinese citizens in mainland China, and additional restrictions may follow. Both China and South Korea have banned initial coin offerings entirely and regulators in other jurisdictions, including Canada, Singapore and Hong Kong, have opined that initial coin offerings may constitute securities offerings subject to local securities regulations. The United Kingdom's Financial Conduct Authority published final rules in October 2020 banning the sale of derivatives and exchange-traded notes that reference certain types of digital assets, contending that they are "ill-suited" to retail investors citing extreme volatility, valuation challenges and association with financial crime. A new law, the Financial Services and Markets Act 2023 ("FSMA"), received royal assent in June 2023. The FSMA brings digital asset activities within the scope of existing laws governing financial institutions, markets and assets. In addition, the Parliament of the European Union approved the text of MiCA in April 2023, establishing a regulatory framework for digital asset services across the European Union. Certain parts of MiCA became effective as of June 2024 and the remainder became effective as of December 2024. MiCA is intended to serve as a comprehensive regulation of digital asset markets and imposes various obligations on digital asset issuers and service providers. The main aims of MiCA are industry regulation, consumer protection, prevention of market abuse and upholding the integrity of digital asset markets. See "Government Oversight."

Foreign laws, regulations or directives may conflict with those of the United States and may negatively impact the acceptance of one or more digital assets by users, merchants and service providers outside the United States and may therefore impede the growth or sustainability of the digital asset economy in the European Union, China, Japan, Russia and the United States and globally, or otherwise negatively affect the value of BAT. Moreover, other events, such as the interruption in telecommunications or internet services, cyber-related terrorist acts, civil disturbances, war or other catastrophes, could also negatively affect the digital asset economy in one or more jurisdictions. For example, Russia's invasion of Ukraine on February 24, 2022 led to volatility in digital asset prices, with an initial steep decline followed by a sharp rebound in prices. The effect of any future regulatory change or other events on the Trust or BAT is impossible to predict, and such change could be substantial and adverse to the Trust and the value of the Shares.

***If regulators or public utilities take actions that restrict or otherwise impact validating activities, there may be a significant decline in such activities, which could adversely affect the Basic Attention Token Network and the value of the Shares.***

Concerns have been raised about the electricity required to secure and maintain digital asset networks. For example, as of December 31, 2024, over 703 million tera hashes are performed every second in connection with mining on the Bitcoin network. Although measuring the electricity consumed by this process is difficult because these operations are performed by various machines with varying levels of efficiency, the process consumes a significant amount of energy. The operations of the Basic Attention Token Network and other digital asset networks may also consume significant amounts of energy. Further, in addition to the direct energy costs of performing calculations on any given digital asset network, there are indirect costs that impact a network's total energy consumption, including the costs of cooling the machines that perform these calculations.

Driven by concerns around energy consumption and the impact on public utility companies, various states and cities have implemented, or are considering implementing, moratoriums on validating activity in their jurisdictions. For example, in

November 2022, New York imposed a two-year moratorium on new proof-of-work mining permits at fossil fuel plants in the state. A significant reduction in validating activity as a result of such actions could adversely affect the security of the Basic Attention Token Network by making it easier for a malicious actor or botnet to manipulate the Blockchain. If regulators or public utilities take action that restricts or otherwise impacts validating activities, such actions could result in decreased security of a digital asset network, including the Basic Attention Token Network, and consequently adversely impact the value of the Shares.

***If regulators subject an Authorized Participant, the Trust or the Sponsor to regulation as a money service business or money transmitter, this could result in extraordinary expenses to the Authorized Participant, the Trust or the Sponsor and also result in decreased liquidity for the Shares.***

To the extent that the activities of any Authorized Participant, the Trust or the Sponsor cause it to be deemed a “money services business” under the regulations promulgated by FinCEN, such Authorized Participant, the Trust or the Sponsor may be required to comply with FinCEN regulations, including those that would mandate the Authorized Participant, the Trust or the Sponsor to implement anti-money laundering programs, make certain reports to FinCEN and maintain certain records. Similarly, the activities of an Authorized Participant, the Trust or the Sponsor may require it to be licensed as a money transmitter or as a digital asset business, such as under the NYDFS’ BitLicense regulations or California’s Digital Financial Assets Law, once effective.

Such additional regulatory obligations may cause the Authorized Participant, the Trust or the Sponsor to incur extraordinary expenses. If the Authorized Participant, the Trust or the Sponsor decided to seek the required licenses, there is no guarantee that they will timely receive them. An Authorized Participant may instead decide to terminate its role as Authorized Participant of the Trust, or the Sponsor may decide to discontinue and wind up the Trust. An Authorized Participant’s decision to cease acting as such may decrease the liquidity of the Shares, which could adversely affect the value of the Shares, and termination of the Trust in response to the changed regulatory circumstances may be at a time that is disadvantageous to the shareholders.

Additionally, to the extent an Authorized Participant, the Trust or the Sponsor is found to have operated without appropriate state or federal licenses, or registration, it may be subject to investigation, administrative or court proceedings, and civil or criminal monetary fines and penalties, all of which would harm the reputation of the Trust or the Sponsor, decrease the liquidity, and have a material adverse effect on the price of, the Shares.

***Regulatory changes or interpretations could obligate the Trust or the Sponsor to register and comply with new regulations, resulting in potentially extraordinary, nonrecurring expenses to the Trust.***

Current and future legislation, CFTC and SEC rulemaking and other regulatory developments may impact the manner in which BAT is treated. In particular, BAT may be classified by the CFTC as a “commodity interest” under the CEA or may be classified by the SEC as a “security” under U.S. federal securities laws. It is possible that a new Administration and Congress in the United States creates a new classification for digital assets. The Sponsor and the Trust cannot be certain as to how future regulatory developments will impact the treatment of BAT under the law. In the face of such developments, the required registrations and compliance steps may result in extraordinary, nonrecurring expenses to the Trust. If the Sponsor decides to terminate the Trust in response to the changed regulatory circumstances, the Trust may be dissolved or liquidated at a time that is disadvantageous to shareholders.

To the extent that BAT is deemed to fall within the definition of a “commodity interest” under the CEA, the Trust and the Sponsor may be subject to additional regulation under the CEA and CFTC regulations. The Sponsor may be required to register as a commodity pool operator or commodity trading adviser with the CFTC and become a member of the National Futures Association and may be subject to additional regulatory requirements with respect to the Trust, including disclosure and reporting requirements. These additional requirements may result in extraordinary, recurring and/or nonrecurring expenses of the Trust, thereby materially and adversely impacting the Shares. If the Sponsor determines not to comply with such additional regulatory and registration requirements, the Sponsor will terminate the Trust. Any such termination could result in the liquidation of the Trust’s BAT at a time that is disadvantageous to shareholders.

To the extent that BAT is determined to be a security under U.S. federal securities laws, the Trust and the Sponsor may be subject to additional requirements under the Investment Company Act and the Sponsor may be required to register as an investment adviser under the Investment Advisers Act. Such additional registration may result in extraordinary, recurring and/or non-recurring expenses of the Trust, thereby materially and adversely impacting the Shares. If the Sponsor determines not to comply with such additional regulatory and registration requirements, the Sponsor will terminate the

Trust. Any such termination could result in the liquidation of the Trust's BAT at a time that is disadvantageous to shareholders.

***The treatment of the Trust for U.S. federal income tax purposes is uncertain.***

The Sponsor intends to take the position that the Trust is properly treated as a grantor trust for U.S. federal income tax purposes. Assuming that the Trust is a grantor trust, the Trust will not be subject to U.S. federal income tax. Rather, if the Trust is a grantor trust, each beneficial owner of Shares will be treated as directly owning its *pro rata* share of the Trust's assets and a pro rata portion of the Trust's income, gains, losses and deductions will "flow through" to each beneficial owner of Shares.

If the IRS were to disagree with, and successfully challenge certain positions the Trust may take, including with respect to Incidental Rights and IR Virtual Currency, the Trust might not qualify as a grantor trust. In addition, the Sponsor has delivered the Pre-Creation Abandonment Notice to the Custodian stating that the Trust is irrevocably abandoning, effective immediately prior to each Creation Time, all Incidental Rights or IR Virtual Currency to which it would otherwise be entitled as of such time and with respect to which it has not taken any Affirmative Action at or prior to such time. There can be no complete assurance that these abandonments will be treated as effective for U.S. federal income tax purposes. If the Trust were treated as owning any asset other than BAT as of any date on which it creates Shares, it would likely cease to qualify as a grantor trust for U.S. federal income tax purposes.

Because of the evolving nature of digital assets, it is not possible to predict potential future developments that may arise with respect to digital assets, including forks, airdrops and other similar occurrences. Assuming that the Trust is currently a grantor trust for U.S. federal income tax purposes, certain future developments could render it impossible, or impracticable, for the Trust to continue to be treated as a grantor trust for such purposes.

If the Trust is not properly classified as a grantor trust, the Trust might be classified as a partnership for U.S. federal income tax purposes. However, due to the uncertain treatment of digital assets for U.S. federal income tax purposes (as discussed below in "Material U.S. Federal Income Tax Consequences—Uncertainty Regarding the U.S. Federal Income Tax Treatment of Digital Assets"), there can be no assurance in this regard. If the Trust were classified as a partnership for U.S. federal income tax purposes, the tax consequences of owning Shares generally would not be materially different from the tax consequences described herein, although there might be certain differences, including with respect to timing of the recognition of taxable income or loss. In addition, tax information reports provided to beneficial owners of Shares would be made in a different form. If the Trust were not classified as either a grantor trust or a partnership for U.S. federal income tax purposes, it would be classified as a corporation for such purposes. In that event, the Trust would be subject to entity-level U.S. federal income tax (currently at the rate of 21%) on its net taxable income and certain distributions made by the Trust to shareholders would be treated as taxable dividends to the extent of the Trust's current and accumulated earnings and profits. Any such dividend distributed to a beneficial owner of Shares that is a non-U.S. person for U.S. federal income tax purposes would be subject to U.S. federal withholding tax at a rate of 30% (or such lower rate as provided in an applicable tax treaty).

***The treatment of digital assets for U.S. federal income tax purposes is uncertain.***

As discussed in the section entitled "Material U.S. Federal Income Tax Consequences—Uncertainty Regarding the U.S. Federal Income Tax Treatment of Digital Assets" below, assuming that the Trust is properly treated as a grantor trust for U.S. federal income tax purposes, each beneficial owner of Shares will be treated for U.S. federal income tax purposes as the owner of an undivided interest in the BAT (and, if applicable, any Incidental Rights and/or IR Virtual Currency) held in the Trust. Due to the new and evolving nature of digital assets and the absence of comprehensive guidance with respect to digital assets, many significant aspects of the U.S. federal income tax treatment of digital assets are uncertain.

In 2014, the Internal Revenue Service ("IRS") released a notice (the "Notice") discussing certain aspects of "convertible virtual currency" (that is, digital assets that have an equivalent value in fiat currency or that act as substitutes for fiat currency) for U.S. federal income tax purposes and, in particular, stating that such digital assets (i) are "property" (ii) are not "currency" for purposes of the rules relating to foreign currency gain or loss and (iii) may be held as a capital asset. In 2019, the IRS released a revenue ruling and a set of "Frequently Asked Questions" (the "Ruling & FAQs") that provide some additional guidance, including guidance to the effect that, under certain circumstances, hard forks of digital assets are taxable events giving rise to ordinary income and guidance with respect to the determination of the tax basis of digital assets. However, the Notice and the Ruling & FAQs do not address other significant aspects of the U.S. federal income tax

treatment of digital assets. Moreover, although the Ruling & FAQs address the treatment of hard forks, there continues to be uncertainty with respect to the timing and amount of the income inclusions.

There can be no assurance that the IRS will not alter its position with respect to digital assets in the future or that a court would uphold the treatment set forth in the Notice and the Ruling & FAQs. It is also unclear what additional guidance on the treatment of digital assets for U.S. federal income tax purposes may be issued in the future. Any such alteration of the current IRS positions or additional guidance could result in adverse tax consequences for shareholders and could have an adverse effect on the value of BAT. Future developments that may arise with respect to digital assets may increase the uncertainty with respect to the treatment of digital assets for U.S. federal income tax purposes. For example, the Notice addresses only digital assets that are “convertible virtual currency,” and it is conceivable that, as a result of a fork, airdrop or similar occurrence, the Trust will hold certain types of digital assets that are not within the scope of the Notice.

Shareholders are urged to consult their tax advisers regarding the tax consequences of owning and disposing of Shares and digital assets in general.

***Future developments regarding the treatment of digital assets for U.S. federal income tax purposes could adversely affect the value of the Shares.***

As discussed above, many significant aspects of the U.S. federal income tax treatment of digital assets, such as BAT, are uncertain, and it is unclear what guidance on the treatment of digital assets for U.S. federal income tax purposes may be issued in the future. It is possible that any such guidance would have an adverse effect on the prices of digital assets, including on the price of BAT in the Digital Asset Markets, and therefore may have an adverse effect on the value of the Shares.

Because of the evolving nature of digital assets, it is not possible to predict potential future developments that may arise with respect to digital assets, including forks, airdrops and similar occurrences. Such developments may increase the uncertainty with respect to the treatment of digital assets for U.S. federal income tax purposes. Moreover, certain future developments could render it impossible, or impracticable, for the Trust to continue to be treated as a grantor trust for U.S. federal income tax purposes.

***Future developments in the treatment of digital assets for tax purposes other than U.S. federal income tax purposes could adversely affect the value of the Shares.***

The taxing authorities of certain states, including New York, (i) have announced that they will follow the Notice with respect to the treatment of digital assets for state income tax purposes and/or (ii) have issued guidance exempting the purchase and/or sale of digital assets for fiat currency from state sales tax. However, it is unclear what further guidance on the treatment of digital assets for state tax purposes may be issued in the future.

The treatment of digital assets for tax purposes by non-U.S. jurisdictions may differ from the treatment of digital assets for U.S. federal, state or local tax purposes. It is possible, for example, that a non-U.S. jurisdiction would impose sales tax or value-added tax on purchases and sales of digital assets for fiat currency. If a foreign jurisdiction with a significant share of the market of BAT users imposes onerous tax burdens on digital asset users, or imposes sales or value-added tax on purchases and sales of digital assets for fiat currency, such actions could result in decreased demand for BAT in such jurisdiction.

Any future guidance on the treatment of digital assets for state, local or non-U.S. tax purposes could increase the expenses of the Trust and could have an adverse effect on the prices of digital assets, including on the price of BAT in the Digital Asset Markets. As a result, any such future guidance could have an adverse effect on the value of the Shares.

***A U.S. tax-exempt shareholder may recognize “unrelated business taxable income” as a consequence of an investment in Shares.***

Under the guidance provided in the Ruling & FAQs, hard forks, airdrops and similar occurrences with respect to digital assets will under certain circumstances be treated as taxable events giving rise to ordinary income. In the absence of guidance to the contrary, it is possible that any such income recognized by a U.S. tax-exempt shareholder would constitute “unrelated business taxable income” (“UBTI”). A tax-exempt shareholder should consult its tax adviser regarding whether such shareholder may recognize UBTI as a consequence of an investment in Shares. See “Material U.S. Federal Income Tax Consequences.”

***Non-U.S. Holders may be subject to U.S. federal withholding tax on income derived from forks, airdrops and similar occurrences.***

The Ruling & FAQs do not address whether income recognized by a non-U.S. person as a result of a fork, airdrop or similar occurrence could be subject to the 30% withholding tax imposed on U.S.-source “fixed or determinable annual or periodical” income. Non-U.S. Holders (as defined under “Material U.S. Federal Income Tax Consequences—Tax Consequences to Non-U.S. Holders” below) should assume that, in the absence of guidance, a withholding agent (including the Sponsor) is likely to withhold 30% of any such income recognized by a non-U.S. Holder in respect of its Shares, including by deducting such withheld amounts from proceeds that such non-U.S. Holder would otherwise be entitled to receive in connection with a distribution of Incidental Rights or IR Virtual Currency. See “Material U.S. Federal Income Tax Consequences.”

**Risk Factors Related to Potential Conflicts of Interest**

***Potential conflicts of interest may arise among the Sponsor or its affiliates and the Trust. The Sponsor and its affiliates have no fiduciary duties to the Trust and its shareholders other than as provided in the Trust Agreement, which may permit them to favor their own interests to the detriment of the Trust and its shareholders.***

The Sponsor will manage the affairs of the Trust. Conflicts of interest may arise among the Sponsor and its affiliates, including the Authorized Participants, on the one hand, and the Trust and its shareholders, on the other hand. As a result of these conflicts, the Sponsor may favor its own interests and the interests of its affiliates over the Trust and its shareholders. These potential conflicts include, among others, the following:

- The Sponsor has no fiduciary duties to, and is allowed to take into account the interests of parties other than, the Trust and its shareholders in resolving conflicts of interest, provided the Sponsor does not act in bad faith;
- The Trust has agreed to indemnify the Sponsor and its affiliates pursuant to the Trust Agreement;
- The Sponsor is responsible for allocating its own limited resources among different clients and potential future business ventures, to each of which it owes fiduciary duties;
- The Sponsor and its staff also service affiliates of the Sponsor, including several other digital asset investment vehicles, and their respective clients and cannot devote all of its, or their, respective time or resources to the management of the affairs of the Trust;
- The Sponsor, its affiliates and their respective officers and employees are not prohibited from engaging in other businesses or activities, including those that might be in direct competition with the Trust;
- Affiliates of the Sponsor have substantial direct investments in BAT that they are permitted to manage taking into account their own interests without regard to the interests of the Trust or its shareholders, and any increases, decreases or other changes in such investments could affect the Index Price and, in turn, the value of the Shares;
- There is an absence of arm’s-length negotiation with respect to certain terms of the Trust, and, where applicable, there has been no independent due diligence conducted with respect to the Trust;
- Several employees of the Sponsor and the Sponsor’s indirect parent company, DCG, are FINRA-registered representatives who historically maintained their licenses through Genesis and currently maintain their licenses through Grayscale Securities;
- DCG is (i) the sole equity holder and indirect parent company of the Sponsor; (ii) the indirect parent company of Grayscale Securities, the only acting Authorized Participant as of the date of this Annual Report; and (iii) a minority interest holder in Kraken, one of the Digital Asset Trading Platforms included in the Index, representing less than 1.0% of its equity;
- DCG has investments in a large number of digital assets and companies involved in the digital asset ecosystem, including trading platforms and custodians. DCG’s positions on changes that should be adopted in the Basic Attention Token Network could be adverse to positions that would benefit the Trust or its shareholders. Additionally, before or after a hard fork on the Ethereum Network, DCG’s position regarding which fork among a group of incompatible forks of the Ethereum Network should be considered the “true” Basic Attention Token Network could be adverse to positions that would most benefit the Trust;

- DCG has been vocal in the past about its support for digital assets other than BAT. Any investments in, or public positions taken on, digital assets other than BAT by DCG could have an adverse impact on the price of BAT;
- The Sponsor decides whether to retain separate counsel, accountants or others to perform services for the Trust;
- The Sponsor and Grayscale Securities, which acts as Authorized Participant and distributor and marketer for the Shares, are affiliated parties that share a common indirect parent company, DCG;
- The Sponsor may appoint an agent to act on behalf of the shareholders, including in connection with the distribution of any Incidental Rights and/or IR Virtual Currency, and such agent may be the Sponsor or an affiliate of the Sponsor; and
- The Sponsor has historically, and may again select an Index Provider that is an affiliate of the Sponsor and the Trust.

By purchasing the Shares, shareholders agree and consent to the provisions set forth in the Trust Agreement. See “Material Contracts—Description of the Trust Agreement.”

For a further discussion of the conflicts of interest among the Sponsor, the distributor, the marketer, Authorized Participant, Liquidity Providers, the Trust and others, see “Conflicts of Interest.”

***Because the Sponsor and the Trust’s sole Authorized Participant are affiliated with each other, the Trust’s Baskets will not be exchanged for BAT in arm’s-length transactions.***

The Sponsor is an affiliate of Grayscale Securities, LLC, a registered broker-dealer currently acting as the sole Authorized Participant, distributor and marketer for the Shares. The Trust issues Creation Baskets in exchange for deposits of BAT. See “Creation and Redemption of Shares.” As the sole Authorized Participant, Grayscale Securities is currently the only entity that may place orders to create Creation Baskets. As a result, the issuance of Creation Baskets does not occur on an arm’s-length basis.

While additional Authorized Participants may be added at any time, subject to the discretion of the Sponsor, the Sponsor may be disincentivized from replacing affiliated service providers due to its affiliated status. In connection with this conflict of interest, shareholders should understand that affiliated service providers will receive fees for providing services to the Trust. Clients of the affiliated service providers may pay commissions at negotiated rates that are greater or less than the rate paid by the Trust. The Sponsor may have an incentive to resolve questions between Grayscale Securities, on the one hand, and the Trust and shareholders, on the other hand, in favor of Grayscale Securities (including, but not limited to, questions as to the calculation of the Basket Amount).

***DCG is a minority interest holder in Kraken, which operates one of the Digital Asset Trading Platforms included in the Index Price.***

DCG, the sole equity holder and indirect parent company of the Sponsor, holds a minority interest of less than 1.0% in Kraken. The Sponsor values its digital assets by reference to the Index Price. The Index Price is the price in U.S. dollars of a BAT derived from the Digital Asset Trading Platforms that are reflected in the Index developed by CoinDesk Indices, Inc. as of 4:00 p.m., New York time, on each business day. Kraken is one of such Digital Asset Trading Platforms included in the Index.

Although DCG does not exercise control over Kraken, it is possible that investors could have concerns that DCG could influence market data provided by this Digital Asset Trading Platform in a way that benefits DCG, for example by artificially inflating the values of BAT in order to increase the Sponsor’s fees. This could make the Trust’s Shares less attractive to investors than the shares of similar vehicles that do not present these concerns, adversely affect investor sentiment about the Trust and negatively affect Share trading prices.

***Shareholders cannot be assured of the Sponsor’s continued services, the discontinuance of which may be detrimental to the Trust.***

Shareholders cannot be assured that the Sponsor will be willing or able to continue to serve as sponsor to the Trust for any length of time. If the Sponsor discontinues its activities on behalf of the Trust and a substitute sponsor is not appointed, the Trust will terminate and liquidate its BAT.

Appointment of a substitute sponsor will not guarantee the Trust's continued operation, successful or otherwise. Because a substitute sponsor may have no experience managing a digital asset financial vehicle, a substitute sponsor may not have the experience, knowledge or expertise required to ensure that the Trust will operate successfully or continue to operate at all. Therefore, the appointment of a substitute sponsor may not necessarily be beneficial to the Trust and the Trust may terminate. See "Conflicts of Interest—The Sponsor."

***Although the Custodian is a fiduciary with respect to the Trust's assets, if the Custodian resigns or is removed by the Sponsor or otherwise, without replacement, it would trigger early termination of the Trust.***

The Custodian is a fiduciary under § 100 of the New York Banking Law and a qualified custodian for purposes of Rule 206(4)-2(d)(6) under the Investment Advisers Act and is licensed to custody the Trust's BAT in trust on the Trust's behalf. However, the SEC has released proposed amendments to Rule 206(4)-2 that, if enacted as proposed, would amend the definition of a "qualified custodian" under Rule 206(4)-2(d)(6). Executive officers of the Custodian's parent company have made public statements indicating that the Custodian will remain a qualified custodian under the proposed SEC rule, if enacted as currently proposed. However, there can be no assurance that the Custodian would continue to qualify as a "qualified custodian" under a final rule.

Furthermore, during the initial term, the Custodian may terminate the Custodian Agreement for Cause (as defined in "Description of the Custodian Agreement—Termination") at any time, and after the initial term, the Custodian can terminate the Agreement for any reason upon the notice period provided under the Custodian Agreement. If the Custodian resigns or is removed by the Sponsor or otherwise, without replacement, the Trust will dissolve in accordance with the terms of the Trust Agreement.

***Shareholders may be adversely affected by the lack of independent advisers representing investors in the Trust.***

The Sponsor has consulted with counsel, accountants and other advisers regarding the formation and operation of the Trust. No counsel was appointed to represent investors in connection with the formation of the Trust or the establishment of the terms of the Trust Agreement and the Shares. Moreover, no counsel has been appointed to represent an investor in connection with the offering of the Shares. Accordingly, an investor should consult his, her or its own legal, tax and financial advisers regarding the desirability of the value of the Shares. Lack of such consultation may lead to an undesirable investment decision with respect to investment in the Shares.

## COINDESK BTX INDEX

The Trust values its BAT by reference to the “Index Price,” which is the price of a BAT calculated by applying a weighting algorithm to the price and trading volume data for the immediately preceding 24-hour period as of 4:00 p.m., New York time, derived from the selected Digital Asset Trading Platforms that are reflected in the CoinDesk Basic Attention Token Price Index (BTX) (the “Index”) on each business day. The Index Price is calculated using non-GAAP methodology and is not used in the Trust’s financial statements.

The Index is a U.S. dollar-denominated composite reference rate for the price of BAT. The Index is designed to (1) mitigate the effects of fraud, manipulation and other anomalous trading activity from impacting the BAT reference rate, (2) provide a real-time, volume-weighted fair value of BAT and (3) appropriately handle and adjust for non-market related events.

The Index Price is determined by the Index Provider through a process in which trade data is cleansed and compiled in such a manner as to algorithmically reduce the impact of anomalous or manipulative trading. This is accomplished by adjusting the weight of each data input based on price deviation relative to the observable set, as well as recent and long-term trading volume at each venue relative to the observable set.

### ***Constituent Trading Platform Selection***

The Digital Asset Trading Platforms that are included in the Index are selected by the Index Provider utilizing a methodology that is guided by the International Organization of Securities Commissions (“IOSCO”) principles for financial benchmarks. For a trading platform to become a Constituent Trading Platform, it must satisfy the criteria listed below (the “Inclusion Criteria”):

- No evidence in the past 12 months of trading restrictions on individuals or entities that would otherwise meet the trading platform’s eligibility requirements to trade;
- No evidence in the past 12 months of undisclosed restrictions on deposits or withdrawals from user accounts;
- Real-time price discovery;
- Limited or no capital controls;
- Transparent ownership including a publicly-known ownership entity;
- Publicly available language and policies addressing legal and regulatory compliance, including KYC (Know Your Customer), AML (Anti-Money Laundering) and other policies designed to comply with relevant regulations that might apply to it; and
- Offer programmatic spot trading of the trading pair, and reliably publish trade prices and volumes on a real-time basis through Rest and Websocket APIs.

All trading platforms that meet these Inclusion Criteria will be assigned to one trading platform Category as defined by the additional criteria below:

- Category 1
  - o Licensed and/or able to serve investors, retail or professional, in the U.S.; and
  - o Maintain sufficient USD or USDC liquidity relative to the size of the listed assets.

- Category 2
  - o Licensed (including in-principal licensure) and/or able to serve investors, retail or professional, in one or more of the following jurisdictions:
    - United Kingdom
    - European Union
      - In the event a trading platform is only licensed or able to serve investors in select European Union countries and none of the other listed jurisdictions, the Index Provider reserves the right to evaluate its eligibility on a case-by-case basis.
    - Hong Kong
    - Singapore; and
  - Maintain sufficient USD or USDC liquidity relative to the size of the listed assets.

A Digital Asset Trading Platform is removed from the Constituent Trading Platforms when it no longer satisfies the Inclusion Criteria. The Index Provider does not currently include data from over-the-counter markets or derivatives platforms among the Constituent Trading Platforms. Over-the-counter data is not currently included because of the potential for trades to include a significant premium or discount paid for larger liquidity, which creates an uneven comparison relative to more active markets. There is also a higher potential for over-the-counter transactions to not be arms-length, and thus not be representative of a true market price. BAT derivative markets are also not currently included as the markets remain relatively thin. While the Index Provider has no plans to include data from over-the-counter markets or derivative platforms at this time, the Index Provider will consider IOSCO principles for financial benchmarks, the management of trading venues of BAT derivatives and the aforementioned Inclusion Criteria when considering whether to include over-the-counter or derivative platform data in the future.

The Index Provider and the Sponsor have entered into the index license agreement, dated as of February 1, 2022 (as amended, the “Index License Agreement”), governing the Sponsor’s use of the Index Price. Pursuant to the terms of the Index License Agreement, the Index Provider may adjust the calculation methodology for the Index Price without notice to, or consent of, the Trust or its shareholders. The Index Provider may decide to change the calculation methodology to maintain the integrity of the Index Price calculation should it identify or become aware of previously unknown variables or issues with the existing methodology that it believes could materially impact its performance and/or reliability. The Index Provider has sole discretion over the determination of Index Price and may change the methodologies for determining the Index Price from time to time. Shareholders will be notified of any material changes to the calculation methodology or the Index Price in the Trust’s current reports and will be notified of all other changes that the Sponsor considers significant in the Trust’s periodic or current reports. The Sponsor will determine the materiality of any changes to the Index Price on a case-by-case basis, in consultation with external counsel.

The Index Provider may change the trading venues that are included in the Index or otherwise change the way in which the Index is calculated at any time. For example, the Index Provider has scheduled quarterly reviews in which it may add or remove Constituent Trading Platforms that satisfy or fail the Inclusion Criteria. The Index Provider does not have any obligation to consider the interests of the Sponsor, the Trust, the shareholders, or anyone else in connection with such changes. While the Index Provider is not required to publicize or explain the changes or to alert the Sponsor to such changes, it has historically notified the Trust of any material changes to the Constituent Trading Platforms, including any additions or removals of the Constituent Trading Platforms, in addition to issuing press releases in connection with the same. The Sponsor will notify investors of any such material event by filing a press release. Although the Index methodology is designed to operate without any manual intervention, rare events would justify manual intervention. Intervention of this kind would be in response to non-market-related events, such as the halting of deposits or withdrawals of funds on a Digital Asset Trading Platform, the unannounced closure of operations on a Digital Asset Trading Platform, insolvency or the compromise of user funds. In the event that such an intervention is necessary, the Index Provider would issue a public announcement through its website, API and other established communication channels with its clients.

Index rate data and the description of the Index are based on information publicly available at the Index Provider’s website at [www.coindesk.com/indices](http://www.coindesk.com/indices). ***None of the information on the Index Provider’s website is incorporated by reference into this Annual Report.***

For additional information on the Index see “Grayscale Basic Attention Token Trust (BAT)—The Index and the Index Price.”

### *Certain Relationships*

The Index Provider and the Sponsor have entered into an index license agreement (the “Index License Agreement”) governing the Sponsor’s use of the Index for calculation of the Index Price. The Index Provider may adjust the calculation methodology for the Index without notice to, or consent of, the Trust or its shareholders. Under the Index License Agreement, the Sponsor pays a monthly fee and a fee based on the NAV of the Trust to the Index Provider in consideration of its license to the Sponsor of Index-related intellectual property. The initial term of the Index License Agreement was February 1, 2022 through the later of February 29, 2024 and the latest date set forth on any order form executed under the Index License Agreement. On June 20, 2023, the Sponsor and the Index Provider, entered into an amendment to the Index License Agreement to extend the initial term of the Index License Agreement from February 29, 2024, to February 28, 2025. On February 5, 2025, the Sponsor and the Index Provider, entered into an amendment to the Index License Agreement to extend the term of the Index License Agreement from February 28, 2025, to February 29, 2028. Thereafter, the Index License Agreement will automatically renew on an annual basis, unless a notice of non-renewal is provided. The Index License Agreement is terminable by either party upon written notice in the event of a material breach that remains uncured for thirty days after initial written notice of such breach. Further, either party may terminate the Index License Agreement immediately upon notice under certain circumstances, including with respect to the other party’s (i) insolvency, bankruptcy or analogous event or (ii) violation of money transmission, taxation or trading regulations that materially adversely affect either party’s ability to perform under the Index License Agreement.

COINDESK® and COINDESK BASIC ATTENTION TOKEN PRICE INDEX (the “Index”) are trade or service marks of CoinDesk Indices, Inc. (with its affiliates, including CC Data Limited, “CDI”) and/or its licensors. CDI or CDI’s licensors own all proprietary rights in the Data.

CDI is not the issuer or producer of the Trust and has no responsibilities, obligations, or duties to investors in or holders of the Trust. The Index is licensed for use by the Sponsor as the sponsor of the Trust. The only relationship that CDI has with the Sponsor in respect of the Trust is the licensing of the Index, which is administered and published by CDI, or any successor thereto, without regard to the Sponsor or the owners or holders of Shares of the Trust.

Investors or holders acquire shares of the Trust offered by the Sponsor and investors and holders neither acquire any interest in the Index nor enter into any relationship of any kind whatsoever with CDI upon making an investment in or acquisition of the Trust. The Trust is not sponsored, endorsed, sold, or promoted by CDI. CDI makes no representation or warranty, express or implied, regarding the advisability of investing in or otherwise acquiring the Trust or the advisability of investing in securities or digital assets generally or the ability of the Index to track corresponding or relative market performance. CDI has not passed on the legality or suitability of the Trust with respect to any person or entity. CDI is not responsible for, nor has participated in, the determination of the timing of, prices at, or quantities of the Trust to be issued. CDI has no obligation to take the needs of the Sponsor or the owners or holders of the Trust or any other third party into consideration in administering, composing, calculating, or publishing the Index. CDI has no obligation or liability in connection with administration, marketing, or trading of the Trust.

The licensing agreement between the Sponsor and CDI is solely for the benefit of the Sponsor and CDI and not for the benefit of the owners or holders of Shares of the Trust or any other third parties.

CDI shall have no liability to the Sponsor, the Trust, investors, holders or other third parties for the quality, accuracy and/or completeness of the index or any data included therein or for interruptions in the delivery of the data. CDI hereby expressly disclaims all warranties of merchantability or fitness for a particular purpose or use with respect to the Index or any other data included therein. CDI reserves the right to change the methods of calculation or publication, or to cease the calculation or publication of the Index and shall not be liable for any miscalculation of or any incorrect, delayed, or interrupted publication with respect to the Index. CDI shall not be liable for any damages, including, without limitation, any special, indirect or consequential damages, or any lost profits, even if advised of the possibility of such, resulting from the use of the Index or any other data included therein or with respect to the Trust.

## **CUSTODY OF THE TRUST'S BAT**

Digital assets and digital asset transactions are recorded and validated on blockchains, the public transaction ledgers of a digital asset network. Each digital asset blockchain serves as a record of ownership for all of the units of such digital asset, even in the case of certain privacy-preserving digital assets, where the transactions themselves are not publicly viewable. All digital assets recorded on a blockchain are associated with a public blockchain address, also referred to as a digital wallet. Digital assets held at a particular public blockchain address may be accessed and transferred using a corresponding private key.

### **Key Generation**

Public addresses and their corresponding private keys are generated by the Custodian in secret key generation ceremonies at secure locations inside faraday cages, which are enclosures used to block electromagnetic fields and thus mitigate against attacks. The Custodian uses quantum random number generators to generate the public and private key pairs.

Once generated, private keys are encrypted, separated into “shards,” and then further encrypted. After the key generation ceremony, all materials used to generate private keys, including computers, are destroyed. All key generation ceremonies are performed offline. No party other than the Custodian has access to the private key shards of the Trust, including the Trust itself.

### **Key Storage**

Private key shards are distributed geographically in secure vaults around the world, including in the United States. The locations of the secure vaults may change regularly and are kept confidential by the Custodian for security purposes.

The Digital Asset Account uses offline storage, or “cold storage”, mechanisms to secure the Trust’s private keys. The term cold storage refers to a safeguarding method by which the private keys corresponding to digital assets are disconnected and/or deleted entirely from the internet. Cold storage of private keys may involve keeping such keys on a non-networked (or “air-gapped”) computer or electronic device or storing the private keys on a storage device (for example, a USB thumb drive) or printed medium (for example, papyrus, paper or a metallic object). A digital wallet may receive deposits of digital assets but may not send digital assets without use of the digital assets’ corresponding private keys. In order to send digital assets from a digital wallet in which the private keys are kept in cold storage, either the private keys must be retrieved from cold storage and entered into an online, or “hot”, digital asset software program to sign the transaction, or the unsigned transaction must be transferred to the cold server in which the private keys are held for signature by the private keys and then transferred back to the online digital asset software program. At that point, the user of the digital wallet can transfer its digital assets.

### **Security Procedures**

The Custodian is the custodian of the Trust’s private keys in accordance with the terms and provisions of the Custodian Agreement. Transfers from the Digital Asset Account requires certain security procedures, including but not limited to, multiple encrypted private key shards, usernames, passwords and 2-step verification. Multiple private key shards held by the Custodian must be combined to reconstitute the private key to sign any transaction in order to transfer the Trust’s assets. Private key shards are distributed geographically in secure vaults around the world, including in the United States.

As a result, if any one secure vault is ever compromised, this event will have no impact on the ability of the Trust to access its assets, other than a possible delay in operations, while one or more of the other secure vaults is used instead. These security procedures are intended to remove single points of failure in the protection of the Trust’s assets.

Transfers of BAT to the Digital Asset Account will be available to the Trust once processed on the Blockchain.

Subject to obtaining regulatory approval to operate a redemption program and authorization of the Sponsor, the process of accessing and withdrawing BAT from the Trust to redeem a Basket by an Authorized Participant will follow the same general procedure as transferring BAT to the Trust to create a Basket by an Authorized Participant, only in reverse. See “Creation and Redemption of Shares.”

## MATERIAL U.S. FEDERAL INCOME TAX CONSEQUENCES

The following discussion addresses the material U.S. federal income tax consequences of the ownership of Shares. References to “Relevant Digital Asset” refer to BAT, the digital asset held by the Trust. This discussion does not describe all of the tax consequences that may be relevant to a beneficial owner of Shares in light of the beneficial owner’s particular circumstances, including tax consequences applicable to beneficial owners subject to special rules, such as:

- financial institutions;
- dealers in securities or commodities;
- traders in securities or commodities that have elected to apply a mark-to-market method of tax accounting in respect thereof;
- persons holding Shares as part of a hedge, “straddle,” integrated transaction or similar transaction;
- Authorized Participants (as defined below);
- U.S. Holders (as defined below) whose functional currency is not the U.S. dollar;
- entities or arrangements classified as partnerships for U.S. federal income tax purposes;
- real estate investment trusts;
- regulated investment companies; and
- tax-exempt entities, including individual retirement accounts.

This discussion applies only to Shares that are held as capital assets and does not address alternative minimum tax consequences or consequences of the Medicare contribution tax on net investment income.

If an entity or arrangement that is classified as a partnership for U.S. federal income tax purposes holds Shares, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and the activities of the partnership. Partnerships holding Shares and partners in those partnerships are urged to consult their tax advisers about the particular U.S. federal income tax consequences of owning Shares.

This discussion is based on the Code, administrative pronouncements, judicial decisions and final, temporary and proposed Treasury regulations as of the date hereof, changes to any of which subsequent to the date hereof may affect the tax consequences described herein. For the avoidance of doubt, this summary does not discuss any tax consequences arising under the laws of any state, local or foreign taxing jurisdiction. Shareholders are urged to consult their tax advisers about the application of the U.S. federal income tax laws to their particular situations, as well as any tax consequences arising under the laws of any state, local or foreign taxing jurisdiction.

### Tax Treatment of the Trust

The Sponsor intends to take the position that the Trust is properly treated as a grantor trust for U.S. federal income tax purposes. Assuming that the Trust is a grantor trust, the Trust will not be subject to U.S. federal income tax. Rather, if the Trust is a grantor trust, each beneficial owner of Shares will be treated as directly owning its *pro rata* share of the Trust’s assets and a pro rata portion of the Trust’s income, gains, losses and deductions will “flow through” to each beneficial owner of Shares.

If the IRS were to disagree with, and successfully challenge, certain positions the Trust may take, including with respect to Incidental Rights and IR Virtual Currency, the Trust might not qualify as a grantor trust. The Pre-Creation Abandonment Notice provides that the Trust will abandon irrevocably, for no direct or indirect consideration, effective immediately prior to each Creation Time, all Incidental Rights or IR Virtual Currency to which it would otherwise be entitled as of such time and with respect to which it has not taken any Affirmative Action at or prior to such time. There can be no complete assurance that these abandonments will be treated as effective for U.S. federal income tax purposes. If the Trust were treated as owning any asset other than the Relevant Digital Asset as of any date on which it creates Shares, it would likely cease to qualify as a grantor trust for U.S. federal income tax purposes.

Moreover, because of the evolving nature of digital assets, it is not possible to predict potential future developments that may arise with respect to digital assets, including forks, airdrops and other similar occurrences. Assuming that the Trust is currently a grantor trust for U.S. federal income tax purposes, certain future developments could render it impossible, or impracticable, for the Trust to continue to be treated as a grantor trust for such purposes.

If the Trust is not properly classified as a grantor trust, the Trust might be classified as a partnership for U.S. federal income tax purposes. However, due to the uncertain treatment of digital assets for U.S. federal income tax purposes, there can be no assurance in this regard. If the Trust were classified as a partnership for U.S. federal income tax purposes, the tax consequences of owning Shares generally would not be materially different from the tax consequences described herein, although there might be certain differences, including with respect to timing of the recognition of taxable income or loss. In addition, tax information reports provided to beneficial owners of Shares would be made in a different form. If the Trust were not classified as either a grantor trust or a partnership for U.S. federal income tax purposes, it would be classified as a corporation for such purposes. In that event, the Trust would be subject to entity-level U.S. federal income tax (currently at the rate of 21%) on its net taxable income and certain distributions made by the Trust to shareholders would be treated as taxable dividends to the extent of the Trust's current and accumulated earnings and profits. Any such dividend distributed to a beneficial owner of Shares that is a non-U.S. person for U.S. federal income tax purposes would be subject to U.S. federal withholding tax at a rate of 30% (or such lower rate as provided in an applicable tax treaty).

The remainder of this discussion is based on the assumption that the Trust will be treated as a grantor trust for U.S. federal income tax purposes.

### **Uncertainty Regarding the U.S. Federal Income Tax Treatment of Digital Assets**

Each beneficial owner of Shares will be treated for U.S. federal income tax purposes as the owner of an undivided interest in the Relevant Digital Asset (and any Incidental Rights and/or IR Virtual Currency) held in the Trust. Due to the new and evolving nature of digital assets and the absence of comprehensive guidance with respect to digital assets, many significant aspects of the U.S. federal income tax treatment of digital assets are uncertain.

In 2014, the Internal Revenue Service ("IRS") released a notice (the "Notice") discussing certain aspects of the treatment of "convertible virtual currency" (that is, digital assets that have an equivalent value in fiat currency or that act as substitutes for fiat currency) for U.S. federal income tax purposes. In the Notice, the IRS stated that, for U.S. federal income tax purposes, such digital assets (i) are "property," (ii) are not "currency" for purposes of the provisions of the Code relating to foreign currency gain or loss and (iii) may be held as a capital asset. In 2019, the IRS released a revenue ruling and a set of "Frequently Asked Questions" (the "Ruling & FAQs") that provide some additional guidance, including guidance to the effect that, under certain circumstances, hard forks of digital assets are taxable events giving rise to ordinary income and guidance with respect to the determination of the tax basis of digital assets. However, the Notice and the Ruling & FAQs do not address other significant aspects of the U.S. federal income tax treatment of digital assets. Moreover, although the Ruling & FAQs address the treatment of hard forks, there continues to be significant uncertainty with respect to the timing and amount of the income inclusions. While the Ruling & FAQs do not address most situations in which airdrops occur, it is clear from the reasoning of the Ruling & FAQs that the IRS generally would treat an airdrop as a taxable event giving rise to ordinary income.

There can be no assurance that the IRS will not alter its position with respect to digital assets in the future or that a court would uphold the treatment set forth in the Notice and the Ruling & FAQs. It is also unclear what additional guidance on the treatment of digital assets for U.S. federal income tax purposes may be issued in the future. Any such alteration of the current IRS positions or additional guidance could result in adverse tax consequences for shareholders and could have an adverse effect on the prices of digital assets, including the price of the Relevant Digital Asset in the Digital Asset Market, and therefore could have an adverse effect on the value of Shares. Future developments that may arise with respect to digital assets may increase the uncertainty with respect to the treatment of digital assets for U.S. federal income tax purposes. For example, the Notice addresses only digital assets that are "convertible virtual currency," and it is conceivable that, as a result of a fork, airdrop or similar occurrence, a Trust will hold certain types of digital assets that are not within the scope of the Notice.

The remainder of this discussion assumes the Relevant Digital Asset, and any Incidental Rights or IR Virtual Currency that the Trust may hold, is properly treated for U.S. federal income tax purposes as property that may be held as a capital asset and that is not currency for purposes of the provisions of the Code relating to foreign currency gain and loss.

Shareholders are urged to consult their tax advisers regarding the tax consequences of an investment in the Trust and in digital assets in general, including, in the case of shareholders that are generally exempt from U.S. federal income taxation, whether such shareholders may recognize “unrelated business taxable income” (“UBTI”) as a consequence of a fork, airdrop or similar occurrence.

### **Incidental Rights and IR Virtual Currency**

It is possible that, in the future, the Trust will hold Incidental Rights and/or IR Virtual Currency that it receives in connection with its investment in the Relevant Digital Asset. The uncertainties with respect to the treatment of digital assets for U.S. federal income tax purposes, described above, apply to Incidental Rights and IR Virtual Currency, as well as to the Relevant Digital Asset. As described above, the Notice addressed only digital assets that are “convertible virtual currency,” defined as digital assets that have an equivalent value in fiat currency or that act as substitutes for fiat currency. It is conceivable that certain IR Virtual Currency the Trust may receive in the future would not be within the scope of the Notice.

In general, it is expected that the Trust would receive Incidental Rights and IR Virtual Currency as a consequence of a fork, an airdrop or a similar occurrence related to its ownership of the Relevant Digital Asset. As described above, the Ruling & FAQs include guidance to the effect that, under certain circumstances, forks (and, presumably, airdrops) of digital assets are taxable events giving rise to ordinary income, but there continues to be uncertainty with respect to the timing and amount of the income inclusions. The Trust’s receipt of Incidental Rights or IR Virtual Currency may give rise to other tax issues. The possibility that the Trust will receive Incidental Rights and/or IR Virtual Currency thus increases the uncertainties and risks with respect to the U.S. federal income tax consequences of an investment in Shares.

The Trust may distribute Incidental Rights or IR Virtual Currency, or cash from the sale of Incidental Rights or IR Virtual Currency, to the shareholders. Alternatively, the Trust may form a liquidating trust to which it contributes Incidental Rights or IR Virtual Currency and distribute interests in the liquidating trust to the shareholders. Any such distribution will not be a taxable event for a U.S. Holder (as defined below). A U.S. Holder’s tax basis in the Incidental Rights or IR Virtual Currency distributed, whether directly or through the medium of a liquidating trust, will be the same as the U.S. Holder’s tax basis in the distributed assets immediately prior to the distribution, and the U.S. Holder’s tax basis in its *pro rata* share of the Trust’s remaining assets will not include the amount of such basis. Immediately after any such distribution, the U.S. Holder’s holding period with respect to the distributed Incidental Rights or IR Virtual Currency will be the same as the U.S. Holder’s holding period with respect to the distributed assets immediately prior to the distribution. A subsequent sale of the distributed Incidental Rights or IR Virtual Currency will generally be a taxable event for a U.S. Holder.

For simplicity of presentation, the remainder of this discussion assumes that the Trust will hold only the Relevant Digital Asset. However, the principles set forth in the discussion below apply to all of the assets that the Trust may hold at any time, including Incidental Rights and IR Virtual Currency, as well as the Relevant Digital Asset. Without limiting the generality of the foregoing, each beneficial owner of Shares generally will be treated for U.S. federal income tax purposes as owning an undivided interest in any Incidental Rights and/or IR Virtual Currency held in the Trust, and any transfers or sales of Incidental Rights and/or IR Virtual Currency by the Trust (other than distributions by the Trust, as described in the preceding paragraph) will be taxable events to shareholders with respect to which shareholders will generally recognize gain or loss in a manner similar to the recognition of gain or loss on a taxable disposition of the Relevant Digital Asset, as described below.

### **Tax Consequences to U.S. Holders**

As used herein, the term “U.S. Holder” means a beneficial owner of a Share for U.S. federal income tax purposes that is:

- an individual who is a citizen or resident of the United States for U.S. federal income tax purposes;
- a corporation, or other entity treated as a corporation for U.S. federal income tax purposes, created or organized in or under the laws of the United States or of any political subdivision thereof; or
- an estate or trust the income of which is subject to U.S. federal income taxation regardless of its source.

Except as specifically noted, the discussion below assumes that each U.S. Holder will acquire all of its Shares on the same date for the same price per Share and either solely for cash or solely for the Relevant Digital Asset that were originally acquired by the U.S. Holder for cash on the same date.

As discussed in the section entitled “Description of Creation of Shares,” a U.S. Holder may be able to acquire Shares of the Trust by contributing the Relevant Digital Asset in-kind to the Trust (either directly or through an Authorized Participant acting as agent of the U.S. Holder). Assuming that the Trust is properly treated as a grantor trust for U.S. federal income tax purposes, such a contribution should not be a taxable event to the U.S. Holder.

For U.S. federal income tax purposes, each U.S. Holder will be treated as owning an undivided interest in the Relevant Digital Asset held in the Trust and will be treated as directly realizing its *pro rata* share of the Trust’s income, gains, losses and deductions. When a U.S. Holder purchases Shares solely for cash, (i) the U.S. Holder’s initial tax basis in its *pro rata* share of the Relevant Digital Asset held in the Trust will be equal to the amount paid for the Shares and (ii) the U.S. Holder’s holding period for its *pro rata* share of such Relevant Digital Asset will begin on the date of such purchase. When a U.S. Holder acquires Shares in exchange for the Relevant Digital Asset, (i) the U.S. Holder’s initial tax basis in its *pro rata* share of the Relevant Digital Asset held in the Trust will be equal to the U.S. Holder’s tax basis in the Relevant Digital Asset that the U.S. Holder transferred to the Trust and (ii) the U.S. Holder’s holding period for its *pro rata* share of such Relevant Digital Asset generally will include the period during which the U.S. Holder held the Relevant Digital Asset that the U.S. Holder transferred to the Trust. The Ruling & FAQs confirm that if a taxpayer acquires tokens of a digital asset at different times and for different prices, the taxpayer has a separate tax basis in each lot of such tokens. Under the Ruling & FAQs, if a U.S. Holder that owns more than one lot of Relevant Digital Asset contributes a portion of its Relevant Digital Asset to the Trust in exchange for Shares, the U.S. Holder may designate the lot(s) from which such contribution will be made, provided that the U.S. Holder is able to identify specifically which units of the Relevant Digital Asset it is contributing and to substantiate its tax basis in those units of the Relevant Digital Asset. In general, if a U.S. Holder acquires Shares (i) solely for cash at different prices, (ii) partly for cash and partly in exchange for a contribution of Relevant Digital Asset or (iii) in exchange for a contribution of Relevant Digital Asset with different tax bases, the U.S. Holder’s share of the Trust’s Relevant Digital Asset will consist of separate lots with separate tax bases. In addition, in this situation, the U.S. Holder’s holding period for the separate lots may be different. In addition, the IR Virtual Currency that the Trust acquires in a hard fork or airdrop that is treated as a taxable event will constitute a separate lot with a separate tax basis and holding period.

When the Trust transfers the Relevant Digital Asset to the Sponsor as payment of the Sponsor’s Fee, or sells the Relevant Digital Asset to fund payment of any Additional Trust Expenses, each U.S. Holder will be treated as having sold its *pro rata* share of those units of the Relevant Digital Asset for their fair market value at that time (which, in the case of the Relevant Digital Asset sold by the Trust, generally will be equal to the cash proceeds received by the Trust in respect thereof). As a result, each U.S. Holder will recognize gain or loss in an amount equal to the difference between (i) the fair market value of the U.S. Holder’s *pro rata* share of the Relevant Digital Asset transferred and (ii) the U.S. Holder’s tax basis for its *pro rata* share of the Relevant Digital Asset transferred. Any such gain or loss will be short-term capital gain or loss if the U.S. Holder’s holding period for its *pro rata* share of the Relevant Digital Asset is one year or less and long-term capital gain or loss if the U.S. Holder’s holding period for its *pro rata* share of the Relevant Digital Asset is more than one year. A U.S. Holder’s tax basis in its *pro rata* share of any Relevant Digital Asset transferred by the Trust generally will be determined by multiplying the tax basis of the U.S. Holder’s *pro rata* share of all of the Relevant Digital Asset held in the Trust immediately prior to the transfer by a fraction the numerator of which is the amount of the Relevant Digital Asset transferred and the denominator of which is the total amount of the Relevant Digital Asset held in the Trust immediately prior to the transfer. Immediately after the transfer, the U.S. Holder’s tax basis in its *pro rata* share of the Relevant Digital Asset remaining in the Trust will be equal to the tax basis of its *pro rata* share of the Relevant Digital Asset held in the Trust immediately prior to the transfer, less the portion of that tax basis allocable to its *pro rata* share of the Relevant Digital Asset transferred.

As noted above, the IRS has taken the position in the Ruling & FAQs that, under certain circumstances, a hard fork of a digital asset constitutes a taxable event giving rise to ordinary income, and it is clear from the reasoning of the Ruling & FAQs that the IRS generally would treat an airdrop as a taxable event giving rise to ordinary income. Under the Ruling & FAQs, a U.S. Holder will have a basis in any IR Virtual Currency received in a fork or airdrop equal to the amount of income the U.S. Holder recognizes as a result of such fork or airdrop and the U.S. Holder’s holding period for such IR Virtual Currency will begin as of the time it recognizes such income.

U.S. Holders' *pro rata* shares of the expenses incurred by the Trust will be treated as "miscellaneous itemized deductions" for U.S. federal income tax purposes. As a result, for taxable years beginning after December 31, 2017 and before January 1, 2026, a non-corporate U.S. Holder's share of these expenses will not be deductible for U.S. federal income tax purposes. For taxable years beginning on or after January 1, 2026, a non-corporate U.S. Holder's share of these expenses will be deductible for regular U.S. federal income tax purposes only to the extent that the U.S. Holder's share of the expenses, when combined with other "miscellaneous itemized deductions," exceeds 2% of the U.S. Holder's adjusted gross income for the particular year, will not be deductible for U.S. federal alternative minimum tax purposes and will be subject to certain other limitations on deductibility.

On a sale or other disposition of Shares, a U.S. Holder will be treated as having sold the Relevant Digital Asset underlying such Shares. Accordingly, the U.S. Holder generally will recognize gain or loss in an amount equal to the difference between (i) the amount realized on the sale of the Shares and (ii) the portion of the U.S. Holder's tax basis in its *pro rata* share of the Relevant Digital Asset held in the Trust that is attributable to the Shares that were sold or otherwise subject to a disposition. Such tax basis generally will be determined by multiplying the tax basis of the U.S. Holder's *pro rata* share of all of the Relevant Digital Asset held in the Trust immediately prior to such sale or other disposition by a fraction the numerator of which is the number of Shares disposed of and the denominator of which is the total number of Shares held by such U.S. Holder immediately prior to such sale or other disposition (such fraction, expressed as a percentage, the "Share Percentage"). If the U.S. Holder's share of the Trust's Relevant Digital Asset consists of separate lots with separate tax bases and/or holding periods, the U.S. Holder will be treated as having sold the Share Percentage of each such lot. Gain or loss recognized by a U.S. Holder on a sale or other disposition of Shares will generally be short-term capital gain or loss if the U.S. Holder's holding period for the Relevant Digital Asset underlying such Shares is one year or less and long-term capital gain or loss if the U.S. Holder's holding period for the Relevant Digital Asset underlying such Shares is more than one year. The deductibility of capital losses is subject to significant limitations.

After any sale or other disposition of fewer than all of a U.S. Holder's Shares, the U.S. Holder's tax basis in its *pro rata* share of the Relevant Digital Asset held in the Trust immediately after the disposition will equal the tax basis in its *pro rata* share of the total amount of the Relevant Digital Asset held in the Trust immediately prior to the disposition, less the portion of that tax basis that is taken into account in determining the amount of gain or loss recognized by the U.S. Holder on the disposition.

Any brokerage or other transaction fee incurred by a U.S. Holder in purchasing Shares generally will be added to the U.S. Holder's tax basis in the underlying assets of the Trust. Similarly, any brokerage fee or other transaction fee incurred by a U.S. Holder in selling Shares generally will reduce the amount realized by the U.S. Holder with respect to the sale.

In the absence of guidance to the contrary, it is possible that any income recognized by a U.S. tax-exempt shareholder as a consequence of a hard fork, airdrop or similar occurrence would constitute UBTI. A tax-exempt shareholder should consult its tax adviser regarding whether such shareholder may recognize some UBTI as a consequence of an investment in Shares.

### **Tax Consequences to Non-U.S. Holders**

As used herein, the term "non-U.S. Holder" means a beneficial owner of a Share for U.S. federal income tax purposes that is not a U.S. Holder. The term "non-U.S. Holder" does not include (i) a nonresident alien individual who is present in the United States for 183 days or more in a taxable year, (ii) a former U.S. citizen or U.S. resident or an entity that has expatriated from the United States; (iii) a person whose income in respect of Shares is effectively connected with the conduct of a trade or business in the United States; or (iv) an entity that is treated as a partnership for U.S. federal income tax purposes. Shareholders described in the preceding sentence should consult their tax advisers regarding the U.S. federal income tax consequences of owning Shares.

A non-U.S. Holder generally will not be subject to U.S. federal income or withholding tax with respect to its share of any gain recognized on the Trust's transfer of the Relevant Digital Asset in payment of the Sponsor's Fee or any Additional Trust Expense or on the Trust's sale or other disposition of the Relevant Digital Asset. In addition, assuming that the Trust holds no asset other than the Relevant Digital Asset, a non-U.S. Holder generally will not be subject to U.S. federal income or withholding tax with respect to any gain it recognizes on a sale or other disposition of Shares. A non-U.S. Holder also will generally not be subject to U.S. federal income or withholding tax with respect to any distribution received from the Trust, whether in cash or in-kind.

Provided that it does not constitute income that is treated as “effectively connected” with the conduct of a trade or business in the United States, U.S.-source “fixed or determinable annual or periodical” (“FDAP”) income received, or treated as received, by a non-U.S. Holder will generally be subject to U.S. withholding tax at the rate of 30% (subject to possible reduction or elimination pursuant to an applicable tax treaty and to statutory exemptions such as the portfolio interest exemption). Although there is no guidance on point, it is likely that any ordinary income recognized by a non-U.S. Holder as a result of a fork, airdrop or similar occurrence would constitute FDAP income. It is unclear, however, whether any such FDAP income would be properly treated as U.S.-source or foreign-source FDAP income. Non-U.S. Holders should assume that, in the absence of guidance, a withholding agent (including the Sponsor) is likely to withhold 30% from a non-U.S. Holder’s *pro rata* share of any such income, including by deducting such withheld amounts from proceeds that such non-U.S. Holder would otherwise be entitled to receive in connection with a distribution of Incidental Rights, IR Virtual Currency or proceeds from the disposition of Incidental Rights or IR Virtual Currency. A non-U.S. Holder that is a resident of a country that maintains an income tax treaty with the United States may be eligible to claim the benefits of that treaty to reduce or eliminate, or to obtain a partial or full refund of, the 30% U.S. withholding tax on its share of any such income, but only if the non-U.S. Holder’s home country treats the Trust as “fiscally transparent,” as defined in applicable Treasury regulations.

Although the nature of the Incidental Rights and IR Virtual Currency that the Trust may hold in the future is uncertain, it is unlikely that any such asset would give rise to income that is treated as “effectively connected” with the conduct of a trade or business in the United States or that any income derived by a non-U.S. Holder from any such asset would otherwise be subject to U.S. income or withholding tax, except as discussed above in connection with the fork, airdrop or similar occurrence giving rise to Incidental Rights or IR Virtual Currency. There can, however, be no complete assurance in this regard.

In order to prevent the possible imposition of U.S. “backup” withholding and (if applicable) to qualify for a reduced rate of withholding tax at source under a treaty, a non-U.S. Holder must comply with certain certification requirements (generally, by delivering a properly executed IRS Form W-8BEN or W-8BEN-E to the relevant withholding agent).

### **U.S. Information Reporting and Backup Withholding**

The Trust or the appropriate broker will file certain information returns with the IRS and provide shareholders with information regarding their annual income (if any) and expenses with respect to the Trust in accordance with applicable Treasury regulations.

A U.S. Holder will generally be subject to information reporting requirements and backup withholding unless (i) the U.S. Holder is a corporation or other exempt recipient or (ii) in the case of backup withholding, the U.S. Holder provides a correct taxpayer identification number and certifies that it is not subject to backup withholding. In order to avoid the information reporting and backup withholding requirements, a non-U.S. Holder may have to comply with certification procedures to establish that it is not a U.S. person. The amount of any backup withholding will be allowed as a credit against the shareholder’s U.S. federal income tax liability and may entitle the holder to a refund, provided that the required information is furnished to the IRS.

### **FATCA**

As discussed above, it is unclear whether any ordinary income recognized by a non-U.S. Holder as a result of a fork, airdrop or similar occurrence would constitute U.S.-source FDAP income. Provisions of the Code commonly referred to as “FATCA” require withholding of 30% on payments of U.S.-source FDAP income and, subject to the discussion of proposed U.S. Treasury regulations below, of gross proceeds of dispositions of certain types of property that produce U.S.-source FDAP income to “foreign financial institutions” (which is broadly defined for this purpose and in general includes investment vehicles) and certain other non-U.S. entities unless various U.S. information reporting and due diligence requirements (generally relating to ownership by U.S. persons of interests in or accounts with those entities) have been satisfied, or an exemption applies. An intergovernmental agreement between the United States and an applicable foreign country may modify these requirements. In addition, regulations proposed by the U.S. Treasury Department (the preamble to which indicates that taxpayers may rely on the regulations pending their finalization) would eliminate the requirement under FATCA of withholding on gross proceeds. If FATCA withholding is imposed, a beneficial owner that is not a foreign financial institution generally may obtain a refund of any amounts withheld by filing a U.S. federal income tax return (which may entail significant administrative burden). Shareholders should consult their tax advisers regarding the effects of FATCA on an investment in the Trust.

**1. The issuer’s primary and secondary SIC Codes.**

The Trust’s primary SIC Code is 6221. The Trust’s secondary SIC code is 6199.

**2. If the issuer has never conducted operations, is in the development stage, or is currently conducting operations.**

The Trust is a passive entity with no operations, and the Sponsor administers and manages the Trust as described in “Description of the Trust.”

**3. Whether the issuer has at any time been a “shell company.”**

The Trust has not at any time been a “shell company.”

**4. The names of any parent, subsidiary, or affiliate of the issuer, and its business purpose, its method of operation, its ownership, and whether it is included in the financial statements attached to this Annual Report.**

Until December 31, 2024, the Trust’s Sponsor was Grayscale Investments, LLC. Prior to October 3, 2022, Genesis Global Trading, Inc., a wholly owned subsidiary of Digital Currency Group, Inc. (“DCG”) and a registered broker-dealer, was the marketer and distributor of the Trust. Genesis Global Trading, Inc. was also an initial purchaser and an Authorized Participant. Effective October 3, 2022, Grayscale Securities, LLC, a wholly owned subsidiary of GSI until December 31, 2024, and GSO thereafter, and a registered broker-dealer, is the marketer and distributor of the Trust. Effective October 3, 2022, Grayscale Securities, LLC is the only acting Authorized Participant. The financial results of these entities are not included in the Trust’s financial statements.

**The Sponsor**

Until December 31, 2024, the Trust’s Sponsor was Grayscale Investments, LLC (“GSI”), a Delaware limited liability company formed on May 29, 2013 and a wholly owned subsidiary of DCG. From January 1, 2025 to May 3, 2025, the co-sponsors of the Trust are Grayscale Operating, LLC (“GSO”) and Grayscale Investments Sponsors, LLC (“GSIS”). GSIS will remain the sole sponsor after May 3, 2025. The Sponsor’s principal place of business is 290 Harbor Drive, 4<sup>th</sup> Floor, Stamford, Connecticut 06902 and its telephone number is (212) 668-1427. Under the Delaware Limited Liability Company Act and the governing documents of the Sponsor, DCG, the sole equity holder of the Sponsor, is not responsible for the debts, obligations and liabilities of the Sponsor solely by reason of being the sole equity holder of the Sponsor.

The Sponsor is neither an investment adviser registered with the SEC nor a commodity pool operator registered with the CFTC, and will not be acting in either such capacity with respect to the Trust, and the Sponsor’s provision of services to the Trust will not be governed by the Investment Advisers Act or the CEA.

**The Sponsor’s Role**

The Sponsor arranged for the creation of the Trust and quotation of the Shares on OTCQX. As partial consideration for its receipt of the Sponsor’s Fee from the Trust, the Sponsor is obligated to pay the Sponsor-paid Expenses. The Sponsor also paid the costs of the Trust’s organization and the costs of the initial sale of the Shares.

The Sponsor is generally responsible for the day-to-day administration of the Trust under the provisions of the Trust Agreement. This includes (i) preparing and providing periodic reports and financial statements on behalf of the Trust for investors, (ii) processing orders to create Baskets and coordinating the processing of such orders with the Custodian and the Transfer Agent, (iii) calculating and publishing the NAV and the NAV per Share of the Trust each business day as of 4:00 p.m., New York time, or as soon thereafter as practicable, (iv) selecting and monitoring the Trust’s service providers and from time to time engaging additional, successor or replacement service providers, (v) instructing the Custodian to transfer the Trust’s BAT, as needed to pay the Sponsor’s Fee and any Additional Trust Expenses, (vi) upon dissolution of the Trust, distributing the Trust’s remaining BAT, Incidental Rights and IR Virtual Currency or the cash proceeds of the sale thereof to the owners of record of the Shares and (vii) establishing the principal market for U.S. GAAP valuation. In addition, if there is a fork in the Ethereum Network after which there is a dispute as to which network resulting from the fork is the Basic Attention Token Network, the Sponsor has the authority to select the network that it believes in good faith is the Basic Attention Token Network, unless such selection or authority would otherwise conflict with the Trust Agreement.

The Sponsor does not store, hold, or maintain custody or control of the Trust's BAT but instead has entered into the Custodian Agreement with the Custodian to facilitate the security of the Trust's BAT.

The Sponsor may transfer all or substantially all of its assets to an entity that carries on the business of the Sponsor if at the time of the transfer the successor assumes all of the obligations of the Sponsor under the Trust Agreement. In such an event, the Sponsor will be relieved of all further liability under the Trust Agreement.

The Sponsor's Fee is paid by the Trust to the Sponsor as compensation for services performed under the Trust Agreement and as partial consideration for the Sponsor's agreement to pay the Sponsor-paid Expenses. See "Grayscale Basic Attention Token Trust (BAT)—Description of the Trust—Trust Expenses."

The Sponsor may, in its sole discretion, select a different index provider, select a different index price provided by the Index Provider, calculate the Index Price by using the cascading set of rules set forth under "Grayscale Basic Attention Token Trust (BAT)—The Index and the Index Price—Determination of the Index Price When Index Price is Unavailable" above, or change the cascading set of rules set forth above at any time.

### **Authorized Participants**

An Authorized Participant must enter into a "Participant Agreement" with the Sponsor and the Trust to govern its placement of orders to create Baskets. The Participant Agreement sets forth the procedures for the creation of Baskets and for the delivery of BAT required for creations. A copy of the form of Participant Agreement is available for inspection at the Sponsor's principal office identified herein.

Each Authorized Participant must (i) be a registered broker-dealer, (ii) enter into a Participant Agreement with the Sponsor and (iii) own a BAT wallet address that is known to the Custodian as belonging to the Authorized Participant, or another entity that has been engaged to source digital assets (any such representative, a "Liquidity Provider"). A list of the current Authorized Participants can be obtained from the Sponsor. Prior to October 3, 2022, Genesis (in such capacity, an "Authorized Participant"), a registered broker-dealer and wholly owned subsidiary of DCG, was the only Authorized Participant, and was party to a participant agreement with the Sponsor and the Trust.

Effective October 3, 2022, the Sponsor entered into a Participant Agreement with Grayscale Securities, pursuant to which Grayscale Securities has agreed to act as an Authorized Participant of the Trust, and terminated its participant agreement with Genesis, among the Sponsor, the Trust and Genesis, which provided the procedures for the creation of Shares. As a result, since October 3, 2022, Genesis ceased acting as an Authorized Participant of the Trust, but served as a Liquidity Provider to Grayscale Securities from October 3, 2022 to September 12, 2023.

As of the date of this Annual Report, Grayscale Securities is the only acting Authorized Participant. The Sponsor intends to engage additional Authorized Participants that are unaffiliated with the Trust in the future.

No Authorized Participant has any obligation or responsibility to the Sponsor or the Trust to effect any sale or resale of Shares.

### **The Distributor and Marketer**

Prior to October 3, 2022, Genesis was the distributor and marketer of the Shares. Since October 3, 2022, Grayscale Securities is the distributor and marketer of the Shares, and Genesis ceased acting as the distributor and marketer of the Shares of the Trust. Grayscale Securities is a registered broker-dealer with the SEC and is a member of FINRA.

In its capacity as distributor and marketer, Grayscale Securities assists the Sponsor in developing an ongoing marketing plan for the Trust; preparing marketing materials regarding the Shares, including the content on the Trust's website, [www.grayscale.com/crypto-products/grayscale-basic-attention-token-trust/](http://www.grayscale.com/crypto-products/grayscale-basic-attention-token-trust/); and executing the marketing plan for the Trust. Grayscale Securities is an affiliate of the Sponsor.

The Sponsor has entered into a Distribution and Marketing Agreement with Grayscale Securities. The Sponsor may engage additional or successor distributors and marketers in the future.

## **Conflicts of Interest**

### **General**

The Sponsor has not established formal procedures to resolve all potential conflicts of interest. Consequently, shareholders may be dependent on the good faith of the respective parties subject to such conflicts to resolve them equitably. Although the Sponsor attempts to monitor these conflicts, it is extremely difficult, if not impossible, for the Sponsor to ensure that these conflicts do not, in fact, result in adverse consequences to the Trust.

The Sponsor presently intends to assert that shareholders have, by subscribing for Shares of the Trust, consented to the following conflicts of interest in the event of any proceeding alleging that such conflicts violated any duty owed by the Sponsor to investors.

### **Digital Currency Group, Inc.**

Digital Currency Group, Inc. is (i) the sole equity holder and indirect parent company of the Sponsor, (ii) the indirect parent company of Grayscale Securities, the only acting Authorized Participant, as of the date of this Annual Report, and (iii) a minority interest holder in Kraken, one of the Digital Asset Trading Platforms included in the Index, representing less than 1.0% of its equity.

Digital Currency Group, Inc. has investments in a large number of digital assets and companies involved in the digital asset ecosystem, including trading platforms and custodians. Digital Currency Group, Inc.'s positions on changes that should be adopted in the Basic Attention Token Network could be adverse to positions that would benefit the Trust or its shareholders. Additionally, before or after a hard fork, Digital Currency Group, Inc.'s position regarding which fork among a group of incompatible forks of the Basic Attention Token Network should be considered the "true" Basic Attention Token Network could be adverse to positions that would most benefit the Trust.

### **The Sponsor**

The Sponsor has a conflict of interest in allocating its own limited resources among, when applicable, different clients and potential future business ventures, to each of which it owes fiduciary duties. Additionally, the professional staff of the Sponsor also services other affiliates of the Trust, including several other digital asset investment vehicles, and their respective clients. Although the Sponsor and its professional staff cannot and will not devote all of its or their respective time or resources to the management of the affairs of the Trust, the Sponsor intends to devote, and to cause its professional staff to devote, sufficient time and resources to manage properly the affairs of the Trust consistent with its or their respective fiduciary duties to the Trust and others.

The Sponsor and Grayscale Securities are affiliates of each other, and the Sponsor may engage other affiliated service providers in the future. Because of the Sponsor's affiliated status, it may be disincentivized from replacing affiliated service providers. In connection with this conflict of interest, shareholders should understand that affiliated service providers will receive fees for providing services to the Trust. Clients of the affiliated service providers may pay commissions at negotiated rates which are greater or less than the rate paid by the Trust.

The Sponsor and any affiliated service provider may, from time to time, have conflicting demands in respect of their obligations to the Trust and, in the future, to other clients. It is possible that future business ventures of the Sponsor and affiliated service providers may generate larger fees, resulting in increased payments to employees, and therefore, incentivizing the Sponsor and/or the affiliated service providers to allocate its/their limited resources accordingly to the potential detriment of the Trust.

There is an absence of arm's-length negotiation with respect to some of the terms of the Trust, and, where applicable, there has been no independent due diligence conducted with respect to the Trust. The Sponsor will, however, not retain any affiliated service providers for the Trust which the Sponsor has reason to believe would knowingly or deliberately favor any other client over the Trust.

## **The Authorized Participant**

Prior to October 3, 2022, Genesis, an affiliate of the Trust and the Sponsor, was the only Authorized Participant and was party to a participant agreement with the Sponsor and the Trust. Since October 3, 2022, the only Authorized Participant is Grayscale Securities, an affiliate of the Trust and the Sponsor. As a result of this affiliation, the Sponsor has an incentive to resolve questions between Grayscale Securities, on the one hand, and the Trust and shareholders, on the other hand, in favor of Grayscale Securities (including, but not limited to, questions as to the calculation of the Basket Amount). Lastly, several employees of the Sponsor and Digital Currency Group, Inc. are FINRA-registered representatives who maintain their licenses through Grayscale Securities.

## **Proprietary Trading/Other Clients**

Because the officers of the Sponsor may trade BAT for their own personal trading accounts (subject to certain internal trading policies and procedures) at the same time as they are managing the account of the Trust, the activities of the officers of the Sponsor, subject to their fiduciary duties, may, from time-to-time, result in their taking positions in their personal trading accounts which are opposite of the positions taken for the Trust. Records of the Sponsor's officers' personal trading accounts will not be available for inspection by shareholders.

### **5. The effect of existing or probable governmental regulations on the business.**

Please refer to "Risk Factors—Risk Factors Related to the Regulation of Digital Assets, the Trust and the Shares" for a discussion of the effect of existing or probable governmental regulations on the Trust's operations.

### **6. An estimate of the amount spent during each of the last two fiscal years on research and development activities, and, if applicable, the extent to which the cost of such activities are borne directly by customers.**

Not applicable.

### **7. Costs and effects of compliance with environmental laws (federal, state and local).**

Not applicable.

### **8. The number of total employees and number of full-time employees.**

The Trust has no employees. The Sponsor had 116 employees as of December 31, 2024.

## **Item 9. The nature of products and services offered.**

### **A. Principal products or services, and their markets.**

The Trust is an investment vehicle that enables investors to gain access and exposure to BAT in the form of a security without the challenges of buying, storing, and safekeeping BAT directly. Shares are distributed through sales in private placement transactions and become eligible to sell into the public market after a statutory one-year holding period. While an investment in the Shares is not a direct investment in BAT, the Shares are designed to provide investors with a cost-effective and convenient way to gain investment exposure to BAT. The Shares are quoted on OTCQX under the ticker symbol "GBAT." The Trust's investment objective is for the value of its Shares (based on BAT per share) to reflect the value of the BAT held by the Trust, less The Trust's expenses and other liabilities. BAT per Share is updated daily: [www.grayscale.com/crypto-products/grayscale-basic-attention-token-trust/](http://www.grayscale.com/crypto-products/grayscale-basic-attention-token-trust/). The Trust's sponsor was Grayscale Investments, LLC until December 31, 2024. Grayscale Operating, LLC is a co-sponsor of the Trust from January 1, 2025 to May 3, 2025, and Grayscale Investments Sponsors, LLC is a co-sponsor of the Trust from January 1, 2025 to May 3, 2025 and will be the sole remaining sponsor thereafter.

### **B. Distribution methods of the products or services.**

Not applicable.

### **C. Status of any publicly announced new product or service.**

Not applicable.

**D. Competitive business conditions, the issuer's competitive position in the industries, and methods of competition.**

Thousands of digital assets have been developed since the inception of Bitcoin, which is currently the most developed digital asset because of the length of time it has been in existence, the investment in the infrastructure that supports it, and the network of individuals and entities that are using Bitcoin in transactions. While BAT has enjoyed some success in its limited history, the aggregate value of outstanding BAT is much smaller than that of Bitcoin and may be eclipsed by the more rapid development of other digital assets.

**E. Sources and availability of raw materials and the names of principal suppliers.**

Not applicable.

**F. Dependence on one or a few major customers.**

Not applicable.

**G. Patents, trademarks, licenses, franchises, concessions, royalty agreements or labor contracts, including their duration.**

Not applicable.

**H. The need for any government approval of principal products or services and the status of any requested government approvals.**

See the discussion set forth under the heading "The effect of existing or probable governmental regulations on the business" above.

**Item 10. The nature and extent of the issuer's facilities.**

The Trust is a passive entity with no operations, and the Sponsor administers and manages the Trust as described in the "Description of the Trust." The principal office of the Sponsor is located at 290 Harbor Drive, 4<sup>th</sup> Floor, Stamford, Connecticut 06902. The Sponsor utilizes a portion of the space leased by Digital Currency Group, Inc. The lease expires on February 29, 2032.

## **PART D. MANAGEMENT STRUCTURE AND FINANCIAL INFORMATION**

### **Item 11. Company insiders (Officers, Directors, and Control Persons).**

#### **A. Management of the Sponsor**

The Trust does not have any directors, officers or employees. Under the Trust Agreement, all management functions of the Trust have been delegated to and are conducted by the Sponsor, its agents and its affiliates, including without limitation, the Custodian and its agents. As officers of the Sponsor, Peter Mintzberg, the principal executive officer of the Sponsor, and Edward McGee, the principal financial and accounting officer of the Sponsor, may take certain actions and execute certain agreements and certifications for the Trust, in their capacity as the principal officers of the Sponsor.

During the year ended December 31, 2024, references to the “Sponsor” in this section refer to GSI, and thereafter refer to GSO or GSIS, as applicable. In connection with the Reorganization, the former Board of GSI was reconstituted at GSIOH. The members of the Board of GSIOH are the same as the members of the Board of GSI prior to the Reorganization. Additionally, the former Audit Committee of GSI was reconstituted at GSIS. The members of the Audit Committee of GSIS are the same as the members of the Audit Committee of GSI prior to the Reorganization. From and after January 1, 2025, any references to the Board in this section refer to the Board of GSIOH and any references to the Audit Committee in this section refer to the Audit Committee of GSIS.

The following individuals are the officers of the Sponsor responsible for overseeing the business and operations of the Trust.

#### ***Mark Shifke, Chairman of the Board***

Mark Shifke, 65, is the Chief Financial Officer of DCG and has served as chairman of the Board since January 2024. Since March 2021, Mr. Shifke has served on the board of directors of Dock Ltd., a full-stack payments and digital banking platform. Since September 2023, Mr. Shifke has served on the board of directors of Luno, a cryptocurrency platform. Mr. Shifke has nearly four decades of financial and fintech experience, and more than eight years of CFO experience leading two publicly-traded companies. Prior to joining DCG, Mr. Shifke served as CFO of Billtrust, a company focused on providing AR and cloud-based solutions around payments, and as CFO of Green Dot (NYSE: GDOT), a mobile banking company and payments platform. Previously, Mr. Shifke led teams at JPMorgan Chase and Goldman Sachs, specializing in M&A Structuring and Advisory, as well as Tax Asset Investments. Mr. Shifke also served as the Head of International Structured Finance Group at KPMG. Mr. Shifke began his career at Davis Polk, where he was a partner. He is a graduate of Tulane University (B.A./J.D.) and the New York University School of Law (LL.M. in Taxation).

#### ***Matthew Kummell, Board Member***

Matt Kummell, 49, is Senior Vice President of Strategy & Operations at DCG and has served as a director of the Sponsor since January 2024. In his role at DCG, Mr. Kummell leads the business’s post-investment efforts, including investment operations and value creation with regard to DCG’s portfolio companies. Since December 2023, Mr. Kummell has served as a member of the board of directors of Foundry, a digital asset mining and staking company. Until November 2023, Mr. Kummell served on the board of directors of CoinDesk, Inc., a digital media, events and information services company for the crypto asset and blockchain technology community. Until January 2012, Mr. Kummell served on the board of directors of Derivix Corporation, a financial services software company. Prior to joining DCG, Mr. Kummell was the Head of North America for Citi’s Business Advisory Services team, a strategic consulting practice focused on institutional investor clients in Citi’s Markets division. Mr. Kummell has also held strategic and front-office leadership roles at Citadel, Balyasny Asset Management, and S.A.C. Capital Advisors, the predecessor to Point 72 Asset Management. Previously, Mr. Kummell served as a case team leader at Bain & Company in its Boston headquarters. Mr. Kummell is an Adjunct Professor at the Tuck School of Business at Dartmouth College. He is a graduate of the University of California, Los Angeles (B.A.) and the Tuck School of Business at Dartmouth College (MBA).

#### ***Peter Mintzberg, Board Member and Chief Executive Officer***

Peter Mintzberg, 56, has been the Chief Executive Officer of the Sponsor and has served as a director of the Sponsor since August 2024. Mintzberg joins the Sponsor from Goldman Sachs, where he served as Global Head of Strategy for Asset and Wealth Management. Prior, he held several global leadership roles in Strategy, M&A, and Investor Relations at BlackRock, Apollo, OppenheimerFunds, and Invesco. With deep knowledge across a broad base of client types and asset classes, Mintzberg has over two decades of experience developing and executing strategy and innovating to drive growth. Mintzberg

started his career working at McKinsey & Co. in New York, San Francisco, and São Paulo, focused on the financial services and technology sectors. Mintzberg was recognized as a Latino leader in Finance by The Alumni Society in 2018, and was selected as a David Rockefeller Fellow in the 2016-2017 Class by the Partnership for New York City. He earned a bachelor's degree in engineering from the Universidade Federal Rio de Janeiro, and an MBA from Harvard University.

***Edward McGee, Board Member and Chief Financial Officer***

Edward McGee, 41, has been the Chief Financial Officer of the Sponsor since January 2022 and has served as a director of the Sponsor since January 2024. Before serving as CFO, Mr. McGee was Vice President, Finance and Controller of the Sponsor since June 2019. Prior to taking on his role at the Sponsor, Mr. McGee served as a Vice President, Accounting Policy at Goldman, Sachs & Co. providing coverage to their SEC Financial Reporting team facilitating the preparation and review of their financial statements and provided U.S. GAAP interpretation, application and policy development while servicing their Special Situations Group, Merchant Banking Division and Urban Investments Group from 2014 to 2019. From 2011 to 2014, Mr. McGee was an auditor at Ernst & Young providing assurance services to publicly listed companies. Mr. McGee earned his Bachelor of Science degree in accounting from the John H. Sykes College of Business at the University of Tampa and graduated with honors while earning his Master of Accountancy in Financial Accounting from the Rutgers Business School at the State University of New Jersey. Mr. McGee is a Certified Public Accountant licensed in the state of New York.

***Hugh Ross, Chief Operating Officer***

Hugh Ross, 57, has been the Chief Operating Officer of the Sponsor since February 2021. Prior to joining the Sponsor, Mr. Ross served twelve years as Chief Operating Officer of Horizon Kinetics LLC, a New York-based investment manager where he was responsible for the operating infrastructure and various digital asset initiatives. During the ten years immediately preceding his tenure at Horizon Kinetics, Mr. Ross was a Vice President with Goldman Sachs & Co. where he served as Chief Operating Officer of the long-only investment manager research team, then-known as Global Manager Strategies ("GMS"), within Goldman Sachs Asset Management ("GSAM"). Mr. Ross also served as a compliance officer for both GSAM and Goldman's Private Wealth Management business. Prior to joining Goldman Sachs, Mr. Ross worked as an in-house counsel for a transfer agent and started his career as a securities industry attorney representing broker-dealers and investment advisers. Mr. Ross is a graduate of the Goizueta Business School at Emory University (B.B.A.) and New York Law School (J.D.).

**Executive Compensation**

The Trust has no employees or directors and is managed by the Sponsor. None of the officers or members of the Sponsor receive compensation from the Trust. The Sponsor's Fee accrues daily at an annual rate of 2.5% of the Trust's NAV Fee Basis Amount and is payable monthly in arrears. For the years ended December 31, 2024 and 2023, the Sponsor earned \$92,802 and \$32,198, respectively, from the Trust. As of December 31, 2024 and 2023, there were no accrued and unpaid Sponsor's Fees. In addition, the Sponsor may pay Additional Trust Expenses on behalf of the Trust and be reimbursed by the Trust. For the years ended December 31, 2024 and 2023, the Trust incurred no Additional Trust Expenses.

**Compensation of Directors**

Not applicable.

**Business Address**

The business address for each of the Sponsor's officers is c/o Grayscale Investments Sponsors, LLC, 290 Harbor Drive, 4<sup>th</sup> Floor, Stamford, Connecticut 06902.

**Beneficial Ownership of Officers and Directors**

As of the date of the Annual Report, the ownership of Mark Shifke, Matthew Kummell, Peter Mintzberg, Edward McGee, and Hugh Ross individually represented beneficial ownership of less than 1% of the Trust's Shares.

## B. Other Control Persons

The following table sets forth certain information with respect to the beneficial ownership of the Shares for each person that, to the Sponsor's knowledge based on the records of the Transfer Agent and other ownership information provided to the Sponsor, beneficially owns a significant portion of the Shares as of the date of this Annual Report:

	<u>Amount of Beneficial Ownership</u>	<u>Percentage of Beneficial Ownership</u>
Off the Chain, LP <sup>(1)</sup>	991,330	34.87%
ParaFi Digital Opportunities LP <sup>(2)</sup>	316,277	11.13%

(1) The address of the aforementioned is c/o Off the Chain Capital, 10337 Los Feliz Dr. Orlando, FL 32836. The person controlling Off the Chain, LP is Brian L. Estes and his address is c/o Off the Chain Capital, 10337 Los Feliz Dr. Orlando, FL 32836.

(2) The address of the aforementioned is c/o ParaFi Digital Opportunities LP, 500 W Putnam Ave. STE 400, Greenwich CT, 06830. The person controlling ParaFi Digital Opportunities LP is Benjamin Forman, Managing Partner, and his address is c/o ParaFi Digital Opportunities LP, 500 W Putnam Ave. STE 400, Greenwich CT, 06830.

## C. Legal/Disciplinary History

None.

## D. Disclosure of Family Relationships

None.

## E. Disclosure of Related Party Transactions

See "Conflicts of Interest" above.

### Item 12. Financial information for the issuer's most recent fiscal period.

The Trust's audited financial statements as of and for the years ended December 31, 2024 and 2023, are attached as Exhibit 1 to this Annual Report. The historical results presented herein are not necessarily indicative of financial results to be achieved in future periods. The Trust's audited financial statements attached as exhibits to this Annual Report are incorporated herein by reference and are considered as part of this Annual Report.

### Item 13. Similar financial information for such part of the two preceding fiscal years as the issuer or its predecessor has been in existence.

See "Financial information for the issuer's most recent fiscal period" above.

### Item 14. The name, address, telephone number, and email address of each of the following outside providers that provide services to the issuer on matters relating to operations, business development and disclosure.

#### 1. Counsel

Andrew D. Thorpe, Esq.  
Gunderson Dettmer Stough Villeneuve Franklin & Hachigian, LLP  
One Bush Plaza, Suite 1200  
San Francisco, CA 94104  
Telephone: (415) 801 4852  
Email: athorpe@gunder.com

#### 2. Independent Auditor

KPMG LLP  
345 Park Avenue  
New York, NY 10154  
Telephone: (212) 758-9700

**3. Any other advisor(s) that assisted, advised, prepared or provided information with respect to this Annual Report - the information shall include the telephone number and email address of each advisor.**

Not applicable.

**Item 15. Management's Discussion and Analysis.**

*The following discussion and analysis of our financial condition and results of operations should be read together with, and is qualified in its entirety by reference to, our audited financial statements and related notes included elsewhere in this Annual Report, which have been prepared in accordance with generally accepted accounting principles in the United States ("U.S. GAAP"). The following discussion may contain forward-looking statements based on current expectations that involve risks and uncertainties. Our actual results could differ materially from those discussed in these forward-looking statements as a result of various factors, including those set forth under "Risk Factors," "Cautionary Note Regarding Forward-Looking Statements" or in other sections of this Annual Report.*

**Trust Overview**

The Trust is a passive entity that is managed and administered by the Sponsor and does not have any officers, directors or employees. The Trust holds BAT and, from time to time on a periodic basis, issues Creation Baskets in exchange for deposits of BAT. As a passive investment vehicle, the Trust's investment objective is for the value of the Shares (based on BAT per Share) to reflect the value of the BAT held by the Trust, determined by reference to the Index Price, less the Trust's expenses and other liabilities. While an investment in the Shares is not a direct investment in BAT, the Shares are designed to provide investors with a cost-effective and convenient way to gain investment exposure to BAT. To date, the Trust has not met its investment objective and the Shares quoted on OTCQX have not reflected the value of the BAT held by the Trust, less the Trust's expenses and other liabilities, but instead have traded at both premiums and discounts to such value, which at times have been substantial. The Trust is not managed like a business corporation or an active investment vehicle.

The activities of the Trust are limited to (i) issuing Baskets in exchange for BAT transferred to the Trust as consideration in connection with the creations, (ii) transferring or selling BAT, Incidental Rights and IR Virtual Currency as necessary to cover the Sponsor's Fee and/or any Additional Trust Expenses, (iii) transferring BAT in exchange for Baskets surrendered for redemption (subject to obtaining regulatory approval from the SEC and approval from the Sponsor), (iv) causing the Sponsor to sell BAT, Incidental Rights and IR Virtual Currency on the termination of the Trust, (v) making distributions of Incidental Rights and/or IR Virtual Currency or cash from the sale thereof and (vi) engaging in all administrative and security procedures necessary to accomplish such activities in accordance with the provisions of the Trust Agreement, the Custodian Agreement, the Index License Agreement and the Participant Agreements.

In addition, the Trust may engage in any lawful activity necessary or desirable in order to facilitate shareholders' access to Incidental Rights or IR Virtual Currency, provided that such activities do not conflict with the terms of the Trust Agreement. The Trust will not be actively managed. It will not engage in any activities designed to obtain a profit from, or to ameliorate losses caused by, changes in the market prices of BAT.

***Incidental Rights and IR Virtual Currency***

The Trust may from time to time come into possession of Incidental Rights and/or IR Virtual Currency by virtue of its ownership of BAT, generally through a fork in the Blockchain, an airdrop offered to holders of BAT or similar event. Pursuant to the terms of the Trust Agreement, the Trust may take any lawful action necessary or desirable in connection with the Trust's ownership of Incidental Rights, including the acquisition of IR Virtual Currency, unless such action would adversely affect the status of the Trust as a grantor trust for U.S. federal income tax purposes or otherwise be prohibited by the Trust Agreement. These actions include (i) selling Incidental Rights and/or IR Virtual Currency in the Digital Asset Market and distributing the cash proceeds to shareholders, (ii) distributing Incidental Rights and/or IR Virtual Currency in kind to the shareholders or to an agent acting on behalf of the shareholders for sale by such agent if an in-kind distribution would otherwise be infeasible and (iii) irrevocably abandoning Incidental Rights or IR Virtual Currency. The Trust may also use Incidental Rights and/or IR Virtual Currency to pay the Sponsor's Fee and Additional Trust Expenses, if any, as discussed below under "—Trust Expenses." However, the Trust does not expect to take any Incidental Rights or IR Virtual Currency it may hold into account for purposes of determining the Trust's NAV, the NAV per Share, Principal Market NAV, or the Principal Market NAV per Share.

## ***Trust Expenses***

The Trust's only ordinary recurring expense is expected to be the Sponsor's Fee. The Sponsor's Fee will accrue daily in U.S. dollars at an annual rate of 2.5% of the NAV Fee Basis Amount of the Trust as of 4:00 p.m., New York time, on each day; provided that for a day that is not a business day, the calculation of the Sponsor's Fee will be based on the NAV Fee Basis Amount from the most recent business day, reduced by the accrued and unpaid Sponsor's Fee for such most recent business day and for each day after such most recent business day and prior to the relevant calculation date. This dollar amount for each daily accrual will then be converted into BAT by reference to the same Index Price used to determine such accrual. The Sponsor's Fee is payable in BAT to the Sponsor monthly in arrears.

To cause the Trust to pay the Sponsor's Fee, the Sponsor will instruct the Custodian to (i) withdraw from the Digital Asset Account the amount of BAT equal to the accrued but unpaid Sponsor's Fee and (ii) transfer such BAT to the Sponsor's account at such times as the Sponsor determines in its absolute discretion.

If the Trust holds any Incidental Rights and/or IR Virtual Currency at any time, the Trust may also pay the Sponsor's Fee, in whole or in part, with such Incidental Rights and/or IR Virtual Currency by entering into an agreement with the Sponsor and transferring such Incidental Rights and/or IR Virtual Currency to the Sponsor at a value to be determined pursuant to such agreement. However, the Trust may use Incidental Rights and/or IR Virtual Currency to pay the Sponsor's Fee only if such agreement and transfer do not otherwise conflict with the terms of the Trust Agreement. The value of any such Incidental Rights and/or IR Virtual Currency will be determined on an arm's-length basis. The Trust currently expects that the value of any such Incidental Rights and/or IR Virtual Currency would be determined by reference to an index provided by the Index Provider or, in the absence of such an index, by reference to the cascading set of rules described in "Grayscale Basic Attention Token Trust (BAT)—The Index and the Index Price." If the Trust pays the Sponsor's Fee in Incidental Rights and/or IR Virtual Currency, in whole or in part, the amount of BAT that would otherwise have been used to satisfy such payment will be correspondingly reduced. The Sponsor, from time to time, may temporarily waive all or a portion of the Sponsor's Fee in its discretion for stated periods of time. Presently, the Sponsor does not intend to waive any of the Sponsor's Fee and there are no circumstances under which the Sponsor has determined it will definitely waive the fee.

After the Trust's payment of the Sponsor's Fee to the Sponsor, the Sponsor may elect to convert the BAT, Incidental Rights and/or IR Virtual Currency received as payment of the Sponsor's Fee into U.S. dollars. The rate at which the Sponsor converts such BAT, Incidental Rights and/or IR Virtual Currency into U.S. dollars may differ from the rate at which the Sponsor's Fee was determined. The Trust will not be responsible for any fees and expenses incurred by the Sponsor to convert BAT, Incidental Rights and/or IR Virtual Currency received in payment of the Sponsor's Fee into U.S. dollars.

As partial consideration for its receipt of the Sponsor's Fee, the Sponsor has assumed the obligation to pay the Sponsor-paid Expenses. There is no cap on such Sponsor-Paid Expenses. The Sponsor has not assumed the obligation to pay Additional Trust Expenses. Any expense that qualifies as an Additional Trust Expense will be deemed to be an Additional Trust Expense and not a Sponsor-paid Expense. If Additional Trust Expenses are incurred, the Sponsor (i) will instruct the Custodian to withdraw from the Digital Asset Account BAT, Incidental Rights and/or IR Virtual Currency in such quantity as may be necessary to permit payment of such Additional Trust Expenses and (ii) may either (x) cause the Trust (or its delegate) to convert such BAT, Incidental Rights and/or IR Virtual Currency into U.S. dollars or other fiat currencies at the Actual Exchange Rate or (y) when the Sponsor incurs such expenses on behalf of the Trust, cause the Trust (or its delegate) to deliver such BAT, Incidental Rights and/or IR Virtual Currency in kind to the Sponsor in satisfaction of such Additional Trust Expenses. If the Trust pays the Additional Trust Expenses in Incidental Rights and/or IR Virtual Currency, in whole or in part, the amount of BAT that would otherwise have been used to satisfy such payment will be correspondingly reduced.

The amount of BAT represented by a Share will decline each time the Trust pays the Sponsor's Fee or any Additional Trust Expenses by transferring or selling BAT.

### ***Impact of Trust Expenses on the Trust's NAV***

The Trust will pay the Sponsor's Fee to the Sponsor in BAT, Incidental Rights and/or IR Virtual Currency. In addition, the Trust will sell BAT, Incidental Rights and/or IR Virtual Currency to raise the funds needed for the payment of any Additional Trust Expenses or will pay Additional Trust Expenses in BAT, Incidental Rights and/or IR Virtual Currency. The Trust's BAT, Incidental Rights and IR Virtual Currency, and the purchase price received as consideration for such sales of BAT, Incidental Rights and IR Virtual Currency, will be the Trust's sole source of funds to cover the Sponsor's Fee and any Additional Trust Expenses. Because the amount of BAT held by the Trust will decrease when BAT is used to pay the Sponsor's Fee or Additional Trust Expenses or are sold to permit the payment of Additional Trust Expenses, it is expected that the fractional amount of BAT represented by each Share will gradually decrease over the life of the Trust. Accordingly, the shareholders will bear the cost of the Sponsor's Fee and Additional Trust Expenses. New BAT deposited into the Digital Asset Account in exchange for additional new Baskets issued by the Trust will not reverse this trend.

### ***Discretion of the Index Provider***

The Index Provider has sole discretion over the determination of the Index Price and may change the methodologies for determining the Index Price from time to time.

### **Basic Attention Token**

Investing in the Shares does not insulate the investor from certain risks, including price volatility. The following chart illustrates the movement in the Trust's NAV per Share (non-GAAP) versus the Index Price (non-GAAP) and the Trust's Principal Market NAV per Share from February 26, 2021 (the inception of the Trust's operations) to December 31, 2024:

For more information on the determination of the Trust's NAV, see "Grayscale Basic Attention Token Trust (BAT)—Description of the Trust—Valuation of BAT and Determination of NAV."

### **Critical Accounting Policies**

#### ***Investment Transactions and Revenue Recognition***

The Trust considers investment transactions to be the receipt of BAT for Share creations and the delivery of BAT for Share redemptions or for payment of expenses in BAT. At this time, the Trust is not accepting redemption requests from shareholders. The Trust records its investment transactions on a trade date basis and changes in fair value are reflected as net change in unrealized appreciation or depreciation on investments. Realized gains and losses are calculated using the specific identification method. Realized gains and losses are recognized in connection with transactions including settling obligations for the Sponsor's Fee in BAT.

### *Principal Market and Fair Value Determination*

To determine which market is the Trust's principal market (or in the absence of a principal market, the most advantageous market) for purposes of calculating the Trust's net asset value in accordance with U.S. GAAP ("Principal Market NAV"), the Trust follows Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 820-10, *Fair Value Measurement*, which outlines the application of fair value accounting. ASC 820-10 determines fair value to be the price that would be received for BAT in a current sale, which assumes an orderly transaction between market participants on the measurement date. ASC 820-10 requires the Trust to assume that BAT is sold in its principal market to market participants or, in the absence of a principal market, the most advantageous market. Market participants are defined as buyers and sellers in the principal or most advantageous market that are independent, knowledgeable, and willing and able to transact.

The Trust only receives BAT in connection with a creation order from the Authorized Participant (or a Liquidity Provider) and does not itself transact on any Digital Asset Markets. Therefore, the Trust looks to market-based volume and level of activity for Digital Asset Markets. The Authorized Participant(s), or a Liquidity Provider, may transact in a Brokered Market, a Dealer Market, Principal-to-Principal Markets and Exchange Markets (referred to as "Trading Platform Markets" in this Annual Report), each as defined in the FASB ASC Master Glossary (collectively, "Digital Asset Markets").

In determining which of the eligible Digital Asset Markets is the Trust's principal market, the Trust reviews these criteria in the following order:

- First, the Trust reviews a list of Digital Asset Markets that maintain practices and policies designed to comply with anti-money laundering ("AML") and know-your-customer ("KYC") regulations, and non-Digital Asset Trading Platform Markets that the Trust reasonably believes are operating in compliance with applicable law, including federal and state licensing requirements, based upon information and assurances provided to it by each market.
- Second, the Trust sorts these Digital Asset Markets from high to low by market-based volume and level of activity of BAT traded on each Digital Asset Market in the trailing twelve months.
- Third, the Trust then reviews pricing fluctuations and the degree of variances in price on Digital Asset Markets to identify any material notable variances that may impact the volume or price information of a particular Digital Asset Market.
- Fourth, the Trust then selects a Digital Asset Market as its principal market based on the highest market-based volume, level of activity and price stability in comparison to the other Digital Asset Markets on the list. Based on information reasonably available to the Trust, Trading Platform Markets have the greatest volume and level of activity for the asset. The Trust therefore looks to accessible Trading Platform Markets as opposed to the Brokered Market, Dealer Market and Principal-to-Principal Markets to determine its principal market. As a result of the aforementioned analysis, a Trading Platform Market has been selected as the Trust's principal market.

The Trust determines its principal market (or in the absence of a principal market the most advantageous market) annually and conducts a quarterly analysis to determine (i) if there have been recent changes to each Digital Asset Market's trading volume and level of activity in the trailing twelve months, (ii) if any Digital Asset Markets have developed that the Trust has access to, or (iii) if recent changes to each Digital Asset Market's price stability have occurred that would materially impact the selection of the principal market and necessitate a change in the Trust's determination of its principal market.

The cost basis of the BAT received by the Trust in connection with a creation order is recorded by the Trust at the fair value of BAT at 4:00 p.m., New York time, on the creation date for financial reporting purposes. The cost basis recorded by the Trust may differ from proceeds collected by the Authorized Participant from the sale of the corresponding Shares to investors.

### *Investment Company Considerations and Significant Estimates*

The Trust is an investment company for U.S. GAAP purposes and follows accounting and reporting guidance in accordance with the FASB ASC Topic 946, *Financial Services—Investment Companies*. The Trust uses fair value as its method of accounting for BAT in accordance with its classification as an investment company for accounting purposes. The Trust is not a registered investment company under the Investment Company Act. U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts in the financial statements and accompanying notes. Actual results could differ from those estimates and these differences could be material.

### **Review of Financial Results (unaudited)**

#### *Financial Highlights for the Years ended December 31, 2024 and 2023*

**(All amounts in the following table and the subsequent paragraphs, except Share, per Share, BAT and price of BAT amounts, are in thousands)**

	<b>For the Years Ended December 31,</b>	
	<b>2024</b>	<b>2023</b>
Net realized and unrealized (loss) gain on investment in BAT	\$ (1,105)	\$ 527
Net (decrease) increase in net assets resulting from operations	\$ (1,198)	\$ 495
Net assets <sup>(1)</sup>	\$ 5,405	\$ 1,502

(1) Net assets in the above table and subsequent paragraphs are calculated in accordance with U.S. GAAP based on the Digital Asset Market price of BAT on the Digital Asset Trading Platform that the Trust considered its principal market, as of 4:00 p.m., New York time, on the valuation date.

Net realized and unrealized loss on investment in BAT for the year ended December 31, 2024, was (\$1,105), which includes a realized loss of (\$106) on the transfer of BAT to pay the Sponsor's Fee and net change in unrealized depreciation on investment in BAT of (\$999). Net realized and unrealized loss on investment in BAT for the year was driven by BAT price depreciation from \$0.26 per BAT as of December 31, 2023, to \$0.23 per BAT as of December 31, 2024. Net decrease in net assets resulting from operations was (\$1,198) for the year ended December 31, 2024, which consisted of the net realized and unrealized loss on investment in BAT, plus the Sponsor's Fee of \$93. Net assets increased to \$5,405 at December 31, 2024, a 260% increase for the year. The increase in net assets resulted from the contribution of approximately 17,871,127 BAT with a value of \$5,101 to the Trust in connection with Share creations during the year, partially offset by the aforementioned BAT price depreciation and the withdrawal of approximately 426,746 BAT to pay the foregoing Sponsor's Fee.

Net realized and unrealized gain on investment in BAT for the year ended December 31, 2023, was \$527, which includes a realized loss of (\$84) on the transfer of BAT to pay the Sponsor's Fee and net change in unrealized appreciation on investment in BAT of \$611. Net realized and unrealized gain on investment in BAT for the year was driven by BAT price appreciation from \$0.17 per BAT as of December 31, 2022, to \$0.26 per BAT as of December 31, 2023. Net increase in net assets resulting from operations was \$495 for the year ended December 31, 2023, which consisted of the net realized and unrealized gain on investment in BAT, less the Sponsor's Fee of \$32. Net assets increased to \$1,502 at December 31, 2023, a 49% increase for the year. The increase in net assets resulted from the aforementioned BAT price appreciation, partially offset by the withdrawal of approximately 146,258 BAT to pay the foregoing Sponsor's Fee.

### *Cash Resources and Liquidity*

The Trust has not had a cash balance at any time since inception. When selling BAT, Incidental Rights and/or IR Virtual Currency in the Digital Asset Market to pay Additional Trust Expenses on behalf of the Trust, the Sponsor endeavors to sell the exact amount of BAT, Incidental Rights and/or IR Virtual Currency needed to pay expenses in order to minimize the Trust's holdings of assets other than BAT. As a consequence, the Sponsor expects that the Trust will not record any cash flow from its operations and that its cash balance will be zero at the end of each reporting period. Furthermore, the Trust is not a party to any off-balance sheet arrangements.

In exchange for the Sponsor's Fee, the Sponsor has agreed to assume most of the expenses incurred by the Trust. As a result, the only ordinary expense of the Trust during the periods covered by this Annual Report was the Sponsor's Fee. The Trust is not aware of any trends, demands, conditions or events that are reasonably likely to result in material changes to its liquidity needs.

### Quantitative and Qualitative Disclosures about Market Risk

The Trust Agreement does not authorize the Trust to borrow for payment of the Trust's ordinary expenses. The Trust does not engage in transactions in foreign currencies which could expose the Trust or holders of Shares to any foreign currency related market risk. The Trust does not invest in any derivative financial instruments and has no foreign operations or long-term debt instruments.

### Selected Operating Data (unaudited)

(All BAT balances are rounded to the nearest whole BAT)

	As of December 31,	
	2024	2023
Price of BAT on principal market <sup>(1)</sup>	\$ 0.23	\$ 0.26
Principal Market NAV per Share <sup>(2)</sup>	\$ 2.11	\$ 2.42
Index Price	\$ 0.23	\$ 0.26
NAV per Share <sup>(3)</sup>	\$ 2.11	\$ 2.42

(1) The Trust performed an assessment of the principal market at December 31, 2024 and 2023, and identified the principal market as Coinbase.

(2) As of December 31, 2024 and 2023, the Principal Market NAV per Share was calculated using the fair value of BAT based on the price provided by Coinbase, the Digital Asset Trading Platform that the Trust considered its principal market, as of 4:00 p.m., New York time, on the valuation date. Prior to March 8, 2024, Principal Market NAV was referred to as NAV and Principal Market NAV per Share was referred to as NAV per Share.

(3) The Trust's NAV per Share is derived from the Index Price as represented by the Index as of 4:00 p.m., New York time, on the valuation date. The Trust's NAV per Share is calculated using a non-GAAP methodology where the price is derived from multiple Digital Asset Trading Platforms. Prior to March 8, 2024, NAV was referred to as Digital Asset Holdings and NAV per Share was referred to as Digital Asset Holdings per Share. See the section entitled "Grayscale Basic Attention Token Trust (BAT)—Description of the Trust—Valuation of BAT and Determination of NAV" above for a description of the Trust's NAV per Share. The Digital Asset Trading Platforms included in the Index as of December 31, 2024 and 2023, were Coinbase, Gemini, and Kraken.

For accounting purposes, the Trust reflects creations and the BAT receivable with respect to such creations on the date of receipt of a notification of a creation but does not issue Shares until the requisite amount of BAT is received. At this time, the Trust is not accepting redemption requests from shareholders. Subject to receipt of regulatory approval from the SEC and approval by the Sponsor in its sole discretion, the Trust may in the future operate a redemption program. The Trust currently has no intention of seeking regulatory approval to operate an ongoing redemption program.

As of December 31, 2024, the Trust had a net closing balance with a value of \$5,394,998, based on the Index Price (non-GAAP methodology). As of December 31, 2024, the Trust had a total market value of \$5,405,076, based on the Digital Asset Market price of BAT on the Trust's principal market (Coinbase).

As of December 31, 2023, the Trust had a net closing balance with a value of \$1,502,095, based on the Index Price (non-GAAP methodology). As of December 31, 2023, the Trust had a total market value of \$1,502,095, based on the Digital Asset Market price of BAT on the Trust's principal market (Coinbase).

### Historical BAT Prices

As movements in the price of BAT will directly affect the price of the Shares, investors should understand recent movements in the price of BAT. Investors, however, should also be aware that past movements in the BAT price are not indicators of future movements. Movements may be influenced by various factors, including, but not limited to, government regulation, security breaches experienced by service providers, as well as political and economic uncertainties around the world.

During the period from February 26, 2021 (the inception of the Trust's operations) to December 31, 2024, the Digital Asset Market price of BAT, based on the price reported by the Trust's principal market as of 4:00 p.m., New York time, traded between \$0.15 (November 4, 2024) and \$1.73 (November 27, 2021), the straight average was \$0.44, and the median was \$0.28. The annual average, high, low and end-of-period BAT prices for the twelve months ended December 31, 2023, the twelve months ended December 31, 2024, and the period from the inception of the Trust's operations until December 31, 2024, based on the price reported by the Trust's principal market as of 4:00 p.m., New York time, on the applicable dates were:

Period	Average	High		Low		End of period	Last business day
		Digital Asset Market Price	Date	Digital Asset Market Price	Date		
Twelve months ended December 31, 2023	\$ 0.22	\$ 0.32	2/20/2023	\$ 0.16	9/11/2023	\$ 0.26	\$ 0.25
Twelve months ended December 31, 2024	\$ 0.23	\$ 0.37	3/13/2024	\$ 0.15	11/4/2024	\$ 0.23	\$ 0.23
February 26, 2021 (the inception of the Trust's operations) to December 31, 2024	\$ 0.44	\$ 1.73	11/27/2021	\$ 0.15	11/4/2024	\$ 0.23	\$ 0.23

### Recent Developments

On January 1, 2025, Grayscale Investments, LLC ("GSI") consummated an internal corporate reorganization (the "Reorganization"), pursuant to which Grayscale Investments, LLC, the Sponsor of the Trust prior to the Reorganization, merged with and into Grayscale Operating, LLC ("GSO"), a Delaware limited liability company and a wholly owned indirect subsidiary of DCG, with GSO continuing as the surviving company (the "Merger"). As a result of the Merger, GSO succeeded by operation of law to all the rights, powers, privileges and franchises and became subject to all of the obligations, liabilities, restrictions and disabilities of GSI, including with respect to the Sponsor Contracts (as defined below), all as provided under the Delaware Limited Liability Company Act. The Reorganization is not expected to have any material impact on the operations of the Trust.

In connection with the Reorganization, on January 1, 2025, and promptly following the effectiveness of the Merger, GSO assigned certain contracts pertaining to its role as Sponsor (as such term is defined in the Trust Agreement) of the Trust (such contracts, the "Sponsor Contracts") to Grayscale Investments Sponsors, LLC, a Delaware limited liability company and a wholly owned direct subsidiary of GSO ("GSIS"), whereby GSIS assumed all of the rights and obligations of GSO under the Sponsor Contracts. Other than the assumption of the Sponsor Contracts by GSIS, the Reorganization does not alter the rights or obligations under any of the Sponsor Contracts.

In connection with the Reorganization, on January 1, 2025, and promptly following the effectiveness of the Merger, GSO and GSIS executed a Certificate of Admission, pursuant to which GSIS was admitted as an additional Sponsor of the Trust under the Trust Agreement, by and among GSO (as successor in interest to GSI), the Trustee, and the shareholders from time to time thereunder, as amended from time to time. GSIS shall be subject to the rights and obligations of a Sponsor under the Trust Agreement.

On January 3, 2025, GSO voluntarily withdrew as a Sponsor of the Trust pursuant to the terms of the Trust Agreement, and, effective May 3, 2025, GSIS shall be the sole remaining Sponsor of the Trust.

## **PART E. ISSUANCE HISTORY**

### **Item 16. List of securities offerings and shares issued for services in the past two years.**

From February 26, 2021 (the inception of the Trust's operations) to December 31, 2024, the Trust has offered the Shares pursuant to Rule 506 of the Regulation D under the Securities Act. The Shares offered by the Trust have not been registered under the Securities Act, or any state or other securities laws, and were offered and sold only to "accredited investors" within the meaning of Rule 501(a) of Regulation D under the Securities Act, and in compliance with any applicable state or other securities laws.

The table below describes the Shares offered, the Shares sold and the average and range of prices at which the Shares were offered and sold by the issuer. All Shares initially offered and sold by the Trust are restricted securities pursuant to Rule 144 under the Securities Act. Until the Shares sold by the Trust become unrestricted in accordance with Rule 144, the certificates or other documents evidencing the Shares will contain legends stating that the Shares have not been registered under the Securities Act and referring to the restrictions on transferability and sale of the Shares under the Securities Act. Such legends are removed upon Shares becoming unrestricted in accordance with Rule 144. From January 1, 2023 to December 31, 2024, no Shares, other securities of the Trust, or options to acquire such other securities were issued in exchange for services provided by any person or entity.

<b>Period</b>	<b>Shares Offered</b>	<b>Shares Sold</b>	<b>No. of Purchasers</b>	<b>Avg.<sup>(1)</sup></b>	<b>High<sup>(1)</sup></b>	<b>Date</b>	<b>Low<sup>(1)</sup></b>	<b>Date</b>

## **PART F. EXHIBITS**

### **Item 17. Material Contracts.**

#### **Description of the Trust Agreement**

The following is a description of the material terms of the Trust Agreement. The Trust Agreement establishes the roles, rights and duties of the Sponsor and the Trustee.

#### **The Sponsor**

##### *Liability of the Sponsor and Indemnification*

Neither the Sponsor nor the Trust insure the Trust's BAT. The Sponsor and its affiliates (each a "Covered Person") will not be liable to the Trust or any shareholder for any loss suffered by the Trust which arises out of any action or inaction of such Covered Person if such Covered Person determined in good faith that such course of conduct was in the best interests of the Trust. However, the preceding liability exclusion will not protect any Covered Person against any liability resulting from its own willful misconduct, bad faith or gross negligence in the performance of its duties.

Each Covered Person will be indemnified by the Trust against any loss, judgment, liability, expense incurred or amount paid in settlement of any claim sustained by it in connection with the Covered Person's activities for the Trust, provided that (i) the Covered Person was acting on behalf of, or performing services for, the Trust and had determined, in good faith, that such course of conduct was in the best interests of the Trust and such liability or loss was not the result of fraud, gross negligence, bad faith, willful misconduct or a material breach of the Trust Agreement on the part of such Covered Person and (ii) any such indemnification will be recoverable only from the property of the Trust. Any amounts payable to an indemnified party will be payable in advance under certain circumstances.

##### *Fiduciary and Regulatory Duties of the Sponsor*

The Sponsor is not effectively subject to the duties and restrictions imposed on "fiduciaries" under both statutory and common law. Rather, the general fiduciary duties that would apply to the Sponsor are defined and limited in scope by the Trust Agreement.

Under Delaware law, a shareholder may bring a derivative action if the shareholder is a shareholder at the time the action is brought and either (i) was a shareholder at the time of the transaction at issue or (ii) acquired the status of shareholder by operation of law or the Trust's governing instrument from a person who was a shareholder at the time of the transaction at issue. Additionally, Section 3816(e) of the Delaware Statutory Trust Act specifically provides that "a beneficial owner's right to bring a derivative action may be subject to such additional standards and restrictions, if any, as are set forth in the governing instrument of the statutory trust, including, without limitation, the requirement that beneficial owners owning a specified beneficial interest in the statutory trust join in the bringing of the derivative action." In addition to the requirements of applicable law, the Trust Agreement provides that no shareholder will have the right, power or authority to bring or maintain a derivative action, suit or other proceeding on behalf of the Trust unless two or more shareholders who (i) are not affiliates of one another and (ii) collectively hold at least 10.0% of the outstanding Shares join in the bringing or maintaining of such action, suit or other proceeding. The Trust selected the 10.0% ownership threshold because the Trust believed that this was a threshold that investors would be comfortable with based on market precedent.

Due to this additional requirement, a shareholder attempting to bring a derivative action in the name of the Trust will be required to locate other shareholders with which it is not affiliated and that have sufficient Shares to meet the 10.0% threshold based on the number of Shares outstanding on the date the claim is brought and thereafter throughout the duration of the action, suit or proceeding.

"Affiliate" is defined in the Trust Agreement to mean any natural person, partnership, limited liability company, statutory trust, corporation, association or other legal entity (each, a "Person") directly or indirectly owning, controlling or holding with power to vote 10% or more of the outstanding voting securities of such Person, (ii) any Person 10% or more of whose outstanding voting securities are directly or indirectly owned, controlled or held with power to vote by such Person, (iii) any Person, directly or indirectly, controlling, controlled by or under common control of such Person, (iv) any employee, officer, director, member, manager or partner of such Person, or (v) if such Person is an employee, officer, director, member, manager or partner, any Person for which such Person acts in any such capacity.

Any shareholders seeking to bring a derivative action may determine whether the 10.0% ownership threshold required to bring a derivative action has been met by dividing the number Shares owned by such shareholders by the total number of Shares outstanding. Shareholders may determine the total number of Shares outstanding by reviewing the Trust's Annual Reports and quarterly filings with the OTCQX Best Market, or by requesting the number of Shares outstanding at any time from the Sponsor pursuant to Sections 7.2 and 8.1 of the Trust Agreement and Section 3819(a) of the DSTA. Because the Trust is a grantor trust, it may only issue one class of securities, the Shares.

The Trust offers Shares on a periodic basis at such times and for such periods as the Sponsor determines in its sole discretion. As a result, in order to maintain the 10.0% ownership threshold required to maintain a derivative action, shareholders may need to increase their holdings or locate additional shareholders during the pendency of a claim. The Trust posts the number of Shares outstanding as of the end of each month on its website and as of the end of each quarter in its annual and quarterly filings with the OTCQX Best Market. Shareholders may monitor the number of Shares outstanding at any time for purposes of calculating their ownership threshold by reviewing the Trust's website and OTCQX filings and by requesting the number of Shares outstanding on any date from the Sponsor at any time pursuant to Sections 7.2 and 8.1 of the Trust Agreement. Shareholders have the opportunity at any time to increase their holdings or locate other shareholders to maintain the 10.0% threshold throughout the duration of a derivative claim. Shareholders may do so by requesting from the Sponsor the list of the names and last known address of all shareholders pursuant to Sections 7.2 and 8.1 of the Trust Agreement and Section 3819(a) of the DSTA.

The Sponsor is not aware of any reason to believe that Section 7.4 of the Trust Agreement is not enforceable under state or federal law. The Court of Chancery of Delaware has stated that "[t]he DSTA is enabling in nature and, as such, permits a trust through its declarations of trust to delineate additional standards and requirements with which a stockholder-plaintiff must comply to proceed derivatively in the name of the trust." *Hartsel v. Vanguard Group, Inc.*, Del. Ch. June 15, 2011. However, there is limited case law addressing the enforceability of provisions like Section 7.4 under state and federal law and it is possible that this provision would not be enforced by a court in another jurisdiction or under other circumstances.

Beneficial owners may have the right, subject to certain legal requirements, to bring class actions in federal court to enforce their rights under the federal securities laws and the rules and regulations promulgated thereunder by the SEC. Beneficial owners who have suffered losses in connection with the purchase or sale of their beneficial interests may be able to recover such losses from the Sponsor where the losses result from a violation by the Sponsor of the anti-fraud provisions of the federal securities laws.

#### *Actions Taken to Protect the Trust*

The Sponsor may prosecute, defend, settle or compromise actions or claims at law or in equity that it considers necessary or proper to protect the Trust or the interests of the shareholders. The expenses incurred by the Sponsor in connection therewith (including the fees and disbursements of legal counsel) will be expenses of the Trust and are deemed to be Additional Trust Expenses. The Sponsor will be entitled to be reimbursed for the Additional Trust Expenses it pays on behalf of the Trust.

#### *Successor Sponsors*

If the Sponsor is adjudged bankrupt or insolvent, the Trust may dissolve and a Liquidating Trustee may be appointed to terminate and liquidate the Trust and distribute its remaining assets. The Trustee will have no obligation to appoint a successor sponsor or to assume the duties of the Sponsor, and will have no liability to any person because the Trust is or is not terminated. However, if a certificate of dissolution or revocation of the Sponsor's charter is filed (and ninety (90) days have passed after the date of notice to the Sponsor of revocation without a reinstatement of the Sponsor's charter) or the withdrawal, removal, adjudication or admission of bankruptcy or insolvency of the Sponsor has occurred, shareholders holding at least a majority (over 50%) of the Shares may agree in writing to continue the affairs of the Trust and to select, effective as of the date of such event, one or more successor Sponsors within ninety (90) days of any such event.

#### **The Trustee**

The Trustee is a fiduciary under the Trust Agreement and must satisfy the requirements of Section 3807 of the Delaware Trust Statute. However, the fiduciary duties, responsibilities and liabilities of the Trustee are limited by, and are only those specifically set forth in, the Trust Agreement.

### *Limitation on Trustee's Liability*

Under the Trust Agreement, the Sponsor has exclusive control of the management of all aspects of the activities of the Trust and the Trustee has only nominal duties and liabilities to the Trust. The Trustee is appointed to serve as the trustee for the sole purpose of satisfying Section 3807(a) of the DSTA which requires that the Trust have at least one trustee with a principal place of business in the State of Delaware. The duties of the Trustee are limited to (i) accepting legal process served on the Trust in the State of Delaware and (ii) the execution of any certificates required to be filed with the Delaware Secretary of State which the Trustee is required to execute under the DSTA.

To the extent the Trustee has duties (including fiduciary duties) and liabilities to the Trust or the shareholders under the DSTA, such duties and liabilities will be replaced by the duties and liabilities of the Trustee expressly set forth in the Trust Agreement. The Trustee will have no obligation to supervise, nor will it be liable for, the acts or omissions of the Sponsor, Transfer Agent, Custodian or any other person. Neither the Trustee, either in its capacity as trustee or in its individual capacity, nor any director, officer or controlling person of the Trustee is, or has any liability as, the issuer, director, officer or controlling person of the issuer of Shares. The Trustee's liability is limited solely to the express obligations of the Trustee as set forth in the Trust Agreement.

Under the Trust Agreement, the Sponsor has the exclusive management, authority and control of all aspects of the activities of the Trust. The Trustee has no duty or liability to supervise or monitor the performance of the Sponsor, nor does the Trustee have any liability for the acts or omissions of the Sponsor. The existence of a trustee should not be taken as an indication of any additional level of management or supervision over the Trust. The Trust Agreement provides that the management authority with respect to the Trust is vested directly in the Sponsor and that the Trustee is not responsible or liable for the genuineness, enforceability, collectability, value, sufficiency, location or existence of any of the BAT or other assets of the Trust.

### *Possible Repayment of Distributions Received by Shareholders; Indemnification by Shareholders*

The Shares are limited liability investments. Investors may not lose more than the amount that they invest plus any profits recognized on their investment. Although it is unlikely, the Sponsor may, from time to time, make distributions to the shareholders. However, shareholders could be required, as a matter of bankruptcy law, to return to the estate of the Trust any distribution they received at a time when the Trust was in fact insolvent or in violation of its Trust Agreement. In addition, the Trust Agreement provides that shareholders will indemnify the Trust for any harm suffered by it as a result of shareholders' actions unrelated to the activities of the Trust.

The foregoing repayment of distributions and indemnity provisions (other than the provision for shareholders indemnifying the Trust for taxes imposed upon it by a state, local or foreign taxing authority, which is included only as a formality due to the fact that many states do not have statutory trust statutes therefore the tax status of the Trust in such states might, theoretically, be challenged) are commonplace in statutory trusts and limited partnerships.

### *Indemnification of the Trustee*

The Trustee and any of the officers, directors, employees and agents of the Trustee will be indemnified by the Trust as primary obligor and DCG as secondary obligor and held harmless against any loss, damage, liability, claim, action, suit, cost, expense, disbursement (including the reasonable fees and expenses of counsel), tax or penalty of any kind and nature whatsoever, arising out of, imposed upon or asserted at any time against such indemnified person in connection with the performance of its obligations under the Trust Agreement, the creation, operation or termination of the Trust or the transactions contemplated therein; provided, however, that neither the Trust nor DCG will be required to indemnify any such indemnified person for any such expenses which are a result of the willful misconduct, bad faith or gross negligence of such indemnified person. If the Trust has insufficient assets or improperly refuses to pay such an indemnified person within 60 days of a request for payment owed under the Trust Agreement, DCG will, as secondary obligor, compensate or reimburse the Trustee or indemnify, defend and hold harmless such an indemnified person as if it were the primary obligor under the Trust Agreement. Any amount payable to such an indemnified person under the Trust Agreement may be payable in advance under certain circumstances and will be secured by a lien on the Trust property. The obligations of DCG and the Trust to indemnify such indemnified persons under the Trust Agreement will survive the termination of the Trust Agreement.

### *Holding of Trust Property*

The Trust will hold and record the ownership of the Trust's assets in a manner such that it will be owned for the benefit of the shareholders for the purposes of, and subject to and limited by the terms and conditions set forth in, the Trust Agreement. The Trust will not create, incur or assume any indebtedness or borrow money from or loan money to any person. The Trustee may not commingle its assets with those of any other person.

The Trustee may employ agents, attorneys, accountants, auditors and nominees and will not be answerable for the conduct or misconduct of any such custodians, agents, attorneys or nominees if such custodians, agents, attorneys and nominees have been selected with reasonable care.

### *Resignation, Discharge or Removal of Trustee; Successor Trustees*

The Trustee may resign as Trustee by written notice of its election so to do, delivered to the Sponsor with at least 60 days' notice. The Sponsor may remove the Trustee in its discretion. If the Trustee resigns or is removed, the Sponsor, acting on behalf of the shareholders, will appoint a successor trustee. The successor Trustee will become fully vested with all of the rights, powers, duties and obligations of the outgoing Trustee.

If the Trustee resigns and no successor trustee is appointed within 180 days after the Trustee notifies the Sponsor of its resignation, the Trustee will terminate and liquidate the Trust and distribute its remaining assets.

### *Amendments to the Trust Agreement*

In general, the Sponsor may amend the Trust Agreement without the consent of any shareholder. In particular, the Sponsor may, without the approval of the shareholders, amend the Trust Agreement if the Trust is advised at any time by the Trust's accountants or legal counsel that the amendments are necessary to permit the Trust to take the position that it is a grantor trust for U.S. federal income tax purposes. However, the Sponsor may not make an amendment, or otherwise supplement the Trust Agreement, if such amendment or supplement would permit the Sponsor, the Trustee or any other person to vary the investment of the shareholders (within the meaning of applicable Treasury Regulations) or would otherwise adversely affect the status of the Trust as a grantor trust for U.S. federal income tax purposes. In addition, no amendments to the Trust Agreement that materially adversely affect the interests of shareholders may be made without the vote of at least a majority (over 50%) of the Shares (not including any Shares held by the Sponsor or its affiliates). A shareholder will be deemed to have consented to a modification or amendment of the Trust Agreement if the Sponsor has notified the shareholders in writing of the proposed modification or amendment and the shareholder has not, within 20 calendar days of such notice, notified the Sponsor in writing the shareholder objects to such modification or amendment.

### *Termination of the Trust*

The Trust will dissolve if any of the following events occur:

- a U.S. federal or state regulator requires the Trust to shut down or forces the Trust to liquidate its BAT, or seizes, impounds or otherwise restricts access to Trust assets;
- any ongoing event exists that either prevents the Trust from making or makes impractical the Trust's reasonable efforts to make a fair determination of the Index Price;
- any ongoing event exists that either prevents the Trust from converting or makes impractical the Trust's reasonable efforts to convert BAT to U.S. dollars; or
- a certificate of dissolution or revocation of the Sponsor's charter is filed (and 90 days have passed since the date of notice to the Sponsor of revocation without a reinstatement of its charter) or the withdrawal, removal, adjudication or admission of bankruptcy or insolvency of the Sponsor has occurred unless (i) at the time there is at least one remaining Sponsor and that remaining Sponsor carries on the Trust or (ii) within 90 days of any such event shareholders holding at least a majority (over 50%) of Shares, not including Shares held by the Sponsor and its affiliates, agree in writing to continue the activities of the Trust and to select, effective as of the date of such event, one or more successor Sponsors.

The Sponsor may, in its sole discretion, dissolve the Trust if any of the following events occur:

- the SEC determines that the Trust is an investment company required to be registered under the Investment Company Act;
- the CFTC determines that the Trust is a commodity pool under the CEA;
- the Trust is determined to be a “money service business” under the regulations promulgated by FinCEN under the authority of the U.S. Bank Secrecy Act and is required to comply with certain FinCEN regulations thereunder;
- the Trust is required to obtain a license or make a registration under any state law regulating money transmitters, money services businesses, providers of prepaid or stored value or similar entities, or virtual currency businesses;
- the Trust becomes insolvent or bankrupt;
- the Custodian resigns or is removed without replacement;
- all of the Trust’s assets are sold;
- the Sponsor determines that the aggregate net assets of the Trust in relation to the expenses of the Trust make it unreasonable or imprudent to continue the affairs of the Trust;
- the Sponsor receives notice from the IRS or from counsel for the Trust or the Sponsor that the Trust fails to qualify for treatment, or will not be treated, as a grantor trust under the Code;
- if the Trustee notifies the Sponsor of the Trustee’s election to resign and the Sponsor does not appoint a successor trustee within 180 days; or
- the Sponsor determines, in its sole discretion, that it is desirable or advisable for any reason to discontinue the affairs of the Trust.

The Sponsor may determine that it is desirable or advisable to discontinue the affairs of the Trust for a variety of reasons. For example, the Sponsor may terminate the Trust if a federal court upholds an allegation that BAT is a security under the federal securities laws.

The death, legal disability, bankruptcy, insolvency, dissolution, or withdrawal of any shareholder (as long as such shareholder is not the sole shareholder of the Trust) will not result in the termination of the Trust, and such shareholder, his or her estate, custodian or personal representative will have no right to a redemption or value such shareholder’s Shares. Each shareholder (and any assignee thereof) expressly agrees that in the event of his or her death, he or she waives on behalf of himself or herself and his or her estate, and he or she directs the legal representative of his or her estate and any person interested therein to waive the furnishing of any inventory, accounting or appraisal of the assets of the Trust and any right to an audit or examination of the books of account for the Trust, except for such rights as are set forth in Article VIII of the Trust Agreement relating to the books of account and reports of the Trust.

Upon dissolution of the Trust and surrender of Shares by the shareholders, shareholders will receive a distribution in U.S. dollars or in BAT, Incidental Rights and/or IR Virtual Currency, at the sole discretion of the Sponsor, after the Sponsor has sold the Trust’s BAT, Incidental Rights and IR Virtual Currency, if applicable, and has paid or made provision for the Trust’s claims and obligations.

If the Trust is forced to liquidate, the Trust will be liquidated under the Sponsor’s direction. The Sponsor, on behalf of the Trust, will engage directly with Digital Asset Markets to liquidate the Trust’s BAT as promptly as possible while obtaining the best fair value possible. The proceeds therefrom will be applied and distributed in the following order of priority: (a) to the expenses of liquidation and termination and to creditors, including shareholders who are creditors, to the extent otherwise permitted by law, in satisfaction of liabilities of the Trust other than liabilities for distributions to shareholders and (b) to the holders of Shares pro rata in accordance with the respective percentages of Shares that they hold. It is expected that the Sponsor would be subject to the same regulatory requirements as the Trust, and therefore, the markets available to the Sponsor will be the same markets available to the Trust.

### *Governing Law*

The Trust Agreement and the rights of the Sponsor, Trustee and shareholders under the Trust Agreement are governed by the laws of the State of Delaware.

## **Description of the Custodian Agreement**

The Custodian Agreement establishes the rights and responsibilities of the Custodian, Sponsor, Trust and Authorized Participants with respect to the Trust's BAT in the Digital Asset Account, which is maintained and operated by the Custodian on behalf of the Trust. For a general description of the Custodian's obligations, see "The Custodian."

### ***Account; Location of BAT***

The Trust's Digital Asset Account is a segregated custody account controlled and secured by the Custodian to store private keys, which allow for the transfer of ownership or control of the Trust's BAT, on the Trust's behalf. Private key shards associated with the Trust's BAT are distributed geographically by the Custodian in secure vaults around the world, including in the United States. The locations of the secure vaults may change regularly and are kept confidential by the Custodian for security purposes. The Custodian requires written approval of the Trust prior to changing the location of the private key shards, and therefore the Trust's BAT, to a location outside the United States. The Digital Asset Account uses offline storage, or cold storage, mechanisms to secure the Trust's private keys. The term cold storage refers to a safeguarding method by which the private keys corresponding to digital assets are disconnected and/or deleted entirely from the internet.

The Custodian Agreement states that the Custodian serves as a fiduciary and custodian on the Trust's behalf, and the BAT in the Digital Asset Account are considered fiduciary assets that remain the Trust's property at all times and are not treated as general assets of the Custodian. Under the Custodian Agreement, the Custodian represents and warrants that it has no right, interest, or title in the BAT held in the Digital Asset Account, and agrees that it will not, directly or indirectly, lend, pledge, hypothecate or rehypothecate such digital assets. The Custodian does not reflect such digital assets as an asset on the balance sheet of the Custodian but does reflect the obligation to safeguard such digital assets with a corresponding asset measured at fair value for such obligation. The Custodian Agreement also contains an agreement by the parties to treat the digital assets credited to the Trust's Digital Asset Account as financial assets under Article 8 of the New York Uniform Commercial Code ("Article 8"). The Custodian's parent, Coinbase Global Inc., has stated in its public securities filings that in light of the inclusion in its custody agreements of provisions relating to Article 8 it believes that a court would not treat custodied digital assets as part of its general estate, although due to the novelty of digital assets courts have not yet considered this type of treatment for custodied digital assets. See "Risk Factors Related to the Trust and the Shares—The Trust relies on third-party service providers to perform certain functions essential to the affairs of the Trust and the replacement of such service providers could pose challenges to the safekeeping of the Trust's BAT and to the operations of the Trust."

### ***Safekeeping of BAT***

The Custodian will use best efforts to keep in safe custody on behalf of the Trust all BAT received by the Custodian. All BAT credited to the Digital Asset Account will (i) be held in the Digital Asset Account at all times, and the Digital Asset Account will be controlled by the Custodian; (ii) be labeled or otherwise appropriately identified as being held for the Trust; (iii) be held in the Digital Asset Account on a non-fungible basis; (iv) not be commingled with other digital assets held by the Custodian, whether held for the Custodian's own account or the account of other clients other than the Trust; (v) not without the prior written consent of the Trust be deposited or held with any third-party depository, custodian, clearance system or wallet; and (vi) for any Digital Asset Account maintained by the Custodian on behalf of the Trust, the Custodian will use best efforts to keep the private key or keys secure, and will not disclose such keys to the Trust, the Sponsor or to any other individual or entity except to the extent that any keys are disclosed consistent with a standard of best efforts and as part of a multiple signature solution that would not result in the Trust or the Sponsor "storing, holding, or maintaining custody or control of" the BAT "on behalf of others" within the meaning of the New York BitLicense Rule (23 NYCRR Part 200) as in effect as of June 24, 2015, such that it would require the Trust or the Sponsor to become licensed under such law.

## ***Insurance***

Pursuant to the terms of the Custodian Agreement, the Custodian is required to maintain insurance in such types and amounts as are commercially reasonable for the custodial services provided by the Custodian. The Custodian has advised the Sponsor that it has insurance coverage pursuant to policies held by Coinbase Global, Inc. (“Coinbase”), which procures fidelity (or crime) insurance coverage at commercially reasonable amounts for the custodial services provided. This insurance coverage is limited to losses of the digital assets the Custodian custodies on behalf of its clients, including the Trust’s BAT, resulting from theft, including internal theft by employees of Coinbase and its subsidiaries and theft or fraud by a director of Coinbase if the director is acting in the capacity of an employee of Coinbase or its subsidiaries.

Moreover, while the Custodian maintains certain capital reserve requirements depending on the assets under custody and to the extent required by applicable law, and such capital reserves may provide additional means to cover client asset losses, the Sponsor does not know the amount of such capital reserves, and neither the Trust nor the Sponsor have access to such information. The Trust cannot be assured that the Custodian will maintain capital reserves sufficient to cover losses with respect to the Trust’s digital assets. Furthermore, Coinbase has represented in securities filings that the total value of crypto assets in its possession and control is significantly greater than the total value of insurance coverage that would compensate Coinbase in the event of theft or other loss of funds.

## ***Deposits, Withdrawals and Storage; Access to the Digital Asset Account***

The Custodial Services (i) allow BAT to be deposited from a public blockchain address to the Digital Asset Account and (ii) allow the Trust or Sponsor to withdraw BAT from the Digital Asset Account to a public blockchain address the Trust or the Sponsor controls (each such transaction is a “Custody Transaction”).

The Custodian reserves the right to refuse to process or to cancel any pending Custody Transaction as required by law or in response to a subpoena, court order, or other binding government order or to enforce transaction, threshold, and condition limits, in each case as communicated to the Trust and the Sponsor as soon as reasonably practicable where the Custodian is permitted to do so, or if the Custodian reasonably believes that the Custody Transaction may violate or facilitate the violation of an applicable law, regulation or applicable rule of a governmental authority or self-regulatory organization. The Custodian may suspend or restrict the Trust’s and Sponsor’s access to the Custodial Services, and/or deactivate, terminate or cancel the Digital Asset Account if the Trust or Sponsor has taken certain actions, including any Prohibited Use or Prohibited Business as set forth in the Custodian Agreement, or if the Custodian is required to do so by a subpoena, court order, or other binding government order.

From the time the Custodian has verified the authorization of a complete set of instructions to withdraw BAT from the Digital Asset Account, the Custodian will have up to forty-eight (48) hours to process and complete such withdrawal. The Custodian will ensure that initiated deposits are processed in a timely manner but the Custodian makes no representations or warranties regarding the amount of time needed to complete processing which is dependent upon many factors outside of the Custodian’s control.

Subject to certain exceptions in the Custodian Agreement, the Trust, the Sponsor and their authorized representatives will be able to access the Digital Asset Account via the Custodian’s website in order to check information about the Digital Asset Account, deposit BAT to the Digital Asset Account or initiate a Custody Transaction (subject to the timing described above).

The Custodian makes no other representations or warranties with respect to the availability and/or accessibility of BAT or the availability and/or accessibility of the Digital Asset Account or Custodial Services.

Subject to any legal and regulatory requirements, in order to support the Trust’s ordinary course of deposits and withdrawals, which involves, or will in the future involve, deposits from and withdrawals to Digital Asset Accounts owned by any Authorized Participant, or a Liquidity Provider, the Custodian will use commercially reasonable efforts to cooperate with the Trust and Sponsor to design and put in place via the Custodial Services a secure procedure to allow Authorized Participants to receive a BAT address for deposits by Authorized Participants, or Liquidity Providers, and to initiate withdrawals to BAT addresses controlled by Authorized Participants or Liquidity Providers.

The Custodian Agreement further provides that the Trust’s and the Sponsor’s auditors or third-party accountants upon 30 days’ advance written notice, have inspection rights to inspect, take extracts from and audit the records maintained with respect to the Digital Asset Account. Such auditors or third-party accountants are not obligated under the Custodian Agreement to exercise their inspection rights.

### ***Security of the Account***

The Custodian securely stores all digital asset private keys held by the Custodian in offline storage. Under the Custodian Agreement, the Custodian must use best efforts to keep private and public keys secure, and may not disclose private keys to the Sponsor, Trust or any other individual or entity.

The Custodian has implemented and will maintain a reasonable information security program that includes policies and procedures that are reasonably designed to safeguard the Custodian's electronic systems and the Trust's and the Sponsor's confidential information from, among other things, unauthorized access or misuse. In the event of a Data Security Event (as defined below), the Custodian will promptly (subject to any legal or regulatory requirements) notify the Trust and the Sponsor. "Data Security Event" is defined as any event whereby (a) an unauthorized person (whether within the Custodian or a third party) acquired or accessed the Trust's or the Sponsor's information, (b) the Trust's or the Sponsor's information is otherwise lost, stolen or compromised or (c) the Custodian's Chief Information Security Officer, or other senior security officer of a similar title, is no longer employed by the Custodian.

### ***Record Keeping; Inspection and Auditing***

The Custodian will keep timely and accurate records of its services pursuant to the Custodian Agreement, and such records must be retained by the Custodian for no less than seven years. The Custodian Agreement also provides that the Custodian will permit, to the extent it may legally do so, the Trust's or the Sponsor's auditors or third-party accountants, upon reasonable notice, to inspect, take extracts from and audit the records that it maintains, take such steps as necessary to verify that satisfactory internal control systems and procedures are in place as the Trust or the Sponsor may reasonably request. The Custodian is obligated to notify the Trust and the Sponsor of any audit report prepared by its internal or independent auditors if such report reveals any material deficiencies or makes any material objections.

The Trust and the Sponsor obtain and perform a comprehensive review of the Services Organization Controls ("SOC") 1 report and SOC 2 each year. In addition to the review of SOC 1 and SOC 2 reports, the Trust, the Sponsor and/or their respective auditors may inspect or audit the Custodian's records in a variety of manners if considered necessary. Such processes may include validating the existing balances as reflected on the Custodian's user interface to nodes of the underlying blockchain and confirming that such digital assets are associated with its public keys to validate the existence and exclusive ownership of the digital assets. To validate software functionality of the private keys, the Trust may transfer a portion of its digital assets from one public key to another public key of the Trust.

The Trust, the Sponsor and their independent auditors may evaluate the Custodian's protection of private keys and other customer information, including review of supporting documentation related to the processes surrounding key lifecycle management, the key generation process (hardware, software, and algorithms associated with generation) the infrastructure used to generate and store private keys, how private keys are stored (for example, cold wallets), the segregation of duties in the authorization of digital asset transactions, and the number of users required to process a transaction and the monitoring of addresses for any unauthorized activity. For additional information, see "—Custody of the Trust's BAT."

### ***Annual Certificate and Report***

Once each calendar year, the Sponsor or Trust may request that the Custodian deliver a certificate signed by a duly authorized officer to certify that all representations and warranties made by the Custodian in the Custodian Agreement are true and correct on and as of the date of such certificate, and have been true and correct throughout the preceding year.

Once each calendar year, the Trust and the Sponsor will be entitled to request that the Custodian provide a copy of its most recent SOC 1 and SOC 2 reports, which are required to be dated within one year prior to such request. The Custodian reserves the right to combine the SOC 1 and SOC 2 reports into a comprehensive report. In the event that the Custodian does not deliver a SOC 1 Report or SOC 2 Report, as applicable, the Sponsor and the Trust will be entitled to terminate the Agreement.

### ***Standard of Care; Limitations of Liability***

The Custodian will use best efforts to keep in safe custody on behalf of the Trust all BAT received by the Custodian. The Custodian is liable to the Sponsor and the Trust for the loss of any BAT to the extent that the Custodian directly caused such loss through a breach of the Custodian Agreement and the Custodian is required to return to the Trust a quantity equal to the quantity of any such lost BAT. In addition, if the Trust or the Sponsor is unable to timely withdraw BAT from the Digital Asset Account due to the Custodian's systems being offline or otherwise unavailable for a period of 48 hours or more, the Custodian will use its best efforts to provide the Sponsor and the Trust with an amount of BAT that is equivalent to any pending withdrawal amounts in order to permit the Sponsor and the Trust to carry on processing withdrawals.

The Custodian's or Trust's total liability under the Custodian Agreement will never exceed the value of the BAT on deposit in the Digital Asset Account at the time of, and directly relating to, the events giving rise to the liability occurred, the value of which will be determined in accordance with the Custodian Agreement. In addition, for as long as a cold storage address holds BAT with a value in excess of \$100 million (the "Cold Storage Threshold") for a period of five consecutive business days or more without being reduced to the Cold Storage Threshold or lower, the Custodian's maximum liability for such cold storage address shall be limited to the Cold Storage Threshold. The Sponsor monitors the value of BAT deposited in cold storage addresses for whether the Cold Storage Threshold has been met by determining the U.S. dollar value of BAT deposited in each cold storage address on business days. Although the Cold Storage Threshold has never been met for a given cold storage address, to the extent it is met and not reduced within five business days, the Trust would not have a claim against the Custodian with respect to the digital assets held in such address to the extent the value exceeds the Cold Storage Threshold.

The Custodian or Trust are not liable to each other for any lost profits or any special, incidental, indirect, intangible, or consequential damages, whether based in contract, tort, negligence, strict liability or otherwise, and whether or not the Custodian has been advised of such losses or the Custodian knew or should have known of the possibility of such damages.

Furthermore, the Custodian is not liable for delays, suspension of operations, whether temporary or permanent, failure in performance, or interruption of service which result directly or indirectly from any cause or condition beyond the reasonable control of the Custodian, including but not limited to, any delay or failure due to any act of God, natural disasters, act of civil or military authorities, act of terrorists, including but not limited to cyber-related terrorist acts, hacking, government restrictions, exchange or market rulings, civil disturbance, war, strike or other labor dispute, fire, interruption in telecommunications or internet services or network provider services, failure of equipment and/or software, other catastrophe or any other occurrence which is beyond the reasonable control of the Custodian and will not affect the validity and enforceability of any remaining provisions. For the avoidance of doubt, a cybersecurity attack, hack or other intrusion by a third party or by someone associated with the Custodian is not a circumstance that is beyond the Custodian's reasonable control, to the extent due to the Custodian's failure to comply with its obligations under the Custodian Agreement.

The Custodian does not bear any liability, whatsoever, for any damage or interruptions caused by any computer viruses, spyware, scareware, Trojan horses, worms or other malware that may affect the Sponsor's or the Trust's computer or other equipment, or any phishing, spoofing or other attack, unless such damage or interruption originated from the Custodian due to its gross negligence, fraud, willful misconduct or breach of the Custodian Agreement.

### ***Indemnity***

Each of the Custodian and the Trust has agreed to indemnify and hold harmless the other such parties from any third-party claim or third-party demand (including reasonable and documented attorneys' fees and any fines, fees or penalties imposed by any regulatory authority) arising out of the Custodian's or the Trust's, as the case may be, breach of the Custodian Agreement, inaccuracy in any of the Custodian's or the Trust's, as the case may be, representations or warranties in the Custodian Agreement, or the Custodian's or the Trust's, as the case may be, knowing, in the case of the Custodian, violation of any law, rule or regulation, or the rights of any third party, except where such claim directly results from the gross negligence, fraud or willful misconduct of the other such party. In addition, the Trust has agreed to indemnify the Custodian with respect to any Incidental Rights or IR Virtual Currency abandoned by the Trust and any tax liability relating thereto or arising therefrom.

### ***Fees and Expenses***

The Custodian Fee is an annualized fee charged monthly that is a percentage of the Trust's monthly assets under custody. Following the second anniversary of the Custodian Agreement, the fee may be adjusted by the Custodian with at least six months' advance notice. Any changes to the fee will be agreed to by the Trust and the Sponsor and the Custodian in writing. To the extent the parties cannot reach an agreement regarding any modifications in pricing, either party may elect to terminate the Custodian Agreement. It is the Trust's and the Sponsor's sole responsibility to determine whether, and to what extent, any taxes apply to any deposits or withdrawals conducted through the Custodial Services.

### ***Term; Renewal***

Subject to each party's termination rights, the Custodian Agreement is for a term of two years. Thereafter, the Custodian Agreement automatically renews for successive terms of one year, unless either party elects not to renew, by providing no less than thirty days' written notice to the other party prior to the expiration of the then-current term, or unless terminated earlier as provided herein.

### ***Termination***

During the initial term, either party may terminate the Custodian Agreement for Cause (as defined below) at any time by written notice to the other party, effective immediately, or on such later date as may be specified in the notice. "Cause" is defined as if: (i) such other party commits any material breach of any of its obligations under the Custodian Agreement; (ii) such other party is adjudged bankrupt or insolvent, or there is commenced against such party a case under any applicable bankruptcy, insolvency or other similar law now or hereafter in effect, or such party files an application for an arrangement with its creditors, seeks or consents to the appointment of a receiver, administrator or other similar official for all or any substantial part of its property, admits in writing its inability to pay its debts as they mature, or takes any corporate action in furtherance of any of the foregoing, or fails to meet applicable legal minimum capital requirements; or (iii) with respect to the Trust's and the Sponsor's right to terminate, any applicable law, rule or regulation or any change therein or in the interpretation or administration thereof has or may have a material adverse effect on the rights of the Trust, the Sponsor or any of their respective beneficiaries with respect to any services covered by the Custodian Agreement.

After the initial term, either party may terminate the Custodian Agreement (i) upon ninety (90) days' prior written notice to the other party and (ii) for Cause at any time by written notice to the other party, effective immediately, or on such later date as may be specified in the notice.

Notwithstanding the foregoing, the Sponsor and the Trust may cancel the Digital Asset Account at any time by withdrawing all balances and contacting the Custodian. Upon termination of the Custodian Agreement, the Custodian will promptly upon the Sponsor's or the Trust's order deliver or cause to be delivered all digital assets held or controlled by the Custodian as of the effective date of termination, together with such copies of the records maintained pursuant to the Custodian Agreement and as the Sponsor and the Trust requests in writing.

### ***Governing Law***

The Custodian Agreement is governed by New York law.

### **Item 18. Articles of Incorporation and Bylaws.**

The Amended and Restated Declaration of Trust and Trust Agreement of Grayscale Basic Attention Token Trust (BAT) dated as of December 18, 2020, is attached as Exhibit 2 to the Information and Disclosure Statement filed with OTC Markets Group Inc. on May 13, 2022. Amendment No. 1 is attached as Exhibit 2 to this Annual Report, as filed with OTC Markets Group Inc. on March 19, 2025.

### **Item 19. Purchases of Equity Securities by the Issuer and Affiliated Purchasers.**

There have been no open market purchases of the Trust's Shares by Affiliated Purchasers and there are no programs that currently authorize Affiliated Purchasers to make such open market purchases. Any ownership of the Trust's Shares by Related Parties are the result of Shares being issued by the Trust to Affiliated Purchasers in the ordinary course of operations and at terms consistent with those available to investors that are not Related Parties.

**Item 20. Issuer's Certifications.**

**Certification**

I, Peter Mintzberg, certify that:

1. I have reviewed the Annual Report, exhibits, and all notes thereto of Grayscale Basic Attention Token Trust (BAT);
2. Based on my knowledge, this Annual Report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this Annual Report; and
3. Based on my knowledge, the financial statements, and other financial information included or incorporated by reference in this Annual Report, fairly present in all material respects the financial condition, results of operations and cash flows of the issuer as of, and for, the periods presented in this Annual Report.

## **Independent Auditors' Report**

Shareholders and Sponsor of  
Grayscale Basic Attention Token Trust (BAT):

### **Report on the Audit of the Financial Statements**

#### *Opinion*

We have audited the financial statements of Grayscale Basic Attention Token Trust (BAT) (the Trust), which comprise the statement of assets and liabilities, including the schedule of investment, as of December 31, 2024, and the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Trust as of December 31, 2024, and the results of its operations and changes in its net assets for the year then ended in accordance with U.S. generally accepted accounting principles.

#### *Basis for Opinion*

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Trust, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### *Responsibilities of Management for the Financial Statements*

Management is responsible for the preparation and fair presentation of the financial statements in accordance with U.S. generally accepted accounting principles, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Trust's ability to continue as a going concern for one year after the date that the financial statements are issued.

#### *Auditors' Responsibilities for the Audit of the Financial Statements*

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Trust's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

/s/ KPMG LLP

New York, New York  
March 19, 2025

## **REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Shareholders and Sponsor of  
Grayscale Basic Attention Token Trust (BAT)

### **Opinion on the Financial Statements**

We have audited the accompanying statement of assets and liabilities, including the schedule of investment, of Grayscale Basic Attention Token Trust (BAT) (the “Trust”) as of December 31, 2023 and the related statement of operations and changes in net assets for the year ended December 31, 2023, and related notes (collectively the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Trust as of December 31, 2023, and the result of its operation for the year ended December 31, 2023, in conformity with accounting principles generally accepted in the United States of America.

### **Basis for Opinion**

These financial statements are the responsibility of the management of the Trust’s Sponsor, Grayscale Investments, LLC. Our responsibility is to express an opinion on the Trust’s financial statements based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Trust in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Trust is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audit, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Trust’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

### **Emphasis of Matter - Investment in BAT**

In forming our opinion, we have considered the adequacy of the disclosures included in Note 7 to the financial statements concerning among other things the risks and uncertainties related to the Trust’s investment in BAT and Incidental Rights or IR Virtual Currency that arise as a result of the Trust’s investment in BAT. The risks and rewards to be recognized by the Trust associated with its investment in BAT will be dependent on many factors outside of the Trust’s control. The currently immature nature of the BAT market including clearing, settlement, custody and trading mechanisms, the dependency on information technology to sustain BAT continuity, as well as valuation and volume volatility all subject BAT to unique risks of theft, loss, or other misappropriation as well as valuation uncertainty. Furthermore, these factors also contribute to the significant uncertainty with respect to the future viability and value of BAT. Our opinion is not qualified in respect to this matter.

/s/ Marcum LLP

We have served as the Trust’s auditor from 2021 to 2024 (such date takes into account the acquisition of certain assets of Friedman LLP by Marcum LLP effective September 1, 2022).

# **Grayscale Basic Attention Token Trust (BAT)**

## **Notes to Financial Statements**

### **1. Organization**

Grayscale Basic Attention Token Trust (BAT) (the “Trust”) is a Delaware Statutory Trust that was formed on December 18, 2020 and commenced operations on February 26, 2021. In general, the Trust holds Basic Attention Token (“BAT”) and, from time to time, issues common units of fractional undivided beneficial interest (“Shares”) (in minimum baskets of 100 Shares, referred to as “Baskets”) in exchange for BAT. The redemption of Shares is not currently contemplated and the Trust does not currently operate a redemption program. Subject to receipt of regulatory approval and approval by the Sponsor in its sole discretion, the Trust may in the future operate a redemption program. The Trust currently has no intention of seeking regulatory approval to operate an ongoing redemption program. The Trust’s investment objective is for the value of the Shares (based on BAT per Share) to reflect the value of the BAT held by the Trust, less the Trust’s expenses and other liabilities. The Trust may also receive Incidental Rights and/or IR Virtual Currency as a result of the Trust’s investment in BAT, in accordance with the terms of the Trust Agreement.

Incidental Rights are rights to claim, or otherwise establish dominion and control over, any virtual currency or other asset or right, which rights are incident to the Trust’s ownership of BAT and arise without any action of the Trust, or of the Sponsor or Trustee on behalf of the Trust; IR Virtual Currency is any virtual currency tokens, or other asset or right, received by the Trust through the exercise (subject to the applicable provisions of the Trust Agreement) of any Incidental Right.

As of December 31, 2024, Grayscale Investments, LLC (“Grayscale” or the “Sponsor”) acted as the Sponsor of the Trust and was a wholly owned subsidiary of Digital Currency Group, Inc. (“DCG”). The Sponsor is responsible for the day-to-day administration of the Trust pursuant to the provisions of the Trust Agreement. Grayscale is responsible for preparing and providing annual and quarterly reports on behalf of the Trust to investors and is also responsible for selecting and monitoring the Trust’s service providers. As partial consideration for the Sponsor’s services, the Trust pays Grayscale a Sponsor’s Fee as discussed in Note 6. The Sponsor also acts as the sponsor and manager of other investment products including Grayscale Aave Trust (AAVE), Grayscale Avalanche Trust (AVAX), Grayscale Bitcoin Trust ETF (NYSE Arca: GBTC), Grayscale Bitcoin Mini Trust ETF (NYSE Arca: BTC), Grayscale Bitcoin Cash Trust (BCH) (OTCQX: BCHG), Grayscale Bittensor Trust (TAO), Grayscale Chainlink Trust (LINK) (OTCQX: GLNK), Grayscale Decentraland Trust (MANA) (OTCQX: MANA), Grayscale Dogecoin Trust (DOGE), Grayscale Ethereum Trust ETF (NYSE Arca: ETHE), Grayscale Ethereum Classic Trust (ETC) (OTCQX: ETCG), Grayscale Ethereum Mini Trust ETF (NYSE Arca: ETH), Grayscale Filecoin Trust (FIL) (OTC Markets: FILG), Grayscale Horizen Trust (ZEN) (OTCQX: HZEN), Grayscale Lido DAO Trust (LDO), Grayscale Litecoin Trust (LTC) (OTCQX: LTCN), Grayscale Livepeer Trust (LPT) (OTCQX: GLIV), Grayscale MakerDao Trust (MKR), Grayscale NEAR Trust (NEAR), Grayscale Optimism Trust (OP), Grayscale Pyth Trust (PYTH), Grayscale Solana Trust (SOL) (OTCQX: GSOL), Grayscale Stacks Trust (STX), Grayscale Stellar Lumens Trust (XLM) (OTCQX: GXLM), Grayscale Sui Trust (SUI), Grayscale XRP Trust, Grayscale Zcash Trust (ZEC) (OTCQX: ZCSH), Grayscale Decentralized AI Fund LLC, Grayscale Decentralized Finance (DeFi) Fund LLC (OTCQB: DEFG), Grayscale Digital Large Cap Fund LLC (OTCQX: GDLC), and Grayscale Smart Contract Platform Ex Ethereum (ETH) Fund LLC, each of which is an affiliate of the Trust. The following investment products sponsored or managed by the Sponsor are SEC reporting companies with their shares registered pursuant to Section 12(g) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”): Grayscale Bitcoin Cash Trust (BCH), Grayscale Ethereum Classic Trust (ETC), Grayscale Horizen Trust (ZEN), Grayscale Litecoin Trust (LTC), Grayscale Stellar Lumens Trust (XLM), Grayscale Zcash Trust (ZEC), and Grayscale Digital Large Cap Fund LLC. The following investment products sponsored by the Sponsor are SEC reporting companies with their shares registered pursuant to Section 12(b) of the Exchange Act: Grayscale Bitcoin Trust ETF, Grayscale Ethereum Trust ETF, Grayscale Ethereum Mini Trust ETF, and Grayscale Bitcoin Mini Trust ETF.

Authorized Participants of the Trust are the only entities who may place orders to create or, if permitted, redeem Baskets. Grayscale Securities, LLC (“Grayscale Securities” or, in such capacity, an “Authorized Participant”), a registered broker-dealer and affiliate of the Sponsor, is the only Authorized Participant, and is party to a participant agreement with the Sponsor and the Trust. Additional Authorized Participants may be added at any time, subject to the discretion of the Sponsor. Liquidity Providers who are unaffiliated with the Trust may be engaged from time to time and at any time.

## **Grayscale Basic Attention Token Trust (BAT)**

### **Notes to Financial Statements**

#### **1. Organization (continued)**

Genesis Global Trading, Inc. (“Genesis”), a wholly owned subsidiary of DCG, served as a Liquidity Provider from October 3, 2022 to September 12, 2023.

The custodian of the Trust is Coinbase Custody Trust Company, LLC (the “Custodian”), a third-party service provider. The Custodian is responsible for safeguarding the BAT, Incidental Rights, and IR Virtual Currency held by the Trust, and holding the private key(s) that provide access to the Trust’s digital wallets and vaults.

The transfer agent for the Trust (the “Transfer Agent”) is Continental Stock Transfer & Trust Company. The responsibilities of the Transfer Agent are to maintain creations, redemptions, transfers, and distributions of the Trust’s Shares which are primarily held in book-entry form.

On May 12, 2022, the Trust received notice that its Shares were qualified for public trading on the OTCQB U.S Market (“OTCQB”) of OTC Markets Group Inc. The Trust’s Shares have been quoted on OTC Markets under the symbol GBAT since May 27, 2022. On December 6, 2024, the Trust received notice that its Shares were qualified to trade on the OTCQX Best Market® (“OTCQX”) of OTC Markets Group Inc. The Trust’s trading symbol on OTCQX is “GBAT” and the CUSIP number for its Shares is 38963UI08.

#### **2. Summary of Significant Accounting Policies**

The following is a summary of significant accounting policies followed by the Trust:

The financial statements have been prepared in accordance with generally accepted accounting principles in the United States (“U.S. GAAP”). The Trust qualifies as an investment company for accounting purposes pursuant to the accounting and reporting guidance under Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 946, *Financial Services—Investment Companies*. The Trust uses fair value as its method of accounting for BAT in accordance with its classification as an investment company for accounting purposes. The Trust is not a registered investment company under the Investment Company Act of 1940. U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts in the financial statements and accompanying notes. Actual results could differ from those estimates and these differences could be material.

The Trust conducts its transactions in BAT, including receiving BAT for the creation of Shares and delivering BAT for the redemption of Shares and for the payment of the Sponsor’s Fee. At this time, the Trust is not accepting redemption requests from shareholders. Since its inception, the Trust has not held cash or cash equivalents.

#### **Principal Market and Fair Value Determination**

To determine which market is the Trust’s principal market (or in the absence of a principal market, the most advantageous market) for purposes of calculating the Trust’s net asset value in accordance with U.S. GAAP (“Principal Market NAV”), the Trust follows ASC Topic 820-10, *Fair Value Measurement*, which outlines the application of fair value accounting. ASC 820-10 determines fair value to be the price that would be received for BAT in a current sale, which assumes an orderly transaction between market participants on the measurement date. ASC 820-10 requires the Trust to assume that BAT is sold in its principal market to market participants or, in the absence of a principal market, the most advantageous market. Market participants are defined as buyers and sellers in the principal or most advantageous market that are independent, knowledgeable, and willing and able to transact.

The Trust only receives BAT in connection with a creation order from the Authorized Participant (or a Liquidity Provider) and does not itself transact on any Digital Asset Markets. Therefore, the Trust looks to market-based volume and level of activity for Digital Asset Markets. The Authorized Participant(s), or a Liquidity Provider, may transact in a Brokered Market, a Dealer Market, Principal-to-Principal Markets and Exchange Markets (referred to as “Trading Platform Markets” in this Annual Report), each as defined in the FASB ASC Master Glossary (collectively, “Digital Asset Markets”).

**Grayscale Basic Attention Token Trust (BAT)**  
**Notes to Financial Statements**

**2. Summary of Significant Accounting Policies (continued)**

In determining which of the eligible Digital Asset Markets is the Trust's principal market, the Trust reviews these criteria in the following order:

First, the Trust reviews a list of Digital Asset Markets that maintain practices and policies designed to comply with anti-money laundering ("AML") and know-your-customer ("KYC") regulations, and non-Digital Asset Trading Platform Markets that the Trust reasonably believes are operating in compliance with applicable law, including federal and state licensing requirements, based upon information and assurances provided to it by each market.

Second, the Trust sorts these Digital Asset Markets from high to low by market-based volume and level of activity of BAT traded on each Digital Asset Market in the trailing twelve months.

Third, the Trust then reviews pricing fluctuations and the degree of variances in price on Digital Asset Markets to identify any material notable variances that may impact the volume or price information of a particular Digital Asset Market.

Fourth, the Trust then selects a Digital Asset Market as its principal market based on the highest market-based volume, level of activity and price stability in comparison to the other Digital Asset Markets on the list. Based on information reasonably available to the Trust, Trading Platform Markets have the greatest volume and level of activity for the asset. The Trust therefore looks to accessible Trading Platform Markets as opposed to the Brokered Market, Dealer Market and Principal-to-Principal Markets to determine its principal market. As a result of the aforementioned analysis, a Trading Platform Market has been selected as the Trust's principal market.

The Trust determines its principal market (or in the absence of a principal market the most advantageous market) annually and conducts a quarterly analysis to determine (i) if there have been recent changes to each Digital Asset Market's trading volume and level of activity in the trailing twelve months, (ii) if any Digital Asset Markets have developed that the Trust has access to, or (iii) if recent changes to each Digital Asset Market's price stability have occurred that would materially impact the selection of the principal market and necessitate a change in the Trust's determination of its principal market.

The cost basis of the BAT received by the Trust in connection with a creation order is recorded by the Trust at the fair value of BAT at 4:00 p.m., New York time, on the creation date for financial reporting purposes. The cost basis recorded by the Trust may differ from proceeds collected by the Authorized Participant from the sale of the corresponding Shares to investors.

**Investment Transactions and Revenue Recognition**

The Trust considers investment transactions to be the receipt of BAT for Share creations and the delivery of BAT for Share redemptions or for payment of expenses in BAT. At this time, the Trust is not accepting redemption requests from shareholders. The Trust records its investment transactions on a trade date basis and changes in fair value are reflected as net change in unrealized appreciation or depreciation on investments. Realized gains and losses are calculated using the specific identification method. Realized gains and losses are recognized in connection with transactions including settling obligations for the Sponsor's Fee in BAT.

**Fair Value Measurement**

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the 'exit price') in an orderly transaction between market participants at the measurement date.

U.S. GAAP utilizes a fair value hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Trust. Unobservable inputs reflect the Trust's assumptions about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

**Grayscale Basic Attention Token Trust (BAT)**  
**Notes to Financial Statements**

**2. Summary of Significant Accounting Policies (continued)**

The fair value hierarchy is categorized into three levels based on the inputs as follows:

- Level 1 – Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Trust has the ability to access. Since valuations are based on quoted prices that are readily and regularly available in an active market, these valuations do not entail a significant degree of judgment.
- Level 2 – Valuations based on quoted prices in markets that are not active or for which significant inputs are observable, either directly or indirectly.
- Level 3 – Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

The availability of valuation techniques and observable inputs can vary by investment. To the extent that valuations are based on sources that are less observable or unobservable in the market, the determination of fair value requires more judgment. Fair value estimates do not necessarily represent the amounts that may be ultimately realized by the Trust.

		Fair Value Measurement Using			
		Amount at Fair Value	Level 1	Level 2	Level 3
December 31, 2024					
Assets					
Investment in BAT		\$ 5,405,076	\$ 5,405,076	\$ -	\$ -
December 31, 2023					
Assets					
Investment in BAT		\$ 1,502,095	\$ 1,502,095	\$ -	\$ -

**Recently Adopted Accounting Pronouncements**

In December 2023, the FASB issued Accounting Standards Update (“ASU”) 2023-08, *Intangibles—Goodwill and Other—Crypto Assets (Subtopic 350-60): Accounting for and Disclosure of Crypto Assets* (“ASU 2023-08”). ASU 2023-08 is intended to improve the accounting for certain crypto assets by requiring an entity to measure those crypto assets at fair value each reporting period with changes in fair value recognized in net income. The amendments also improve the information provided to investors about an entity’s crypto asset holdings by requiring disclosure about significant holdings, contractual sale restrictions, and changes during the reporting period. ASU 2023-08 is effective for annual and interim reporting periods beginning after December 15, 2024. Early adoption is permitted for both interim and annual financial statements that have not yet been issued. The Trust adopted this new guidance on January 1, 2024, with no material impact on its financial statements and disclosures as the Trust historically used fair value as its method of accounting for BAT in accordance with its classification as an investment company for accounting purposes.

In this reporting period, the Trust adopted FASB Accounting Standards Update 2023-07, Segment Reporting (Topic 280)—*Improvements to Reportable Segment Disclosures* (“ASU 2023-07”). Adoption of the new standard impacted financial statement disclosures only and did not affect the Trust’s financial position or the results of its operations. Operating segments are defined as components of an enterprise that engage in business activities for which discrete financial information is available and regularly reviewed by the chief operating decision maker (“CODM”) in deciding how to allocate resources and to assess performance. The Chief Executive Officer and Chief Financial Officer of the Sponsor act as the Trust’s CODM. The Trust represents a single operating segment, as the CODM monitors the operating results of the Trust as a whole and the Trust’s passive investment objective is pre-determined in accordance with the terms of the Trust Agreement. The financial information in the form of the Trust’s total returns, expense ratios and changes in net assets (i.e., changes in net assets resulting from operations and capital share transactions), which are used by the CODM to assess the segment’s performance, are consistent with that presented within the Trust’s financial statements. Segment assets are reflected on the accompanying Statements of Assets and Liabilities as Total assets and the only significant segment expense, the Sponsor’s fee, related party, is included in the accompanying Statements of Operations.

**Grayscale Basic Attention Token Trust (BAT)**  
**Notes to Financial Statements**

**3. Fair Value of BAT**

BAT is held by the Custodian on behalf of the Trust and is carried at fair value. As of December 31, 2024 and 2023, the Trust held 23,221,670.88633760 and 5,777,290.03508440 BAT, respectively.

The Trust determined the fair value per BAT to be \$0.23 and \$0.26 on December 31, 2024 and 2023, respectively, using the price provided at 4:00 p.m., New York time, by the Digital Asset Trading Platform Market considered to be the Trust's principal market (Coinbase).

The following represents the changes in quantity of BAT and the respective fair value:

	<b>Quantity</b>	<b>Fair Value</b>
<b>Balance at December 31, 2022</b>	5,923,547.90038736	\$ 1,007,003
BAT contributed	-	-
BAT distributed for Sponsor's Fee, related party	(146,257.86530296)	(32,198)
Net change in unrealized appreciation on investment in BAT	-	611,125
Net realized loss on investment in BAT	-	(83,835)
<b>Balance at December 31, 2023</b>	5,777,290.03508440	\$ 1,502,095
BAT contributed	17,871,127.06696200	5,101,090
BAT distributed for Sponsor's Fee, related party	(426,746.21570880)	(92,802)
Net change in unrealized depreciation on investment in BAT	-	(999,218)
Net realized loss on investment in BAT	-	(106,089)
<b>Balance at December 31, 2024</b>	23,221,670.88633760	\$ 5,405,076

**4. Creations and Redemptions of Shares**

At December 31, 2024 and 2023, there were an unlimited number of Shares authorized by the Trust. The Trust creates (and, should the Trust commence a redemption program, redeems) Shares from time to time, but only in one or more Baskets. The creation and redemption of Baskets on behalf of investors are made by the Authorized Participant in exchange for the delivery of BAT to the Trust or the distribution of BAT by the Trust. The amount of BAT required for each creation Basket or redemption Basket is determined by dividing (x) the amount of BAT owned by the Trust at 4:00 p.m., New York time, on such trade date of a creation or redemption order, after deducting the amount of BAT representing the U.S. dollar value of accrued but unpaid fees and expenses of the Trust, by (y) the number of Shares outstanding at such time and multiplying the quotient obtained by 100. Each Share represented approximately 9.0837 and 9.3137 BAT at December 31, 2024 and 2023, respectively. The decrease in the amount of BAT represented by each Share is primarily a result of the periodic withdrawal of BAT to pay the Sponsor's Fee.

The cost basis of investments in BAT recorded by the Trust is the fair value of BAT, as determined by the Trust, at 4:00 p.m., New York time, on the date of transfer to the Trust by the Authorized Participant, or Liquidity Provider, based on the creation Baskets. The cost basis recorded by the Trust may differ from proceeds collected by the Authorized Participant from the sale of each Share to investors. The Authorized Participant or Liquidity Provider may realize significant profits buying, selling, creating, and, if permitted, redeeming Shares as a result of changes in the value of Shares or BAT.

At this time, the Trust is not operating a redemption program and is not accepting redemption requests. Subject to receipt of regulatory approval and approval by the Sponsor in its sole discretion, the Trust may in the future operate a redemption program. The Trust currently has no intention of seeking regulatory approval to operate an ongoing redemption program.

**Grayscale Basic Attention Token Trust (BAT)**  
**Notes to Financial Statements**

**5. Income Taxes**

The Sponsor takes the position that the Trust is properly treated as a grantor trust for U.S. federal income tax purposes. Assuming that the Trust is a grantor trust, the Trust will not be subject to U.S. federal income tax. Rather, if the Trust is a grantor trust, each beneficial owner of Shares will be treated as directly owning its pro rata Share of the Trust's assets and a pro rata portion of the Trust's income, gains, losses and deductions will "flow through" to each beneficial owner of Shares.

If the Trust were not properly classified as a grantor trust, the Trust might be classified as a partnership for U.S. federal income tax purposes. However, due to the uncertain treatment of digital assets, including forks, airdrops and similar occurrences for U.S. federal income tax purposes, there can be no assurance in this regard. If the Trust were classified as a partnership for U.S. federal income tax purposes, the tax consequences of owning Shares generally would not be materially different from the tax consequences described herein, although there might be certain differences, including with respect to timing. In addition, tax information reports provided to beneficial owners of Shares would be made in a different form. If the Trust were not classified as either a grantor trust or a partnership for U.S. federal income tax purposes, it would be classified as a corporation for such purposes. In that event, the Trust would be subject to entity-level U.S. federal income tax (currently at the rate of 21%) on its net taxable income and certain distributions made by the Trust to shareholders would be treated as taxable dividends to the extent of the Trust's current and accumulated earnings and profits.

In accordance with U.S. GAAP, the Trust has defined the threshold for recognizing the benefits of tax return positions in the financial statements as "more-likely-than-not" to be sustained by the applicable taxing authority and requires measurement of a tax position meeting the "more-likely-than-not" threshold, based on the largest benefit that is more than 50% likely to be realized. Tax positions not deemed to meet the "more-likely-than-not" threshold are recorded as a tax benefit or expense in the current period. As of and during the years ended December 31, 2024 and 2023, the Trust did not have a liability for any unrecognized tax amounts. However, the Sponsor's conclusions concerning its determination of "more-likely-than-not" tax positions may be subject to review and adjustment at a later date based on factors including, but not limited to, further implementation guidance, and ongoing analyses of and changes to tax laws, regulations and interpretations thereof.

The Sponsor of the Trust has evaluated whether or not there are uncertain tax positions that require financial statement recognition and has determined that no reserves for uncertain tax positions related to federal, state and local income taxes existed as of December 31, 2024 or 2023.

**6. Related Parties**

The Trust considered the following entities, their directors, and certain employees to be related parties of the Trust as of December 31, 2024: DCG, Grayscale, and Grayscale Securities. As of December 31, 2024 and 2023, 342,643 and 376,312 Shares of the Trust were held by related parties of the Trust, respectively.

Genesis Global Trading, Inc. filed a certificate of dissolution in August 2024, and has therefore been removed from the list of related parties.

In accordance with the Trust Agreement governing the Trust, the Trust pays a fee to the Sponsor, calculated as 2.5% of the aggregate value of the Trust's assets, less its liabilities (which include any accrued but unpaid expenses up to, but excluding, the date of calculation), as calculated and published by the Sponsor or its delegates in the manner set forth in the Trust Agreement (the "Sponsor's Fee"). The Sponsor's Fee accrues daily in U.S. dollars and is payable in BAT, monthly in arrears. The amount of BAT payable in respect of each daily U.S. dollar accrual will be determined by reference to the same U.S. dollar value of BAT used to determine such accrual. For purposes of these financial statements, the U.S. dollar value of BAT is determined by reference to the Digital Asset Trading Platform Market that the Trust considers its principal market as of 4:00 p.m., New York time, on each valuation date. The Trust held no Incidental Rights or IR Virtual Currency as of December 31, 2024 and 2023. No Incidental Rights or IR Virtual Currencies have been distributed in payment of the Sponsor's Fee during the years ended December 31, 2024 and 2023.

**Grayscale Basic Attention Token Trust (BAT)**  
**Notes to Financial Statements**

**6. Related Parties (continued)**

As partial consideration for receipt of the Sponsor's Fee, the Sponsor is obligated under the Trust Agreement to assume and pay all fees and other expenses incurred by the Trust in the ordinary course of its affairs, excluding taxes, but including marketing fees; administrator fees, if any; custodian fees; transfer agent fees; trustee fees; the fees and expenses related to the listing, quotation or trading of the Shares on any secondary market (including customary legal, marketing and audit fees and expenses) in an amount up to \$600,000 in any given fiscal year; ordinary course legal fees and expenses; audit fees; regulatory fees, including, if applicable, any fees relating to the registration of the Shares under the Securities Act or the Exchange Act; printing and mailing costs; the costs of maintaining the Trust's website and applicable license fees (together, the "Sponsor-paid Expenses"), provided that any expense that qualifies as an Additional Trust Expense will be deemed to be an Additional Trust Expense and not a Sponsor-paid Expense.

The Trust may incur certain extraordinary, non-recurring expenses that are not Sponsor-paid Expenses, including, but not limited to, taxes and governmental charges, expenses and costs of any extraordinary services performed by the Sponsor (or any other service provider) on behalf of the Trust to protect the Trust or the interests of shareholders (including in connection with any Incidental Rights and any IR Virtual Currency), any indemnification of the Custodian or other agents, service providers or counterparties of the Trust, the fees and expenses related to the listing, quotation or trading of the Shares on any secondary market (including legal, marketing and audit fees and expenses) to the extent exceeding \$600,000 in any given fiscal year and extraordinary legal fees and expenses, including any legal fees and expenses incurred in connection with litigation, regulatory enforcement or investigation matters (collectively "Additional Trust Expenses"). In such circumstances, the Sponsor or its delegate (i) will instruct the Custodian to withdraw from the Digital Asset Account BAT, Incidental Rights and/or IR Virtual Currency in such quantity as may be necessary to permit payment of such Additional Trust Expenses and (ii) may either (x) cause the Trust (or its delegate) to convert such BAT, Incidental Rights and/or IR Virtual Currency into U.S. dollars or other fiat currencies at the Actual Exchange Rate or (y) when the Sponsor incurs such expenses on behalf of the Trust, cause the Trust (or its delegate) to deliver such BAT, Incidental Rights and/or IR Virtual Currency in kind to the Sponsor, in each case in such quantity as may be necessary to permit payment of such Additional Trust Expenses.

For the years ended December 31, 2024 and 2023, the Trust incurred Sponsor's Fees of \$92,802 and \$32,198, respectively. As of December 31, 2024 and 2023, there were no accrued and unpaid Sponsor's Fees. In addition, the Sponsor may pay Additional Trust Expenses on behalf of the Trust, which are reimbursable by the Trust to the Sponsor. For the years ended December 31, 2024 and 2023, the Sponsor did not pay any Additional Trust Expenses on behalf of the Trust.

**7. Risks and Uncertainties**

The Trust is subject to various risks including market risk, liquidity risk, and other risks related to its concentration in a single asset, BAT. Investing in BAT is currently highly speculative and volatile.

The Principal Market NAV of the Trust, calculated by reference to the principal market price in accordance with U.S. GAAP, relates primarily to the value of the BAT held by the Trust, and fluctuations in the price of BAT could materially and adversely affect an investment in the Shares of the Trust. The price of BAT has a limited history. During such history, BAT prices have been volatile and subject to influence by many factors, including the levels of liquidity. If Digital Asset Markets continue to experience significant price fluctuations, the Trust may experience losses. Several factors may affect the price of BAT, including, but not limited to, global BAT supply and demand, theft of BAT from global trading platforms or vaults, competition from other forms of digital currency or payment services, global or regional political, economic or financial conditions, and other unforeseen events and situations.

The BAT held by the Trust are commingled and the Trust's shareholders have no specific rights to any specific BAT. In the event of the insolvency of the Trust, its assets may be inadequate to satisfy a claim by its shareholders.

**Grayscale Basic Attention Token Trust (BAT)**  
**Notes to Financial Statements**

**7. Risks and Uncertainties (continued)**

There is currently no clearing house for BAT, nor is there a central or major depository for the custody of BAT. There is a risk that some or all of the Trust's BAT could be lost or stolen. There can be no assurance that the Custodian will maintain adequate insurance or that such coverage will cover losses with respect to the Trust's BAT. Further, transactions in BAT are irrevocable. Stolen or incorrectly transferred BAT may be irretrievable. As a result, any incorrectly executed BAT transactions could adversely affect an investment in the Shares.

The Securities and Exchange Commission (the "SEC") has stated that certain digital assets may be considered "securities" under the federal securities laws. The test for determining whether a particular digital asset is a "security" is complex and difficult to apply, and the outcome is difficult to predict. Public, though non-binding, statements by senior officials at the SEC have indicated that the SEC did not consider Bitcoin or Ether to be securities, and does not currently consider Bitcoin to be a security. The SEC staff has also provided informal assurances via no-action letter to a handful of promoters that their digital assets are not securities. On the other hand, the SEC has brought enforcement actions against the issuers and promoters of several other digital assets on the basis that the digital assets in question are securities and has not formally or explicitly confirmed that it does not deem Ether to be a security.

If BAT is determined to be a "security" under federal or state securities laws by the SEC or any other agency, or in a proceeding in a court of law or otherwise, it may have material adverse consequences for BAT. For example, it may become more difficult for BAT to be traded, cleared and custodied as compared to other digital assets that are not considered to be securities, which could, in turn, negatively affect the liquidity and general acceptance of BAT and cause users to migrate to other digital assets. As such, any determination that BAT is a security under federal or state securities laws may adversely affect the value of BAT and, as a result, an investment in the Shares.

In addition, if BAT is in fact a security, the Trust could be considered an unregistered "investment company" under the Investment Company Act of 1940, which could necessitate the Trust's liquidation. In this case, the Trust and the Sponsor may be deemed to have participated in an illegal offering of investment company securities and there is no guarantee that the Sponsor will be able to register the Trust under the Investment Company Act of 1940 at such time, or take such other actions as may be necessary to ensure the Trust's activities comply with applicable law, which could force the Sponsor to liquidate the Trust.

To the extent a private key required to access a BAT address is lost, destroyed or otherwise compromised and no backup of the private keys are accessible, the Trust may be unable to access the BAT controlled by the private key and the private key will not be capable of being restored by the Basic Attention Token Network. The processes by which BAT transactions are settled are dependent on the BAT peer-to-peer network, and as such, the Trust is subject to operational risk. A risk also exists with respect to previously unknown technical vulnerabilities, which may adversely affect the value of BAT.

The Trust relies on third-party service providers to perform certain functions essential to its operations. Any disruptions to the Trust's service providers' business operations resulting from business failures, financial instability, security failures, government mandated regulation or operational problems could have an adverse impact on the Trust's ability to access critical services and be disruptive to the operations of the Trust.

The Sponsor and the Trust may be subject to various litigation, regulatory investigations, and other legal proceedings that arise in the ordinary course of its business.

**Grayscale Basic Attention Token Trust (BAT)**

Principal market net asset value, beginning of year	\$ 2.42	\$ 1.62
Net (decrease) increase in net assets from investment operations:		
Net investment loss	(0.05)	(0.05)
Net realized and unrealized (loss) gain	(0.26)	0.85
Net (decrease) increase in net assets resulting from operations	(0.31)	0.80
Principal market net asset value, end of year	<u>\$ 2.11</u>	<u>\$ 2.42</u>
Total return	<u>-12.81%</u>	<u>49.38%</u>
<i>Ratios to average net assets:</i>		
Net investment loss	-2.50%	-2.50%
Expenses	-2.50%	-2.50%

An individual shareholder's return, ratios, and per Share performance may vary from those presented above based on the timing of Share transactions. The amount shown for a Share outstanding throughout the period may not correlate with the Statement of Operations for the period due to the number of Shares issued in Creations occurring at an operational value derived from an operating metric as defined in the Trust Agreement.

Total return is calculated assuming an initial investment made at the Principal Market NAV at the beginning of the year and assuming redemption on the last day of the year.

**9. Indemnifications**

In the normal course of business, the Trust enters into certain contracts that provide a variety of indemnities, including contracts with the Sponsor and affiliates of the Sponsor, DCG and its officers, directors, employees, subsidiaries and affiliates, and the Custodian as well as others relating to services provided to the Trust. The Trust's maximum exposure under these and its other indemnities is unknown. However, no liabilities have arisen under these indemnities in the past and, while there can be no assurances in this regard, there is no expectation that any will occur in the future. Therefore, the Sponsor does not consider it necessary to record a liability in this regard.

**Grayscale Basic Attention Token Trust (BAT)**  
**Notes to Financial Statements**

**10. Subsequent Events**

On January 1, 2025, Grayscale Investments, LLC (“GSI”) consummated an internal corporate reorganization (the “Reorganization”), pursuant to which Grayscale Investments, LLC, the Sponsor of the Trust prior to the Reorganization, merged with and into Grayscale Operating, LLC (“GSO”), a Delaware limited liability company and a wholly owned indirect subsidiary of DCG, with GSO continuing as the surviving company (the “Merger”). As a result of the Merger, GSO succeeded by operation of law to all the rights, powers, privileges and franchises and became subject to all of the obligations, liabilities, restrictions and disabilities of GSI, including with respect to the Sponsor Contracts (as defined below), all as provided under the Delaware Limited Liability Company Act. The Reorganization is not expected to have any material impact on the operations of the Trust.

In connection with the Reorganization, on January 1, 2025, and promptly following the effectiveness of the Merger, GSO assigned certain contracts pertaining to its role as Sponsor (as such term is defined in the Trust Agreement) of the Trust (such contracts, the “Sponsor Contracts”) to Grayscale Investments Sponsors, LLC, a Delaware limited liability company and a wholly owned direct subsidiary of GSO (“GSIS”), whereby GSIS assumed all of the rights and obligations of GSO under the Sponsor Contracts. Other than the assumption of the Sponsor Contracts by GSIS, the Reorganization does not alter the rights or obligations under any of the Sponsor Contracts.

In connection with the Reorganization, on January 1, 2025, and promptly following the effectiveness of the Merger, GSO and GSIS executed a Certificate of Admission, pursuant to which GSIS was admitted as an additional Sponsor of the Trust under the Trust Agreement, by and among GSO (as successor in interest to GSI), the Trustee, and the shareholders from time to time thereunder, as amended from time to time. GSIS shall be subject to the rights and obligations of a Sponsor under the Trust Agreement.

On January 3, 2025, GSO voluntarily withdrew as a Sponsor of the Trust pursuant to the terms of the Trust Agreement, and, effective May 3, 2025, GSIS shall be the sole remaining Sponsor of the Trust.

As of the close of business on March 14, 2025, the fair value of BAT determined in accordance with the Trust’s accounting policy was \$0.15 per BAT.

Subsequent events have been evaluated through March 19, 2025, the date the financial statements were available to be issued.

## **Exhibit 2**

Amendment No. 1 to the Amended and Restated Declaration of Trust and Trust Agreement of Grayscale Basic Attention Token Trust (BAT), dated March 22, 2024.

**AMENDMENT NO. 1 TO THE  
AMENDED AND RESTATED  
DECLARATION OF TRUST AND  
TRUST AGREEMENT**

This **AMENDMENT NO. 1 (THE “AMENDMENT”) TO THE AMENDED AND RESTATED DECLARATION OF TRUST AND TRUST AGREEMENT** of **GRAYSCALE BASIC ATTENTION TOKEN TRUST (BAT)** is made and entered into as of the 22nd day of March, 2024, by and among **GRAYSCALE INVESTMENTS, LLC**, a Delaware limited liability company, **DELAWARE TRUST COMPANY** (formerly known as CSC Trust Company of Delaware), a Delaware corporation, as trustee, and the **SHAREHOLDERS** from time to time hereunder.

\* \* \*

**RECITALS**

**WHEREAS**, the Sponsor and the Trustee entered into the Amended and Restated Declaration of Trust and Trust Agreement dated as of December 18, 2020, as may be further amended from time to time (the “**Trust Agreement**”);

**WHEREAS**, Section 10.1 of the Trust Agreement provides that the Sponsor and the Trustee may amend the Trust Agreement without the consent of the Shareholders, subject to certain exceptions; and

**WHEREAS**, the Sponsor and the Trustee wish to amend the Trust Agreement pursuant to Section 10.1 thereof, to clarify the rights of Shareholders of the Trust, with such Amendment to be effective immediately as of the date hereof.

**NOW, THEREFORE**, pursuant to Section 10.1 of the Trust Agreement, the Trustee and the Sponsor hereby amend the Trust Agreement as set forth below.

**ARTICLE I**

**AMENDMENTS**

SECTION 1.1 *Amendments.* The Trust Agreement is hereby amended as follows:

(a) Section 1.1 of the Trust Agreement is hereby amended as follows (with ~~strike through~~ representing deletions and **underlining and bold** representing additions):

SECTION 1.1 *Definitions.* As used in this Trust Agreement, the following terms shall have the following meanings unless the context otherwise requires:

“**Business Day**” means any day other than a Saturday, Sunday or other day on which ~~banks~~ **national securities exchanges** are permitted or required to close for business in New York, New York.

(b) Section 13.12 of the Trust Agreement is hereby amended and restated in its entirety to read as follows:

SECTION 13.12     *Integration.* This Trust Agreement and Amendment No. 1 thereto constitute the entire agreement among the parties hereto pertaining to the subject matter hereof and supersede all prior agreements and understandings pertaining thereto.

## ARTICLE II

### MISCELLANEOUS

SECTION 2.1     *Governing Law.* The validity and construction of this Amendment shall be governed by the laws of the State of Delaware, and the rights of all parties hereto and the effect of every provision hereof shall be subject to and construed according to the laws of the State of Delaware without regard to the conflict of laws provisions thereof.

SECTION 2.2     *Provisions In Conflict With Law or Regulations.*

(a) The provisions of this Amendment are severable, and if the Sponsor shall determine, with the advice of counsel, that any one or more of such provisions (the “**Conflicting Provisions**”) are in conflict with the Code, the Delaware Trust Statute, the Securities Act, if applicable, or other applicable U.S. federal or state laws or the rules and regulations of any Secondary Market, the Conflicting Provisions shall be deemed never to have constituted a part of this Amendment, even without any amendment of this Amendment pursuant to this Amendment; *provided, however*, that such determination by the Sponsor shall not affect or impair any of the remaining provisions of this Amendment or the Trust Agreement, or render invalid or improper any action taken or omitted prior to such determination. No Sponsor or Trustee shall be liable for making or failing to make such a determination.

(b) If any provision of this Amendment shall be held invalid or unenforceable in any jurisdiction, such holding shall not in any manner affect or render invalid or unenforceable such provision in any other jurisdiction or any other provision of this Amendment in any jurisdiction.

SECTION 2.3     *Construction.* In this Amendment, unless the context otherwise requires, words used in the singular or in the plural include both the plural and singular and words denoting any gender include all genders. The title and headings of different parts are inserted for convenience and shall not affect the meaning, construction or effect of this Amendment.

SECTION 2.4     *Counterparts; Electronic Signatures.* This Amendment may be executed in one or more counterparts (including those by facsimile or other electronic means), all of which shall constitute one and the same instrument binding on all of the parties hereto, notwithstanding that all parties are not signatory to the original or the same counterpart. This Amendment, to the extent signed and delivered by means of a facsimile machine or other electronic transmission, shall be treated in all manner and respects as an original agreement and shall be considered to have the same binding legal effect as if it were the original signed version thereof delivered in person.

SECTION 2.5            *Defined Terms.* For purposes of this Amendment, any capitalized terms used and not defined herein shall have the same respective meanings as assigned to them in the Trust Agreement.

*[Signature Page Follows]*

**IN WITNESS WHEREOF**, the undersigned have duly executed this Amendment No. 1 to the Amended and Restated Declaration of Trust and Trust Agreement as of the day and year first above written.
