### Item 8.01. Other Events.

On November 8, 2024, Grayscale Investments, LLC, the sponsor (the “Sponsor”) of Grayscale Bitcoin Mini Trust ETF (the “Trust”), issued a press release announcing its intention to effect a reverse share split of the Trust’s shares, at a ratio of 1-for-5 (the “Reverse Share Split”), effective as of 5:00 p.m. Eastern Time on November 19, 2024 (the “Effective Time”). As of the Effective Time, every 5 (five) shares of the Trust’s existing shares will automatically convert into 1 (one) share.

As a result of the Reverse Share Split, a shareholder could hold a fractional share. Any fractional shares that would be created as a result of the Reverse Share Split may either, at the discretion of such shareholder’s Depository Trust Company (“DTC”) participant, (i) be tracked by such DTC participant on its internal ledgers or (ii) be aggregated and sold after determination of the number of fractional shares that would be created as a result of the Reverse Share Split, and shareholders will receive the net cash proceeds of such sale in proportion to the fractional shares sold that would otherwise be held by such shareholder as a result of the Reverse Share Split. Fractional shares cannot trade on NYSE Arca, Inc. (“NYSE Arca”).

Following the Reverse Share Split, on November 20, 2024, the shares will continue to trade on NYSE Arca under the symbol “BTC.” The Reverse Share Split is expected to increase the price per share of the Trust to five times the net asset value of a share prior to the Reverse Share Split, with a proportionate decrease in the number of shares outstanding (excluding fractional shares). The new CUSIP number for the shares following the Reverse Share Split will be 389930 207.

The press release announcing the Reverse Share Split is filed as Exhibit 99.1 and incorporated herein by reference.

**Grayscale Investments® Announces Intention to Effect Reverse Share Splits for  
Grayscale® Bitcoin Mini Trust ETF (Ticker: BTC) and Grayscale® Ethereum Mini Trust  
ETF (Ticker: ETH)**

November 8, 2024 -- Grayscale Investments® (“Grayscale”), an asset management firm with over a decade of expertise in crypto investing, offering more than 25 crypto investment products, today announced its intention to effect reverse share splits of two of its exchange-traded products (“ETPs”), Grayscale® Bitcoin Mini Trust ETF (NYSE Arca: BTC) and Grayscale® Ethereum Mini Trust ETF (NYSE Arca: ETH), with details as follows:

<b>ETP Name</b>	<b>Old CUSIP</b>	<b>New CUSIP</b>	<b>Split Ratio</b>
Grayscale® Bitcoin Mini Trust ETF (NYSE Arca: BTC)	389930 108	389930 207	1:5
Grayscale® Ethereum Mini Trust ETF (NYSE Arca: ETH)	38964R 104	38964R 203	1:10

*Grayscale Bitcoin Mini Trust ETF and Grayscale Ethereum Mini Trust ETF (collectively the “Funds”) are not registered under the Investment Company Act of 1940 (the “1940 Act”) and therefore are not subject to the same regulations and protections as 1940 Act registered ETFs and mutual funds.*

Effective as of 5:00 pm Eastern Time on November 19, 2024, Grayscale will effect a reverse share split for each of BTC and ETH at the above ratios. Following the reverse share splits, on November 20, 2024, the shares of each Fund will continue to trade on NYSE Arca, Inc. (“NYSE Arca”) under the symbols “BTC” and “ETH” respectively. The reverse share splits are expected to increase the price per share of BTC to five times the net asset value of a share, and of ETH to ten times the net asset value of a share, prior to the reverse share splits, with proportionate decreases in the number of shares outstanding (excluding fractional shares). For example, every five pre-split shares of BTC will result in the receipt of one post-split share of BTC, which will be five times higher than the net asset value (“NAV”) per share of a pre-split share.

**Illustration of Reverse Split**

The following table shows the effect of a hypothetical 1:5 reverse split:

<b>Period</b>	<b>Number of Shares Owned</b>	<b>Hypothetical NAV per Share</b>	<b>Value of Shares</b>
Pre-Split	500	\$2	\$1,000
Post-Split	100	\$10	\$1,000

The following table shows the effect of a hypothetical 1:10 reverse split:

<b>Period</b>	<b>Number of Shares Owned</b>	<b>Hypothetical NAV per Share</b>	<b>Value of Shares</b>
Pre-Split	1,000	\$1	\$1,000
Post-Split	100	\$10	\$1,000

### **Fractional Shares**

As a result of the reverse share splits, a shareholder of the Funds' shares could hold fractional shares. Any fractional shares that would be created as a result of the reverse share splits may either, at the discretion of such shareholder's DTC participant, (i) be tracked by such DTC participant on its internal ledgers or (ii) be aggregated and sold after determination of the number of fractional shares that would be created as a result of the reverse share split, and shareholders will receive the net cash proceeds of such sale in proportion to the fractional shares sold that would otherwise be held by such shareholder as a result of such reverse share split. Fractional shares cannot trade on NYSE Arca.
