Approximate date of commencement of proposed sale to the public: As soon as practicable after the effective date of this Registration Statement.

If any of the securities being registered on this form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, check the following box.

If this form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer
Non-accelerated filer

Accelerated filer
Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 7(a)(2)(B) of the Securities Act.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the Registration Statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.

The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and we are not soliciting offers to buy these securities in any state where the offer or sale is not permitted.

SUBJECT TO COMPLETION, DATED JULY 17, 2024

PRELIMINARY PROSPECTUS

GRAYSCALE[®]

GRAYSCALE ETHEREUM MINI TRUST (ETH)

Grayscale Ethereum Mini Trust (ETH) (the “Trust”) is a Delaware statutory trust that issues common units of fractional undivided beneficial interest (“Shares”), which represent ownership in the Trust. The Trust’s purpose is to hold “Ether”, which are digital assets that are created and transmitted through the operations of the peer-to-peer Ethereum Network, a decentralized network of computers that operates on cryptographic protocols. The Trust’s investment objective is for the value of the Shares (based on Ether per Share) to reflect the value of Ether held by the Trust, as determined by reference to the Index Price (as defined herein), less the Trust’s expenses and other liabilities. While an investment in the Shares is not a direct investment in Ether, the Shares are designed to provide investors with a cost-effective and convenient way to gain investment exposure to Ether. Grayscale Investments, LLC is the sponsor of the Trust (the “Sponsor”), Delaware Trust Company is the trustee of the Trust (the “Trustee”), The Bank of New York Mellon is the transfer agent of the Trust (in such capacity, the “Transfer Agent”) and the administrator of the Trust (in such capacity, the “Administrator”), Coinbase, Inc. is the prime broker of the Trust (the “Prime Broker”) and Coinbase Custody Trust Company, LLC is the custodian of the Trust (the “Custodian”).

Prior to this offering, there has been no public market for the Shares. The Trust intends to list the Shares on NYSE Arca, Inc. (“NYSE Arca”) under the symbol “ETH.” The Trust intends to issue Shares on a continuous basis and is registering an indeterminate number of Shares. It is expected that the Shares will be sold to the public at varying prices to be determined by reference to, among other considerations, the price of Ether and the trading price of the Shares on the NYSE Arca at the time of each sale.

The Shares may be purchased from the Trust only in one or more blocks of 10,000 Shares (a block of 10,000 Shares is called a “Basket”). The Trust issues Baskets of Shares to certain authorized participants (“Authorized Participants”) on an ongoing basis as described in “Plan of Distribution.” In addition, the Trust redeems Shares in Baskets on an ongoing basis from Authorized Participants. The Trust is currently able to accept Cash Orders (as defined herein), pursuant to which an Authorized Participant will deposit cash into, or accept cash from, the Cash Account in connection with the creation and redemption of Baskets, and a third party (a “Liquidity Provider”) that is not an agent of, or otherwise acting on behalf of, such Authorized Participant will obtain or receive Ether in exchange for cash in connection with such order. However, and in common with other spot digital asset exchange-traded products, the Trust is not at this time able to create and redeem shares via in-kind transactions with Authorized Participants, and there has yet to be definitive regulatory guidance on whether and how registered broker-dealers can hold and deal in Ether in compliance with the federal securities laws. To the extent further regulatory clarity emerges, the Sponsor expects NYSE Arca to seek the necessary regulatory approval to amend its listing rules to permit the Trust to do so (the “In-Kind Regulatory Approval”). Subject to NYSE Arca seeking and obtaining In-Kind Regulatory Approval, in the future the Trust may also create and redeem Shares via in-kind transactions with Authorized Participants or their designees (any such designee, an “AP Designee”) in exchange for Ether. There can be no assurance as to when such regulatory clarity will emerge, or when NYSE Arca will seek or obtain such regulatory approval, if at all. See “Description of Creation and Redemption of Shares.” Some of the activities of the Authorized Participants will result in their being deemed participants in a distribution in a manner which would render them statutory underwriters and subject them to the prospectus-delivery and liability provisions under the Securities Act of 1933, as amended (the “Securities Act”). See “Plan of Distribution.”

In addition, and in common with other spot Ether exchange-traded products at this time, none of the Trust, the Sponsor, the Custodian, nor any other person associated with the Trust will, directly or indirectly, engage in Staking (as defined herein), meaning no action will be taken pursuant to which any portion of the Trust’s Ether becomes subject to Ethereum proof-of-stake validation or is used to earn additional Ether or generate income or other earnings, and there can be no assurance that the Trust, the Sponsor, the Custodian or any other person associated with the Trust will ever be permitted to engage in such activity in the future.

Investing in the Shares involves significant risks. You should carefully consider the risk factors described in “Risk Factors” starting on page 19 before you invest in the Shares.

The Trust is an “emerging growth company” as defined in the Jumpstart Our Business Startups Act and will therefore be subject to reduced reporting requirements. **Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.**

The Shares are neither interests in nor obligations of the Sponsor or the Trustee.

On May 31, 2024, the Sponsor purchased \$100,000 in Shares (the “Seed Shares”), comprising 10,000 Shares at a per Share price of \$10. The Seed Shares are currently anticipated to be redeemed for cash in connection with, and immediately prior to the consummation of, the Initial Distribution (as defined below).

Prior to the creation of any Baskets through Authorized Participants pursuant to this prospectus, the Sponsor currently intends to effectuate the initial creation of Shares of the Trust (the “Initial Distribution Basket Creation”) through the contribution by Grayscale Ethereum Trust (ETH) (“ETHE”) of a certain amount of Ether to the Trust as consideration and in exchange for newly created Shares of the Trust. The newly created Shares of the Trust will then be distributed to shareholders of ETHE (“ETHE Shareholders”) (as of 4:00 PM ET on July 18, 2024 (the “Record Date”), pro rata based on a 1:1 ratio, such that for each one (1) share of ETHE (“ETHE Shares”) held by each ETHE Shareholder on the Record Date, such ETHE Shareholder will be entitled to receive one (1) Share of the Trust on a subsequent date to be determined by the Sponsor (the “Distribution Date”) (such transactions collectively, the “Initial Distribution”).

As a result of the contemplated Initial Distribution, following the Distribution Date (and prior to the creation of any Baskets through Authorized Participants pursuant to this prospectus), the Trust will hold approximately 10% of the Ether that was held by ETHE as of the Record Date and ETHE would hold the remaining approximately 90% of the Ether that was held by ETHE as of the Record Date (the “ETHE Ether Portion”) (in the case of the ETHE Ether Portion only, reduced by the portion of the Sponsor’s Fee (as defined herein) attributable to such Ether accrued and paid between the Record Date and the Distribution Date). For illustrative purposes only, using the number of ETHE Shares outstanding and amount of Ether held by ETHE as of March 31, 2024 as an estimate, the Sponsor anticipates that approximately 310,158,500 Shares will be distributed to ETHE Shareholders in the aggregate, and that the Trust will hold approximately 294,427.07395424 Ether immediately following the consummation of the Initial Distribution. Such amounts are included for illustrative purposes only, and are subject to change using the actual amounts of Ether held by ETHE and ETHE Shares outstanding as of the Record Date. See “Unaudited Pro Forma Financial Statements” for more information. Prior to the creation of any Baskets through Authorized Participants pursuant to this prospectus, such Shares will represent all of the outstanding Shares of the Trust.

Neither the number of outstanding ETHE Shares nor the exposure of ETHE Shareholders to Ether underlying their aggregate shareholdings (including ETHE Shares and Shares of the Trust) are expected to change as a result of the contemplated Initial Distribution. No consent, authorization, approval or proxy is being sought from ETHE Shareholders in connection with the Initial Distribution, and ETHE Shareholders will not need to pay any consideration, exchange or surrender existing ETHE Shares or take any other action to receive Shares of the Trust on the Distribution Date. Following the Initial Distribution, the Trust and ETHE will operate as independent NYSE Arca listed exchange-traded commodity products, and neither will have any share ownership, beneficial or otherwise, in the other.

The Sponsor does not expect the Initial Distribution to be a taxable event for ETHE or its shareholders.

The U.S. dollar value of a Basket of Shares at 4:00 p.m., New York time, on the trade date of a creation or redemption order is equal to the “Basket Amount”, which is the number of Ether required to create or redeem a Basket of Shares, multiplied by the “Index Price,” which is the U.S. dollar value of an Ether derived from the Digital Asset Trading Platforms (as defined herein) that are reflected in the CoinDesk Ether Price Index (ETX) (the “Index”), calculated at 4:00 p.m., New York time, on each business day. The Index Price is calculated using non-GAAP methodology and is not used in the Trust’s financial statements.

The Trust is not a registered investment company under the Investment Company Act of 1940, as amended (the “Investment Company Act”) and is therefore not subject to regulation under the Investment Company Act. Furthermore, the Sponsor believes that the Trust is not a commodity pool for purposes of the Commodity Exchange Act of 1936, as amended (the “CEA”), as administered by the Commodity Futures Trading Commission (the “CFTC”) and that neither the Sponsor nor the Trustee is subject to regulation by the CFTC as a commodity pool operator or a commodity trading advisor. See “Risk Factors—Risk Factors Related to the Trust and the Shares—Shareholders do not have the protections associated with ownership of shares in an investment company registered under the Investment Company Act or the protections afforded by the CEA.”

The date of this prospectus is _____, 2024.

Neither the Trust nor the Sponsor has authorized anyone to provide you with any information other than that contained in this prospectus or any free writing prospectus prepared by or on behalf of the Trust. Neither the Trust nor the Sponsor takes any responsibility for, and can provide no assurance as to the reliability of, any information that others may give you. Neither the Trust nor the Sponsor is making an offer to sell any security or soliciting any offer to buy any security in any jurisdiction where the offer or sale is not permitted. You should not assume that the information appearing in this prospectus or any free writing prospectus is accurate as of any date other than the respective dates on the front of such documents. The Trust’s business, assets, financial condition, results of operations and prospects may have changed since those dates.

This prospectus does not constitute an offer to sell, or an invitation on behalf of the Trust or the Sponsor, to subscribe to or purchase any securities, and may not be used for or in connection with an offer or solicitation by anyone, in any jurisdiction in which such an offer or solicitation is not authorized or to any person to whom it is unlawful to make such an offer or solicitation.

Authorized Participants may be required to deliver a prospectus when making transactions in the Shares.

The information contained in the section captioned “Business—Overview of the Ethereum Industry and Market” is based on information obtained from sources that the Sponsor believes are reliable. This prospectus summarizes certain documents and other information in a manner the Sponsor believes to be accurate. In making an investment decision, you must rely on your own examination of the Trust, the Ethereum industry, the operation of the Ethereum market and the terms of the offering and the Shares, including the merits and risks involved. Although the Sponsor believes this information to be reliable, the accuracy and completeness of this information is not guaranteed and has not been independently verified.

See “Glossary of Defined Terms” for the definition of certain capitalized terms used in this prospectus.

FORWARD-LOOKING STATEMENTS

This prospectus contains “forward-looking statements” with respect to the Trust’s financial conditions, results of operations, plans, objectives, future performance and business. Statements preceded by, followed by or that include words such as “may,” “might,” “will,” “should,” “expect,” “plan,” “anticipate,” “believe,” “estimate,” “predict,” “potential” or “continue,” the negative of these terms and other similar expressions are intended to identify some of the forward-looking statements. All statements (other than statements of historical fact) included in this prospectus that address activities, events or developments that will or may occur in the future, including such matters as changes in market prices and conditions, the Trust’s operations, the Sponsor’s plans and references to the Trust’s future success and other similar matters are forward-looking statements. These statements are only predictions. Actual events or results may differ materially from such statements. These statements are based upon certain assumptions and analyses the Sponsor made based on its perception of historical trends, current conditions and expected future developments, as well as other factors appropriate in the circumstances. You should specifically consider the numerous risks described in “Risk Factors” in this prospectus. Whether or not actual results and developments will conform to the Sponsor’s expectations and predictions, however, is subject to a number of risks and uncertainties, including:

- recent developments in the digital asset economy which have led to extreme volatility and disruption in digital asset markets, a loss of confidence in participants of the digital asset ecosystem, significant negative publicity surrounding digital assets broadly and market-wide declines in liquidity;
- the extreme volatility of trading prices that many digital assets, including Ether, have experienced in recent periods and may continue to experience, which could cause the value of the Shares to be volatile and/or have a material adverse effect on the value of the Shares;
- the recentness of the development of digital assets and the uncertain medium-to-long term value of the Shares due to a number of factors relating to the capabilities and development of blockchain technologies and to the fundamental investment characteristics of digital assets;
- the value of the Shares depending on the acceptance of digital assets, such as Ether, which represent a new and rapidly evolving industry;
- the value of the Shares relating directly to the value of Ether then held by the Trust, the value of which may be highly volatile and subject to fluctuations due to a number of factors;
- the risk that validators may suffer losses due to Staking (as defined herein), or Staking may prove unattractive to validators, which could adversely affect the Ethereum Network;
- a temporary or permanent “fork” or a “clone”, which could adversely affect the value of the Shares;
- the largely unregulated nature and lack of transparency surrounding the operations of Digital Asset Trading Platforms, which may adversely affect the value of digital assets and, consequently, the value of the Shares;
- the limited history of the Index;
- the lack of active trading markets for the Shares, which may result in losses on investors’ investments at the time of disposition of Shares;
- the possibility that illiquid markets may exacerbate losses or increase the variability between the Trust’s NAV and its market price;
- the possibility that there may be less liquidity or wider spreads in the market for the Shares as compared to the shares of other spot Ether exchange-traded products, such as the ETHE Shares;
- competition from the emergence or growth of other digital assets or methods of investing in Ether could have a negative impact on the price of Ether and adversely affect the value of the Shares;
- the liquidity of the Shares may be affected if Authorized Participants cease to perform their obligations under the Participant Agreements or the Liquidity Engager is unable to engage Liquidity Providers;

- the possibility that the Shares may trade at a price that is at, above or below the Trust’s NAV per Share as a result of the non-current trading hours between NYSE Arca and the Digital Asset Trading Platform Market;
- regulatory changes or actions by the U.S. Congress or any U.S. federal or state agencies that may affect the value of the Shares or restrict the use of one or more digital assets, validating activity or the operation of their networks or the Digital Asset Trading Platform Market in a manner that adversely affects the value of the Shares;
- a determination that Ether or any other digital asset is a “security” may adversely affect the value of Ether and the value of the Shares and result in potentially extraordinary, nonrecurring expenses to, or termination of, the Trust;
- changes in the policies of the U.S. Securities and Exchange Commission (the “SEC”) that could adversely impact the value of the Shares;
- regulatory changes or other events in foreign jurisdictions that may affect the value of the Shares or restrict the use of one or more digital assets, validating activity or the operation of their networks or the Digital Asset Trading Platform Market in a manner that adversely affects the value of the Shares;
- the possibility that an Authorized Participant, the Trust or the Sponsor could be subject to regulation as a money service business or money transmitter, which could result in extraordinary expenses to such Authorized Participant, the Trust or the Sponsor and also result in decreased liquidity for the Shares;
- regulatory changes or interpretations that could obligate the Trust or the Sponsor to register and comply with new regulations, resulting in potentially extraordinary, nonrecurring expenses to the Trust;
- potential conflicts of interest that may arise among the Sponsor or its affiliates and the Trust;
- the potential discontinuance of the Sponsor’s continued services, which could be detrimental to the Trust;
- the lack of ability to facilitate in-kind creations and redemptions of Shares, which could have adverse consequences for the Trust;
- the lack of ability to participate in Staking (as defined herein), which could have adverse consequences for the Trust;
- the Trust’s reliance on third-party service providers to perform certain functions essential to the affairs of the Trust and the challenges replacement of such service providers could pose to the safekeeping of the Trust’s Ether and to the operations of the Trust; and
- the Custodian’s possible resignation or removal by the Sponsor or otherwise, without replacement, which could trigger early termination of the Trust.

Consequently, all forward-looking statements made in this prospectus are qualified by these cautionary statements, and there can be no assurance that the actual results or developments the Sponsor anticipates will be realized or, even if substantially realized, that they will result in the expected consequences to, or have the expected effects on, the Trust’s operations or the value of the Shares. Should one or more of these risks discussed in “Risk Factors” in this prospectus, or other uncertainties materialize, or should underlying assumptions prove incorrect, actual outcomes may vary materially from those described in forward-looking statements. Forward-looking statements are made based on the Sponsor’s beliefs, estimates and opinions on the date the statements are made and neither the Trust nor the Sponsor is under a duty or undertakes an obligation to update forward-looking statements if these beliefs, estimates and opinions or other circumstances should change, other than as required by applicable laws. Moreover, neither the Trust, the Sponsor, nor any other person assumes responsibility for the accuracy and completeness of any of these forward-looking statements. Investors are therefore cautioned against relying on forward-looking statements.

PROSPECTUS SUMMARY

This summary highlights information contained elsewhere in this prospectus. This summary may not contain all of the information that you should consider before deciding to invest in the Shares. You should read this entire prospectus carefully, including the “Risk Factors” section and the consolidated financial statements and the notes to those statements, before making an investment decision about the Shares.

Grayscale Ethereum Mini Trust (ETH)

Trust Overview

Grayscale Ethereum Mini Trust (ETH) (the “Trust”) is a Delaware Statutory Trust that was formed on April 23, 2024, by the filing of the Certificate of Trust with the Delaware Secretary of State in accordance with the provisions of the Delaware Statutory Trust Act (“DSTA”). The Trust’s purpose is to hold “Ether”, which are digital assets that are created and transmitted through the operations of the peer-to-peer Ethereum Network, a decentralized network of computers that operates on cryptographic protocols. There are several key features of the Ethereum Network. Ether has an unlimited supply and a circulating supply of approximately 120 million coins as of June 30, 2024. As of June 30, 2024, the 24-hour trading volume of Ether was approximately \$3.0 billion. As of June 30, 2024, the aggregate market value of Ether was \$413 billion. As of June 30, 2024, Ether was the second largest digital asset by market capitalization, as tracked by CoinMarketCap.com.

As a passive investment vehicle, the Trust’s investment objective is for the value of the Shares (based on Ether per Share) to reflect the value of Ether held by the Trust, determined by reference to the Index Price, less the Trust’s expenses and other liabilities. The Trust does not seek to generate returns beyond tracking the price of Ether. There can be no assurance that the Trust will be able to achieve its investment objective. The Trust will not utilize leverage, derivatives or any similar arrangements in seeking to meet its investment objective.

From and after the date of this prospectus, the Trust intends to issue Shares on an ongoing basis pursuant to this registration statement, intends to rely on an exemption or other relief from the SEC under Regulation M to operate a redemption program, and intends to list the Shares on NYSE Arca under the symbol “ETH.” The Shares will be distributed by Authorized Participants who will be able to take advantage of arbitrage opportunities to keep the value of the Shares closely linked to the Index Price (referred to as the “arbitrage mechanism”). In particular, upon listing on NYSE Arca, the Sponsor expects there to be a net creation of Shares if the Shares trade at a premium to NAV per Share and a net redemption of Shares if the Shares trade at a discount to NAV per Share, representing the effective functioning of the arbitrage mechanism.

Thereafter, it is expected that the Shares will be sold by the Authorized Participants to the public at varying prices to be determined by reference to, among other considerations, the price of the Ether represented by each Share and the trading price of the Shares on NYSE Arca at the time of each sale.

Grayscale Investments, LLC is the sponsor (the “Sponsor”) of the Trust, CSC Delaware Trust Company is the trustee (the “Trustee”) of the Trust, The Bank of New York Mellon is the transfer agent (in such capacity, the “Transfer Agent”) and the administrator (in such capacity, the “Administrator”) of the Trust, Coinbase, Inc. is the prime broker (the “Prime Broker”) of the Trust and Coinbase Custody Trust Company, LLC is the custodian (the “Custodian”) of the Trust.

The Trust issues Shares only in one or more blocks of 10,000 Shares (a block of 10,000 Shares is called a “Basket”) to certain authorized participants (“Authorized Participants”) from time to time. Baskets are offered in exchange for Ether. Through its redemption program, the Trust will redeem Shares from Authorized Participants on an ongoing basis.

The U.S. dollar value of a Basket of Shares at 4:00 p.m., New York time, on the trade date of a creation or redemption order is equal to the Basket Amount, which is the number of Ether required to create or redeem a Basket of Shares, multiplied by the “Index Price,” which is the U.S. dollar value of an Ether derived from the Digital Asset Trading Platforms that are reflected in the CoinDesk Ether Price Index (ETX) (the “Index”) at 4:00 p.m., New York time, on each business day. The Index Price is calculated using non-GAAP methodology and is not used in the Trust’s financial statements. See “Overview of the Ethereum Industry and Market—The Index and the Index Price.”

The Basket Amount on any trade date is determined by dividing (x) the number of Ether owned by the Trust at 4:00 p.m., New York time, on such trade date, after deducting the number of Ether representing the U.S. dollar value of accrued but unpaid fees and expenses of the Trust (converted using the Index Price at such time, and carried to the eighth decimal place), by (y) the number of Shares outstanding at such time (with the quotient so obtained calculated to one one-hundred-millionth of one Ether (i.e., carried to the eighth decimal place)), and multiplying such quotient by 10,000.

The Trust creates Baskets of Shares only upon receipt of Ether and will redeem Shares only by distributing Ether or proceeds from the disposition of Ether. At this time, Authorized Participants may only submit orders to create or redeem Shares through transactions that are referred to as “Cash Orders” in this prospectus. Cash Orders are made through the participation of a Liquidity Provider (as defined herein) and facilitated by the Transfer Agent, as described in “Description of Creation and Redemption of Shares.” Authorized Participants must pay a Variable Fee (as defined herein) in connection with certain Cash Orders.

Subject to In-Kind Regulatory Approval, in the future Authorized Participants would also be able to submit orders to create or redeem shares through “In-Kind Orders.” In connection with In-Kind Orders, Authorized Participants, or their AP Designees, would deposit Ether directly with the Trust or receive Ether directly from the Trust. However, because In-Kind Regulatory Approval has not been obtained, at this time Shares will not be created or redeemed through In-Kind Orders. Furthermore, there is regulatory uncertainty regarding whether registered broker-dealers can hold and deal in Ether in compliance with the applicable requirements of the federal securities laws, including financial responsibility rules. Even if In-Kind Regulatory Approval were sought and obtained, there can be no assurance that in-kind creations or redemptions of the Shares will be available in the future. To the extent in-kind creations and redemptions of Shares continue to be unavailable for any reason, this could have adverse consequences for the Trust. See “Risk Factors—Risk Factors Related to the Trust and the Shares—The lack of ability to facilitate in-kind creations and redemptions of Shares could have adverse consequences for the Trust.”

The Shares are neither interests in nor obligations of the Sponsor or the Trustee. As provided under the Trust Agreement, the Trust’s assets will not be loaned or pledged, or serve as collateral for any loan, margin, rehypothecation, or other similar activity to which the Sponsor, the Trust or any of their respective affiliates are a party.

Some of the notable features of the Trust and its Shares include the holding of Ether in the Trust’s own accounts, the experience of the Sponsor’s management team in the Ethereum industry and the use of the Custodian to protect the Trust’s private keys. See “Business—Activities of the Trust.”

The Sponsor maintains an Internet website at www.etfs.grayscale.com/eth, through which the Trust’s annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), will be made available free of charge after they have been filed with or furnished to the Securities and Exchange Commission (the “SEC”) in each case following the effective date of the registration statement of which this prospectus forms a part. Additional information regarding the Trust may also be found on the SEC’s EDGAR database at www.sec.gov.

The contents of the websites referred to above and any websites referred to herein are not incorporated into this filing. Further, our references to the URLs for these websites are intended to be inactive textual references only.

Trust Objective and Determination of Principal Market NAV and NAV

The Trust's investment objective is for the value of the Shares (based on Ether per Share) to reflect the value of Ether held by the Trust, determined by reference to the Index Price, less the Trust's expenses and other liabilities. There can be no assurance that the Trust will be able to achieve its investment objective.

While an investment in the Shares is not a direct investment in Ether, the Shares are designed to provide investors with a cost-effective and convenient way to gain investment exposure to Ether. A substantial direct investment in Ether may require expensive and sometimes complicated arrangements in connection with the acquisition, security and safekeeping of the Ether and may involve the payment of substantial fees to acquire such Ether from third-party facilitators through cash payments of U.S. dollars. Because the value of the Shares is designed to be correlated with the value of Ether held by the Trust, it is important to understand the investment attributes of, and the market for, Ether.

The Trust's Ether are carried, for financial statement purposes, at fair value as required by U.S. generally accepted accounting principles ("GAAP"). The Trust determines the fair value of Ether based on the price provided by the Digital Asset Market (defined below) that the Trust considers its principal market as of 4:00 p.m., New York time, on the valuation date. The net asset value of the Trust determined on a GAAP basis is referred to in this prospectus as "Principal Market NAV." "Digital Asset Market" means a "Brokered Market," "Dealer Market," "Principal-to-Principal Market" or "Exchange Market," as each such term is defined in the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Master Glossary. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies and Estimates—Principal Market and Fair Value Determination" in this prospectus for more information on the Trust's principal market selection.

The Trust uses the Index Price to calculate its "NAV," which is the aggregate value, expressed in U.S. dollars, of the Trust's assets (other than U.S. dollars or other fiat currency), less the U.S. dollar value of the Trust's expenses and other liabilities calculated in the manner set forth under "Business —Valuation of Ether and Determination of NAV." "NAV per Share" is calculated by dividing NAV by the number of Shares then outstanding.

NAV and NAV per Share are not measures calculated in accordance with GAAP. NAV is not intended to be a substitute for the Trust's Principal Market NAV calculated in accordance with GAAP, and NAV per Share is not intended to be a substitute for the Trust's Principal Market NAV per Share calculated in accordance with GAAP.

Ethereum History

The Ethereum Network is a recent technological innovation, and the Ether that are created, transferred, used and stored by entities and individuals have certain features associated with several types of assets, most notably commodities and currencies.

The price of Ether on public Digital Asset Trading Platforms (as defined herein) has a limited history, and during this history, Ether prices on the Digital Asset Markets more generally, and on Digital Asset Trading Platforms individually, have been volatile and subject to influence by many factors, including operational interruptions. While the Index is designed to limit exposure to the interruption of individual Digital Asset

Trading Platforms, the Index Price, and the price of Ether generally, remains subject to volatility experienced by Digital Asset Trading Platforms, and such volatility could adversely affect the value of the Shares. For example, from July 1, 2019 through June 30, 2024, the index price utilized by Grayscale Ethereum Trust (ETH) (the “ETHE Index Price”), which uses a methodology identical to the Index Price, ranged from \$109.83 to \$4,776.32, with the straight average being \$1,703.32. In addition, during the twelve months ended June 30, 2024, the ETHE Index Price ranged from \$1,531.25 to \$4,033.10. See “Business—Overview of the Ethereum Industry and Market—Historical Ether Prices.”

Several U.S. regulators, including the Financial Crimes Enforcement Network of the U.S. Department of the Treasury (“FinCEN”), the Commodity Futures Trading Commission (“CFTC”), the U.S. Internal Revenue Service (“IRS”), and state regulators, including the New York Department of Financial Services (“NYDFS”), have made official pronouncements or issued guidance or rules regarding the treatment of Ether and other digital assets. However, other U.S. and state agencies, such as the SEC, have not made official pronouncements or issued guidance or rules regarding the treatment of Ether, although the SEC, by action through delegated authority approving exchange rule filings to list shares of trusts holding Ether as commodity-based exchange-traded products, has implicitly taken the view that Ether is a commodity. Similarly, the treatment of Ether and other digital assets is often uncertain or contradictory in other countries. The regulatory uncertainty surrounding the treatment of Ether creates risks for the Trust and its Shares. See “Risk Factors—Risk Factors Related to the Regulation of Digital Assets, the Trust and the Shares.”

Staking

Staking on the Ethereum Network refers to using Ether, or permitting Ether to be used, directly or indirectly, through an agent or otherwise, in the Ethereum Network’s proof-of-stake validation protocol, in exchange for the receipt of consideration, including, but not limited to, staking rewards paid in fiat currency or paid in kind (collectively, “Staking”). At this time, none of the Trust, the Sponsor, the Custodian, nor any other person associated with the Trust may, directly or indirectly, engage in Staking of the Trust’s Ether on behalf of the Trust, meaning no action will be taken pursuant to which any portion of the Trust’s Ether becomes used in Ethereum proof-of-stake validation or is used to earn additional Ether or generate income or other earnings, and there can be no assurance that the Trust, the Sponsor, the Custodian or any other person associated with the Trust will ever be permitted to engage in Staking of the Trust’s Ether or such income generating activity in the future.

To the extent (i) the Trust were to amend its Trust Agreement to permit Staking of the Trust’s Ether and (ii) NYSE Arca were to seek and obtain a rule change permitting the listing of a spot Ether investment vehicle engaged in Staking, in the future the Trust may seek to establish a program to use its Ether in the proof-of-stake validation mechanism of the Ethereum Network to receive rewards comprising additional Ether in respect of a portion of its Ether holdings. However, as long as such conditions and requirements have not been satisfied, the Trust will not use its Ether in the proof-of-stake validation mechanism of the Ethereum Network to receive rewards comprising additional Ether in respect of its Ether holdings. The current inability of the Trust to use its Ether in Staking and receive such rewards could place the Shares at a comparative disadvantage relative to an investment in Ether directly or through a vehicle that is not subject to such a prohibition, which could negatively affect the value of the Shares. See “Risk Factors—Risk Factors Related to the Trust and the Shares—The Trust is not permitted to engage in Staking, which could negatively affect the value of the Shares.”

Summary Risk Factors

Before you invest in the Shares, you should carefully consider all the information in this prospectus, including matters set forth under the heading “Risk Factors.” Some of the more significant challenges and risks relating to an investment in the Shares include those associated with the following:

- Extreme volatility of trading prices that many digital assets, including Ether, have experienced in recent periods and may continue to experience, could have a material adverse effect on the value of the Shares and the Shares could lose all or substantially all of their value;
- The medium-to-long term value of the Shares is subject to a number of factors relating to the capabilities and development of blockchain technologies and to the fundamental investment characteristics of digital assets;
- The value of the Shares is dependent on the acceptance of digital assets, such as Ether, which represent a new and rapidly evolving industry;
- Digital assets may have concentrated ownership and large sales or distributions by holders of such digital assets could have an adverse effect on the market price of such digital assets;
- Recent developments in the digital asset economy have led to extreme volatility and disruption in digital asset markets, a loss of confidence in participants of the digital asset ecosystem, significant negative publicity surrounding digital assets broadly and market-wide declines in liquidity;
- The largely unregulated nature and lack of transparency surrounding the operations of Digital Asset Trading Platforms may adversely affect the value of digital assets and, consequently, the value of the Shares;
- The value of the Shares relates directly to the value of Ether held by the Trust, the value of which may be highly volatile and subject to fluctuations;
- The Shares may trade at a price that is at, above or below the Trust’s NAV per Share as a result of the non-current trading hours between NYSE Arca and the Digital Asset Trading Platform Market;
- Shareholders may suffer a loss on their investment if the Shares trade above or below the Trust’s NAV per Share;
- Validators may suffer losses due to Staking, or Staking may prove unattractive to validators, which could adversely affect the Ethereum Network;
- A temporary or permanent “fork” or a “clone” could adversely affect the value of the Shares;
- The lack of active trading markets for the Shares may result in losses on investors’ investments at the time of disposition of Shares;
- Possible illiquid markets may exacerbate losses or increase the variability between the Trust’s NAV and its market price;
- The possibility that there may be less liquidity or wider spreads in the market for the Shares as compared to the shares of other spot Ether exchange-traded products, such as the ETHE Shares;
- The limited history of the Index;
- Competition from the emergence or growth of other digital assets or methods of investing in Ether could have a negative impact on the price of Ether and adversely affect the value of the Shares;
- The liquidity of the Shares may be affected if Authorized Participants cease to perform their obligations under the Participant Agreements or the Liquidity Engager is unable to engage Liquidity Providers;

- Any suspension or other unavailability of the Trust’s redemption program may cause the Shares to trade at a discount to the NAV per Share;
- The lack of ability to participate in Staking could have adverse consequences for the Trust;
- A determination that Ether or any other digital asset is a “security” may adversely affect the value of Ether and the value of the Shares, and result in potentially extraordinary, nonrecurring expenses to, or termination of, the Trust;
- Regulatory changes or actions by the U.S. Congress or any U.S. federal or state agencies may affect the value of the Shares or restrict the use of Ether, validating activity or the operation of the Ethereum Network or the Digital Asset Markets in a manner that adversely affects the value of the Shares;
- Changes in the policies of the U.S. Securities and Exchange Commission (the “SEC”) could adversely impact the value of the Shares;
- Regulatory changes or other events in foreign jurisdictions may affect the value of the Shares or restrict the use of one or more digital assets, validating activity or the operation of their networks or the Digital Asset Trading Platform Market in a manner that adversely affects the value of the Shares;
- An Authorized Participant, the Trust or the Sponsor could be subject to regulation as a money service business or money transmitter, which could result in extraordinary expenses to the Authorized Participant, the Trust or the Sponsor and also result in decreased liquidity for the Shares;
- Regulatory changes or interpretations could obligate the Trust or the Sponsor to register and comply with new regulations, resulting in potentially extraordinary, nonrecurring expenses to the Trust;
- Conflicts of interest may arise among the Sponsor or its affiliates and the Trust;
- The Sponsor’s services may be discontinued, which could be detrimental to the Trust;
- The lack of ability to facilitate in-kind creations and redemptions of Shares could have adverse consequences for the Trust;
- If the Custodian resigns or is removed by the Sponsor, or otherwise, without replacement, it could trigger early termination of the Trust;
- The Trust relies on third-party service providers to perform certain functions essential to the affairs of the Trust and the replacement of such service providers could pose a challenge to the safekeeping of the Trust’s Ether and to the operations of the Trust; and
- There is no guarantee that an active trading market for the Shares will develop.

Emerging Growth Company Status

The Trust is an “emerging growth company” as defined in the Jumpstart Our Business Startups Act (the “JOBS Act”). For as long as the Trust is an emerging growth company, unlike other public companies that are not emerging growth companies under the JOBS Act, it will not be required to:

- provide an auditor’s attestation report on management’s assessment of the effectiveness of our system of internal control over financial reporting pursuant to Section 404(b) of the Sarbanes-Oxley Act;
- provide more than two years of audited financial statements and related management’s discussion and analysis of financial condition and results of operations;
- comply with any new requirements that may be adopted by the Public Company Accounting Oversight Board (the “PCAOB”) requiring mandatory audit firm rotation or a supplement to the auditor’s report in which the auditor would be required to provide additional information about the audit and the financial statements of the issuer;

- provide certain disclosure regarding executive compensation required of larger public companies; or
- obtain shareholder approval of any golden parachute payments not previously approved.

The Trust will cease to be an emerging growth company upon the earliest of:

- the last day of the fiscal year in which the Trust has \$1.235 billion or more in annual revenues;
- the date on which the Trust becomes a “large accelerated filer” under Rule 12b-2 promulgated under the Exchange Act;
- the date on which the Trust issues more than \$1.0 billion of non-convertible debt over a three-year period; or
- the last day of the fiscal year following the fifth anniversary of the Trust’s initial public offering.

In addition, Section 107 of the JOBS Act provides that an emerging growth company can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act for complying with new or revised accounting standards. The Trust intends to take advantage of these reporting exemptions until it is no longer an emerging growth company. The Trust’s election to use the phase-in periods permitted by this election may make it difficult to compare its financial statements to those of non-emerging growth companies and other emerging growth companies that have opted out of the longer phase-in periods under Section 107 of the JOBS Act and who will comply with new or revised financial accounting standards. If the Trust were to subsequently elect instead to comply with these public company effective dates, such election would be irrevocable pursuant to Section 107 of the JOBS Act.

Corporate Information

The offices of the Trust and the Sponsor are located at 290 Harbor Drive, 4th Floor, Stamford, Connecticut 06902 and the Trust’s telephone number is (212) 668-1427. The Trustee has a trust office at 2711 Centerville Road, Wilmington, Delaware 19808. The Prime Broker’s and the Custodian’s office is located at 548 Market Street, #23008, San Francisco, CA 94104. The Transfer Agent’s office is located at 240 Greenwich Street, New York, NY 10286. Our Internet site is www.etfs.grayscale.com/eth. Our website and the information contained therein or connected thereto is not incorporated into this prospectus or the registration statement of which it forms a part.

THE OFFERING

Shares Offered by the Trust Shares representing units of fractional undivided beneficial interest in, and ownership of, the Trust.

Use of Proceeds Proceeds received by the Trust from the issuance and sale of Baskets will consist of Ether deposited with the Trust in connection with the Initial Distribution and future creations. Such Ether will only be (i) owned by the Trust, (ii) transferred (or converted to U.S. dollars, if necessary) to pay the Trust's expenses, (iii) distributed or otherwise disposed of in connection with the redemption of Baskets or (iv) liquidated in the event that the Trust terminates or as otherwise required by law or regulation.

Proposed NYSE Arca symbol ETH

CUSIP 38964R104

Index Price The Index Price is the price of an Ether at 4:00 p.m., New York time, calculated based on the price and trading volume data of the Digital Asset Trading Platforms included in the Index over the preceding 24-hour period. The Index Price is calculated using non-GAAP methodology and is not used in the Trust's financial statements.

The Index is a U.S. dollar-denominated composite reference rate for the price of Ether. The Index is designed to (1) mitigate the effects of fraud, manipulation and other anomalous trading activity from impacting the Ether reference rate, (2) provide a real-time, volume-weighted fair value of Ether and (3) appropriately handle and adjust for non-market related events. The Index Provider formally re-evaluates the weighting algorithm quarterly, but maintains discretion to change the way in which an Index Price is calculated based on its periodic review or in extreme circumstances. The exact methodology to calculate the Index Price is not publicly available. Still, the Index is designed to limit exposure to trading or price distortion of any individual Digital Asset Trading Platform that experiences periods of unusual activity or limited liquidity by discounting, in real-time, anomalous price movements at individual Digital Asset Trading Platforms. The Digital Asset Trading Platforms that are included in the Index are selected by the Index Provider utilizing a methodology that is guided by the International Organization of Securities Commissions ("IOSCO") principles for financial benchmarks. For an exchange to become a Constituent Trading Platform (as defined herein), it must satisfy the Inclusion Criteria described in this prospectus, as may be updated by the Index Provider from time to time. See "Risk Factors—Risk Factors Related to the Digital Asset Markets—The Index Price used to calculate the value of the Trust's Ether may be volatile, and purchasing and selling activity in the Digital Asset Markets associated with Basket creations and redemptions may affect the Index Price and Share trading prices, adversely affecting the value of the Shares."

Index price data and the description of the Index are based on information publicly available at the Index Provider's website at

www.coindesk.com/indices/. None of the information on the Index Provider's website is incorporated by reference into this prospectus.

The Index Provider may change the trading venues that are used to calculate the Index Price or otherwise change the way in which the Index Price is calculated at any time. If the Index Price becomes unavailable, or if the Sponsor determines in good faith that the Index Price does not reflect an accurate Ether price, then the Sponsor will, on a best efforts basis, contact the Index Provider to obtain the Index Price directly from the Index Provider. If after such contact the Index Price remains unavailable or the Sponsor continues to believe in good faith that the Index Price does not reflect an accurate Ether price, then the Sponsor will employ a cascading set of rules to determine the Index Price, as described in "Business—Overview of the Ethereum Industry and Market—The Index and the Index Price."

The Sponsor may, in its sole discretion, select a different Index Provider, select a different index price provided by the Index Provider, calculate the Index Price using a cascading set of rules as described above, or change such cascading set of rules at any time. The Sponsor will provide notice of any such changes in the Trust's periodic or current reports and, if the Sponsor makes such a change other than on an ad hoc or temporary basis, will file a proposed rule change with the SEC.

Digital Asset Trading Platform Public Market Data

On each online Digital Asset Trading Platform, Ether is traded with publicly disclosed valuations for each executed trade, measured by one or more fiat currencies such as the U.S. dollar or Euro. Over-the-counter dealers or market makers do not typically disclose their trade data.

The Digital Asset Trading Platforms initially expected to be included in the Index are Coinbase, Crypto.com, Kraken and LMAX Digital. As further described below, the Sponsor and the Trust reasonably believe each of these Digital Asset Trading Platforms are in material compliance with applicable U.S. federal and state licensing requirements and maintain practices and policies designed to comply with know-your-customer ("KYC") and anti-money-laundering ("AML") regulations.

Coinbase: A U.S.-based exchange registered as a money services business ("MSB") with the Financial Crimes Enforcement Network ("FinCEN") and licensed as a virtual currency business under the New York State Department of Financial Services ("NYDFS") BitLicense as well as a money transmitter in various U.S. states.

Crypto.com: A Singapore-based exchange registered as an MSB with FinCEN and licensed as a money transmitter in various U.S. states. Crypto.com does not hold a BitLicense.

Kraken: A U.S.-based exchange registered as an MSB with FinCEN and licensed as a money transmitter in various U.S. states. Kraken does not hold a BitLicense.

LMAX Digital: A U.K.-based exchange registered as a broker with the Financial Conduct Authority (“FCA”). LMAX Digital does not hold a BitLicense.

Currently, there are several Digital Asset Trading Platforms operating worldwide, and online Digital Asset Trading Platforms represent a substantial percentage of Ether buying and selling activity and provide the most data with respect to prevailing valuations of Ether. These exchanges include established exchanges such as the Digital Asset Trading Platforms initially expected to be included in the Index, which provide a number of options for buying and selling Ether. The below table reflects the trading volume in Ether and market share of the ETH-U.S. dollar trading pairs of each of the Digital Asset Trading Platforms initially expected to be included in the Index (collectively, “Constituent Trading Platforms”), using data reported by the Index Provider from May 1, 2015 to June 30, 2024:

Digital Asset Trading Platforms expected to be included in the Index	Volume (Ether)	Market Share⁽¹⁾
Coinbase	434,986,200	34.86%
Kraken	138,579,315	11.11%
LMAX Digital	73,620,833	5.90%
Crypto.com	34,980,599	2.80%
Total Ether-U.S. Dollar trading pair . . .	<u>682,116,947</u>	<u>54.67%</u>

(1) Market share is calculated using trading volume data (in Ether) for certain Digital Asset Trading Platforms, including Coinbase, Crypto.com, Kraken, and LMAX Digital, as well as certain other large U.S.-dollar denominated Digital Asset Trading Platforms that are not initially expected to be included in the Index, including Binance.US (data included from April 1, 2020), Bitfinex, Bitflyer (data included from December 24, 2018), Bittrex (data included from July 31, 2018 to December 3, 2023), Cboe Digital (data included from October 1, 2020), FTX.US (data included from April 1, 2022 to November 12, 2022), Gemini (data included from October 7, 2015), itBit, LakeBTC (data included from May 1, 2015 to June 1, 2018 and from January 27, 2019 to May 6, 2021), HitBTC (data included from April 1, 2019 to March 31, 2020) and OKCoin (data included through December 31, 2022). Information regarding each Digital Asset Trading Platform may be found on the websites for such Digital Asset Trading Platforms, among other places. Such information is referenced for informational purposes only and is not incorporated by reference into this prospectus.

Creation and Redemption The Trust creates and redeems Shares from time to time, but only in one or more whole Baskets of 10,000 Shares each, but may be subject to change. At this time, a Basket is only made in exchange for delivery to the Trust or the distribution by the Trust of an amount of

cash, equivalent to the amount of Ether represented by the Basket being created or redeemed, as the case may be, the amount of which is representative of the combined NAV of the number of Shares included in the Baskets being created or redeemed determined as of 4:00 p.m., New York time, on the day the order to create or redeem Baskets is properly received. Except when aggregated in Baskets or under extraordinary circumstances permitted under the Trust Agreement, the Shares are not individually redeemable securities.

The Trust issues and redeems Shares on an ongoing basis, but only in one or more whole Baskets of 10,000 Shares each. The creation and redemption of Baskets requires the delivery to or acquisition by the Trust, or the distribution or disposition by the Trust, of the number of Ether represented by the Baskets being created or redeemed, the number of which is equal to the “Basket Amount” as of 4:00 p.m., New York time, on the trade date of a creation or redemption order multiplied by the number of Baskets being created or redeemed (the “Total Basket Amount”). The number of Ether required to create a Basket, or to be delivered or disposed of upon the redemption of a Basket, will gradually decrease over time due to the transfer of the Trust’s Ether to pay the Sponsor’s Fee and the delivery or sale of the Trust’s Ether to pay any Trust expenses not assumed by the Sponsor. See “Description of Creation and Redemption of Shares” in this prospectus.

Although the Trust creates Baskets only upon the receipt of Ether, and redeems Baskets only by distributing Ether or proceeds from the disposition of Ether, at this time an Authorized Participant can only submit Cash Orders, pursuant to which the Authorized Participant will deposit cash into, or accept cash from, the Cash Account in connection with the creation and redemption of Baskets. Cash Orders will be facilitated by the Transfer Agent and Grayscale Investments, LLC, which will engage one or more eligible companies (each, a “Liquidity Provider”) that is not an agent of, or otherwise acting on behalf of, any Authorized Participant to obtain or receive Ether in connection with such orders. The Sponsor may in its sole discretion limit the number of Shares created pursuant to Cash Orders on any specified day without notice to the Authorized Participants and may direct the Marketing Agent to reject any Cash Orders in excess of such capped amount. The redemption of Shares pursuant to Cash Orders will only take place if approved by the Sponsor in writing, in its sole discretion and on a case-by-case basis.

The Trust is currently able to accept Cash Orders. However, and in common with other spot digital asset exchange-traded products, the Trust is not at this time able to create and redeem shares via in-kind transactions with Authorized Participants, and there has yet to be definitive regulatory guidance on whether and how registered broker-dealers can hold and deal in Ether in compliance with the federal securities laws. Subject to In-Kind Regulatory Approval, in the future the Trust may also create and redeem Baskets via In-Kind Orders, pursuant to which an Authorized Participant or its AP Designee

would deposit Ether directly with the Trust or receive Ether directly from the Trust. However, because In-Kind Regulatory Approval has not been obtained, at this time Baskets will not be created or redeemed through In-Kind Orders and will only be created or redeemed through Cash Orders. There can be no assurance as to when such regulatory clarity will emerge, or when NYSE Arca will seek or obtain such regulatory approval, if at all. See “Risk Factors—Risk Factors Related to the Trust and the Shares—The lack of ability to facilitate in-kind creations and redemptions of Shares could have adverse consequences for the Trust.” See “Description of Creation and Redemption of Shares.”

The Sponsor has engaged certain unaffiliated Liquidity Providers, and intends to engage additional Liquidity Providers who are unaffiliated with the Trust in the future.

Net Asset Value The net asset value of the Trust determined on a GAAP basis is referred to in this prospectus as “Principal Market NAV.” The Sponsor also calculates Principal Market NAV per Share in accordance with GAAP. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Selected Operating Data” for additional information reconciling the Trust’s NAV and NAV per Share presented against the GAAP metrics presented in our financial statements included hereto.

The Trust’s NAV The Trust’s NAV is the aggregate value, expressed in U.S. dollars, of the Trust’s assets (other than U.S. dollars or other fiat currency), less the U.S. dollar value of the Trust’s expenses and other liabilities calculated in the manner set forth under “Business—Overview of the Ethereum Industry and Market.”

The Sponsor also calculates the NAV per Share, which equals the NAV of the Trust divided by the number of Shares then outstanding. The Sponsor will publish the NAV and NAV per Share each business day as of 4:00 p.m., New York time, or as soon thereafter as practicable at the Trust’s website at www.etfs.grayscale.com/eth. The contents of the website referred to above and any websites referred to herein are not incorporated into this filing. Further, our references to the URL for this website is intended to be an inactive textual reference only. See “Business—Valuation of Ether and Determination of NAV” for a more detailed description of how the Trust’s NAV and NAV per Share are calculated.

Incidental Rights and IR Virtual

Currency Other than receiving and distributing cash from the Cash Account in connection with the creation and redemption of Baskets as described under “Description of Creation and Redemption of Shares,” the Trust will not hold cash, and will not engage a cash custodian. The Trust may from time to time be entitled to come into possession of rights incident to its ownership of Ether, which permit the Trust to acquire, or otherwise establish dominion and control over, other virtual currencies. These rights are generally expected to arise in connection with forks in the Blockchain, airdrops offered to holders of Ether or

other similar events and arise without any action of the Trust or of the Sponsor or Trustee on behalf of the Trust. We refer to these rights as “Incidental Rights” and any such virtual currency acquired through Incidental Rights as “IR Virtual Currency.”

With respect to any fork, airdrop or similar event, the Sponsor will cause the Trust to irrevocably abandon the Incidental Rights or IR Virtual Currency. In the event the Trust seeks to change this position, an application would need to be filed with the SEC by NYSE Arca seeking approval to amend its listing rules to permit the Trust to distribute the Incidental Rights or IR Virtual Currency in-kind to an agent of the shareholders for resale by such agent. Because the Trust will abandon any Incidental Rights and IR Virtual Currency, the Trust would not receive any direct or indirect consideration for the Incidental Rights or IR Virtual Currency and thus the value of the Shares will not reflect the value of the Incidental Rights or IR Virtual Currency. See “Business—Incidental Rights and IR Virtual Currency.”

Trust Expenses The Trust’s only ordinary recurring expense is expected to be the “Sponsor’s Fee.” Subject to the temporary waiver of a portion of the Sponsor’s Fee as discussed below under “Business—Expenses; Sales of Ether—Expenses to Be Paid by the Sponsor,” the Sponsor’s Fee will accrue daily in U.S. dollars at an annual rate of 0.25% of the NAV Fee Basis Amount of the Trust as of 4:00 p.m., New York time, on each day; *provided* that for a day that is not a business day, the calculation will be based on the NAV Fee Basis Amount from the most recent business day, reduced by the accrued and unpaid Sponsor’s Fee for such most recent business day and for each day after such most recent business day and prior to the relevant calculation date. This dollar amount for each daily accrual will then be converted into Ether by reference to the same Index Price used to determine such accrual. The Sponsor’s Fee is payable in Ether to the Sponsor daily in arrears.

To cause the Trust to pay the Sponsor’s Fee, the Sponsor will instruct the Custodian to withdraw from the Trust’s Vault Balance (as defined below) the number of Ether equal to the accrued but unpaid Sponsor’s Fee and transfer such Ether to the Sponsor’s account at such times as the Sponsor determines in its absolute discretion.

The Sponsor, from time to time, may temporarily waive all or a portion of the Sponsor’s Fee in its sole discretion. The Sponsor has determined to waive a portion of the Sponsor’s Fee for the first 12 months beginning on the commencement of trading of the Shares on NYSE Arca, so that the fee will be 0.12% of the NAV of the Trust for the first \$2.0 billion of the Trust’s assets. If the Trust’s assets exceed \$2.0 billion prior to the end of the 12-month period, the Sponsor’s Fee charged on assets over \$2.0 billion will be 0.25%. All investors will incur the same Sponsor’s Fee, which is the weighted average of those fee rates. After the 12-month waiver period is over, the Sponsor’s Fee will be 0.25%. Other than as disclosed herein, the

Sponsor does not presently intend to waive any of the Sponsor's Fee and there are no other circumstances under which the Sponsor has determined it will definitely waive the fee. The Sponsor is under no obligation to waive any portion of its fees and any such waiver shall create no obligation to waive any such fees during any period not covered by the waiver.

After the Trust's payment of the Sponsor's Fee to the Sponsor, the Sponsor may elect to convert any Ether received as payment of the Sponsor's Fee into U.S. dollars. The rate at which the Sponsor converts such Ether to U.S. dollars may differ from the rate at which the relevant Sponsor's Fee was determined. The Trust will not be responsible for any fees and expenses incurred by the Sponsor to convert Ether received in payment of the Sponsor's Fee into U.S. dollars.

As partial consideration for its receipt of the Sponsor's Fee, the Sponsor is obligated under the Trust Agreement to assume and pay all fees and other expenses incurred by the Trust in the ordinary course of its affairs, excluding taxes, but including: (i) the Marketing Fee, (ii) the Administrator Fee, (iii) the Custodian Fee and fees for any other security vendor engaged by the Trust, (iv) the Transfer Agent Fee, (v) the Trustee fee, (vi) the fees and expenses related to the listing, quotation or trading of the Shares on any Secondary Market (including customary legal, marketing and audit fees and expenses) in an amount up to \$600,000 in any given fiscal year, (vii) ordinary course, legal fees and expenses, (viii) audit fees, (ix) regulatory fees, including, if applicable, any fees relating to the registration of the Shares under the Securities Act or the Exchange Act, (x) printing and mailing costs, (xi) costs of maintaining the Trust's website and (xii) applicable license fees (each, a "Sponsor-paid Expense" and collectively, the "Sponsor-paid Expenses"), *provided* that any expense that qualifies as an Additional Trust Expense will be deemed to be an Additional Trust Expense and not a Sponsor-paid Expense.

The Trust may incur certain extraordinary, nonrecurring expenses that are not Sponsor-paid Expenses, including, but not limited to, taxes and governmental charges, expenses and costs of any extraordinary services performed by the Sponsor (or any other service provider) on behalf of the Trust to protect the Trust or the interests of shareholders, any indemnification of the Custodian or other agents, service providers or counterparties of the Trust, the fees and expenses related to the listing, quotation or trading of the Shares on any Secondary Market (including legal, marketing and audit fees and expenses) to the extent exceeding \$600,000 in any given fiscal year and extraordinary legal fees and expenses, including any legal fees and expenses incurred in connection with litigation, regulatory enforcement or investigation matters (collectively, "Additional Trust Expenses").

In such circumstances, the Sponsor or its delegate (i) will instruct the Custodian to withdraw from the Trust's Vault Balance Ether in such

quantity as may be necessary to permit payment of such Additional Trust Expenses and (ii) may either (x) cause the Trust (or its delegate) to convert such Ether into U.S. dollars or other fiat currencies at the Actual Exchange Rate or (y) when the Sponsor incurs such expenses on behalf of the Trust, cause the Trust (or its delegate) to deliver such Ether in kind to the Sponsor in satisfaction of such Additional Trust Expenses.

Although the Sponsor is obligated to use its commercially reasonable efforts to obtain the highest price when engaging other parties to assist with the sale of the Trust's Ether to raise proceeds for any Additional Trust Expenses, the Sponsor will have some discretion in arranging for the sale of the Trust's Ether, and may engage one or more of its affiliates to assist with any such sale. The Sponsor and its respective directors, officers, employees, affiliates, and/or parties engaged to assist with the sale of the Trust's Ether may trade in the Ether, digital asset, derivative or other markets for their own accounts, and in doing so may take positions opposite to or ahead of those held by the Trust and may compete with the Trust for positions in the marketplace. For example, sales of the Trust's Ether for the satisfaction of any Additional Trust Expenses may create conflicts of interest on behalf of one or more such parties in respect of their obligation to the Trust. The Sponsor has adopted and implemented policies and procedures that are reasonably designed to ensure compliance with applicable law, including a Compliance Manual and Code of Ethics, which address conflicts of interest. See "Risk Factors—Risk Factors Related to Potential Conflicts of Interest—Potential conflicts of interest may arise among the Sponsor or its affiliates and the Trust. The Sponsor and its affiliates have no fiduciary duties to the Trust and its shareholders other than as provided in the Trust Agreement, which may permit them to favor their own interests to the detriment of the Trust and its shareholders."

In order to raise proceeds to pay for any Additional Trust Expenses, the Sponsor would execute the sale of Ether through eligible financial institutions that are subject to federal and state licensing requirements and practices regarding AML and KYC regulations, which may include a Liquidity Provider or one or more of their respective affiliates. The Sponsor expects that these financial institutions will generally only have access to Digital Asset Trading Platforms or other venues that they reasonably believe are operating in compliance with applicable law, including federal and state licensing requirements, based upon information and assurances provided to it by each venue. The Trust is not responsible for paying any costs associated with the transfer of Ether to the Sponsor in connection with the payment of the Sponsor's Fee or the sale of Ether in connection with the payment of any Additional Trust Expenses. The number of Ether represented by a Share will decline each time the Trust pays the Sponsor's Fee or any Additional Trust Expenses by transferring or selling Ether. See "Business—Expenses; Sales of Ether."

The quantity of Ether to be delivered to the Sponsor or other relevant payee in payment of the Sponsor’s Fee or any Additional Trust Expenses, or sold to permit payment of Additional Trust Expenses, will vary from time to time depending on the level of the Trust’s expenses and the value of Ether held by the Trust. See “Business—Expenses; Sales of Ether.” Assuming that the Trust is a grantor trust for U.S. federal income tax purposes, each delivery or sale of Ether by the Trust for the payment of expenses will be a taxable event to shareholders. See “Material U.S. Federal Income Tax Consequences—Tax Consequences to U.S. Holders.”

Voting Rights The shareholders take no part in the management or control of the Trust. Under the Trust Agreement, shareholders have limited voting rights. For example, in the event that the Sponsor withdraws, a majority of the shareholders may elect and appoint a successor sponsor to carry out the affairs of the Trust. In addition, no amendments to the Trust Agreement that materially adversely affect the interests of shareholders may be made without the vote of at least a majority (over 50%) of the Shares (not including any Shares held by the Sponsor or its affiliates). However, the Sponsor may make any other amendments to the Trust Agreement in its sole discretion without shareholder consent *provided* that the Sponsor provides 20 days’ notice of any such amendment. See “Description of the Shares.”

Termination Events Upon dissolution of the Trust and surrender of Shares by the shareholders, shareholders will receive a distribution in U.S. dollars or interests in any liquidating trust or other vehicle formed to hold Ether, at the sole discretion of the Sponsor, after the Sponsor has sold the Trust’s Ether, if applicable, and has paid or made provision for the Trust’s claims and obligations. See “Business—Description of the Trust Agreement—Termination of the Trust.” In exercising its discretion, the Sponsor expects to take into consideration a number of factors including, but not limited to, the intention that the Shares offer investors an opportunity to gain exposure to digital assets through an investment in securities, the operational challenges of transferring Ether to the Trust’s shareholders via their brokers or brokerage platforms and the ability of those parties to receive Ether or cash, as well as the tax consequences of distributing cash or Ether. Based on the foregoing considerations, the Sponsor currently expects such distributions to be made in cash and to execute the sales of any Ether in connection with the termination of the Trust through eligible financial institutions that are subject to federal and state licensing requirements and practices regarding AML and KYC regulations, which may include a Liquidity Provider or one or more of their respective affiliates.

Authorized Participants Baskets may be created or redeemed only by Authorized Participants. Each Authorized Participant must (i) be a registered broker-dealer and (ii) have entered into a Participant Agreement with the Sponsor and the Transfer Agent. Subject to In-Kind Regulatory Approval, in the future any Authorized Participants creating and redeeming Shares

through In-Kind Orders must also own, or their AP Designee (as defined below) must own, an Ether wallet address that is known to the Custodian as belonging to the Authorized Participant or its AP Designee and maintain an account with the Custodian. The Participant Agreement provides the procedures for the creation and redemption of Baskets and for the delivery of Ether required for the creation and redemption of Baskets via a Liquidity Provider, as well as the deposit with and subsequent delivery by the Trust of cash required in connection therewith, from or to an Authorized Participant or Liquidity Provider, as applicable. See “Description of Creation and Redemption of Shares.”

As of the date of this prospectus, the Trust has engaged Jane Street Capital, LLC, Virtu Americas LLC, Macquarie Capital (USA) Inc. and ABN AMRO Clearing USA LLC as Authorized Participants. Additional Authorized Participants may be added at any time, subject to the discretion of the Sponsor.

Liquidity Providers Liquidity Providers facilitate the purchase and sale of Ether in connection with Cash Orders for creations or redemptions of Baskets. Liquidity Providers are engaged by Grayscale Investments, LLC (in such capacity, the “Liquidity Engager”) and are not party to Participant Agreements or otherwise agents of, or otherwise acting on behalf of, any Authorized Participant. See “Description of Creation and Redemption of Shares.” The Liquidity Engager’s criteria for engaging one or more Liquidity Providers includes the completion of due diligence that considers each such Liquidity Provider’s Ether trading capabilities, organizational structure, operating history, lines of business, controls, and other details necessary to evaluate their ability to facilitate Cash Orders. Liquidity Providers formalize their relationship through a Liquidity Provider Agreement between the Liquidity Engager, Liquidity Provider, and the Sponsor (on behalf of the Trust). Pursuant to such Liquidity Provider Agreements, the Liquidity Providers will be contractually obligated to deliver or receive Ether in exchange for cash in connection with Cash Orders for creations or redemptions.

The Liquidity Providers with which Grayscale Investments, LLC, acting in its capacity as the Liquidity Engager, will engage in Ether transactions are third parties that are not affiliated with the Sponsor or the Trust and are not acting as agents of the Trust, the Sponsor, or any Authorized Participant, and all transactions will be done on an arms-length basis. Except for the contractual relationships between each Liquidity Provider and Grayscale Investments, LLC in its capacity as the Liquidity Engager and the Sponsor (on behalf of the Trust), there is no other pre-existing contractual relationship between each Liquidity Provider, on the one hand, and the Trust, the Sponsor, or any Authorized Participant, on the other hand, in each case that relates to the Trust or the Trust’s Shares. When seeking to buy Ether in connection with creations or sell Ether in connection with redemptions, the Liquidity Engager will seek to obtain commercially

reasonable prices and terms from the approved Liquidity Providers. Once agreed upon, the transaction will generally occur on an “over-the-counter” basis.

As of the date of this prospectus, the Liquidity Engager has engaged JSCT, LLC, Virtu Financial Singapore Pte. Ltd., Flow Traders B.V., Cumberland DRW LLC and Flowdesk as Liquidity Providers. Additional Liquidity Providers may be added at any time, subject to the discretion of the Liquidity Engager.

Clearance and Settlement The Shares are evidenced by one or more global certificates that the Transfer Agent issues to DTC. The Shares are primarily available in book-entry form. Shareholders may hold their Shares through DTC if they are direct participants in DTC (“DTC Participants”), or indirectly through entities that are DTC Participants.

Risk Factors See the risks discussed in “Risk Factors” in this prospectus before you invest in the Shares.

RISK FACTORS

You should carefully consider the following risks and all of the other information set forth in this prospectus before deciding to invest in shares of the Shares. If any of the following risks actually occurs, our business, financial condition or results of operations would likely suffer. In such case, the trading price of the Shares could decline due to any of these risks, and you may lose all or part of your investment.

Risk Factors Related to Digital Assets

The trading prices of many digital assets, including Ether, have experienced extreme volatility in recent periods and may continue to do so. Extreme volatility in the future, including further declines in the trading prices of Ether, could have a material adverse effect on the value of the Shares and the Shares could lose all or substantially all of their value.

The trading prices of many digital assets, including Ether, have experienced extreme volatility in recent periods and may continue to do so. For instance, following significant increases throughout the majority of 2020, digital asset prices, including Ether, experienced significant volatility throughout 2021 and 2022. This volatility became extreme in November 2022 when FTX Trading Ltd. (“FTX”) halted customer withdrawals. See “—Risk Factors Related to the Digital Asset Markets—Recent developments in the digital asset economy have led to extreme volatility and disruption in digital asset markets, a loss of confidence in participants of the digital asset ecosystem, significant negative publicity surrounding digital assets broadly and market-wide declines in liquidity.” Digital asset prices, including Ether, have continued to fluctuate widely to date throughout 2023 and through the date of this prospectus.

Extreme volatility in the future, including further declines in the trading prices of Ether, could have a material adverse effect on the value of the Shares and the Shares could lose all or substantially all of their value. Furthermore, negative perception, a lack of stability and standardized regulation in the digital asset economy may reduce confidence in the digital asset economy and may result in greater volatility in the price of Ether and other digital assets, including a depreciation in value. The Trust is not actively managed and will not take any actions to take advantage, or mitigate the impacts, of volatility in the price of Ether. For additional information that quantifies the volatility of Ether prices, see “Business—Overview of the Ethereum Industry and Market—Historical Ether Prices.”

Digital assets such as Ether were only introduced within the past two decades, and the medium-to-long term value of the Shares is subject to a number of factors relating to the capabilities and development of blockchain technologies and to the fundamental investment characteristics of digital assets.

Digital assets such as Ether were only introduced within the past two decades, and the medium-to-long term value of the Shares is subject to a number of factors relating to the capabilities and development of blockchain technologies, such as the recentness of their development, their dependence on the internet and other technologies, their dependence on the role played by users, developers and validators and the potential for malicious activity. For example, the realization of one or more of the following risks could materially adversely affect the value of the Shares:

- Digital asset networks and the software used to operate them are in the early stages of development. Given the recentness of the development of digital asset networks, digital assets may not function as intended and parties may be unwilling to use digital assets, which would dampen the growth, if any, of digital asset networks.
- The loss or destruction of a private key required to access a digital asset may be irreversible. If a private key is lost, destroyed or otherwise compromised and no backup of the private key is accessible, the owner would be unable to access the digital asset corresponding to that private key and the private key will not be capable of being restored by the digital asset network.

- Digital asset networks are dependent upon the internet. A disruption of the internet or a digital asset network, such as the Ethereum Network, would affect the ability to transfer digital assets, including Ether, and, consequently, their value.
- The acceptance of software patches or upgrades by a significant, but not overwhelming, percentage of the users and validators in a digital asset network, such as the Ethereum Network, could result in a “fork” in such network’s blockchain, resulting in the operation of multiple separate networks.
- Digital asset validating operations can consume significant amounts of electricity, which may have a negative environmental impact and give rise to public opinion against allowing, or government regulations restricting, the use of electricity for validating operations. Additionally, validators may be forced to cease operations during an electricity shortage or power outage.
- The open-source structure of many digital asset network protocols, such as the protocol for the Ethereum Network, means that developers and other contributors are generally not directly compensated for their contributions in maintaining and developing such protocols. As a result, the developers and other contributors of a particular digital asset may lack a financial incentive to maintain or develop the network or may lack the resources to adequately address emerging issues. Alternatively, some developers may be funded by companies whose interests are at odds with other participants in a particular digital asset network. A failure to properly monitor and upgrade the protocol of the Ethereum Network could damage that network.
- Moreover, in the past, flaws in the source code for digital assets have been exposed and exploited, including flaws that disabled some functionality for users, exposed users’ personal information and/or resulted in the theft of users’ digital assets. The cryptography underlying Ethereum could prove to be flawed or ineffective, or developments in mathematics and/or technology, including advances in digital computing, algebraic geometry and quantum computing, could result in such cryptography becoming ineffective. In any of these circumstances, a malicious actor may be able to take the Trust’s Ether, which would adversely affect the value of the Shares. Moreover, functionality of the Ethereum Network may be negatively affected such that it is no longer attractive to users, thereby dampening demand for Ether. Even if another digital asset other than Ether were affected by similar circumstances, any reduction in confidence in the source code or cryptography underlying digital assets generally could negatively affect the demand for digital assets and therefore adversely affect the value of the Shares.
- The Ethereum Network is in the process of implementing a series of software upgrades and other changes to its protocol, which were previously referred to collectively as Ethereum 2.0 and some of which were implemented during 2022, such as the Merge. These upgrades will result in new iterations of the Ethereum Network. Many of the contemplated upgrades to the Ethereum Network will include updates to material aspects of its source code. Although some of these upgrades have been successfully implemented, such as the Merge, previously successful upgrades do not guarantee that future upgrades will be successful, and any failure to properly implement future changes could have a material adverse effect on the value of Ether and the value of the Shares. One recent upgrade is known as the “Dencun” upgrade, which could increase the scalability of the Ethereum Network by allowing easy synchronization with Layer 2 networks capable of processing many more transactions than the Ethereum Blockchain alone. The intended effect is to increase the rate of transactions that can be processed by the Ethereum Network. As a result, it is possible that the amount of Ether required to sync Layer 2 networks with the Ethereum Blockchain would be reduced and therefore the demand for Ether could be reduced, which could have a material adverse effect on the value of Ether and the value of the Shares. See “Business—Overview of the Ethereum Industry and Market—Modifications to the Ethereum Protocol” for additional information. In addition, the acceptance of software patches or upgrades by a significant, but not overwhelming, percentage of the users and validators in a digital asset network could result in a “fork” in such network’s blockchain, resulting in the operation of multiple separate networks. See “A temporary or permanent “fork” could adversely affect the value of the Shares” for additional information.

- The Ethereum Network is still in the process of developing and making significant decisions that will affect policies that govern the supply and issuance of Ether as well as other Ethereum Network protocols. For example, the Ethereum Network has on three separate occasions reduced the quantity of Ether rewarded per block and may make additional changes in the future, see “Business—Overview of the Ethereum Industry and Market—Creation of New Ether” for additional information. If the Ethereum Network does not successfully develop its policies on supply and issuance, or does so in a manner that is not attractive to network participants, there may not be sufficient network level support for such network, which could lead to a decline in the support and price of Ether.

Moreover, because digital assets, including Ether, have been in existence for a short period of time and are continuing to develop, there may be additional risks in the future that are impossible to predict as of the date of this prospectus.

Digital assets represent a new and rapidly evolving industry, and the value of the Shares depends on the acceptance of Ether.

The first digital asset, Bitcoin, was launched in 2009. Ether launched in 2015 and, along with Bitcoin, was one of the first cryptographic digital assets to gain global adoption and critical mass. In general, digital asset networks, including the Ethereum Network and other cryptographic and algorithmic protocols governing the issuance of digital assets represent a new and rapidly evolving industry that is subject to a variety of factors that are difficult to evaluate. For example, the realization of one or more of the following risks could materially adversely affect the value of the Shares:

- Ether is only selectively accepted by retail and commercial outlets, and use of Ether by consumers remains limited. Banks and other established financial institutions may refuse to process funds for Ether transactions; process wire transfers to or from Digital Asset Trading Platforms, Ethereum-related companies or service providers; or maintain accounts for persons or entities transacting in Ether. As a result, the prices of Ether are largely determined by speculators and validators, thus contributing to price volatility that makes retailers less likely to accept Ether in the future. While the use of other digital assets, such as Bitcoin, to purchase goods and services from commercial or service businesses is developing, Ether has not yet been accepted in the same manner because it has a slightly different purpose than Bitcoin.
- Banks may not provide banking services, or may cut off banking services, to businesses that provide digital asset-related services or that accept digital assets as payment, which could dampen liquidity in the market and damage the public perception of digital assets generally or any one digital asset in particular, such as Ether, and their or its utility as a payment system, which could decrease the price of digital assets generally or individually.
- Certain privacy-preserving features have been or are expected to be introduced to a number of digital asset networks. If any such features are introduced to the Ethereum Network, any trading platforms or businesses that facilitate transactions in Ether may be at an increased risk of criminal or civil lawsuits, or of having banking services cut off if there is a concern that these features interfere with the performance of anti-money laundering duties and economic sanctions checks.
- Users, developers and validators may otherwise switch to or adopt certain digital assets at the expense of their engagement with other digital asset networks, which may negatively impact those networks, including the Ethereum Network.

The Trust is not actively managed and will not have any formal strategy relating to the development of the Ethereum Network

Smart contracts are a new technology and ongoing development may magnify initial problems, cause volatility on the networks that use smart contracts and reduce interest in them, which could have an adverse impact on the value of Ether.

Smart contracts are programs that run on a blockchain that execute automatically when certain conditions are met. Since smart contracts typically cannot be stopped or reversed, vulnerabilities in their programming can have damaging effects. For example, in June 2016, a vulnerability in the smart contracts underlying The DAO, a distributed autonomous organization for venture capital funding, allowed an attack by a hacker to syphon approximately \$60 million worth of Ether from The DAO's accounts into a segregated account. In the aftermath of the theft, certain developers and core contributors pursued a "hard fork" of the Ethereum Network in order to erase any record of the theft. Despite these efforts, the price of Ether dropped approximately 35% in the aftermath of the attack and subsequent hard fork. In addition, in July 2017, a vulnerability in a smart contract for a multi-signature wallet software developed by Parity led to a \$30 million theft of Ether, and in November 2017, a new vulnerability in Parity's wallet software led to roughly \$160 million worth of Ether being indefinitely frozen in an account. Other smart contracts, such as bridges between blockchain networks and DeFi protocols have also been manipulated, exploited or used in ways that were not intended or envisioned by their creators such that attackers syphoned over \$3.8 billion worth of digital assets from smart contracts in 2022. Initial problems and continued problems with the development, design and deployment of smart contracts may have an adverse effect on the value of Ether, which could have a negative impact on the value of the Shares.

Layer 2 solutions on the Ethereum Network were only recently conceived and may not properly function as intended, which could have an adverse impact on the value of Ether and an investment in the Shares.

So-called "Layer 2" solutions are protocols built on top of an underlying smart contract platform blockchain intended to provide scalability to the underlying blockchain by increasing transaction efficiency. For example, Arbitrum is a smart contract platform protocol built on top of the Ethereum Blockchain; it is intended to provide scalability to Ethereum by allowing users to transact on a second blockchain deployed on the Ethereum Network. Under this model, Ethereum functions as the base layer, or "Layer 1" blockchain. Such solutions are intended to improve upon the transaction speed, cost and efficiency of transactions on their respective Layer 1. Layer 2 solutions therefore rely, to various degrees, on the functionality of the underlying Layer 1 blockchain.

The details of how this is done vary significantly between different Layer 2 technologies and implementations. For example, "rollups" perform transaction execution outside the Layer 1 blockchain and then post the data, typically in batches, back to the Layer 1 Ethereum Blockchain where consensus is reached. "Zero knowledge rollups" are generally designed to run the computation needed to validate the transactions off-chain, on the Layer 2 protocol, and submit a proof of validity of a batch of transactions (not the entire transactions themselves). By contrast, "optimistic rollups" assume transactions are valid by default and only run computation, via a fraud proof, in the event of a challenge. Other proposed Layer 2 scaling solutions include, among others, "state channels", which are designed to allow participants to run a large number of transactions on the Layer 2 side channel protocol and only submit two transactions to the main Layer 1 Ethereum Blockchain (the transaction opening the state channel, and the transaction closing the channel), "side chains", in which an entire Layer 2 blockchain network with similar capabilities to the existing Layer 1 Ethereum Blockchain runs in parallel with the existing Layer 1 Ethereum Blockchain and allows smart contracts and DApps to run on the Layer 2 side chain without burdening the main Layer 1 network, and others. To date, the Ethereum Network community has not coalesced overwhelmingly around any particular Layer 2 solution, though this could change. There is no guarantee that any of the mechanisms in place or being explored for increasing the speed and throughput of settlement of Ethereum Network transactions will be effective, or how long these mechanisms will take to become effective, which could cause the Ethereum Network to not adequately resolve scaling challenges and adversely impact the adoption of Ether and the Ethereum Network and the value of the Shares. There is no guarantee that any potential scaling solution, whether a change to the Layer 1 blockchain or the introduction of a Layer 2 solution like rollups, state channels or side chains, will achieve widespread adoption. It is possible that proposed changes to the Layer 1 Ethereum Blockchain could divide the community, potentially even causing a

hard fork, or that the decentralized governance of the Ethereum Network causes network participants to fail to coalesce overwhelmingly around any particular solution, causing the Ethereum Network to suffer reduced adoption or causing users or validators to migrate to other blockchain networks. It is also possible that scaling solutions could fail to work as intended or could introduce bugs, coding defects or flaws, security risks, or other problems that could cause them to suffer operational disruptions. For example, in multiple instances throughout 2022 and 2023, the Arbitrum network experienced outages due to failures in its primary node responsible for submitting transactions to Ethereum.

Further, smart contracts deployed on one Layer 2 solution may not be interoperable with smart contracts deployed on other Layer 2 solutions. In particular, the advent of Layer 2 solutions presents the possibility of fracturing liquidity of DeFi DApps on a smart contract platform's mainchain by splitting such liquidity among multiple, non-interoperable Layer 2 solutions, which could limit their use case or reduce efficiency. As Layer 2 solutions grow in popularity and total value locked, these types of difficulties may lead to transactional congestion or forfeiture of value held on the Ethereum Network, which in turn could have an adverse impact on the value of Ether.

Changes in the governance of a digital asset network may not receive sufficient support from users and validators, which may negatively affect that digital asset network's ability to grow and respond to challenges.

The governance of decentralized networks, such as the Ethereum Network, is by voluntary consensus and open competition. As a result, there may be a lack of consensus or clarity on the governance of any particular decentralized digital asset network, which may stymie such network's utility and ability to grow and face challenges. The foregoing notwithstanding, the protocols for some decentralized networks, such as the Ethereum Network, are informally managed by a group of core developers that propose amendments to the relevant network's source code. Core developers' roles evolve over time, largely based on self-determined participation. If a significant majority of users and validators were to adopt amendments to the Ethereum Network based on the proposals of such core developers, the Ethereum Network would be subject to new protocols that may adversely affect the value of Ether.

As a result of the foregoing, it may be difficult to find solutions or marshal sufficient effort to overcome any future problems, especially long-term problems, on digital asset networks.

Digital asset networks face significant scaling challenges and efforts to increase the volume and speed of transactions may not be successful.

Many digital asset networks face significant scaling challenges due to the fact that public blockchains generally face a tradeoff between security and scalability. One means through which public blockchains achieve security is decentralization, meaning that no intermediary is responsible for securing and maintaining these systems. For example, a greater degree of decentralization generally means a given digital asset network is less susceptible to manipulation or capture. In practice, this typically means that every single node on a given digital asset network is responsible for securing the system by processing every transaction and maintaining a copy of the entire state of the network. As a result, a digital asset network may be limited in the number of transactions it can process by the capabilities of each single fully participating node. Many developers are actively researching and testing scalability solutions for public blockchains that do not necessarily result in lower levels of security or decentralization, such as off-chain payment channels and Layer 2 networks. Off-chain payment channels would allow parties to transact without requiring the full processing power of a blockchain. Layer 2 networks can increase the scalability of a blockchain by allowing users to transact on a second blockchain deployed on top of a Layer 1 network.

As of June 30, 2024, the Ethereum Network handled approximately 13 transactions per second. In an effort to increase the volume of transactions that can be processed on a given digital asset network, many digital

assets are being upgraded with various features to increase the speed and throughput of digital asset transactions. For example, in 2024, the Ethereum Network implemented an upgrade referred to as Dencun that includes proto-danksharding. See “Business—Overview of the Ethereum Industry and Market—Creation of New Ether” and “Business—Overview of the Ethereum Industry and Market—Modifications to the Ethereum Protocol” for additional information.

As corresponding increases in throughput lag behind growth in the use of digital asset networks, average fees and settlement times may increase considerably. For example, the Ethereum Network has been, at times, at capacity, which has led to increased transaction fees. Since January 1, 2021, Ether average daily transaction fees have ranged from \$0.97 per transaction on October 2, 2022, to as high as \$200.27 per transaction on May 1, 2022. As of June 30, 2024, Ether average daily transaction fees were \$1.73 per transaction. Increased fees and decreased settlement speeds could preclude certain uses for Ether (e.g., micropayments), and could reduce demand for, and the price of, Ether, which could adversely impact the value of the Shares.

There is no guarantee that any of the mechanisms in place or being explored for increasing the scale of settlement of Ethereum Network transactions will be effective, or how long these mechanisms will take to become effective, which could adversely impact the value of the Shares.

Digital asset networks are developed by a diverse set of contributors and the perception that certain high-profile contributors will no longer contribute to the network could have an adverse effect on the market price of the related digital asset.

Digital asset networks are often developed by a diverse set of contributors and the perception that high-profile contributors may no longer contribute to the network may have an adverse effect on the market price of any related digital assets. For example, in June 2017, an unfounded rumor circulated that Ethereum protocol developer Vitalik Buterin had died. Following the rumor, the price of Ether decreased approximately 20% before recovering after Buterin himself dispelled the rumor. Some have speculated that the rumor led to the decrease in the price of Ether. In the event a high-profile contributor to the Ethereum Network, such as Vitalik Buterin, is perceived as no longer contributing to the Ethereum Network due to death, retirement, withdrawal, incapacity, or otherwise, whether or not such perception is valid, it could negatively affect the price of Ether, which could adversely impact the value of the Shares.

Digital assets may have concentrated ownership and large sales or distributions by holders of such digital assets, or any ability to participate in or otherwise influence a digital asset’s underlying network, could have an adverse effect on the market price of such digital asset.

As of June 30, 2024, the largest 100 Ether wallets held approximately 21.6% of the Ether in circulation. Moreover, it is possible that other persons or entities control multiple wallets that collectively hold a significant number of Ether, even if they individually only hold a small amount, and it is possible that some of these wallets are controlled by the same person or entity. As a result of this concentration of ownership, large sales or distributions by such holders could have an adverse effect on the market price of Ether.

If the digital asset award or transaction fees for recording transactions on the Ethereum Network are not sufficiently high to incentivize validators, or if certain jurisdictions continue to limit or otherwise regulate validating activities, validators may cease expanding validating power or demand high transaction fees, which could negatively impact the value of Ether and the value of the Shares.

In 2021, the Ethereum Network implemented the EIP-1559 upgrade. EIP-1559 changed the methodology used to calculate transaction fees paid to Ethereum validators in such a manner that reduced the total net issuance of Ether fees paid to validators. If the digital asset awards for validating blocks or the transaction fees for recording transactions on the Ethereum Network are not sufficiently high to incentivize validators, or if certain jurisdictions continue to limit or otherwise regulate validating activities, validators may cease expending

validating power to validate blocks and confirmations of transactions on the Ethereum Blockchain could be slowed. For example, the realization of one or more of the following risks could materially adversely affect the value of the Shares:

- If the profit margins of digital asset validating operations are not sufficiently high, digital asset validators are more likely to immediately sell tokens earned by validating, resulting in an increase in liquid supply of that digital asset, which would generally tend to reduce that digital asset's market price.
- A reduction in digital assets staked by validators on the Ethereum Network could increase the likelihood of a malicious actor or botnet obtaining control. See “—If a malicious actor or botnet obtains control of more than 33% of the validating power on the Ethereum Network, or otherwise obtains control over the Ethereum Network through its influence over core developers or otherwise, such actor or botnet could manipulate the Blockchain to adversely affect the value of the Shares or the ability of the Trust to operate.”
- Validators have historically accepted relatively low transaction confirmation fees on most digital asset networks. If validators demand higher transaction fees for recording transactions in the Ethereum Blockchain or a software upgrade automatically charges fees for all transactions on the Ethereum Network, the cost of using Ether may increase and the marketplace may be reluctant to accept Ether as a means of payment. Alternatively, validators could collude in an anti-competitive manner to reject low transaction fees on the Ethereum Network and force users to pay higher fees, thus reducing the attractiveness of the Ethereum Network. Higher transaction confirmation fees resulting through collusion or otherwise may adversely affect the attractiveness of the Ethereum Network, the value of Ether and the value of the Shares.
- To the extent that any validators cease to record transactions that do not include the payment of a transaction fee in validated blocks or do not record a transaction because the transaction fee is too low, such transactions will not be recorded on the Ethereum Blockchain until a block is validated by a validator who does not require the payment of transaction fees or is willing to accept a lower fee. Any widespread delays in the recording of transactions could result in a loss of confidence in the digital asset network.
- During the course of ordering transactions and validating blocks, validators may be able to prioritize certain transactions in return for increased transaction fees, an incentive system known as “Maximal Extractable Value” or MEV. For example, in blockchain networks that facilitate DeFi protocols in particular, such as the Ethereum Network, users may attempt to gain an advantage over other users by increasing offered transaction fees. Certain software solutions, such as Flashbots, have been developed which facilitate validators in capturing MEV produced by these increased fees. The MEV incentive system may lead to an increase in transaction fees on the Ethereum Network, which may diminish its use. Users or other stakeholders on the Ethereum Network could also view the existence of MEV as unfair manipulation of decentralized digital asset networks, and refrain from using DeFi protocols or the Ethereum Network generally. In addition, it is possible that regulators or legislators could enact rules which restrict the use of MEV, which could diminish the popularity of the Ethereum Network among users and validators. Any of these or other outcomes related to MEV may adversely affect the value of Ether and the value of the Shares.

Validators may suffer losses due to Staking, or Staking may prove unattractive to validators, which could adversely affect the Ethereum Network.

Validation on the Ethereum Network requires Ether to be transferred into smart contracts on the underlying blockchain network not under the control of the person who owns such Ether. If the Ethereum Network source code or protocol were to fail to behave as expected, suffer cybersecurity attacks or hacks, experience security issues, or encounter other problems, such transferred (i.e., staked) Ether may be irretrievably lost. In addition, the

Ethereum Network’s underlying protocol dictates requirements for participation in validation activity, and may impose penalties, if the relevant activities are not performed correctly. The Ethereum Network imposes three types of sanctions for validator misbehavior or inactivity, which would result in a portion of staked Ether being destroyed or “burned”: penalties, slashing and inactivity leaks.

A validator may face penalties if it fails to take certain actions, such as providing a timely attestation to a block proposed by another validator. Under this scenario, a validator’s staked Ether could be burned in an amount equal to the reward to which it would have been entitled for successfully performing the actions.

A more severe sanction (i.e., “slashing”) is imposed if a validator commits malicious acts related to the proposal or attestation of blocks with invalid transactions. Slashing can result in the validator having a portion of its staked Ether immediately confiscated, withdrawn, or burned by the Ethereum Network, resulting in losses to them. After this initial slashing, the validator is queued for forceful removal from the Ethereum Network’s validator “pool,” and more of the validator’s stake is burned over a period of approximately 36 days (with the exact amount of Ether burned and time period determined by the protocol) regardless of whether the validator makes any further slashable errors, at which point the validator is automatically removed from the validator pool.

Staked Ether may also be burned through a process known as an “inactivity leak,” which is triggered if the Ethereum protocol has gone too long without finalizing a new block. For a new block to be successfully added to the blockchain, validators that account for at least two-thirds of all staked Ether must agree on the validity of a proposed block. This means that if validators representing more than one-third of the total staked Ether are offline, no new blocks can be finalized. To prevent this, an inactivity leak causes the Ether staked by the inactive validators to gradually “bleed away” until these inactive validators represent less than one-third of the total stake, thereby allowing the remaining active validators to finalize proposed blocks. This provides a further incentive for validators to remain online and continue performing validation activities.

As well as sanctions, as part of the “activating” and “exiting” processes of Staking, staked Ether will be inaccessible for a variable period of time determined by a range of factors, including network congestion, resulting in potential inaccessibility during those periods. “Activation” is the funding of a validator to be included in the active set of validators, thereby allowing the validator to participate in the Ethereum Network’s proof-of-stake consensus protocol. “Exit” is the request to exit from the active set of validators and no longer participate in the Ethereum Network’s proof-of-stake consensus protocol. As part of these “activating” and “exiting” processes of Staking on the Ethereum Network, any staked Ether will be inaccessible for a period of time and will not earn any income during this period. However, depending on demand, un-staking can take between hours, days or weeks to complete.

If validators’ staked Ether are slashed or otherwise subject to sanctions by the Ethereum Network, their assets may be confiscated, withdrawn, or burnt by the network, resulting in losses to the validator, or the users who provided the Ether to the validator to stake on their behalf. Any cybersecurity attacks, security issues, hacks, penalties, slashing events, or other problems could damage validators’ willingness to participate in validation, discourage existing and future validators from serving as such, and adversely impact the Ethereum Network’s adoption or the price of Ether. Any disruption of validation on the Ethereum Network could interfere with network operations and cause the Ethereum Network to be less attractive to users and application developers than competing blockchain networks, which could cause the price of Ether to decrease. In addition, the limited liquidity during the “activation” or “exiting” processes could dissuade potential validators from participating, which could interfere with network operations or security and cause the Ethereum Network to be less attractive to users and application developers than competing blockchain networks, which could cause the price of Ether to decrease.

There can be no guarantee that penalties, slashing or inactivity leaks and resulting losses will not deter validators from Staking. Any such deterrence would affect the Ethereum Network’s ability to process transactions, thus making the Ethereum Network less attractive to potential users thereof and negatively affecting the value of the Shares.

If a malicious actor or botnet obtains control of more than 33% of the validating power on the Ethereum Network, or otherwise obtains control over the Ethereum Network through its influence over core developers or otherwise, such actor or botnet could manipulate the Blockchain to adversely affect the value of the Shares or the ability of the Trust to operate.

All networked systems are vulnerable to various types of attacks. As with any computer network, the Ethereum Network could be attacked. For example, following the Merge and the switch to proof-of-stake validation, the Ethereum Network is currently vulnerable to several types of attacks, including:

- “>33% attack” where, if a malicious actor, validator, botnet (a volunteer or hacked collection of computers controlled by networked software coordinating the actions of the computers) or group of validators acting in concert were to gain control of more than 33% of the total staked Ether on the Ethereum Network, a malicious actor could temporarily impede or delay block confirmation or even cause a temporary fork in the blockchain. This is designed to be a temporary risk, as the Ethereum Network’s inactivity leak would be expected to eventually penalize the attacker enough for the chain to finalize again (i.e., the honest majority would be expected to reclaim 2/3rd stake as the attacker’s stake is penalized). Moreover, it is not believed that a 33% attack would allow a malicious actor to engage in double-spending or fraudulent block propagation. Even without 33% control, a malicious actor or botnet could create a flood of transactions in order to slow down the Ethereum Network.
- “>50% attack” where, if a malicious actor, validator, botnet (a volunteer or hacked collection of computers controlled by networked software coordinating the actions of the computers) or group of validators acting in concert were to gain control of more than 50% of the total staked Ether on the Ethereum Network, a malicious actor would be able to gain full control of the Ethereum Network and the ability to manipulate future transactions on the blockchain, including censoring transactions, double-spending and fraudulent block propagation, potentially for an extended period or even permanently. In theory, the minority non-attackers might reach social consensus to reject blocks proposed by the malicious majority attacker, reducing the attacker’s ability to engage in malicious activity, but there can be no assurance this would happen or that non-attackers would be able to coordinate effectively. Although the malicious actor or botnet would not be able to generate new tokens or transactions using such control, it could “double-spend” its own tokens (i.e., spend the same tokens in more than one transaction) and prevent the confirmation of other users’ transactions for so long as it maintained control (over 50%). To the extent that such malicious actor or botnet did not yield its control of the validating power on the Ethereum Network or the Ethereum community did not reject the fraudulent blocks as malicious, reversing any changes made to the Ethereum Blockchain may not be possible.
- “>66% attack” where, if a malicious actor, validator, botnet (a volunteer or hacked collection of computers controlled by networked software coordinating the actions of the computers) or group of validators acting in concert were to gain control of more than 66% of the total staked Ether on the Ethereum Network, a malicious actor could permanently and irreversibly manipulate the blockchain, including censorship, double-spending and fraudulent block propagation. The attacker could finalize their preferred chain without any consideration for the votes of other stakers and could also revert finalized blocks.

For example, in August 2020, the Ethereum Classic Network, a proof-of-work network, was the target of two double-spend attacks by an unknown actor or actors that gained more than 50% of the processing power of the Ethereum Classic Network. The attacks resulted in reorganizations of the Ethereum Classic Blockchain that allowed the attacker or attackers to reverse previously recorded transactions in excess of over \$5.0 million and \$1.0 million.

In addition, in May 2019, the Bitcoin Cash network, a proof-of-work network, experienced a >50% attack when two large mining pools reversed a series of transactions in order to stop an unknown miner from taking advantage of a flaw in a recent Bitcoin Cash protocol upgrade. Although this particular attack was arguably

benevolent, the fact that such coordinated activity was able to occur may negatively impact perceptions of the Bitcoin Cash network. Although the two attacks described above took place on proof-of-work-based networks, it is possible that a similar attack may occur on the Ethereum Network, which could negatively impact the value of Ether and the value of the Shares.

Although there are no known reports of malicious control of the Ethereum Network, if groups of coordinating or connected Ether holders that together have more than 50% of outstanding Ether were to stake that Ether and run validators, they could exert authority over the validation of Ether transactions. This risk is heightened if over 50% of the validating power on the network falls within the jurisdiction of a single governmental authority and is significantly heightened if over 66% falls within such a jurisdiction. If network participants, including the core developers and the administrators of validating pools, do not act to ensure greater decentralization of Ether, the feasibility of a malicious actor obtaining control of the validating power on the Ethereum Network will increase, which may adversely affect the value of the Shares.

A malicious actor may also obtain control over the Ethereum Network through its influence over core developers by gaining direct control over a core developer or an otherwise influential programmer. The less that the Ethereum ecosystem grows, the greater the possibility that a malicious actor may be able to maliciously influence the Ethereum Network in this manner. Moreover, it is possible that a group of Ether holders that together control more than 50% of outstanding Ether are in fact part of the initial or current core developer group, or are otherwise influential members of the Ethereum community. To the extent that the initial or current core developer groups also control more than 50% of outstanding Ether, as some believe, the risk of this particular group of users causing the Ethereum Network to adopt updates to the core protocol that this particular group wants to be implemented will be even greater, and should this materialize, it may adversely affect the value of the Shares.

Liquid staking applications pose centralization concerns, and a single liquid staking application has reportedly controlled around or in excess of 33% of the total staked Ether on the Ethereum Network.

Validators must deposit 32 Ether to activate a unique validator key pair that is used to sign block proposals and attestations on behalf of its stake (i.e., participate in the proof-of-stake consensus mechanism). For every 32 Ether deposit that is staked, a unique validator key pair is generated. This validator key pair is only used in validation processes (block proposal and attestation, and the staking associated therewith), and is separate from the public-private key pair generated in respect of the blockchain address on the Ethereum Network which is used to hold the Ether. An application built on the Ethereum Network, or a single node operator, can manage many validator key pairs. For example, Lido, an application that provides a so-called “liquid staking” solution that permits holders of Ether to deposit them with Lido, which stakes the Ether while issuing the holder a transferrable token, is reported by some sources to have or have had up to 275,000 validator key pairs (each representing 32 staked Ether) divided across over 30 node operators. At times, Lido has reportedly controlled around or in excess of 33% of the total staked Ether on the Ethereum Network. While it is widely believed that Lido has little incentive to attempt to interfere with transaction finality or block confirmations using its reported 33% stake, since doing so would likely cause its entire stake to be slashed and thus lost (assuming good actors unaffiliated with Lido controlled the remainder), and also because Lido is believed to not control most of the third party node operators where its Ether is staked, and finally because the occurrence of such manipulation of the Ethereum Network’s consensus process by Lido or any other actor would likely cause Ether to lose substantial value (which would hurt Lido economically), it nevertheless poses centralization concerns. If Lido, or a bad actor with a similar sized stake, were to attempt to interfere with transaction finality or block confirmations, it could negatively affect the use and adoption of the Ethereum Network, the value of Ether, and thus the value of the Shares.

A temporary or permanent “fork” or a “clone” could adversely affect the value of the Shares.

The Ethereum Network operates using open-source protocols, meaning that any user can download the software, modify it and then propose that the users and validators of Ethereum adopt the modification. When a

modification is introduced and a substantial majority of users and validators' consent to the modification, the change is implemented and the network remains uninterrupted. However, if less than a substantial majority of users and validators' consent to the proposed modification, and the modification is not compatible with the software prior to its modification, the consequence would be what is known as a "hard fork" of the Ethereum Network, with one group running the pre-modified software and the other running the modified software. The effect of such a fork would be the existence of two versions of Ether running in parallel, yet lacking interchangeability. For example, in September 2022, the Ethereum Network transitioned to a proof-of-stake model, in an upgrade referred to as the "Merge." Following the Merge, a hard fork of the Ethereum Network occurred, as certain Ethereum miners and network participants planned to maintain the proof-of-work consensus mechanism that was replaced as part of the Merge. This version of the network was rebranded as "Ethereum Proof-of-Work."

Forks may also occur as a network community's response to a significant security breach. For example, in July 2016, Ethereum "forked" into Ether and a new digital asset, Ethereum Classic, as a result of the Ethereum Network community's response to a significant security breach. In June 2016, an anonymous hacker exploited a smart contract running on the Ethereum Network to syphon approximately \$60 million of Ether held by The DAO, a distributed autonomous organization, into a segregated account. In response to the hack, most participants in the Ethereum community elected to adopt a "fork" that effectively reversed the hack. However, a minority of users continued to develop the original blockchain, referred to as "Ethereum Classic" with the digital asset on that blockchain now referred to as ETC. ETC now trades on several Digital Asset Trading Platforms. A fork may also occur as a result of an unintentional or unanticipated software flaw in the various versions of otherwise compatible software that users run. Such a fork could lead to users and validators abandoning the digital asset with the flawed software. It is possible, however, that a substantial number of users and validators could adopt an incompatible version of the digital asset while resisting community-led efforts to merge the two chains. This could result in a permanent fork, as in the case of Ethereum and Ethereum Classic.

Furthermore, a hard fork can lead to new security concerns. For example, when the Ethereum and Ethereum Classic networks split in July 2016, replay attacks, in which transactions from one network were rebroadcast to nefarious effect on the other network, plagued Ethereum trading platforms through at least October 2016. An Ethereum trading platform announced in July 2016 that it had lost 40,000 Ethereum Classic, worth about \$100,000 at that time, as a result of replay attacks. Similar replay attack concerns occurred in connection with the Bitcoin Cash and Bitcoin Satoshi's Vision networks split in November 2018. Another possible result of a hard fork is an inherent decrease in the level of security due to significant amounts of validating power remaining on one network or migrating instead to the new forked network. After a hard fork, it may become easier for an individual validator or validating pool's validating power to exceed 50% of the validating power of a digital asset network that retained or attracted less validating power, thereby making digital asset networks that rely on proof-of-stake more susceptible to attack.

Protocols may also be cloned. Unlike a fork, which modifies an existing blockchain, and results in two competing networks, each with the same genesis block, a "clone" is a copy of a protocol's codebase, but results in an entirely new blockchain and new genesis block. Tokens are created solely from the new "clone" network and, in contrast to forks, holders of tokens of the existing network that was cloned do not receive any tokens of the new network. A "clone" results in a competing network that has characteristics substantially similar to the network it was based on, subject to any changes as determined by the developer(s) that initiated the clone.

A hard fork may adversely affect the price of Ether at the time of announcement or adoption. For example, the announcement of a hard fork could lead to increased demand for the pre-fork digital asset, in anticipation that ownership of the pre-fork digital asset would entitle holders to a new digital asset following the fork. The increased demand for the pre-fork digital asset may cause the price of the digital asset to rise. After the hard fork, it is possible the aggregate price of the two versions of the digital asset running in parallel would be less than the price of the digital asset immediately prior to the fork. Furthermore, while the Trust would be entitled to both versions of the digital asset running in parallel, the Sponsor will, as permitted by the terms of the Trust

Agreement, determine which version of the digital asset is generally accepted as the Ethereum Network and should therefore be considered the appropriate network for the Trust's purposes, and there is no guarantee that the Sponsor will choose the digital asset that is ultimately the most valuable fork. Either of these events could therefore adversely impact the value of the Shares. For example, following the DAO hack in July 2016, holders of Ether voted on-chain to reverse the hack, effectively causing a hard fork. For the days following the vote, the price of Ether rose from \$11.65 on July 15, 2016 to \$14.66 on July 21, 2016, the day after the first Ethereum Classic block was mined. A clone may also adversely affect the price of Ether at the time of announcement or adoption. For example, on November 6, 2016, Rhett Creighton, a Zcash developer, cloned the Zcash Network to launch Zclassic, a substantially identical version of the Zcash Network that eliminated the Founders' Reward. For the days following the date the first Zclassic block was mined, the price of ZEC fell from \$504.57 on November 5, 2016 to \$236.01 on November 7, 2016 in the midst of a broader sell off of ZEC beginning immediately after the Zcash Network launch on October 28, 2016. A clone may also adversely affect the price of Ether at the time of announcement or adoption.

A future fork in or clone of the Ethereum Network could adversely affect the value of the Shares or the ability of the Trust to operate.

In the event of a hard fork of the Ethereum Network, the Sponsor will, if permitted by the terms of the Trust Agreement, use its discretion to determine which network should be considered the appropriate network for the Trust's purposes, and in doing so may adversely affect the value of the Shares.

In the event of a hard fork of the Ethereum Network, the Sponsor will, as permitted by the terms of the Trust Agreement, use its discretion to determine, in good faith, which peer-to-peer network, among a group of incompatible forks of the Ethereum Network, is generally accepted as the Ethereum Network and should therefore be considered the appropriate network for the Trust's purposes. The Sponsor will base its determination on a variety of then relevant factors, including, but not limited to, the Sponsor's beliefs regarding expectations of the core developers of Ether, users, services, businesses, validators and other constituencies, as well as the actual continued acceptance of, validating power on, and community engagement with, the Ethereum Network. There is no guarantee that the Sponsor will choose the digital asset that is ultimately the most valuable fork, and the Sponsor's decision may adversely affect the value of the Shares as a result. The Sponsor may also disagree with shareholders, security vendors and the Index Provider on what is generally accepted as Ether and should therefore be considered "Ether" for the Trust's purposes, which may also adversely affect the value of the Shares as a result.

Any name change and any associated rebranding initiative by the core developers of Ether may not be favorably received by the digital asset community, which could negatively impact the value of Ether and the value of the Shares.

From time to time, digital assets may undergo name changes and associated rebranding initiatives. For example, Bitcoin Cash may sometimes be referred to as Bitcoin ABC in an effort to differentiate itself from any Bitcoin Cash hard forks, such as Bitcoin Satoshi's Vision, and in the third quarter of 2018, the team behind ZEN rebranded and changed the name of ZenCash to "Horizen." We cannot predict the impact of any name change and any associated rebranding initiative on Ether. After a name change and an associated rebranding initiative, a digital asset may not be able to achieve or maintain brand name recognition or status that is comparable to the recognition and status previously enjoyed by such digital asset. The failure of any name change and any associated rebranding initiative by a digital asset may result in such digital asset not realizing some or all of the anticipated benefits contemplated by the name change and associated rebranding initiative, and could negatively impact the value of Ether and the value of the Shares.

If the Ethereum Network is used to facilitate illicit activities, businesses that facilitate transactions in Ether could be at increased risk of criminal or civil lawsuits, or of having services cut off, which could negatively affect the price of Ether and the value of the Shares.

Digital asset networks have in the past been, and may continue to be, used to facilitate illicit activities. If the Ethereum Network is used to facilitate illicit activities, businesses that facilitate transactions in Ether could be at increased risk of potential criminal or civil lawsuits, or of having banking or other services cut off, if there is a concern that certain smart contracts on the Ethereum Network could interfere with the performance of anti-money laundering activities and economic sanctions checks. There is also a risk that digital asset trading platforms may remove Ether from their platforms as a result of these concerns. Other service providers of such businesses may also cut off services if there is a concern that the Ethereum Network is being used to facilitate crime. Any of the aforementioned occurrences could increase regulatory scrutiny of the Ethereum Network and/or adversely affect the price of Ether, the attractiveness of the Ethereum Network and an investment in the Shares of the Trust.

When the Trust and the Sponsor, acting on behalf of the Trust, sell or deliver, as applicable, Ether or, subject to NYSE Arca obtaining regulatory approval from the SEC, Incidental Rights and/or IR Virtual Currency, they generally do not transact directly with counterparties other than the Authorized Participant, a Liquidity Provider or other similarly eligible financial institutions that are subject to federal and state licensing requirements and maintain practices and policies designed to comply with AML and KYC regulations. When an Authorized Participant (subject to In-Kind Regulatory Approval) or a Liquidity Provider sources Ether in connection with the creation of the Shares or facilitates transactions in Ether at the direction of the Trust or the Sponsor, it directly faces its counterparty and, in all instances, the Authorized Participant and the Liquidity Provider follow policies and procedures designed to ensure that it knows the identity of its counterparty. The Authorized Participant is a registered broker-dealer and therefore subject to AML and countering the financing of terrorism obligations under the Bank Secrecy Act as administered by FinCEN and further overseen by the SEC and FINRA.

In accordance with its regulatory obligations, the Authorized Participant, or the Liquidity Provider, conducts customer due diligence and enhanced due diligence on its counterparties, which enables it to determine each counterparty's AML and other risks and assign an appropriate risk rating.

As part of its counterparty onboarding process, each of the Authorized Participant and the Liquidity Provider uses third-party services to screen prospective counterparties against various watch lists, including the Specially Designated Nationals List of the Treasury Department Office of Foreign Assets Control ("OFAC") and countries and territories identified as non-cooperative by the Financial Action Task Force. If the Sponsor, the Trust, the Authorized Participant or the Liquidity Provider were nevertheless to transact with such a sanctioned entity, the Sponsor, the Trust, the Authorized Participant and the Liquidity Provider would be at increased risk of potential criminal or civil lawsuits.

Risk Factors Related to the Digital Asset Markets

Recent developments in the digital asset economy have led to extreme volatility and disruption in digital asset markets, a loss of confidence in participants of the digital asset ecosystem, significant negative publicity surrounding digital assets broadly and market-wide declines in liquidity.

Since the fourth quarter of 2021 and to date, digital asset prices have fluctuated widely. This has led to volatility and disruption in the digital asset markets and financial difficulties for several prominent industry participants, including digital asset trading platforms, hedge funds and lending platforms. For example, in the first half of 2022, digital asset lenders Celsius Network LLC and Voyager Digital Ltd. and digital asset hedge fund Three Arrows Capital each declared bankruptcy. This resulted in a loss of confidence in participants in the digital asset ecosystem, negative publicity surrounding digital assets more broadly and market-wide declines in digital asset trading prices and liquidity.

Thereafter, in November 2022, FTX, the third largest Digital Asset Trading Platform by volume at the time, halted customer withdrawals amid rumors of the company's liquidity issues and likely insolvency. Shortly thereafter, FTX's CEO resigned and FTX and several affiliates of FTX filed for bankruptcy. The U.S. Department of Justice subsequently brought criminal charges, including charges of fraud, violations of federal securities laws, money laundering, and campaign finance offenses, against FTX's former CEO and others. In November 2023, FTX's former CEO was convicted of fraud and money laundering. Similar charges related to violations of anti-money laundering laws were brought in November 2023 against Binance and its former CEO. FTX is also under investigation by the SEC, the Justice Department, and the Commodity Futures Trading Commission, as well as by various regulatory authorities in the Bahamas, Europe and other jurisdictions. In response to these events, the digital asset markets have experienced extreme price volatility and declines in liquidity. In addition, several other entities in the digital asset industry filed for bankruptcy following FTX's bankruptcy filing, such as BlockFi Inc. and Genesis Global Capital, LLC ("Genesis Capital"), a subsidiary of Genesis Global Holdco, LLC ("Genesis Holdco"). The SEC also brought charges against Genesis Capital and Gemini Trust Company, LLC ("Gemini") in January 2023 for their alleged unregistered offer and sale of securities to retail investors. In October 2023, the New York Attorney General brought charges against Gemini, Genesis Capital, Genesis Asia Pacific PTE. LTD. ("Genesis Asia Pacific"), Genesis Holdco, (together with Genesis Capital and Genesis Asia Pacific, the "Genesis Entities"), Genesis Capital's former CEO, DCG, and DCG's CEO alleging violations of the New York Penal Law, the New York General Business Law and the New York Executive Law. In February 2024, the NYAG amended its complaint to expand the charges against Gemini, the Genesis Entities, Genesis Capital's former CEO, DCG, and DCG's CEO to include harm to additional investors. Also in February 2024, the Genesis Entities entered into a settlement agreement with the NYAG to resolve the NYAG's allegations against the Genesis Entities, which proposed settlement remains subject to the approval of the Bankruptcy Court of the Southern District of New York.

Furthermore, Genesis Holdco, together with certain of its subsidiaries, filed a voluntary petition for reorganization under Chapter 11 of the U.S. Bankruptcy Code in January 2023. While Genesis Holdco is not a service provider to the Trust, it is a wholly owned subsidiary of DCG, and is an affiliate of the Trust and the Sponsor.

These events have led to a substantial increase in regulatory and enforcement scrutiny of the industry as a whole and of Digital Asset Trading Platforms in particular, including from the Department of Justice, the SEC, the CFTC, the White House and Congress. For example, in June 2023, the SEC brought charges against Binance (the "Binance Complaint") and Coinbase (the "Coinbase Complaint"), two of the largest digital asset trading platforms, alleging that they solicited U.S. investors to buy, sell, and trade "crypto asset securities" through their unregistered trading platforms and operated unregistered securities exchanges, brokerages and clearing agencies. Binance subsequently announced that it would be suspending USD deposits and withdrawals on Binance.US and that it plans to delist its USD trading pairs. In addition, in November 2023, the SEC brought similar charges against Kraken (the "Kraken Complaint"), alleging that it operated as an unregistered securities exchange, brokerage and clearing agency. The Binance Complaint, the Coinbase Complaint and the Kraken Complaint have led, and may in the future lead, to further volatility in digital asset prices.

These events have also led to significant negative publicity around digital asset market participants including DCG, Genesis and DCG's other affiliated entities. This publicity could negatively impact the reputation of the Sponsor and have an adverse effect on the trading price and/or the value of the Shares. Moreover, sales of a significant number of Shares of the Trust as a result of these events could have a negative impact on the trading price of the Shares.

Further, in March 2023, the Federal Deposit Insurance Corporation ("FDIC") accepted Silicon Valley Bank and Signature Bank into receivership. Also, in March 2023, Silvergate Bank announced plans to wind down and liquidate its operations. Following these events, a number of companies that provide digital asset-related services have been unable to find banks that are willing to provide them with bank accounts and banking services. Although these events did not have a material impact on the Trust or the Sponsor, it is possible that a future

closing of a bank with which the Trust or the Sponsor has a financial relationship could subject the Trust or the Sponsor to adverse conditions and pose challenges in finding an alternative suitable bank to provide the Trust or the Sponsor with bank accounts and banking services.

These events are continuing to develop at a rapid pace and it is not possible to predict at this time all of the risks that they may pose to the Sponsor, the Trust, their affiliates and/or the Trust's third-party service providers, or on the digital asset industry as a whole.

Continued disruption and instability in the digital asset markets as these events develop, including further declines in the trading prices and liquidity of Ether, could have a material adverse effect on the value of the Shares and the Shares could lose all or substantially all of their value.

The value of the Shares relates directly to the value of Ether, the value of which may be highly volatile and subject to fluctuations due to a number of factors.

The value of the Shares relates directly to the value of the Ether held by the Trust and fluctuations in the price of Ether could adversely affect the value of the Shares. The market price of Ether may be highly volatile, and subject to a number of factors, including:

- An increase in the global Ether supply;
- Manipulative trading activity on Digital Asset Trading Platforms, which, in many cases, are largely unregulated;
- The adoption of Ether as a medium of exchange, store-of-value or other consumptive asset and the maintenance and development of the open-source software protocol of the Ethereum Network;
- Forks in the Ethereum Network;
- Investors' expectations with respect to interest rates, the rates of inflation of fiat currencies or Ether, and digital asset trading platform rates;
- Consumer preferences and perceptions of Ether specifically and digital assets generally;
- Fiat currency withdrawal and deposit policies on Digital Asset Trading Platforms;
- The liquidity of Digital Asset Markets and any increase or decrease in trading volume on Digital Asset Markets;
- Investment and trading activities of large investors that invest directly or indirectly in Ether;
- A "short squeeze" resulting from speculation on the price of Ether, if aggregate short exposure exceeds the number of Shares available for purchase;
- An active derivatives market for Ether or for digital assets generally;
- A determination that Ether is a security or changes in Ether's status under the federal securities laws;
- Monetary policies of governments, trade restrictions, currency devaluations and revaluations and regulatory measures or enforcement actions, if any, that restrict the use of Ether as a form of payment or the purchase of Ether on the Digital Asset Markets;
- Global or regional political, economic or financial conditions, events and situations, such as the novel coronavirus outbreak;
- Fees associated with processing an Ether transaction and the speed at which Ether transactions are settled;
- Interruptions in service from or closures or failures of major Digital Asset Trading Platforms;

- Decreased confidence in Digital Asset Trading Platforms due to the largely unregulated nature and lack of transparency surrounding the operations of Digital Asset Trading Platforms;
- Increased competition from other forms of digital assets or payment services; and
- The Trust's own acquisitions or dispositions of Ether, since there is no limit on the number of Ether that the Trust may acquire.

In addition, there is no assurance that Ether will maintain its value in the long or intermediate term. In the event that the price of Ether declines, the Sponsor expects the value of the Shares to decline proportionately.

The value of an Ether as represented by the Index Price or by the Trust's principal market may also be subject to momentum pricing due to speculation regarding future appreciation in value, leading to greater volatility that could adversely affect the value of the Shares. Momentum pricing typically is associated with growth stocks and other assets whose valuation, as determined by the investing public, accounts for future appreciation in value, if any. The Sponsor believes that momentum pricing of Ether has resulted, and may continue to result, in speculation regarding future appreciation in the value of Ether, inflating and making the Index Price more volatile. As a result, Ether may be more likely to fluctuate in value due to changing investor confidence, which could impact future appreciation or depreciation in the Index Price and could adversely affect the value of the Shares.

Due to the largely unregulated nature and lack of transparency surrounding the operations of Digital Asset Trading Platforms, they may experience fraud, market manipulation, business failures, security failures or operational problems, which may adversely affect the value of Ether and, consequently, the value of the Shares.

Digital Asset Trading Platforms are relatively new and, in many ways, are not subject to, or may not comply with, regulation in relevant jurisdictions in a manner similar to other regulated trading platforms, such as national securities exchanges or designated contract markets. While many prominent Digital Asset Trading Platforms provide the public with significant information regarding their ownership structure, management teams, corporate practices and regulatory compliance, many other Digital Asset Trading Platforms do not provide this information. Furthermore, while Digital Asset Trading Platforms are and may continue to be subject to federal and state licensing requirements in the United States, Digital Asset Trading Platforms do not currently appear to be subject to regulation in a similar manner as other regulated trading platforms, such as national securities exchanges or designated contract markets. As a result, the marketplace may lose confidence in Digital Asset Trading Platforms, including prominent trading platforms that handle a significant volume of Ether trading.

Many Digital Asset Trading Platforms are unlicensed, not subject to, or not in compliance with, regulation in relevant jurisdictions, operate without extensive supervision by governmental authorities, and do not provide the public with significant information regarding their ownership structure, management team, corporate practices, cybersecurity, and regulatory compliance. In particular, those located outside the United States may be subject to significantly less stringent regulatory and compliance requirements in their local jurisdictions and may take the position that they are not subject to laws and regulations that would apply to a national securities exchange or designated contract market in the United States, or may, as a practical matter, be beyond the ambit of U.S. regulators. As a result, trading activity on or reported by these Digital Asset Trading Platforms is generally significantly less regulated than trading activity on or reported by regulated U.S. securities and commodities markets, and may reflect behavior that would be prohibited in regulated U.S. trading venues. For example, in 2022 one report claimed that trading volumes on unregulated Digital Asset Trading Platforms were inflated by over 70% due to false or non-economic trades, with specific focus on unlicensed trading platforms located outside of the United States. Such reports may indicate that the Digital Asset Trading Platform Market is significantly smaller than expected and that the U.S. makes up a significantly larger percentage of the Digital Asset Trading Platform Market than is commonly understood. Nonetheless, any actual or perceived false trading in the Digital Asset Trading Platform Market, and any other fraudulent or manipulative acts and practices, could adversely affect the value of Ether and/or negatively affect the market perception of Ether, which could in turn adversely impact the value of the Shares.

The SEC has also identified possible sources of fraud and manipulation in the Digital Asset Markets generally, including, among others (1) “wash-trading”; (2) persons with a dominant position in Ether manipulating Ether pricing; (3) hacking of the Ethereum Network and trading platforms; (4) malicious control of the Ethereum Network; (5) trading based on material, non-public information (for example, plans of market participants to significantly increase or decrease their holdings in Ether, new sources of demand for Ether) or based on the dissemination of false and misleading information; (6) manipulative activity involving purported “stablecoins,” including Tether; and (7) fraud and manipulation at Digital Asset Markets. The use or presence of such acts and practices in the Digital Asset Markets could, for example, falsely inflate the volume of Ether present in the Digital Asset Markets or cause distortions in the price of Ether, among other things that could adversely affect the Trust or cause losses to shareholders. Moreover, tools to detect and deter fraudulent or manipulative trading activities, such as market manipulation, front-running of trades, and wash-trading, may not be available to or employed by Digital Asset Markets, or may not exist at all. Many Digital Asset Markets also lack certain safeguards put in place by exchanges for more traditional assets to enhance the stability of trading on the exchanges and prevent “flash crashes,” such as limit-down circuit breakers. As a result, the prices of Ether on Digital Asset Markets may be subject to larger and/or more frequent sudden declines than assets traded on more traditional exchanges.

In addition, over the past several years, some Digital Asset Trading Platforms have been closed, been subject to criminal and civil litigation and have entered into bankruptcy proceedings due to fraud and manipulative activity, business failure and/or security breaches. In many of these instances, the customers of such Digital Asset Trading Platforms were not compensated or made whole for the partial or complete losses of their account balances in such Digital Asset Trading Platforms. While smaller Digital Asset Trading Platforms are less likely to have the infrastructure and capitalization that make larger Digital Asset Trading Platforms more stable, larger Digital Asset Trading Platforms are more likely to be appealing targets for hackers and malware and their shortcomings or ultimate failures are more likely to have contagion effects on the digital asset ecosystem, and therefore may be more likely to be targets of regulatory enforcement action. For example, in February 2014, Mt. Gox, the largest Digital Asset Trading Platform at the time, halted withdrawals of Bitcoin and subsequently filed for bankruptcy protection in Japan following a hack that resulted in the loss of several hundred thousand Bitcoin. In the two weeks following the halt of Bitcoin withdrawals from Mt. Gox, the value of one Bitcoin fell on other trading platforms from around \$795 to \$578. Failure and shortcomings of large Digital Asset Trading Platforms have since continued; in January 2015, Bitstamp announced that approximately 19,000 Bitcoin had been stolen from its operational or “hot” wallets, and in August 2016, it was reported that almost 120,000 Bitcoin worth around \$78 million were stolen from Bitfinex. The value of Bitcoin and other digital assets immediately decreased over 10% following reports of the theft at Bitfinex. Regulatory enforcement actions have followed, such as in July 2017, when FinCEN assessed a \$110 million fine against BTC-E, a now defunct Digital Asset Trading Platform, for facilitating crimes such as drug sales and ransomware attacks. In addition, in December 2017, Yopian, the operator of Seoul-based digital asset trading platform Youbit, suspended digital asset trading and filed for bankruptcy following a hack that resulted in a loss of 17% of Yopian’s assets. In January 2018, the Japanese digital asset trading platform, Coincheck, was hacked, resulting in losses of approximately \$535 million, and in February 2018, the Italian digital asset trading platform, Bitgrail, was hacked, resulting in approximately \$170 million in losses. In May 2019, one of the world’s largest Digital Asset Trading Platforms, Binance, was hacked, resulting in losses of approximately \$40 million. More recently, in November 2022, FTX, another of the world’s largest Digital Asset Trading Platforms, filed for bankruptcy protection and subsequently halted customer withdrawals as well as trading on its FTX.US platform. While details and events surrounding the failure continue to develop, and it is unclear what the eventual impacts of its bankruptcy will be, it appears that fraud, security failures and operational problems all played a role in FTX’s issues. Moreover, Digital Asset Trading Platforms have been a subject of enhanced regulatory and enforcement scrutiny, and Digital Asset Markets have experienced continued instability, following the failure of FTX. In particular, in June 2023, the SEC brought the Binance Complaint and Coinbase Complaint, alleging that Binance and Coinbase operated unregistered securities exchanges, brokerages and clearing agencies. In addition, in November 2023, the SEC brought the Kraken Complaint, alleging that Kraken operated as an unregistered securities exchange, brokerage and clearing agency.

Negative perception, a lack of stability and standardized regulation in the Digital Asset Markets and/or the closure or temporary shutdown of Digital Asset Trading Platforms due to fraud, business failure, security breaches or government mandated regulation, and associated losses by customers, may reduce confidence in the Ethereum Network and result in greater volatility in the prices of Ether. Furthermore, the closure or temporary shutdown of a Digital Asset Trading Platform used in calculating the Index Price may result in a loss of confidence in the Trust's ability to determine its NAV on a daily basis. These potential consequences of such a Digital Asset Trading Platform's failure could adversely affect the value of the Shares.

Digital Asset Trading Platforms may be exposed to front-running.

Digital Asset Trading Platforms may be susceptible to "front-running," which refers to the process when someone uses technology or market advantage to get prior knowledge of upcoming transactions. Front-running is a frequent activity on centralized as well as decentralized trading platforms. By using bots functioning on a millisecond-scale timeframe, bad actors are able to take advantage of the forthcoming price movement and make economic gains at the cost of those who had introduced these transactions. The objective of a front runner is to buy tokens at a low price and later sell them at a higher price while simultaneously exiting the position. To the extent that front-running occurs, it may result in investor frustrations and concerns as to the price integrity of Digital Asset Trading Platforms and digital assets more generally.

Digital Asset Trading Platforms may be exposed to wash trading.

Digital Asset Trading Platforms may be susceptible to wash trading. Wash trading occurs when offsetting trades are entered into for other than bona fide reasons, such as the desire to inflate reported trading volumes. Wash trading may be motivated by non-economic reasons, such as a desire for increased visibility on popular websites that monitor markets for digital assets so as to improve a trading platform's attractiveness to investors who look for maximum liquidity, or it may be motivated by the ability to attract listing fees from token issuers who seek the most liquid and high-volume trading platforms on which to list their tokens. Results of wash trading may include unexpected obstacles to trade and erroneous investment decisions based on false information.

Even in the United States, there have been allegations of wash trading even on regulated venues. Any actual or perceived false trading on Digital Asset Trading Platforms, and any other fraudulent or manipulative acts and practices, could adversely affect the value of Ether and/or negatively affect the market perception of Ether.

To the extent that wash trading either occurs or appears to occur in Digital Asset Trading Platforms, investors may develop negative perceptions about Ether and the digital assets industry more broadly, which could adversely impact the price of Ether and, therefore, the price of the Shares. Wash trading also may place more legitimate Digital Asset Trading Platforms at a relative competitive disadvantage.

The lack of active trading markets for the Shares may result in losses on investors' investments at the time of disposition of Shares.

Although Shares are expected to be publicly listed and traded on the NYSE Arca, there can be no guarantee that an active trading market for the Trust will develop or be maintained. If shareholders need to sell their Shares at a time when no active market for them exists, the price shareholders receive for their Shares, assuming they are able to sell them, likely will be lower than the price that shareholders would receive if an active market did exist and, accordingly, a shareholder may suffer losses.

Possible illiquid markets may exacerbate losses or increase the variability between the Trust's NAV and its market price.

Ether is a novel asset with a limited trading history. Therefore, the markets for Ether may be less liquid and more volatile than other markets for more established products, such as futures contracts for traditional physical

commodities. It may be difficult to execute an Ether trade at a specific price when there is a relatively small volume of buy and sell orders in the Ethereum market. A market disruption can also make it more difficult to liquidate a position or find a suitable counterparty at a reasonable cost.

Market illiquidity may cause losses for the Trust. The large size of the positions that the Trust may acquire could increase the risk of illiquidity, by both making the positions more difficult to liquidate and increasing the losses incurred while trying to do so, should the Trust need to liquidate its Ether. Any type of disruption or illiquidity will potentially be exacerbated due to the fact that the Trust will only invest in Ether, which is highly concentrated.

The Index has a limited history and a failure of the Index Price could adversely affect the value of the Shares.

The Index has a limited history and the Index Price is a composite reference rate calculated using trading price data from various Digital Asset Trading Platforms chosen by the Index Provider. The Index Provider may remove or add Digital Asset Trading Platforms to the Index in the future at its discretion. For more information on the inclusion criteria for Digital Asset Trading Platforms in the Index, see “Business—Overview of the Ethereum Industry and Market—The Index and the Index Price.”

Although the Index is designed to accurately capture the market price of Ether, third parties may be able to purchase and sell Ether on public or private markets not included among the constituent Digital Asset Trading Platforms of the Index, and such transactions may take place at prices materially higher or lower than the Index Price. Moreover, there may be variances in the prices of Ether on the various Digital Asset Trading Platforms, including as a result of differences in fee structures or administrative procedures on different Digital Asset Trading Platforms. For example, based on data provided by the Index Provider, on any given day during the twelve months ended June 30, 2024, the maximum differential between the 4:00 p.m., New York time spot price of any single Digital Asset Trading Platform initially expected to be included in the Index and the Index Price was 0.48% and the average of the maximum differentials of the 4:00 p.m., New York time, spot price of each Digital Asset Trading Platform initially expected to be included in the Index and the Index Price was 0.31%. During this same period, the average differential between the 4:00 p.m., New York time, spot prices of all the Digital Asset Trading Platforms initially expected to be included in the Index and the Index Price was 0.001%. To the extent such prices differ materially from the Index Price, investors may lose confidence in the Shares’ ability to track the market price of Ether, which could adversely affect the value of the Shares.

The Index Price used to calculate the value of the Trust’s Ether may be volatile, and purchasing and selling activity in the Digital Asset Markets associated with Basket creations and redemptions may affect the Index Price and Share trading prices, adversely affecting the value of the Shares.

The price of Ether on public Digital Asset Trading Platforms has a very limited history, and during this history, Ether prices on the Digital Asset Markets more generally, and on Digital Asset Trading Platforms individually, have been volatile and subject to influence by many factors, including operational interruptions. While the Index is designed to limit exposure to the interruption of individual Digital Asset Trading Platforms, the Index Price, and the price of Ether generally, remains subject to volatility experienced by Digital Asset Trading Platforms, and such volatility could adversely affect the value of the Shares. For example, from July 1, 2019 through June 30, 2024, the ETHE Index Price, which uses a methodology identical to the Index Price, ranged from \$109.83 to \$4,776.32, with the straight average being \$1,703.32. In addition, during the twelve months ended June 30, 2024, the ETHE Index Price ranged from \$1,531.25 to \$4,033.10. The Sponsor has not observed a material difference between the ETHE Index Price and average prices from the constituent Digital Asset Trading Platforms individually or as a group. The price of Ether more generally has experienced volatility similar to the ETHE Index Price during these periods. See “Business—Overview of the Ethereum Industry and Market—Historical Ether Prices.”

Furthermore, because the number of Digital Asset Trading Platforms is limited, the Index will necessarily be comprised of a limited number of Digital Asset Trading Platforms. If a Digital Asset Trading Platform were subjected to regulatory, volatility or other pricing issues, the Index Provider would have limited ability to remove such Digital Asset Trading Platform from the Index, which could skew the price of Ether as represented by the Index. Trading on a limited number of Digital Asset Trading Platforms may result in less favorable prices and decreased liquidity of Ether and, therefore, could have an adverse effect on the value of the Shares.

Purchasing activity associated with acquiring Ether required for the creation of Baskets may increase the market price of Ether on the Digital Asset Markets, which will result in higher prices for the Shares. Alternatively, selling activity associated with sales of Ether withdrawn from the Trust in connection with the redemption of Baskets may decrease the market price of Ether on the Digital Asset Markets, which will result in lower prices for the Shares. Increases or decreases in the market price of Ether may also occur as a result of the purchasing or selling activity of other market participants. Other market participants may attempt to benefit from an increase or decrease in the market price of Ether that may result from increased purchasing or selling activity of Ether connected with the creation or redemption of Baskets. Consequently, the market price of Ether may decline immediately after Baskets are created. Decreases in the market price of Ether may also occur as a result of sales in Secondary Markets by other market participants. If the Index Price declines, the value of the Shares will generally also decline.

Competition from the emergence or growth of other digital assets or methods of investing in Ether could have a negative impact on the price of Ether and adversely affect the value of the Shares.

As of June 30, 2024, Ether was the second largest digital asset by market capitalization, as tracked by CoinMarketCap.com. As of June 30, 2024 the alternative digital assets tracked by CoinMarketCap.com had a total market capitalization of approximately \$2,313.7 billion (including the approximately \$413 billion market cap of Ether), as calculated using market prices and total available supply of each digital asset, excluding tokens pegged to other assets. In addition, many consortiums and financial institutions are also researching and investing resources into private or permissioned smart contracts platforms rather than open platforms like the Ethereum Network. Competition from the emergence or growth of alternative digital assets and smart contracts platforms, such as Solana, Avalanche or Cardano, could have a negative impact on the demand for, and price of, Ether and thereby adversely affect the value of the Shares.

In addition, some digital asset networks, including the Ethereum Network, may be the target of ill will from users of other digital asset networks. For example, in July 2016, the Ethereum Network underwent a contentious hard fork that resulted in the creation of a new digital asset network called Ethereum Classic. As a result, some users of the Ethereum Classic Network may harbor ill will toward the Ethereum Network. These users may attempt to negatively impact the use or adoption of the Ethereum Network. For additional information on the hard fork that resulted in the creation of Ethereum Classic, see “Business—Overview of the Ethereum Industry and Market—Introduction to Ether and the Ethereum Network—The DAO and Ethereum Classic.”

Investors may also invest in Ether through means other than the Shares, including through direct investments in Ether and other financial vehicles, including securities backed by or linked to Ether and digital asset financial vehicles similar to the Trust. In particular, the Trust and the Sponsor face competition with respect to the creation of competing exchange-traded spot Ether products, among other digital asset vehicles, several of which have applications pending before the SEC or that have already received SEC approval. Whether the Trust is successful in achieving its intended competitive position may be impacted by a range of factors, including the Trust’s timing in entering the market relative to competing spot Ether exchange-traded products and its fee structure relative to those competing products. The Trust’s competitors may offer a more liquid secondary market for their shares, and/or may charge a substantially lower fee than the Sponsor’s Fee or expense ratio now or in the future. If the Trust fails to grow sufficient scale due to competition, the Sponsor may have difficulty raising sufficient revenue to cover the costs associated with maintaining the Trust and such shortfalls could impact the Sponsor’s ability to properly invest in robust ongoing operations and controls of the Trust to minimize the risk of

operating events, errors, or other forms of losses to the shareholders. Furthermore, the Trust may fail to attract adequate liquidity in the secondary market due to such competition, resulting in a small number of Authorized Participants willing to make a market in the Shares, which in turn could result in the Shares trading at a significant premium or discount for extended periods. Likewise, market and financial conditions, among other conditions outside the Trust's control, may cause investors to find it more attractive to gain exposure to Ether through other vehicles, rather than the Trust.

In addition, to the extent digital asset financial vehicles other than the Trust tracking the price of Ether come to represent a significant proportion of the demand for Ether, large purchases or redemptions of the securities of these digital asset financial vehicles, or private funds holding Ether, could negatively affect the Index Price, the NAV, the NAV per Share, the value of the Shares, the Principal Market NAV and the Principal Market NAV per Share. Accordingly, there can be no assurance that the Trust will be able to achieve its intended competitive positioning relative to competitors, which could adversely affect the performance of the Trust and the value of the Shares.

Prices of Ether may be affected due to stablecoins (including Tether and U.S. Dollar Coin (“USDC”)), the activities of stablecoin issuers and their regulatory treatment.

While the Trust does not invest in stablecoins, it may nonetheless be exposed to these and other risks that stablecoins pose for the market for Ether and other digital assets. Stablecoins are digital assets designed to have a stable value over time as compared to typically volatile digital assets, and are typically marketed as being pegged to a fiat currency, such as the U.S. dollar, at a certain value. Although the prices of stablecoins are intended to be stable, in many cases their prices fluctuate, sometimes significantly. This volatility has in the past impacted the prices of certain digital assets, and has at times caused certain stablecoins to lose their “peg” to the underlying fiat currency. Stablecoins are a relatively new phenomenon, and it is impossible to know all of the risks that they could pose to participants in the digital asset markets. In addition, some have argued that some stablecoins, particularly Tether, are improperly issued without sufficient backing in a way that could cause artificial rather than genuine demand for digital assets, raising their prices. On February 17, 2021 the New York Attorney General entered into an agreement with Tether's operators, requiring them to cease any further trading activity with New York persons and pay \$18.5 million in penalties for false and misleading statements made regarding the assets backing Tether. On October 15, 2021, the CFTC announced a settlement with Tether's operators in which they agreed to pay \$42.5 million in fines to settle charges that, among others, Tether's claims that it maintained sufficient U.S. dollar reserves to back every Tether stablecoin in circulation with the “equivalent amount of corresponding fiat currency” held by Tether were untrue.

USDC is a reserve-backed stablecoin issued by Circle Internet Financial that is commonly used as a method of payment in digital asset markets, including the Ethereum market. The issuer of USDC uses the Circle Reserve Fund to hold cash, U.S. Treasury bills, notes and other obligations issued or guaranteed as to principal and interest by the U.S. Treasury, and repurchase agreements secured by such obligations or cash, which serve as reserves backing USDC stablecoins. While USDC is designed to maintain a stable value at 1 U.S. dollar at all times, on March 10, 2023, the value of USDC fell below \$1.00 (and remained below for multiple days) after Circle Internet Financial disclosed that \$3.3 billion of the USDC reserves were held at Silicon Valley Bank, which had entered FDIC receivership earlier that day. Popular stablecoins are reliant on the U.S. banking system and U.S. treasuries, and the failure of either to function normally could impede the function of stablecoins or lead to outsized redemption requests, and therefore could adversely affect the value of the Shares.

Some stablecoins have been asserted to be securities under the federal securities laws. For example, on June 5, 2023, the SEC alleged in a complaint that the stablecoin BUSD, a U.S. dollar stablecoin issued by Binance, was a “crypto asset security” and that Binance “offered and sold to U.S. investors as part of a profit-earning scheme within the Binance ecosystem.” In another example, the District Court for the Southern District of New York denied defendants' motion to dismiss an SEC complaint asserting that the stablecoin UST, a U.S. dollar stablecoin issued by Terra, is a security. Further public concern about the possible security status of

stablecoins manifested in November 2023, when the financial technology company PayPal disclosed in a filing that it had received a subpoena from the SEC relating to the PayPal USD stablecoin that requested the production of documents. A determination that a popular stablecoin is a security could lead to outsized redemption requests, and therefore could adversely affect the broader value of the Shares.

Given the role that stablecoins play in global digital asset markets, their fundamental liquidity can have a dramatic impact on the broader digital asset market, including the market for Ether. Because a large portion of the digital asset market still depends on stablecoins such as Tether and USDC, there is a risk that a disorderly de-pegging or a run on Tether or USDC could lead to dramatic market volatility in, and/or materially and adversely affect the prices of, digital assets more broadly.

Volatility in stablecoins, operational issues with stablecoins (for example, technical issues that prevent settlement), concerns about the sufficiency of any reserves that support stablecoins, or regulatory concerns about stablecoin issuers or intermediaries, such as Bitcoin spot markets, that support stablecoins, could impact individuals' willingness to trade on trading venues that rely on stablecoins and could impact the price of Ether, and in turn, an investment in the Shares.

Risk Factors Related to the Trust and the Shares

The Trust relies on third-party service providers to perform certain functions essential to the affairs of the Trust and the replacement of such service providers could pose a challenge to the safekeeping of the Trust's Ether and to the operations of the Trust.

The Trust relies on the Custodian and the Prime Broker (together, the "Custodial Entities"), the Authorized Participants and other third-party service providers to perform certain functions essential to managing the affairs of the Trust. In addition, Liquidity Providers are relied upon to facilitate the purchase and sale of Ether in connection with creations and redemptions of Shares in cash ("Cash Orders"), and the Transfer Agent and Grayscale Investments, LLC (in such capacity, the "Liquidity Engager") are relied upon to facilitate such Cash Orders. Any disruptions to a service provider's business operations, resulting from business failures, financial instability, security failures, government mandated regulation or operational problems, could have an adverse impact on the Trust's ability to access critical services and be disruptive to the operations of the Trust and require the Sponsor or the Liquidity Engager, as the case may be, to replace such service provider. Moreover, the Sponsor could decide to replace a service provider to the Trust, or the Liquidity Engager may decide to replace a Liquidity Provider, for other reasons.

If the Sponsor decides, or is required, to replace Coinbase Custody Trust Company, LLC as the custodian of the Trust's Ether, or Coinbase, Inc. as the prime broker controlling and securing the Trust's Settlement Balance, transfer of the respective maintenance responsibilities of the Vault Balance or the Settlement Balance to another party or parties will likely be complex and could subject the Trust's Ether to the risk of loss during the transfer, which could have a negative impact on the performance of the Shares or result in loss of the Trust's assets.

Moreover, the legal rights of customers with respect to digital assets held on their behalf by a third-party custodian, such as the Custodial Entities, in insolvency proceedings are currently uncertain. The Prime Broker Agreement contains an agreement by the parties to treat the digital assets credited to the Trust's Vault Balance and Settlement Balance as financial assets under Article 8 in addition to stating that the Custodian will serve as fiduciary and custodian on the Trust's behalf with respect to the Trust's Ether held in the Vault Balance, and that any Ether credited to the Settlement Balance will be treated as custodial assets.

The Custodial Entities' parent, Coinbase Global, has also stated in its most recent public securities filings that in light of the inclusion of provisions relating to Article 8 in its custody and prime broker client agreements, it believes that a court would not treat custodied digital assets as part of its general estate in the event the Custodial Entities were to experience insolvency. However, due to the novelty of digital asset custodial

arrangements courts have not yet considered this type of treatment for custodied digital assets and it is not possible to predict with certainty how they would rule in such a scenario. Moreover, the Custodian and the Prime Broker are potentially subject to different insolvency regimes and there is no assurance that the digital assets credited to the Trust's Settlement Balance would be treated similarly to those credited to the Trust's Vault Balance in an insolvency, notwithstanding the rights and obligations conferred under the Prime Broker Agreement or Coinbase Global's views regarding the treatment of such assets under Article 8. In the event that the Custodian or the Prime Broker and/or Coinbase Global became subject to insolvency proceedings and a court were to rule that the custodied digital assets were part of the Custodian's, the Prime Broker's and/or Coinbase Global's general estate and not the property of the Trust, then the Trust would be treated as a general unsecured creditor in such insolvency proceedings and the Trust would be subject to the loss of all or a significant portion of its assets.

In addition, the Custodian is a fiduciary under § 100 of the New York Banking Law and a qualified custodian for purposes of Rule 206(4)-2(d)(6) under the Investment Advisers Act and is licensed to custody the Trust's Ether in trust on the Trust's behalf. However, the SEC has recently released proposed amendments to Rule 206(4)-2 that, if enacted as proposed, would amend the definition of a "qualified custodian" under Rule 206(4)-2(d)(6). Executive officers of the Custodian's parent company have made public statements indicating that the Custodian will remain a qualified custodian under the proposed SEC rule, if enacted as currently proposed. However, there can be no assurance that the Custodian would continue to qualify as a "qualified custodian" under a final rule.

To the extent that Sponsor is not able to find a suitable party willing to serve as custodian, the Sponsor may be required to terminate the Trust and liquidate the Trust's Ether. In addition, to the extent that the Sponsor finds a suitable party and must enter into a modified or separate custody agreement that is less favorable for the Trust or Sponsor and/or transfer the Trust's assets in a relatively short time period, the safekeeping of the Trust's Ether may be adversely affected, which may in turn adversely affect value of the Shares. Likewise, if the Sponsor and/or Grayscale Investments, LLC is required to replace any other service provider, they may not be able to find a party willing to serve in such capacity in a timely manner or at all. If the Sponsor decides, or is required, to replace an Authorized Participant and/or if the Liquidity Engager decides, or is required, to replace a Liquidity Provider, this could negatively impact the Trust's ability to create new Shares, which would impact the Shares' liquidity and could have a negative impact on the value of the Shares.

The amount of the Trust's assets represented by each Share will decline over time as the Trust pays the Sponsor's Fee and Additional Trust Expenses, and as a result, the value of the Shares may decrease over time.

The Sponsor's Fee accrues daily in U.S. dollars at an annual rate based on the NAV Fee Basis Amount, which is based on the NAV of the Trust, and is paid to the Sponsor in Ether. See "Business—Expenses; Sales of Ether—Disposition of Ether" and "Business—Expenses; Sales of Ether—Hypothetical Expense Example." As a result, the amount of Trust's assets represented by each Share declines as the Trust pays the Sponsor's Fee (or sells Ether in order to raise cash to pay any Additional Trust Expenses), which may cause the Shares to decrease in value over time or dampen any increase in value.

The value of the Shares may be influenced by a variety of factors unrelated to the value of Ether.

The value of the Shares may be influenced by a variety of factors unrelated to the price of Ether and the Digital Asset Trading Platforms included in the Index that may have an adverse effect on the value of the Shares. These factors include the following factors:

- Unanticipated problems or issues with respect to the mechanics of the Trust's operations and the trading of the Shares may arise, in particular due to the fact that the mechanisms and procedures governing the creation and offering of the Shares and storage of Ether have been developed specifically for this product;

- The Trust could experience difficulties in operating and maintaining its technical infrastructure, including in connection with expansions or updates to such infrastructure, which are likely to be complex and could lead to unanticipated delays, unforeseen expenses and security vulnerabilities;
- The Trust could experience unforeseen issues relating to the performance and effectiveness of the security procedures used to protect the Vault Balance, or the security procedures may not protect against all errors, software flaws or other vulnerabilities in the Trust’s technical infrastructure, which could result in theft, loss or damage of its assets; or
- Although the Ethereum Network itself does not have any privacy enhancing features at this time, if any such features are introduced to the Ethereum Network in the future, or if protocols built on top of the Ethereum Network introduce such privacy enhancing features, such as Tornado Cash, a digital asset protocol designed to obfuscate blockchain transactions, service providers may decide to terminate their relationships with the Trust due to concerns that the introduction of privacy enhancing features to the Ethereum Network may increase the potential for Ether to be used to facilitate crime, exposing such service providers to potential reputational harm, sanctions or other restrictions. See “—Risk Factors Related to the Regulation of Digital Assets, the Trust and the Shares—Regulatory changes or actions by the U.S. Congress or any U.S. federal or state agencies may affect the value of the Shares or restrict the use of Ether, validating activity or the operation of the Ethereum Network or the Digital Asset Markets in a manner that adversely affects the value of the Shares.”

Any of these factors could affect the value of the Shares, either directly or indirectly through their effect on the Trust’s assets.

Shareholders do not have the protections associated with ownership of shares in an investment company registered under the Investment Company Act or the protections afforded by the CEA.

The Investment Company Act is designed to protect investors by preventing insiders from managing investment companies to their benefit and to the detriment of public investors, such as: the issuance of securities having inequitable or discriminatory provisions; the management of investment companies by irresponsible persons; the use of unsound or misleading methods of computing earnings and asset value; changes in the character of investment companies without the consent of investors; and investment companies from engaging in excessive leveraging. To accomplish these ends, the Investment Company Act requires the safekeeping and proper valuation of fund assets, restricts greatly transactions with affiliates, limits leveraging, and imposes governance requirements as a check on fund management.

The Trust is not a registered investment company under the Investment Company Act, and the Sponsor believes that the Trust is not required to register under such act. Consequently, shareholders do not have the regulatory protections provided to investors in investment companies.

The Trust will not hold or trade in commodity interests regulated by the CEA, as administered by the CFTC. Furthermore, the Sponsor believes that the Trust is not a commodity pool for purposes of the CEA, and that neither the Sponsor nor the Trustee is subject to regulation by the CFTC as a commodity pool operator or a commodity trading adviser in connection with the operation of the Trust. Consequently, shareholders will not have the regulatory protections provided to investors in CEA-regulated instruments or commodity pools.

As the Sponsor and its management have limited history of operating investment vehicles like the Trust, their experience may be inadequate or unsuitable to manage the Trust.

The past performances of the Sponsor’s management in other investment vehicles, including their experiences in the digital asset and venture capital industries, are no indication of their ability to manage an investment vehicle such as the Trust. If the experience of the Sponsor and its management is inadequate or unsuitable to manage an investment vehicle such as the Trust, the operations of the Trust may be adversely affected.

Furthermore, the Sponsor is currently engaged in the management of other investment vehicles which could divert their attention and resources. If the Sponsor were to experience difficulties in the management of such other investment vehicles that damaged the Sponsor or its reputation, it could have an adverse impact on the Sponsor's ability to continue to serve as Sponsor for the Trust.

Security threats to the Trust's Vault Balance or Settlement Balance could result in the halting of Trust operations, including the creation and redemption of Baskets, and a loss of Trust assets or damage to the reputation of the Trust, each of which could result in a reduction in the value of the Shares.

Security breaches, computer malware and computer hacking attacks have been a prevalent concern in relation to digital assets. The Sponsor believes that the Trust's Ether held in the Vault Balance, as well as the Trust's Ether held temporarily in the Settlement Balance, will be an appealing target to hackers or malware distributors seeking to destroy, damage or steal the Trust's Ether and will only become more appealing as the Trust's assets grow. To the extent that the Trust, the Sponsor or the Custodial Entities are unable to identify and mitigate or stop new security threats or otherwise adapt to technological changes in the digital asset industry, the Trust's Ether may be subject to theft, loss, destruction or other attack.

The Sponsor believes that the security procedures in place for the Trust, including, but not limited to, offline storage, or cold storage, for a substantial portion of the Trust's Ether, multiple encrypted private key "shards", usernames, passwords and 2-step verification, are reasonably designed to safeguard the Trust's Ether. Nevertheless, the security procedures cannot guarantee the prevention of any loss due to a security breach, software defect or act of God that may be borne by the Trust. Additionally, because a portion of the Trust's Ether from time to time will be held in hot storage, such Ether will be more vulnerable to a potential hack or other cyberattack that could lead to a loss of Trust assets.

The security procedures and operational infrastructure may be breached due to the actions of outside parties, error or malfeasance of an employee of the Sponsor, a Custodial Entity, or otherwise, and, as a result, an unauthorized party may obtain access to an Account, the relevant private keys (and therefore Ether) or other data of the Trust. Additionally, outside parties may attempt to fraudulently induce employees of the Sponsor or a Custodial Entity to disclose sensitive information in order to gain access to the Trust's infrastructure. As the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently, or may be designed to remain dormant until a predetermined event and often are not recognized until launched against a target, the Sponsor and the Custodial Entities may be unable to anticipate these techniques or implement adequate preventative measures. Moreover, the Custodial Entities will not be liable for any claims or losses arising out of or relating to the acts and/or omissions of any unauthorized third parties, except to the extent such losses are caused by a Custodial Entity's negligence, fraud or willful misconduct.

An actual or perceived breach of the accounts associated with the Trust's Vault Balance and Settlement Balance (the "Accounts") could harm the Trust's operations, result in loss of the Trust's assets, damage the Trust's reputation and negatively affect the market perception of the effectiveness of the Trust, all of which could in turn reduce demand for the Shares, resulting in a reduction in the value of the Shares. The Trust may also cease operations, the occurrence of which could similarly result in a reduction in the value of the Shares.

Ether transactions are irrevocable and stolen or incorrectly transferred Ether may be irretrievable. As a result, any incorrectly executed Ether transactions could adversely affect the value of the Shares.

Ether transactions are typically not reversible without the consent and active participation of the recipient of the transaction. Once a transaction has been verified and recorded in a block that is added to the Blockchain, an incorrect transfer or theft of Ether generally will not be reversible and the Trust may not be capable of seeking compensation for any such transfer or theft. Although the Trust's transfers of Ether will regularly be made to or from the Vault Balance, it is possible that, through computer or human error, or through theft or criminal action, the Trust's Ether could be transferred from the Trust's Vault Balance in incorrect amounts or to unauthorized third parties, or to uncontrolled accounts.

Such events have occurred in connection with digital assets in the past. For example, in September 2014, the Chinese Digital Asset Trading Platform Huobi announced that it had sent approximately 900 Bitcoins and 8,000 Litecoins (worth approximately \$400,000 at the prevailing market prices at the time) to the wrong customers. To the extent that the Trust is unable to seek a corrective transaction with such third party or is incapable of identifying the third party which has received the Trust's Ether through error or theft, the Trust will be unable to revert or otherwise recover incorrectly transferred Ether. The Trust will also be unable to convert or recover its Ether transferred to uncontrolled accounts. To the extent that the Trust is unable to seek redress for such error or theft, such loss could adversely affect the value of the Shares.

The lack of full insurance and shareholders' limited rights of legal recourse against the Trust, Trustee, Sponsor, Transfer Agent and Custodial Entities expose the Trust and its shareholders to the risk of loss of the Trust's Ether for which no person or entity is liable.

The Trust is not a banking institution or otherwise a member of the FDIC or Securities Investor Protection Corporation ("SIPC") and, therefore, deposits held with or assets held by the Trust are not subject to the protections enjoyed by depositors with FDIC or SIPC member institutions. In addition, neither the Trust nor the Sponsor insure the Trust's Ether.

While the Custodian is required under the Prime Broker Agreement to maintain insurance coverage that is commercially reasonable for the custodial services it provides, and the Custodial Entities have advised the Sponsor that they maintain insurance at commercially reasonable amounts for the digital assets custodied on behalf of clients, including the Trust's Ether, resulting from theft, shareholders cannot be assured that the Custodian or the Prime Broker will maintain adequate insurance or that such coverage will cover losses with respect to the Trust's Ether. Moreover, while the Custodian maintains certain capital reserve requirements depending on the assets under custody and to the extent required by applicable law, and such capital reserves may provide additional means to cover client asset losses, the Sponsor does not know the amount of such capital reserves, and neither the Trust nor the Sponsor have access to such information. The Trust cannot be assured that the Custodial Entities will maintain capital reserves sufficient to cover losses with respect to the Trust's digital assets. Furthermore, Coinbase has represented in securities filings that the total value of crypto assets in its possession and control is significantly greater than the total value of insurance coverage that would compensate Coinbase in the event of theft or other loss of funds.

Furthermore, the Custodial Entities' aggregate maximum liability with respect to breach of their obligations under the Prime Broker Agreement will not exceed the greater of: (i) the value of the Ether or cash involved in the event, including but not limited to transaction(s) or deliveries(s), giving rise to such liability at the time of the event giving rise to such liability; (ii) the aggregate amount of fees paid by the Trust to the Custodial Entities in respect of the Custodial and Prime Broker Services in the 12-month period prior to the event giving rise to such liability; or (iii) five million U.S. dollars. The Custodian's total liability under the Prime Broker Agreement will not exceed the greater of: (i) the aggregate amount of fees paid by the Trust to the Custodian in respect of the custodial services in the 12-month period prior to the event giving rise to such liability; or (ii) the value of the Ether on deposit in the Vault Balance at the time of the events giving rise to the liability occurred, the value of which will be determined in accordance with the Prime Broker Agreement.

In addition, the Custodian's maximum liability in respect of each cold storage address that holds Ether is limited to the "Cold Storage Threshold" of \$100 million. The Sponsor monitors the value of Ether deposited in cold storage addresses for whether the Cold Storage Threshold has been met by determining the U.S. dollar value of Ether deposited in each cold storage address on business days. Although the Cold Storage Threshold has never been met for a given cold storage address, to the extent it is met the Trust would not have a claim against the Custodian with respect to the digital assets held in such address to the extent the value exceeds the Cold Storage Threshold. The Custodial Entities and the Trust are not liable to each other for any special, incidental, indirect, punitive, or consequential damages, whether or not the other party had been advised of such losses or knew or should have known of the possibility of such damages.

The shareholders' recourse against the Sponsor and the Trust's other service providers for the services they provide to the Trust, including those relating to the provision of instructions relating to the movement of Ether, is limited. Consequently, a loss may be suffered with respect to the Trust's Ether that is not covered by insurance and for which no person is liable in damages. As a result, the recourse of the Trust or the shareholders, under New York law, is limited.

The Trust may be required, or the Sponsor may deem it appropriate, to terminate and liquidate at a time that is disadvantageous to shareholders.

Pursuant to the terms of the Trust Agreement, the Trust is required to dissolve under certain circumstances. In addition, the Sponsor may, in its sole discretion, dissolve the Trust for a number of reasons, including if the Sponsor determines, in its sole discretion, that it is desirable or advisable for any reason to discontinue the affairs of the Trust. For example, the Sponsor expects that it may be advisable to discontinue the affairs of the Trust if a federal court upholds an allegation that Ether is a security under the federal securities laws, among other reasons. See "Business—Description of the Trust Agreement—Termination of the Trust."

If the Trust is required to terminate and liquidate, or the Sponsor determines in accordance with the terms of the Trust Agreement that it is appropriate to terminate and liquidate the Trust, such termination and liquidation could occur at a time that is disadvantageous to shareholders, such as when the Actual Exchange Rate of Ether is lower than the Index Price was at the time when shareholders purchased their Shares. In such a case, when the Trust's Ether are sold as part of its liquidation, the resulting proceeds distributed to shareholders will be less than if the Actual Exchange Rate were higher at the time of sale. See "Business—Description of the Trust Agreement—Termination of the Trust" for more information about the termination of the Trust, including when the termination of the Trust may be triggered by events outside the direct control of the Sponsor, the Trustee or the shareholders.

The Trust Agreement includes provisions that limit shareholders' voting rights and restrict shareholders' right to bring a derivative action.

Under the Trust Agreement, shareholders have limited voting rights and the Trust will not have regular shareholder meetings. Shareholders take no part in the management or control of the Trust. Accordingly, shareholders do not have the right to authorize actions, appoint service providers or take other actions as may be taken by shareholders of other trusts or companies where shares carry such rights. The shareholders' limited voting rights give almost all control under the Trust Agreement to the Sponsor and the Trustee. The Sponsor may take actions in the operation of the Trust that may be adverse to the interests of shareholders and may adversely affect the value of the Shares.

Moreover, pursuant to the terms of the Trust Agreement, shareholders' statutory right under Delaware law to bring a derivative action (i.e., to initiate a lawsuit in the name of the Trust in order to assert a claim belonging to the Trust against a fiduciary of the Trust or against a third party when the Trust's management has refused to do so) is restricted. Under Delaware law, a shareholder may bring a derivative action if the shareholder is a shareholder at the time the action is brought and either (i) was a shareholder at the time of the transaction at issue or (ii) acquired the status of shareholder by operation of law or the Trust's governing instrument from a person who was a shareholder at the time of the transaction at issue. Additionally, Section 3816(e) of the Delaware Statutory Trust Act specifically provides that a "beneficial owner's right to bring a derivative action may be subject to such additional standards and restrictions, if any, as are set forth in the governing instrument of the statutory trust, including, without limitation, the requirement that beneficial owners owning a specified beneficial interest in the statutory trust join in the bringing of the derivative action." In addition to the requirements of applicable law and in accordance with Section 3816(e), the Trust Agreement provides that no shareholder will have the right, power or authority to bring or maintain a derivative action, suit or other proceeding on behalf of the Trust unless two or more shareholders who (i) are not "Affiliates" (as defined in the Trust Agreement and below) of one another and (ii) collectively hold at least 10.0% of the outstanding Shares join in the bringing or

maintaining of such action, suit or other proceeding. This provision applies to any derivative actions brought in the name of the Trust other than claims under the federal securities laws and the rules and regulations thereunder.

Due to this additional requirement, a shareholder attempting to bring or maintain a derivative action in the name of the Trust will be required to locate other shareholders with which it is not affiliated and that have sufficient Shares to meet the 10.0% threshold based on the number of Shares outstanding on the date the claim is brought and thereafter throughout the duration of the action, suit or proceeding. This may be difficult and may result in increased costs to a shareholder attempting to seek redress in the name of the Trust in court. Moreover, if shareholders bringing a derivative action, suit or proceeding pursuant to this provision of the Trust Agreement do not hold 10.0% of the outstanding Shares on the date such an action, suit or proceeding is brought, or such shareholders are unable to maintain Share ownership meeting the 10.0% threshold throughout the duration of the action, suit or proceeding, such shareholders' derivative action may be subject to dismissal. As a result, the Trust Agreement limits the likelihood that a shareholder will be able to successfully assert a derivative action in the name of the Trust, even if such shareholder believes that he or she has a valid derivative action, suit or other proceeding to bring on behalf of the Trust. See "Business—Description of the Trust Agreement—The Sponsor—Fiduciary and Regulatory Duties of the Sponsor" for more detail.

The Sponsor is solely responsible for determining the value of the NAV and NAV per Share and any errors, discontinuance or changes in such valuation calculations may have an adverse effect on the value of the Shares.

The Sponsor will determine the Trust's NAV and NAV per Share on a daily basis as soon as practicable after 4:00 p.m., New York time, on each business day. The Sponsor's determination is made utilizing data from the operations of the Trust and the Index Price, calculated at 4:00 p.m., New York time, on such day. If the Sponsor determines in good faith that the Index does not reflect an accurate Ether price, then the Sponsor will employ an alternative method to determine the Index Price under the cascading set of rules set forth in "Business—Overview of the Ethereum Industry and Market—The Index and the Index Price—Determination of the Index Price When Index Price is Unavailable." In the context of applying such rules, the Sponsor may determine in good faith that the alternative method applied does not reflect an accurate Ether price and apply the next alternative method under the cascading set of rules. If the Sponsor determines after employing all of the alternative methods that the Index Price does not reflect an accurate Ether price, the Sponsor will use its best judgment to determine a good faith estimate of the Index Price. There are no predefined criteria to make a good faith assessment in these scenarios and such decisions will be made by the Sponsor in its sole discretion. The Sponsor may calculate the Index Price in a manner that ultimately inaccurately reflects the price of Ether. To the extent that the NAV, NAV per Share or the Index Price are incorrectly calculated, the Sponsor may not be liable for any error and such misreporting of valuation data could adversely affect the value of the Shares and investors could suffer a substantial loss on their investment in the Trust. Moreover, the terms of the Trust Agreement do not prohibit the Sponsor from changing the Index Price used to calculate the NAV and NAV per Share of the Trust. Any such change in the Index Price could affect the value of the Shares and investors could suffer a substantial loss on their investment in the Trust.

Extraordinary expenses resulting from unanticipated events may become payable by the Trust, adversely affecting the value of the Shares.

In consideration for the Sponsor's Fee, the Sponsor has contractually assumed all ordinary-course operational and periodic expenses of the Trust. See "Business—Expenses; Sales of Ether." Extraordinary expenses incurred by the Trust, such as taxes and governmental charges; expenses and costs of any extraordinary services performed by the Sponsor (or any other service provider) on behalf of the Trust to protect the Trust or the interests of shareholders; or extraordinary legal fees and expenses are not assumed by the Sponsor and are borne by the Trust. The Sponsor will cause the Trust to either (i) sell Ether held by the Trust or (ii) deliver Ether in-kind to the Sponsor to pay Trust expenses not assumed by the Sponsor on an as-needed basis. Accordingly, the Trust may be required to sell or otherwise dispose of Ether at a time when the trading prices for those assets are depressed.

The sale or other disposition of assets of the Trust in order to pay extraordinary expenses could have a negative impact on the value of the Shares for several reasons. These include the following factors:

- The Trust is not actively managed and no attempt will be made to protect against or to take advantage of fluctuations in the prices of Ether. Consequently, if the Trust incurs expenses in U.S. dollars, the Trust's Ether may be sold at a time when the values of the disposed assets are low, resulting in a negative impact on the value of the Shares.
- Because the Trust does not generate any income, every time that the Trust pays expenses, it will deliver Ether to the Sponsor or sell Ether. Any sales of the Trust's assets in connection with the payment of expenses will decrease the amount of the Trust's assets represented by each Share each time its assets are sold or transferred to the Sponsor.
- Assuming that the Trust is a grantor trust for U.S. federal income tax purposes, each delivery or sale of Ether by the Trust to pay the Sponsor's Fee and/or Additional Trust Expenses will be a taxable event to beneficial owners of Shares. Thus, the Trust's payment of expenses could result in beneficial owners of Shares incurring tax liability without an associated distribution from the Trust. Any such tax liability could adversely affect an investment in the Shares. See "Material U.S. Federal Income Tax Consequences."

The Trust's delivery or sale of Ether to pay expenses or other operations of the Trust could result in shareholders' incurring tax liability without an associated distribution from the Trust.

Assuming that the Trust is treated as a grantor trust for U.S. federal income tax purposes, each delivery of Ether by the Trust to pay the Sponsor's Fee or other expenses and each sale of Ether by the Trust to pay Additional Trust Expenses will be a taxable event to beneficial owners of Shares. Thus, the Trust's payment of expenses could result in beneficial owners of Shares incurring tax liability without an associated distribution from the Trust. Any such tax liability could adversely affect an investment in the Shares. See "Material U.S. Federal Income Tax Consequences."

The value of the Shares will be adversely affected if the Trust is required to indemnify the Sponsor, the Trustee, the Transfer Agent or the Custodian under the Trust Documents.

Under the Trust Documents, each of the Sponsor, the Trustee, the Transfer Agent and the Custodian has a right to be indemnified by the Trust for certain liabilities or expenses that it incurs without negligence, bad faith or willful misconduct on its part. Therefore, the Sponsor, Trustee, Transfer Agent or the Custodian may require that the assets of the Trust be sold in order to cover losses or liability suffered by it. Any sale of that kind would reduce the NAV of the Trust and the value of the Shares.

Intellectual property rights claims may adversely affect the Trust and the value of the Shares.

The Sponsor is not aware of any intellectual property rights claims that may prevent the Trust from operating and holding Ether. However, third parties may assert intellectual property rights claims relating to the operation of the Trust and the mechanics instituted for the investment in, holding of and transfer of Ether. Regardless of the merit of an intellectual property or other legal action, any legal expenses to defend or payments to settle such claims would be extraordinary expenses that would be borne by the Trust through the sale or transfer of its Ether. Additionally, a meritorious intellectual property rights claim could prevent the Trust from operating and force the Sponsor to terminate the Trust and liquidate its Ether. As a result, an intellectual property rights claim against the Trust could adversely affect the value of the Shares.

Pandemics, epidemics and other natural and man-made disasters could negatively impact the value of the Trust's holdings and/or significantly disrupt its affairs.

Pandemics, epidemics and other natural and man-made disasters could negatively impact demand for digital assets, including Ether, and disrupt the operations of many businesses, including the businesses of the Trust's

service providers. For example, the COVID-19 pandemic had serious adverse effects on the economies and financial markets of many countries, resulting in increased volatility and uncertainty in economies and financial markets of many countries and in the Digital Asset Markets. Moreover, governmental authorities and regulators throughout the world have in the past responded to major economic disruptions, including as a result of the COVID-19 pandemic, with a variety of fiscal and monetary policy changes, such as quantitative easing, new monetary programs and lower interest rates. An unexpected or quick reversal of any such policies, or the ineffectiveness of such policies, could increase volatility in economies and financial market generally, and could specifically increase volatility in the Digital Asset Markets, which could adversely affect the value of Ether and the value of the Shares.

In addition, pandemics, epidemics and other natural and man-made disasters could disrupt the operations of many businesses. For example, in response to the COVID-19 pandemic, many governments imposed travel restrictions and prolonged, closed international borders and enhanced health screenings at ports of entry and elsewhere, which disrupted businesses around the world. Any disruptions to the Sponsor's, the Trust's or the Trust's service providers' business operations resulting from business restrictions, quarantines or restrictions on the ability of personnel to perform their jobs as a result of any future pandemic, epidemic or other disaster could have an adverse impact on the Trust's ability to access critical services and could be disruptive to the affairs of the Trust.

The lack of ability to facilitate in-kind creations and redemptions of Shares could have adverse consequences for the Trust.

The Trust is currently only able to accept Cash Orders, which means that an Authorized Participant will deposit cash into, or accept cash from, the Cash Account in connection with the creation and redemption of Baskets, and a Liquidity Provider will obtain or receive Ether in exchange for cash in connection with such order. However, and in common with other spot digital asset exchange-traded products, the Trust is not at this time able to create and redeem Shares via in-kind transactions with Authorized Participants in exchange for Ether.

Authorized participants must be registered broker-dealers. Registered broker-dealers are subject to various requirements of the federal securities laws and rules, including financial responsibility rules such as the customer protection rule, the net capital rule and recordkeeping requirements. There has yet to be definitive regulatory guidance on whether and how registered broker-dealers can comply with these rules with regard to transacting in or holding spot Ether. Until further regulatory clarity emerges regarding whether registered broker-dealers can hold and deal in Ether under such rules, there is a risk that registered broker-dealers participating in the in-kind creation or redemption of Shares for Ether may be unable to demonstrate compliance with such requirements. While compliance with these requirements would be the broker-dealer's responsibility, a national securities exchange is required to enforce compliance by its member broker-dealers with applicable federal securities law and rules. As a result, the SEC is unlikely to permit an exchange to adopt listing rules for a product if it is not clear that the exchange's members would be able to comply with applicable rules when transacting in the product as designed. To the extent further regulatory clarity emerges, the Sponsor expects NYSE Arca to seek the necessary regulatory approval to amend its listing rules to permit the Trust to create and redeem Shares through In-Kind Orders, in which Authorized Participants or their designees would deposit Ether directly with the Trust or receive Ether directly from the Trust. However, there can be no assurance as to when such regulatory clarity will emerge, or when NYSE Arca will seek or obtain this approval, if at all.

To the knowledge of the Sponsor, exchange-traded products for all spot-market commodities other than Bitcoin and Ether, such as gold and silver, employ in-kind creations and redemptions with the underlying asset. The Sponsor believes that it is generally more efficient, and therefore less costly, for spot commodity exchange-traded products to utilize in-kind orders rather than cash orders, because there are fewer steps in the process and therefore there is less operational risk involved when an authorized participant can manage the buying and selling of the underlying asset itself, rather than depend on an unaffiliated party such as the issuer or sponsor of the exchange-traded product. As such, a spot commodity exchange-traded product that only employs cash creations

and redemptions and does not permit in-kind creations and redemptions is a novel product that has not been tested, and could be impacted by any resulting operational inefficiencies.

In particular, the Trust's inability to facilitate in-kind creations and redemptions could result in the exchange-traded product arbitrage mechanism failing to function as efficiently as it otherwise would, leading to the potential for the Shares to trade at premiums or discounts to the NAV per Share, and such premiums or discounts could be substantial. Furthermore, if Cash Orders are unavailable, either due to the Sponsor's decision to reject or suspend such orders or otherwise, it will not be possible for Authorized Participants to redeem or create Shares, in which case the arbitrage mechanism would be unavailable. This could result in impaired liquidity for the Shares, wider bid/ask spreads in secondary trading of the Shares and greater costs to investors and other market participants. In addition, the Trust's inability to facilitate in-kind creations and redemptions, and resulting reliance on cash creations and redemptions, could cause the Sponsor to halt or suspend the creation of redemption of Shares during times of market volatility or turmoil, among other consequences.

Even if In-Kind Regulatory Approval were obtained, there can be no assurance that in-kind creations or redemptions of the Shares will be available in the future, or that broker-dealers would be willing to serve as Authorized Participants with respect to the in-kind creation and redemption of Shares. Any of these factors could adversely affect the performance of the Trust and the value of the Shares.

Shareholders will not receive the benefits of any forks or airdrops.

The Ethereum Network operates using open-source protocols, meaning that any user can download the software, modify it and then propose that the users and validators of Ethereum adopt the modification. When a modification is introduced and a substantial majority of users and validators consent to the modification, the change is implemented and the network remains uninterrupted. However, if less than a substantial majority of users and validators consent to the proposed modification, and the modification is not compatible with the software prior to its modification, the consequence would be what is known as a "hard fork" of the Ethereum Network, with one group running the pre-modified software and the other running the modified software. The effect of such a fork would be the existence of two versions of Ethereum running in parallel, yet lacking interchangeability. In addition to forks, a digital asset may become subject to a similar occurrence known as an "airdrop." In an airdrop, the promoters of a new digital asset announce to holders of another digital asset that such holders will be entitled to claim a certain amount of the new digital asset, generally for free, based on the fact that they hold such other digital asset. We refer to the right to receive any benefits arising from a fork, airdrop or similar event as an "Incidental Right" and any such virtual currency acquired through an Incidental Right as "IR Virtual Currency."

With respect to any fork, airdrop or similar event, the Sponsor will cause the Trust to irrevocably abandon the Incidental Rights and any IR Virtual Currency associated with such event. As such, shareholders will not receive the benefits of any forks, and the Trust is not able to participate in any airdrop.

In the event the Sponsor seeks to change the Trust's policy with respect to Incidental Rights or IR Virtual Currency, an application would need to be filed with the SEC by NYSE Arca seeking approval to amend its listing rules to permit the Trust to distribute the Incidental Rights or IR Virtual Currency in-kind to an agent of the shareholders for resale by such agent. However, there can be no assurance as to whether or when the Sponsor would make such a decision, or when NYSE Arca will seek or obtain this approval, if at all.

Even if such regulatory approval is sought and obtained, shareholders may not receive the benefits of any forks, the Trust may not choose, or be able, to participate in an airdrop, and the timing of receiving any benefits from a fork, airdrop or similar event is uncertain. Any inability to recognize the economic benefit of a hard fork or airdrop could adversely affect the value of the Shares.

The Trust is not permitted to engage in Staking, which could negatively affect the value of the Shares.

At this time, none of the Trust, the Sponsor, the Custodian, nor any other person associated with the Trust may, directly or indirectly, engage in Staking of the Trust's Ether on behalf of the Trust, meaning no action will be taken pursuant to which any portion of the Trust's Ether becomes used in Ethereum proof-of-stake validation or is used to earn additional Ether or generate income or other earnings, and there can be no assurance that the Trust, the Sponsor, the Custodian or any other person associated with the Trust will ever be permitted to engage in Staking of the Trust's Ether or such income generating activity in the future.

To the extent (i) the Trust were to amend its Trust Agreement to permit Staking of the Trust's Ether and (ii) NYSE Arca were to seek and obtain a rule change permitting the listing of a spot Ether investment vehicle engaged in Staking, in the future the Trust may seek to establish a program to use its Ether in the proof-of-stake validation mechanism of the Ethereum Network to receive rewards comprising additional Ether in respect of a portion of its Ether holdings. However, as long as such conditions and requirements have not been satisfied, the Trust will not use its Ether in the proof-of-stake validation mechanism of the Ethereum Network to receive rewards comprising additional Ether in respect of its Ether holdings. The current inability of the Trust to use its Ether in Staking and receive such rewards could place the Shares at a comparative disadvantage relative to an investment in Ether directly or through a vehicle that is not subject to such a prohibition, which could negatively affect the value of the Shares.

Coinbase Global serves as the Ether custodian and prime execution agent for several competing exchange-traded Ether products, which could adversely affect the Trust's operations and ultimately the value of the Shares.

The Prime Broker and Custodian are both affiliates of Coinbase Global. As of the date hereof, Coinbase Global is the largest publicly traded digital asset company in the world by market capitalization and is also the largest digital asset custodian in the world by assets under custody. By virtue of its leading market position and capabilities, and the relatively limited number of institutionally-capable providers of digital asset brokerage and custody services, Coinbase Global serves as the Ether custodian and prime execution agent for several competing exchange-traded Ether products. Therefore, Coinbase Global plays a critical role in supporting the U.S. spot Ether exchange-traded product ecosystem, and its size and market share create the risk that Coinbase Global may fail to properly resource its operations to adequately support all such products that use its services, which could harm the Trust, the shareholders and the value of the Shares. If Coinbase Global were to favor the interests of certain products over others, it could result in inadequate attention or comparatively unfavorable commercial terms to less favored products, which could adversely affect the Trust's operations and ultimately the value of the Shares.

Certain of the Authorized Participants engaged by the Trust serve in a similar capacity for several competing exchange-traded Ether products, which could adversely affect the arbitrage mechanism, the Trust's operations, the performance of the Trust and ultimately the value of the Shares.

Certain of the Authorized Participants engaged by the Trust serve in a similar capacity for several competing exchange-traded Ether products. As a result, the Authorized Participants may be unable to adequately support all of the exchange-traded Ether products that use their respective services. This risk may also be exacerbated as a consequence of the price and volatility of Ether, as well as the number of Ether that is required to create or redeem Shares of the Trust. Moreover, the Authorized Participants may choose to facilitate creations and redemptions for competing products rather than for the Trust, including as a result of, among other things, how effectively the arbitrage mechanism of the Trust functions, the liquidity for the Shares, the bid/ask spreads in secondary trading of the Shares and the costs associated with creating and redeeming Shares of the Trust, in each case relative to competing products. In addition, given the relatively limited number of market participants that could serve as Authorized Participants of the Trust, the Trust may not be able to engage other providers to serve as Authorized Participants. If any or all of the Authorized Participants were to cease to act in their capacity

as Authorized Participants of the Trust, or if any of the Authorized Participants were to favor creating and redeeming shares of competing products over those of the Trust, the Trust may receive inadequate attention or be subject to comparatively unfavorable commercial terms, which could adversely affect the arbitrage mechanism, the Trust’s operations, the performance of the Trust and ultimately the value of the Shares. See also “—Risks Related to the Offering—Competition from the emergence or growth of other digital assets or methods of investing in Ether could have a negative impact on the price of Ether and adversely affect the value of the Shares.”

Risk Factors Related to the Regulation of Digital Assets, the Trust and the Shares

A determination that Ether or any other digital asset is a “security” may adversely affect the value of Ether and the value of the Shares, and result in potentially extraordinary, nonrecurring expenses to, or termination of, the Trust.

Depending on its characteristics, a digital asset may be considered a “security” under the federal securities laws. The test for determining whether a particular digital asset is a “security” is complex and difficult to apply, and the outcome is difficult to predict. Public, though non-binding, statements by senior officials at the SEC have indicated that the SEC did not consider Bitcoin or Ether to be securities, and does not currently consider Bitcoin to be a security. The SEC staff has also provided informal assurances via no-action letter to a handful of promoters that their digital assets are not securities. On the other hand, the SEC has brought enforcement actions against the issuers and promoters of several other digital assets on the basis that the digital assets in question are securities. More recently, the SEC has also brought enforcement actions against digital asset trading platforms for operating unregistered securities exchanges on the basis that certain of the digital assets traded on their platforms are securities.

For example, in June 2023, the SEC brought the Binance Complaint and the Coinbase Complaint, alleging violations of a variety of securities laws. In its complaints, the SEC asserted that SOL, ADA, MATIC, FIL, ATOM, SAND, MANA, ALGO, AXS, COTI, CHZ, FLOW, ICP, NEAR, VGX, DASH and NEXO, are securities under the federal securities laws. In addition, in November 2023, the SEC brought the Kraken Complaint, alleging that Kraken operated as an unregistered securities exchange, brokerage and clearing agency.

Whether a digital asset is a security under the federal securities laws depends on whether it is included in the lists of instruments making up the definition of “security” in the Securities Act, the Exchange Act and the Investment Company Act. Digital assets as such do not appear in any of these lists, although each list includes the terms “investment contract” and “note,” and the SEC has typically analyzed whether a particular digital asset is a security by reference to whether it meets the tests developed by the federal courts interpreting these terms, known as the Howey and Reves tests, respectively. For many digital assets, whether or not the Howey or Reves tests are met is difficult to resolve definitively, and substantial legal arguments can often be made both in favor of and against a particular digital asset qualifying as a security under one or both of the Howey and Reves tests. Adding to the complexity, the SEC staff has indicated that the security status of a particular digital asset can change over time as the relevant facts evolve.

As part of determining whether Ether is a security for purposes of the federal securities laws, the Sponsor takes into account a number of factors, including the various definitions of “security” under the federal securities laws and federal court decisions interpreting elements of these definitions, such as the U.S. Supreme Court’s decisions in the Howey and Reves cases, as well as reports, orders, press releases, public statements and speeches by the SEC, its commissioners and its staff providing guidance on when a digital asset may be a security for purposes of the federal securities laws. Finally, the Sponsor discusses the security status of Ether with external counsel, and has received a memorandum regarding the status of Ether under the federal securities laws from external counsel and has discussed the status of Ether with external counsel and continues to believe that Ether is not a security. The Sponsor has discussed, for example, the security status of Ether with external counsel both

before and after the Merge and determined that the Merge has not caused Ether to have become a security for a variety of reasons including, but not limited to, the following:

First, the SEC, by action through delegated authority approving exchange rule filings to list shares of trusts holding Ether as commodity-based exchange-traded products, has implicitly taken the view that Ether is a commodity.

Second, consistent with the holdings in recent Federal court cases involving Ripple and Terraform, the Sponsor believes that whether something is an investment contract under the Howey test is a transaction-specific assessment that does not attach to the underlying object of that transaction as the underlying object of a transaction is not itself “a contract, transaction or scheme.” The Sponsor therefore believes that a digital asset such as Ether cannot itself be an investment contract security. That remains true after the Merge.

Third, the Sponsor also believes that Ether is a consumable commodity that is not a security. Ether was used in making gas fee payments on the Ethereum Network prior to the Merge and continues to be extensively used in this capacity after the Merge. The Merge also introduced a new use for Ether as part of the new consensus mechanism, which provides further evidence that Ether is a consumable commodity and not a security.

Fourth, the Sponsor believes that any expectations of profit that a purchaser of Ether may possess from their purchase depends on the overall market for Ether, not any identifiable “other” or issuer as required in the Howey test. Specifically, the Sponsor believes that Ether’s value derives from the supply and demand for useful applications built on the Ethereum Network. The Sponsor believes this to be the case before the Merge and continues to believe it to be the case after the Merge.

Fifth, the Sponsor believes that even if a holder of Ether expects profits based upon the action of persons directly involved in updating the Ethereum Network’s code, or in publishing new blocks of transactions on the Ethereum Network, the group of persons involved in such activities is sufficiently decentralized such that there is no “other” upon whom a purchaser could rely for Howey purposes. There were thousands of developers working on the Ethereum Network’s code before the Merge, and there continues to be today. There were thousands of miners publishing blocks on the Ethereum Network before the Merge, and there are approximately one million validators performing that role after the Merge. The Sponsor therefore believes that the Ethereum Network remains “sufficiently decentralized” and that Ether is not a security, just as a former Director of Corporation Finance of the Commission stated in June 2018.

Sixth, similar to profits that could be sought from mining under proof of work, any profits realized from validating Ether transactions only accrue to those who affirmatively engage in validation efforts, rather than holders of Ether more generally. Any of these profits are also based on the validator’s own efforts to engage in validation, and not the efforts of identifiable “others” more generally.

Seventh, the Sponsor believes Ether is not a security because futures contracts with Ether as the underlying asset continue to be offered by trading platforms regulated only by the CFTC, even after the Merge.

In addition, the Sponsor has considered generally whether the Merge may have caused Ether to be classified as a security under Reves or any other instrument making up the definition of “security” in the Securities Act, the Exchange Act and the Investment Company Act and concluded that it did not.

Through this process the Sponsor believes that it is applying the proper legal standards in determining that Ether is not a security in light of the uncertainties inherent in the Howey and Reves tests. In light of these uncertainties and the fact-based nature of the analysis, the Sponsor acknowledges that the SEC may take a contrary position; and the Sponsor’s conclusion, even if reasonable under the circumstances, would not preclude legal or regulatory action based on the presence of a security.

As is the case with Ether, analyses from counsel typically review the often-complex facts surrounding a particular digital asset's underlying technology, creation, use case and usage development, distribution and secondary-market trading characteristics as well as contributions of the individuals or organizations who appear to be involved in these activities, among other relevant facts, usually drawing on publicly available information. This information, usually found on the internet, often includes both information that originated with or is attributed to such individuals or organizations, as well as information from third-party sources and databases that may or may not have a connection to such individuals or organizations, and the availability and nature of such information can change over time. The Sponsor and counsel often have no independent means of verifying the accuracy or completeness of such information, and therefore of necessity usually must assume that such information is materially accurate and complete for purposes of the Howey and Reves analyses. After having gathered this information, counsel typically analyzes it in light of the Howey and Reves tests, in order to inform a judgment as to whether or not a federal court would conclude that the digital asset in question is or is not a security for purposes of the federal securities laws. Often, certain factors appear to support a conclusion that the digital asset in question is a security, while other factors appear to support the opposite conclusion, and in such a case counsel endeavors to weigh the importance and relevance of the competing factors. This analytical process is further complicated by the fact that, at present, federal judicial case law applying the relevant tests to digital assets is limited and in some situations inconsistent, with no federal appellate court having considered the question on the merits, as well as the fact that because each digital asset presents its own unique set of relevant facts, it is not always possible to directly analogize the analysis of one digital asset to another. Because of this factual complexity and the current lack of a well-developed body of federal case law applying the relevant tests to a variety of different fact patterns, the Sponsor has not in the past received, and currently does not expect that it would be able to receive, "opinions" of counsel stating that a particular digital asset is or is not a security for federal securities law purposes. The Sponsor understands that as a matter of practice, counsel is generally able to render a legal "opinion" only when the relevant facts are substantially ascertainable and the applicable law is both well-developed and settled. As a result, given the relative novelty of digital assets, the challenges inherent in fact-gathering for particular digital assets, and the fact that federal courts have only recently been tasked with adjudicating the applicability of federal securities law to digital assets, the Sponsor understands that at present counsel is generally not in a position to render a legal "opinion" on the securities law status of Ether or any other particular digital asset.

As such, notwithstanding the Sponsor's receipt of a memorandum regarding the status of Ether under the federal securities laws from external counsel and the Sponsor's view that Ether is not a security, the SEC or a federal court may in the future take a different view as to the security status of Ether.

If the Sponsor determines that Ether is a security under the federal securities laws, whether that determination is initially made by the Sponsor itself, or because a federal court upholds an allegation that Ether is a security, the Sponsor does not intend to permit the Trust to continue holding Ether in a way that would violate the federal securities laws (and therefore would either dissolve the Trust or potentially seek to operate the Trust in a manner that complies with the federal securities laws, including the Investment Company Act). Because the legal tests for determining whether a digital asset is or is not a security often leave room for interpretation, for so long as the Sponsor believes there to be good faith grounds to conclude that the Trust's Ether is not a security, the Sponsor does not intend to dissolve the Trust on the basis that Ether could at some future point be finally determined to be a security.

Any enforcement action by the SEC or a state securities regulator asserting that Ether is a security, or a court decision to that effect, would be expected to have an immediate material adverse impact on the trading value of Ether, as well as the Shares. This is because the business models behind most digital assets are incompatible with regulations applying to transactions in securities. If a digital asset is determined to be a security, it is likely to become difficult or impossible for the digital asset to be traded, cleared or custodied in the United States through the same channels used by non-security digital assets, which in addition to materially and adversely affecting the trading value of the digital asset is likely to significantly impact its liquidity and market

participants' ability to convert the digital asset into U.S. dollars. Any assertion that a digital asset is a security by the SEC or another regulatory authority may have similar effects.

For example, in 2020 the SEC filed a complaint against the issuer of XRP, Ripple Labs, Inc., and two of its executives, alleging that they raised more than \$1.3 billion through XRP sales that should have been registered under the federal securities laws, but were not. In the years prior to the SEC's action, XRP's market capitalization at times reached over \$140 billion. However, in the weeks following the SEC's complaint, XRP's market capitalization fell to less than \$10 billion, which was less than half of its market capitalization in the days prior to the complaint.

Likewise, in the days following the announcement of the Binance Complaint and Coinbase Complaint, the price of various digital assets, including Bitcoin and Ether, declined significantly and may continue to decline as these cases advance through the federal court system. Subsequently, in July 2023, the District Court for the Southern District of New York held that while XRP is not a security, certain sales of XRP to certain buyers amounted to "investment contracts" under the Howey test. The SEC later sought an interlocutory appeal of the district court's verdict that XRP is not a security, which appeal was denied by the district court in October 2023. Moreover, also in July 2023, another judge in the District Court for the Southern District of New York, in litigation between the SEC and the issuer of the UST and LUNA digital assets, suggested that he disagreed with the approach underlying the XRP decision. The Binance Complaint, the Coinbase Complaint, the Kraken Complaint, and the SEC's actions against XRP's issuer and the issuer of the UST and LUNA digital assets, as well as seemingly inconsistent views of different district court judges, underscore the continuing uncertainty around which digital assets are securities, and demonstrate that such factors as how long a digital asset has been in existence, how widely held it is, how large its market capitalization is and that it has actual use in commercial transactions, ultimately may have no bearing on whether the SEC or a court will find it to be a security.

In addition, if Ether is in fact a security, the Trust could be considered an unregistered "investment company" under SEC rules, which could necessitate the Trust's liquidation. In this case, the Trust and the Sponsor may be deemed to have participated in an illegal offering of securities and there is no guarantee that the Sponsor will be able to register the Trust under the Investment Company Act at such time or take such other actions as may be necessary to ensure the Trust's activities comply with applicable law, which could force the Sponsor to liquidate the Trust.

Moreover, whether or not the Sponsor or the Trust were subject to additional regulatory requirements as a result of any determination that its assets include securities, the Sponsor may nevertheless decide to terminate the Trust, in order, if possible, to liquidate the Trust's assets while a liquid market still exists. For example, in response to the SEC's action against the issuer of XRP, certain significant market participants announced they would no longer support XRP and announced measures, including the delisting of XRP from major digital asset trading platforms, resulting in the Sponsor's conclusion that it was likely to be increasingly difficult for U.S. investors, including Grayscale XRP Trust (XRP), an affiliate of the Trust, to convert XRP into U.S. dollars. The Sponsor subsequently dissolved Grayscale XRP Trust (XRP) and liquidated its assets. If the SEC or a federal court were to determine that Ether is a security, it is likely that the value of the Shares of the Trust would decline significantly. Furthermore, if a federal court upholds an allegation that Ether is a security, the Trust itself may be terminated and, if practical, its assets liquidated.

Regulatory changes or actions by the U.S. Congress or any U.S. federal or state agencies may affect the value of the Shares or restrict the use of Ether, validating activity or the operation of the Ethereum Network or the Digital Asset Markets in a manner that adversely affects the value of the Shares.

As digital assets have grown in both popularity and market size, the U.S. Congress and a number of U.S. federal and state agencies (including FinCEN, SEC, CFTC, FINRA, the Consumer Financial Protection Bureau ("CFPB"), the Department of Justice, the Department of Homeland Security, the Federal Bureau of Investigation, the IRS, the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, the Federal

Reserve and state financial institution and securities regulators) have been examining the operations of digital asset networks, digital asset users and the Digital Asset Markets, with particular focus on the extent to which digital assets can be used to launder the proceeds of illegal activities or fund criminal or terrorist enterprises and the safety and soundness of trading platforms and other service providers that hold or custody digital assets for users. Many of these state and federal agencies have issued consumer advisories regarding the risks posed by digital assets to investors. Ongoing and future regulatory actions with respect to digital assets generally or Ether in particular may alter, perhaps to a materially adverse extent, the nature of an investment in the Shares or the ability of the Trust to continue to operate.

Moreover, President Biden's March 9, 2022 Executive Order, asserting that technological advances and the rapid growth of the digital asset markets "necessitate an evaluation and alignment of the United States Government approach to digital assets," signals an ongoing focus on digital asset policy and regulation in the United States. A number of reports issued pursuant to the Executive Order have focused on various risks related to the digital asset ecosystem, and have recommended additional legislation and regulatory oversight. There have also been several bills introduced in Congress that propose to establish additional regulation and oversight of the digital asset markets. In connection with these developments, the SEC has taken a number of actions. For example, in February 2023, the SEC proposed amendments to the custody rules under Rule 406(4)-2 of the Investment Advisers Act. The proposed rule changes would amend the definition of a "qualified custodian" under Rule 206(4)-2(d)(6) and expand the current custody rule in 406(4)-2 to cover digital assets and related advisory activities. If enacted as proposed, these rules would likely impose additional regulatory requirements with respect to the custody and storage of digital assets and could lead to additional regulatory oversight of the digital asset ecosystem more broadly. Moreover, the failure of FTX in November 2022 and the resulting market turmoil substantially increased regulatory scrutiny in the United States and globally and led to SEC and criminal investigations, enforcement actions and other regulatory activity across the digital asset ecosystem. For example, in June 2023, the SEC brought enforcement actions against Binance and Coinbase, two of the largest digital asset trading platforms, alleging that Binance and Coinbase operated unregistered securities exchanges, brokerages and clearing agencies. In addition, in November 2023, the SEC brought similar charges against Kraken, alleging that it operated as an unregistered securities exchange, brokerage and clearing agency.

It is difficult to predict whether, or when, any of these developments will lead to Congress granting additional authorities to the SEC or other regulators, what the nature of such additional authorities might be, how additional legislation and/or regulatory oversight might impact the ability of Digital Asset Markets to function or how any new regulations or changes to existing regulations might impact the value of digital assets generally and Ether held by the Trust specifically. The consequences of increased federal regulation of digital assets and digital asset activities could have a material adverse effect on the Trust and the Shares.

Law enforcement agencies have often relied on the transparency of blockchains to facilitate investigations. However, certain privacy-enhancing features have been, or are expected to be, introduced to a number of digital asset networks. If the Ethereum Network were to adopt any of these features, these features may provide law enforcement agencies with less visibility into transaction-level data. Europol, the European Union's law enforcement agency, released a report in October 2017 noting the increased use of privacy-enhancing digital assets like Zcash and Monero in criminal activity on the internet. In August 2022, OFAC banned all U.S. citizens from using Tornado Cash, a digital asset protocol designed to obfuscate blockchain transactions, by adding certain Ether wallet addresses associated with the protocol to its Specially Designated Nationals list. A large portion of Ethereum validators globally, as well as notable industry participants such as Centre, the issuer of the USDC stablecoin, have reportedly complied with the sanctions and blacklisted the sanctioned addresses from interacting with their networks. In October 2023, FinCEN issued a notice of proposed rulemaking that identified convertible virtual currency (CVC) mixing as a class of transactions of primary money laundering concern and proposed requiring covered financial institutions to implement certain recordkeeping and reporting requirements on transactions that covered financial institutions know, suspect, or have reason to suspect involve CVC mixing within or involving jurisdictions outside the United States. In April 2024, the DOJ arrested and charged the developers of the Samourai Wallet mixing service with conspiracy to commit money laundering and conspiracy

to operate an unlicensed money transmitting business. In May 2024, a co-founder of Tornado Cash was sentenced to more than five years imprisonment in the Netherlands for developing Tornado Cash on the basis that he had helped launder more than \$2 billion worth of digital assets through Tornado Cash. Although no regulatory action has been taken to treat privacy-enhancing digital assets differently, this may change in the future.

Competing industries may have more influence with policymakers than the digital asset industry, which could lead to the adoption of laws and regulations that are harmful to the digital asset industry.

The digital asset industry is relatively new, although its influence over public policy is increasing, and it does not have the same access to policymakers and lobbying organizations in many jurisdictions compared to industries with which digital assets may be seen to compete, such as banking, payments and consumer finance. Competitors from other, more established industries may have greater access to and influence with governmental officials and regulators and may be successful in persuading these policymakers that digital assets require heightened levels of regulation compared to the regulation of traditional financial services. As a result, new laws and regulations may be proposed and adopted in the United States and elsewhere, or existing laws and regulations may be interpreted in new ways, that disfavor or impose compliance burdens on the digital asset industry or digital asset platforms, which could adversely impact the value of Ether and therefore the value of the Shares.

Regulatory changes or other events in foreign jurisdictions may affect the value of the Shares or restrict the use of one or more digital assets, validating activity or the operation of their networks or the Digital Asset Trading Platform Market in a manner that adversely affects the value of the Shares.

Various foreign jurisdictions have, and may continue to adopt laws, regulations or directives that affect the digital asset network, the Digital Asset Markets, and their users, particularly Digital Asset Trading Platforms and service providers that fall within such jurisdictions' regulatory scope. For example, if China or other foreign jurisdictions were to ban or otherwise restrict mining activity, including by regulating or limiting manufacturers' ability to produce or sell semiconductors or hard drives in connection with mining, it would have a material adverse effect on digital asset networks (including the Ethereum Network), the Digital Asset Market, and as a result, impact the value of the Shares.

A number of foreign jurisdictions have recently taken regulatory action aimed at digital asset activities. China has made transacting in cryptocurrencies illegal for Chinese citizens in mainland China, and additional restrictions may follow. Both China and South Korea have banned initial coin offerings entirely and regulators in other jurisdictions, including Canada, Singapore and Hong Kong, have opined that initial coin offerings may constitute securities offerings subject to local securities regulations. The United Kingdom's Financial Conduct Authority published final rules in October 2020 banning the sale of derivatives and exchange-traded notes that reference certain types of digital assets, contending that they are "ill-suited" to retail investors citing extreme volatility, valuation challenges and association with financial crime. A new law, the Financial Services and Markets Act 2023 ("FSMA"), received royal assent in June 2023. The FSMA brings digital asset activities within the scope of existing laws governing financial institutions, markets and assets. In addition, the Parliament of the European Union approved the text of MiCA in April 2023, establishing a regulatory framework for digital asset services across the European Union. MiCA is intended to serve as a comprehensive regulation of digital asset markets and imposes various obligations on digital asset issuers and service providers. The main aims of MiCA are industry regulation, consumer protection, prevention of market abuse and upholding the integrity of digital asset markets. MiCA was formally approved by the European Union's member state in 2023 and is expected to come into effect in 2024. See "Business—Overview of the Ethereum Industry and Market—Government Oversight."

Foreign laws, regulations or directives may conflict with those of the United States and may negatively impact the acceptance of one or more digital assets by users, merchants and service providers outside the United States and may therefore impede the growth or sustainability of the digital asset economy in the European Union,

China, Japan, Russia and the United States and globally, or otherwise negatively affect the value of Ether. Moreover, other events, such as the interruption in telecommunications or internet services, cyber-related terrorist acts, civil disturbances, war or other catastrophes, could also negatively affect the digital asset economy in one or more jurisdictions. For example, Russia's invasion of Ukraine on February 24, 2022 led to volatility in digital asset prices, with an initial steep decline followed by a sharp rebound in prices. The effect of any future regulatory change or other events on the Trust or Ether is impossible to predict, and such change could be substantial and adverse to the Trust and the value of the Shares.

If regulators subject an Authorized Participant, the Trust or the Sponsor to regulation as a money service business or money transmitter, this could result in extraordinary expenses to the Authorized Participant, the Trust or the Sponsor and also result in decreased liquidity for the Shares.

To the extent that the activities of any Authorized Participant, the Trust or the Sponsor cause it to be deemed a "money services business" under the regulations promulgated by FinCEN, such Authorized Participant, the Trust or the Sponsor may be required to comply with FinCEN regulations, including those that would mandate the Authorized Participant to implement anti-money laundering programs, make certain reports to FinCEN and maintain certain records. Similarly, the activities of an Authorized Participant, the Trust or the Sponsor may require it to be licensed as a money transmitter or as a digital asset business, such as under the NYDFS' BitLicense regulation.

Such additional regulatory obligations may cause the Authorized Participant, the Trust or the Sponsor to incur extraordinary expenses. If the Authorized Participant, the Trust or the Sponsor decided to seek the required licenses, there is no guarantee that they will timely receive them. An Authorized Participant may instead decide to terminate its role as Authorized Participant of the Trust, or the Sponsor may decide to discontinue and wind up the Trust. An Authorized Participant's decision to cease acting as such may decrease the liquidity of the Shares, which could adversely affect the value of the Shares, and termination of the Trust in response to the changed regulatory circumstances may be at a time that is disadvantageous to the shareholders.

Additionally, to the extent an Authorized Participant, the Trust or the Sponsor is found to have operated without appropriate state or federal licenses, it may be subject to investigation, administrative or court proceedings, and civil or criminal monetary fines and penalties, all of which would harm the reputation of the Trust or the Sponsor, decrease the liquidity, and have a material adverse effect on the price of, the Shares.

Regulatory changes or interpretations could obligate the Trust or the Sponsor to register and comply with new regulations, resulting in potentially extraordinary, nonrecurring expenses to the Trust.

Current and future legislation, CFTC and SEC rulemaking and other regulatory developments may impact the manner in which Ether are treated. In particular, Ether may be classified by the CFTC as a "commodity interest" under the CEA or may be classified by the SEC as a "security" under U.S. federal securities laws. The Sponsor and the Trust cannot be certain as to how future regulatory developments will impact the treatment of Ether under the law. In the face of such developments, the required registrations and compliance steps may result in extraordinary, nonrecurring expenses to the Trust. If the Sponsor decides to terminate the Trust in response to the changed regulatory circumstances, the Trust may be dissolved or liquidated at a time that is disadvantageous to shareholders.

To the extent that Ether is deemed to fall within the definition of a "commodity interest" under the CEA, the Trust and the Sponsor may be subject to additional regulation under the CEA and CFTC regulations. The Sponsor may be required to register as a commodity pool operator or commodity trading adviser with the CFTC and become a member of the National Futures Association and may be subject to additional regulatory requirements with respect to the Trust, including disclosure and reporting requirements. These additional requirements may result in extraordinary, recurring and/or nonrecurring expenses of the Trust, thereby materially and adversely impacting the Shares. If the Sponsor determines not to comply with such additional regulatory and

registration requirements, the Sponsor will terminate the Trust. Any such termination could result in the liquidation of the Trust's Ether at a time that is disadvantageous to shareholders.

To the extent that Ether is determined to be a security under U.S. federal securities laws, the Trust and the Sponsor may be subject to additional requirements under the Investment Company Act and the Sponsor may be required to register as an investment adviser under the Investment Advisers Act. Such additional registration may result in extraordinary, recurring and/or non-recurring expenses of the Trust, thereby materially and adversely impacting the Shares. If the Sponsor determines not to comply with such additional regulatory and registration requirements, the Sponsor will terminate the Trust. Any such termination could result in the liquidation of the Trust's Ether at a time that is disadvantageous to shareholders.

The treatment of the Trust for U.S. federal income tax purposes is uncertain.

The Sponsor intends to take the position that the Trust is properly treated as a grantor trust for U.S. federal income tax purposes. Assuming that the Trust is a grantor trust, the Trust will not be subject to U.S. federal income tax. Rather, if the Trust is a grantor trust, each beneficial owner of Shares will be treated as directly owning its pro rata share of the Trust's assets and a pro rata portion of the Trust's income, gain, losses and deductions will "flow through" to each beneficial owner of Shares.

The Sponsor has committed to cause the Trust to irrevocably abandon any Incidental Rights and IR Virtual Currency to which the Trust may become entitled in the future. In furtherance of that commitment, the Prime Broker Agreement provides that the Trust is irrevocably abandoning, effective immediately prior to each Creation Time or Redemption Time, all Incidental Rights or IR Virtual Currency to which it would otherwise be entitled as of such time and with respect to which it has not taken any Affirmative Action at or prior to such time. There can be no complete assurance that these abandonments will be treated as effective for U.S. federal income tax purposes. If the Trust were treated as owning any asset other than Ether as of any date on which it creates or redeems Shares, it might cease to qualify as a grantor trust for U.S. federal income tax purposes.

In addition, and in common with other spot digital asset exchange-traded products, at this time the Trust is not permitted to create or redeem Shares via in-kind transactions with Authorized Participants. Unless and until In-Kind Regulatory Approval is obtained, Baskets will be created or redeemed only through Cash Orders. In general, investment vehicles intended to be treated as grantor trusts for U.S. federal income tax purposes historically have created additional trust interests only in kind, and there is no authority directly addressing whether a grantor trust may create or redeem trust interests under procedures similar to those that govern Cash Orders. Accordingly, there can be no complete assurance that the creation or redemption of Shares under the procedures governing Cash Orders will not cause the Trust to fail to qualify as a grantor trust for U.S. federal income tax purposes.

Moreover, because of the evolving nature of digital assets, it is not possible to predict potential future developments that may arise with respect to digital assets, including forks, airdrops and other similar occurrences. Assuming that the Trust is currently a grantor trust for U.S. federal income tax purposes, certain future developments could render it impossible, or impracticable, for the Trust to continue to be treated as a grantor trust for such purposes.

If the Trust is not properly classified as a grantor trust, the Trust might be classified as a partnership for U.S. federal income tax purposes. However, due to the uncertain treatment of digital assets for U.S. federal income tax purposes (as discussed below in "Material U.S. Federal Income Tax Consequences—Uncertainty Regarding the U.S. Federal Income Tax Treatment of Digital Assets"), there can be no assurance in this regard. If the Trust were classified as a partnership for U.S. federal income tax purposes, the tax consequences of owning Shares generally would not be materially different from the tax consequences described herein, although there might be certain differences, including with respect to timing of the recognition of taxable income or loss. In addition, tax information reports provided to beneficial owners of Shares would be made in a different form. If the Trust were

not classified as either a grantor trust or a partnership for U.S. federal income tax purposes, it would be classified as a corporation for such purposes. In that event, the Trust would be subject to entity-level U.S. federal income tax (currently at the rate of 21%) on its net taxable income and certain distributions made by the Trust to shareholders would be treated as taxable dividends to the extent of the Trust's current and accumulated earnings and profits. Any such dividend distributed to a beneficial owner of Shares that is a non-U.S. person for U.S. federal income tax purposes would be subject to U.S. federal withholding tax at a rate of 30% (or such lower rate as provided in an applicable tax treaty).

The treatment of digital assets for U.S. federal income tax purposes is uncertain.

As discussed in the section entitled “Material U.S. Federal Income Tax Consequences—Uncertainty Regarding the U.S. Federal Income Tax Treatment of Digital Assets,” assuming that the Trust is properly treated as a grantor trust for U.S. federal income tax purposes, each beneficial owner of Shares will be treated for U.S. federal income tax purposes as the owner of an undivided interest in the Ether (and, if applicable, any Incidental Rights and/or IR Virtual Currency) held in the Trust. Due to the new and evolving nature of digital assets and the absence of comprehensive guidance with respect to digital assets, many significant aspects of the U.S. federal income tax treatment of digital assets are uncertain.

In 2014, the Internal Revenue Service (“IRS”) released a notice (the “Notice”) discussing certain aspects of “convertible virtual currency” (that is, digital assets that have an equivalent value in fiat currency or that act as substitutes for fiat currency) for U.S. federal income tax purposes and, in particular, stating that such digital assets (i) are “property” (ii) are not currency” for purposes of the rules relating to foreign currency gain or loss and (iii) may be held as a capital asset. In 2019, the IRS released a revenue ruling and a set of “Frequently Asked Questions” (the “Ruling & FAQs”) that provide some additional guidance, including guidance to the effect that, under certain circumstances, hard forks of digital assets are taxable events giving rise to ordinary income and guidance with respect to the determination of the tax basis of digital assets. However, the Notice and the Ruling & FAQs do not address other significant aspects of the U.S. federal income tax treatment of digital assets. Moreover, although the Ruling & FAQs address the treatment of hard forks, there continues to be uncertainty with respect to the timing and amount of the income inclusions.

There can be no assurance that the IRS will not alter its position with respect to digital assets in the future or that a court would uphold the treatment set forth in the Notice and the Ruling & FAQs. It is also unclear what additional guidance on the treatment of digital assets for U.S. federal income tax purposes may be issued in the future. Any such alteration of the current IRS positions or additional guidance could result in adverse tax consequences for shareholders and could have an adverse effect on the value of Ether. Future developments that may arise with respect to digital assets may increase the uncertainty with respect to the treatment of digital assets for U.S. federal income tax purposes. For example, the Notice addresses only digital assets that are “convertible virtual currency,” and it is conceivable that, as a result of a fork, airdrop or similar occurrence, the Trust could hold certain types of digital assets that are not within the scope of the Notice in the event the Sponsor seeks to change the Trust's policy with respect to Incidental Rights or IR Virtual Currency, subject to NYSE Arca obtaining regulatory approval from the SEC.

Shareholders are urged to consult their tax advisers regarding the tax consequences of owning and disposing of Shares and digital assets in general.

Future developments regarding the treatment of digital assets for U.S. federal income tax purposes could adversely affect the value of the Shares.

As discussed above, many significant aspects of the U.S. federal income tax treatment of digital assets, such as Ether, are uncertain, and it is unclear what guidance on the treatment of digital assets for U.S. federal income tax purposes may be issued in the future. It is possible that any such guidance would have an adverse effect on the prices of digital assets, including on the price of Ether in the Digital Asset Markets, and therefore may have an adverse effect on the value of the Shares.

Because of the evolving nature of digital assets, it is not possible to predict potential future developments that may arise with respect to digital assets, including forks, airdrops and similar occurrences. Such developments may increase the uncertainty with respect to the treatment of digital assets for U.S. federal income tax purposes. Moreover, certain future developments could render it impossible, or impracticable, for the Trust to continue to be treated as a grantor trust for U.S. federal income tax purposes.

Future developments in the treatment of digital assets for tax purposes other than U.S. federal income tax purposes could adversely affect the value of the Shares.

The taxing authorities of certain states, including New York, (i) have announced that they will follow the Notice with respect to the treatment of digital assets for state income tax purposes and/or (ii) have issued guidance exempting the purchase and/or sale of digital assets for fiat currency from state sales tax. However, it is unclear what further guidance on the treatment of digital assets for state tax purposes may be issued in the future.

The treatment of digital assets for tax purposes by non-U.S. jurisdictions may differ from the treatment of digital assets for U.S. federal, state or local tax purposes. It is possible, for example, that a non-U.S. jurisdiction would impose sales tax or value-added tax on purchases and sales of digital assets for fiat currency. If a foreign jurisdiction with a significant share of the market of Ether users imposes onerous tax burdens on digital asset users, or imposes sales or value-added tax on purchases and sales of digital assets for fiat currency, such actions could result in decreased demand for Ether in such jurisdiction.

Any future guidance on the treatment of digital assets for state, local or non-U.S. tax purposes could increase the expenses of the Trust and could have an adverse effect on the prices of digital assets, including on the price of Ether in the Digital Asset Markets. As a result, any such future guidance could have an adverse effect on the value of the Shares.

A U.S. tax-exempt shareholder may recognize “unrelated business taxable income” as a consequence of an investment in Shares.

Under the guidance provided in the Ruling & FAQs, hard forks, airdrops and similar occurrences with respect to digital assets will under certain circumstances be treated as taxable events giving rise to ordinary income. In the absence of guidance to the contrary, it is possible that any such income recognized by a U.S. tax-exempt shareholder would constitute “unrelated business taxable income” (“UBTI”). A tax-exempt shareholder should consult its tax adviser regarding whether such shareholder may recognize UBTI as a consequence of an investment in Shares. See “Material U.S. Federal Income Tax Consequences.”

Non-U.S. Holders may be subject to U.S. federal withholding tax on income derived from forks, airdrops and similar occurrences.

The Ruling & FAQs do not address whether income recognized by a non-U.S. person as a result of a fork, airdrop or similar occurrence could be subject to the 30% withholding tax imposed on U.S.-source “fixed or determinable annual or periodical” income. Non-U.S. Holders (as defined under “Material U.S. Federal Income Tax Consequences—Tax Consequences to Non-U.S. Holders”) should assume that, in the absence of guidance, a withholding agent (including the Sponsor) is likely to withhold 30% of any such income recognized by a non-U.S. Holder in respect of its Shares, including by deducting such withheld amounts from proceeds that such non-U.S. Holder would otherwise be entitled to receive in connection with a distribution of Incidental Rights or IR Virtual Currency. See “Material U.S. Federal Income Tax Consequences.”

Risk Factors Related to Potential Conflicts of Interest

Potential conflicts of interest may arise among the Sponsor or its affiliates and the Trust. The Sponsor and its affiliates have no fiduciary duties to the Trust and its shareholders other than as provided in the Trust Agreement, which may permit them to favor their own interests to the detriment of the Trust and its shareholders.

The Sponsor will manage the affairs of the Trust. Conflicts of interest may arise among the Sponsor and its affiliates, on the one hand, and the Trust and its shareholders, on the other hand. As a result of these conflicts, the Sponsor may favor its own interests and the interests of its affiliates over the Trust and its shareholders. These potential conflicts include, among others, the following:

- The Sponsor has no fiduciary duties to, and is allowed to take into account the interests of parties other than, the Trust and its shareholders in resolving conflicts of interest, provided the Sponsor does not act in bad faith;
- The Trust has agreed to indemnify the Sponsor and its affiliates pursuant to the Trust Agreement;
- The Sponsor is responsible for allocating its own limited resources among different clients and potential future business ventures, to each of which it owes fiduciary duties;
- The Sponsor and its staff also service affiliates of the Sponsor, including several other digital asset investment vehicles, and their respective clients and cannot devote all of its, or their, respective time or resources to the management of the affairs of the Trust;
- The Sponsor, its affiliates and their respective officers and employees are not prohibited from engaging in other businesses or activities, including those that might be in direct competition with the Trust;
- Affiliates of the Sponsor have substantial direct investments in Ether that they are permitted to manage taking into account their own interests without regard to the interests of the Trust or its shareholders, and any increases, decreases or other changes in such investments could affect the Index Price and, in turn, the value of the Shares;
- There is an absence of arm's-length negotiation with respect to certain terms of the Trust, and, where applicable, there has been no independent due diligence conducted with respect to the Trust;
- Several employees of the Sponsor and the Sponsor's parent company, DCG, are FINRA-registered representatives who historically maintained their licenses through Genesis and currently maintain their licenses through Grayscale Securities;
- DCG is (i) the sole member and parent company of the Sponsor; (ii) a minority interest holder in Coinbase, Inc., which operates Coinbase, one of the Digital Asset Trading Platforms initially expected to be included in the Index and the Trust's principal market, and which is the parent company of the Custodian, representing less than 1.0% of its equity; and (iii) a minority interest holder in Kraken, one of the Digital Asset Trading Platforms initially expected to be included in the Index, representing less than 1.0% of its equity;
- DCG has investments in a large number of digital assets and companies involved in the digital asset ecosystem, including trading platforms and custodians. DCG's positions on changes that should be adopted in the Ethereum Network could be adverse to positions that would benefit the Trust or its shareholders. Additionally, before or after a hard fork on the Ethereum Network, DCG's position regarding which fork among a group of incompatible forks of the Ethereum Network should be considered the "true" Ethereum Network could be adverse to positions that would most benefit the Trust;
- DCG has been vocal in the past about its support for digital assets other than Ether. Any investments in, or public positions taken on, digital assets other than Ether by DCG, could have an adverse impact on the price of Ether;

- The Sponsor decides whether to retain separate counsel, accountants or others to perform services for the Trust;
- While the Index Provider does not currently utilize data from over-the-counter markets or derivatives platforms, it may decide to include pricing from such markets or platforms in the future;
- The Sponsor may appoint an agent to act on behalf of the shareholders, and such agent may be the Sponsor or an affiliate of the Sponsor; and
- The Sponsor may select an Index Provider that is an affiliate of the Sponsor and the Trust.

By purchasing the Shares, shareholders agree and consent to the provisions set forth in the Trust Agreement. See “Business—Description of the Trust Agreement.”

For a further discussion of the conflicts of interest among the Sponsor, the distributor, the marketer, Authorized Participant, Liquidity Providers, the Trust and others, see “Certain Relationships and Related Party Transactions.”

DCG is a minority interest holder in both Coinbase, Inc. and Kraken, which operate two of the Digital Asset Trading Platforms initially expected to be included in the Index Price.

DCG, the sole member and parent company of the Sponsor, holds a minority interest of less than 1.0% in each of Coinbase, Inc., which operates Coinbase, and Kraken. The Sponsor values its digital assets by reference to the Index Price. The Index Price is the price in U.S. dollars of an Ether derived from the Digital Asset Trading Platforms that are reflected in the Index developed by CoinDesk Indices, Inc. as of 4:00 p.m., New York time, on each business day. Coinbase and Kraken are two of such Digital Asset Trading Platforms initially expected to be included in the Index.

Although DCG does not exercise control over Coinbase or Kraken, it is possible that investors could have concerns that DCG could influence market data provided by these Digital Asset Trading Platforms in a way that benefits DCG, for example by artificially inflating the values of Ether in order to increase the Sponsor’s fees. This could make the Trust’s Shares less attractive to investors than the shares of similar vehicles that do not present these concerns, adversely affect investor sentiment about the Trust and negatively affect Share trading prices.

DCG holds a minority interest in the parent company of the Custodian, which could lead DCG to cause the Sponsor to take actions that favor the Custodian’s interests over the Trust’s interests.

Coinbase, Inc. is also the parent company of the Custodian, Coinbase Custody Trust Company, LLC. The Custodian serves as a fiduciary and custodian on the Trust’s behalf, and is responsible for safeguarding the Ether held by the Trust, and holding the private keys that provide access to the Trust’s digital wallets and vaults. DCG’s minority interest of less than 1.0% in the parent company of the Custodian may present risks to shareholders to the extent DCG causes the Sponsor to favor the Custodian’s interests over the interests of the Trust or its shareholders with respect to, for example, fees charged and the quality of service provided by the Custodian. Similarly, it is possible that investors could have concerns that DCG’s interest in Coinbase, Inc. could cause it to refrain from taking actions that are in the best interests of the Trust but that could harm the Custodian. This could make the Trust’s Shares less attractive to investors than the shares of similar vehicles that do not present these concerns, adversely affect investor sentiment about the Trust and negatively affect Share trading prices.

Shareholders cannot be assured of the Sponsor’s continued services, the discontinuance of which may be detrimental to the Trust.

Shareholders cannot be assured that the Sponsor will be willing or able to continue to serve as sponsor to the Trust for any length of time. If the Sponsor discontinues its activities on behalf of the Trust and a substitute sponsor is not appointed, the Trust will terminate and liquidate its Ether.

Appointment of a substitute sponsor will not guarantee the Trust’s continued operation, successful or otherwise. Because a substitute sponsor may have no experience managing a digital asset financial vehicle, a substitute sponsor may not have the experience, knowledge or expertise required to ensure that the Trust will operate successfully or continue to operate at all. Therefore, the appointment of a substitute sponsor may not necessarily be beneficial to the Trust and the Trust may terminate. See “Certain Relationships and Related Party Transactions—The Sponsor.”

Although the Custodian is a fiduciary with respect to the Trust’s assets, if the Custodian resigns or is removed by the Sponsor or otherwise, without replacement, it would trigger early termination of the Trust.

The Custodian is a fiduciary under § 100 of the New York Banking Law and a qualified custodian for purposes of Rule 206(4)-2(d)(6) under the Investment Advisers Act and is licensed to custody the Trust’s Ether in trust on the Trust’s behalf. However, the SEC has recently released proposed amendments to rule 206(4)-2 that, if enacted as proposed, would amend the definition of a “qualified custodian” under Rule 206(4)-2(d)(6). Executive officers of the Custodian’s parent company have made public statements indicating that the Custodian will remain a qualified custodian under the proposed SEC rule, if enacted as currently proposed. However, there can be no assurance that the Custodian would continue to qualify as a “qualified custodian” under a final rule.

A Custodial Entity may terminate the Prime Broker Agreement for Cause (as defined in “Business—Description of the Prime Broker Agreement—Term; Termination and Suspension”) at any time or upon one hundred eighty days’ prior written notice to the Trust, as provided under the Prime Broker Agreement. If the Custodian resigns or is removed by the Sponsor or otherwise, without replacement, the Trust will dissolve in accordance with the terms of the Trust Agreement.

Shareholders may be adversely affected by the lack of independent advisers representing investors in the Trust.

The Sponsor has consulted with counsel, accountants and other advisers regarding the formation and operation of the Trust. No counsel was appointed to represent investors in connection with the formation of the Trust or the establishment of the terms of the Trust Agreement and the Shares. Moreover, no counsel has been appointed to represent an investor in connection with the offering of the Shares. Accordingly, an investor should consult his, her or its own legal, tax and financial advisers regarding the desirability of the value of the Shares. Lack of such consultation may lead to an undesirable investment decision with respect to investment in the Shares.

The Trust is an “emerging growth company” and the reduced disclosure requirements applicable to emerging growth companies may make the Shares less attractive to investors.

The Trust is an “emerging growth company,” as defined in the JOBS Act, and intends to take advantage of certain exemptions from various reporting requirements that are applicable to other public companies, including, but not limited to, not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act, reduced disclosure obligations regarding executive compensation in its periodic reports and exemptions from the requirement of shareholder approval of any golden parachute payments not previously approved. The Trust intends to take advantage of these reporting exemptions until it is no longer an emerging growth company. The Sponsor and the Trust cannot predict if investors will find the Shares less attractive

because the Trust will rely on these exemptions. The Trust will remain an emerging growth company for up to five years after its initial public offering, although it will lose that status sooner if the Trust has more than \$1.235 billion of revenues in a fiscal year, has more than \$700 million in market value of Shares held by non-affiliates as of any June 30 or issues more than \$1.0 billion of non-convertible debt over a rolling three-year period. If some investors find the Shares less attractive as a result, there may be a less active trading market for the Shares and the price of the Shares may be more volatile.

Risk Factors Related to the Offering

There may be less liquidity or wider spreads in the market for ETH Shares as compared to the shares of other spot Ether exchange-traded products, such as the ETHE Shares.

Although the Sponsor believes that the Initial Distribution will facilitate an active trading market for ETH Shares and ETH Shares are expected to be publicly listed and traded on the NYSE Arca, as a new investment vehicle, there can be no guarantee that the trading market for ETH Shares will develop as robustly as the trading market for the shares of other spot Ether exchange-traded products, such as the ETHE Shares, or that one will develop at all. To the extent that no active trading market develops and/or the assets of the Trust do not reach or maintain a viable size to facilitate robust trading, the liquidity of the ETH Shares may be limited, which could result in wider bid/ask spreads and negatively impact the value of the ETH Shares. In addition, if shareholders need to sell their ETH Shares at a time when no active market for them exists, the price shareholders receive for their ETH Shares, assuming that shareholders are able to sell them, likely will be lower than the price that shareholders would receive if an active market did exist and, accordingly, a shareholder may suffer losses. See “—Risk Factors Related to the Digital Asset Markets—The lack of active trading markets for the Shares may result in losses on investors’ investments at the time of disposition of Shares.”

The liquidity of the Shares may be affected if Authorized Participants cease to perform their obligations under the Participant Agreements or the Liquidity Engager is unable to engage Liquidity Providers.

In the event that one or more Authorized Participants having substantial interests in Shares or otherwise responsible for a significant portion of the Shares’ daily trading volume on NYSE Arca terminates its Participant Agreement, the liquidity of the Shares would likely decrease, which could adversely affect the value of the Shares. In addition, if the Liquidity Engager is unable to engage one or more Liquidity Providers to obtain or receive Ether in connection with Cash Orders, the Trust may have difficulty maintaining the participation of certain Authorized Participants or engaging additional Authorized Participants. Under such circumstances, the liquidity of the Shares would likely decrease, which could adversely affect the value of the Shares.

The Shares may trade at a price that is at, above or below the Trust’s NAV per Share as a result of the non-current trading hours between NYSE Arca and the Digital Asset Trading Platform Market.

The Trust’s NAV per Share will fluctuate with changes in the market value of Ether, and the Sponsor expects the trading price of the Shares to fluctuate in accordance with changes in the Trust’s NAV per Share, as well as market supply and demand. However, the Shares may trade on NYSE Arca at a price that is at, above or below the Trust’s NAV per Share for a variety of reasons. For example, NYSE Arca is open for trading in the Shares for a limited period each day, but the Digital Asset Trading Platform Market is a 24-hour marketplace. During periods when NYSE Arca is closed but Digital Asset Trading Platforms are open, significant changes in the price of Ether on the Digital Asset Trading Platform Market could result in a difference in performance between the value of Ether as measured by the Index and the most recent NAV per Share or closing trading price. For example, if the price of Ether on the Digital Asset Trading Platform Market, and the value of Ether as measured by the Index, move significantly in a negative direction after the close of NYSE Arca, the trading price of the Shares may “gap” down to the full extent of such negative price shift when NYSE Arca reopens. If the price of Ether on the Digital Asset Trading Platform Market drops significantly during hours NYSE Arca is closed, shareholders may not be able to sell their Shares until after the “gap” down has been fully realized,

resulting in an inability to rapidly mitigate losses in a negative market. Even during periods when NYSE Arca is open, large Digital Asset Trading Platforms (or a substantial number of smaller Digital Asset Trading Platforms) may be lightly traded or closed for any number of reasons, which could increase trading spreads and widen any premium or discount on the Shares.

Shareholders may suffer a loss on their investment if the Shares trade above or below the Trust's NAV per Share.

If the Shares trade on NYSE Arca in the future at a premium, investors who purchase Shares on NYSE Arca will pay more for their Shares than investors who purchase Shares directly from Authorized Participants. In contrast, if the Shares trade on NYSE Arca in the future at a discount, investors who purchase Shares directly from Authorized Participants will pay more for their Shares than investors who purchase Shares on NYSE Arca. As a result, shareholders who purchase Shares on NYSE Arca at a premium may suffer a loss on their investment if they sell their Shares at a time when the premium has decreased from the premium at which they purchased the Shares even if the NAV per Share remains the same. Likewise, shareholders that purchase Shares directly from the Trust may suffer a loss on their investment if they sell their Shares at a time when the Shares are trading at a discount on NYSE Arca. Furthermore, shareholders may suffer a loss on their investment even if the NAV per Share increases because the decrease in any premium or increase in any discount may offset any increase in the NAV per Share.

USE OF PROCEEDS

Proceeds received by the Trust from the issuance and sale of Baskets will consist of Ether deposited with the Trust in connection with the Initial Distribution and future creations. Such Ether will only be (i) owned by the Trust, (ii) transferred (or converted to U.S. dollars, if necessary) to pay the Trust's expenses, (iii) distributed or otherwise disposed of in connection with the redemption of Baskets or (iv) liquidated in the event that the Trust terminates or as otherwise required by law or regulation.

UNAUDITED PRO FORMA FINANCIAL STATEMENTS

The following unaudited pro forma financial statements consist of the Unaudited Pro Forma Statement of Assets and Liabilities as of March 31, 2024 and the Unaudited Pro Forma Statements of Operations for the three months ended March 31, 2024 and the year ended December 31, 2023. These unaudited pro forma financial statements were derived from available information and assumptions related to the contemplated Initial Distribution. The Trust had nominal assets and no liabilities, and conducted no operations prior to the date of this prospectus; a presentation of the Trust's historical financial position and results of operations as of and for the periods presented is therefore not meaningful.

The Unaudited Pro Forma Statement of Assets and Liabilities as of March 31, 2024 has been prepared to give effect to the Initial Distribution as if it had occurred or become effective as of March 31, 2024. The Unaudited Pro Forma Statements of Operations for the three months ended March 31, 2024 and the year ended December 31, 2023 have been prepared to give effect to the Initial Distribution as if it had occurred or had become effective as of January 1, 2023.

The unaudited pro forma financial statements have been prepared in accordance with Article 11 of Regulation S-X as amended by the final rule, Release No. 33-10786 "Amendments to Financial Disclosures about Acquired and Disposed Businesses." The assumptions and estimates underlying the adjustments to the unaudited pro forma financial statements are described in the accompanying notes, which should be read together with the unaudited pro forma financial statements. These amounts are estimates, and the final amounts could differ materially from these estimates.

The unaudited pro forma financial statements have been adjusted to give effect to the Initial Distribution using the following assumptions, which are based on the actual amounts of Ether held by ETHE and ETHE shares outstanding as of January 1, 2023, the beginning of ETHE's most recently completed fiscal year, and other available information. The unaudited pro forma financial statements have been prepared to reflect transaction accounting and autonomous entity adjustments to present the financial condition and results of operations of the Trust as a stand-alone entity. The Sponsor notes that such assumptions regarding the quantity of Ether that will be contributed by ETHE to the Trust and the Sponsor's Fee that the Trust will charge are purely for illustrative purposes and not necessarily reflective of the ultimate quantity of Ether to be contributed to the Trust in the Initial Distribution or the actual Sponsor's Fee that will be payable on the Shares of the Trust:

- 303,763.14252286 Ether will be contributed by ETHE to the Trust;
- 310,158,500 shares of the Trust will be issued and distributed to holders of ETHE Shares; and
- the Sponsor's Fee payable on the Shares of the Trust will be 0.20%.

The unaudited pro forma financial statements are for illustrative and informational purposes only, and are not intended to represent what the Trust's financial position and results of operations would have been had the Trust been in operation during the periods presented or if the Initial Distribution had occurred as of the dates indicated. The unaudited pro forma financial statements also should not be considered indicative of the Trust's future financial position or future results of operations.

The following unaudited pro forma financial information illustrates the effects of the following transactions and assumptions:

- the transfer to the Trust of Ether at the fair value on the date of receipt (assumed to be January 1, 2023, for illustrative purposes) from ETHE, reduced by the amount of tokens used to pay the Sponsor's Fee during the three months ended March 31, 2024 and the year ended December 31, 2023 (this is reflected in the "Transaction Accounting Adjustments" column in the Unaudited Pro Forma Statement of Assets and Liabilities below);

- the impact of the daily Sponsor’s Fee accrual applied to the Trust assets over the specified period (i.e., the period from January 1, 2023, to December 31, 2023 or the period from January 1, 2024 to March 31, 2024, as applicable) (this is reflected in the “Autonomous Entity Adjustments” columns in the Unaudited Pro Forma Statements of Operations below);
- the assumption that Coinbase is the Digital Asset Trading Platform Market considered to be the Trust’s principal market and used to determine the fair value for the Ether in the “Investments in Ether” line on the Unaudited Pro Forma Statement of Assets and Liabilities as of March 31, 2024 and used to determine the daily value of the Sponsor’s Fee as described in Note 3 below; and
- the assumption that there were no additional post Initial Distribution creation or redemption activities for the period.

The unaudited pro forma financial statements reported below should be read in conjunction with “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” included elsewhere in this prospectus.

The unaudited pro forma financial information is subject to change based on the finalization of the terms of the Initial Distribution, and utilizing actual amounts of Ether held by ETHE and ETHE shares outstanding as of the Record Date. If the actual facts are different than these assumptions, then the unaudited pro forma financial information will be different, and those changes could be material.

NOTES TO UNAUDITED PRO FORMA FINANCIAL STATEMENTS

Note 1. Basis of Presentation

The accompanying unaudited pro forma financial information was prepared in accordance with Article 11 of Regulation S-X as amended by the final rule, Release No. 33-10786 “Amendments to Financial Disclosures about Acquired and Disposed Businesses.” Release No. 33-10786 replaces the existing pro forma adjustment criteria with simplified requirements to depict the accounting for the transaction (“Transaction Accounting Adjustments”), adjustments that depict the registrant as an autonomous entity (“Autonomous Entity Adjustments”) and present the reasonably estimable synergies and other transaction effects that have occurred or are reasonably expected to occur (“Management’s Adjustments”). The accompanying unaudited pro forma financial information presents the unaudited pro forma statements of operations and unaudited pro forma statement of assets and liabilities after giving effect to the Initial Distribution, with the audited historical financial statements of the Trust having been adjusted in the accompanying unaudited pro forma financial information to give pro forma effect to the Initial Distribution. The Transaction Accounting Adjustments depict the accounting for the Initial Distribution as required by GAAP, and the Autonomous Entity Adjustments depict the application of the Sponsor’s Fee that will apply to the Trust. The Sponsor has elected not to present Management’s Adjustments, and as such, the unaudited pro forma financial statements do not reflect any anticipated synergies or dis-synergies, operating efficiencies or cost savings that may result from the Initial Distribution or integration costs that may be incurred.

The accompanying unaudited pro forma financial information is presented for illustrative purposes only and does not purport to be indicative of what the Trust’s financial position and results of operations would have been had the Trust been in operation during the periods presented or if the Initial Distribution had occurred as of the dates indicated.

The unaudited pro forma financial statements consist of the Unaudited Pro Forma Statement of Assets and Liabilities as of March 31, 2024, and Unaudited Pro Forma Statements of Operations for the three months ended March 31, 2024 and the year ended December 31, 2023, which have been derived using the price provided at 4:00 p.m. New York time, by the Digital Asset Trading Platform Market considered to be the Trust’s principal market (Coinbase). The unaudited pro forma financial statements include certain pro forma adjustments, including the Transaction Accounting Adjustments and Autonomous Entity Adjustments, that reflect the accounting for transactions in accordance with accounting principles generally accepted in the United States (“U.S. GAAP”), to present fairly the Unaudited Pro Forma Statement of Assets and Liabilities and Unaudited Pro Forma Statement of Operations for and as of the periods indicated as if the Trust was an operating entity.

The Unaudited Pro Forma Statement of Assets and Liabilities as of March 31, 2024 gives effect to the Transaction Accounting Adjustments and the Autonomous Entity Adjustments as if they had occurred on March 31, 2024. The Unaudited Pro Forma Statements of Operations gives effect to the Autonomous Entity Adjustments for the three months ended March 31, 2024 and the year ended December 31, 2023, in each case as if they had occurred on January 1, 2023.

Note 2. Description of the Initial Distribution

ETHE currently intends to effectuate the Initial Distribution by contributing a certain amount of Ether to the Trust as consideration and in exchange for newly created Shares of the Trust. The newly created Shares of the Trust will then be distributed to shareholders of ETHE as of the Record Date, pro rata based on a 1:1 ratio, such that for each one (1) share of ETHE held by each ETHE Shareholder on the Record Date, such ETHE Shareholder will be entitled to receive one (1) Share of the Trust on the Distribution Date. See “The Initial Distribution” for more information. This is reflected in the “Transaction Accounting Adjustments” column in the Unaudited Pro Forma Statement of Assets and Liabilities above.

Note 3. Transaction Accounting Adjustments and Autonomous Entity Adjustments

The unaudited pro forma financial statements are subject to assumptions and adjustments described below. The Transaction Accounting Adjustments and Autonomous Entity Adjustments are based on available information and reasonable assumptions; however, such adjustments are subject to change. For the purposes of all adjustments, the Trust assumes that Coinbase is the Digital Asset Trading Platform Market considered to be the Trust's principal market, and that there were no additional creation or redemption activities as of the dates indicated in the pro forma financial statements. All amounts below are in thousands other than Ether token amounts and the price of Ether.

Transaction Accounting Adjustments:

- (a) Investment in Ether, at fair value:
 - Represents the cost basis value of the remaining 303,005.50894652 Ether in the Trust as of March 31, 2024. The Trust received 303,763.14252286 Ether transferred from Grayscale Ethereum Trust (ETH), in connection with the Initial Distribution which presumes an effective transfer date as of January 1, 2023. The fair value on the date of receipt of the respective Ether amounted to \$364,774 and was calculated using a price of \$1,200.85 per Ether. There were 757.63357634 Ether used to pay the Sponsor's Fee during the period ended March 31, 2024 resulting in a remaining cost basis of \$363,864. Ether prices used for these calculations was the price provided at 4:00 p.m. New York time, by the Digital Asset Trading Platform Market considered to be the Trust's principal market (Coinbase) and the remaining value is reflected in the "Transaction Accounting Adjustments" column of the Unaudited Pro Forma Statement of Assets and Liabilities.
- (b) Sponsor's Fee payable, related party:
 - Represents any accrued but not paid Sponsor's Fee and it is assumed that there would be fifteen monthly payments to the Sponsor during the period beginning on January 1, 2023 and ended on March 31, 2024, and therefore there was no unpaid portion of the Sponsor's Fee as of March 31, 2024.
- (c) Shares issued and outstanding, no par value (unlimited Shares authorized):
 - Represents the Shares issued and outstanding, no par value (unlimited Shares authorized) for the issuance of 310,158,500 no par value Trust shares in connection with the Initial Distribution. The number of shares outstanding for the Trust is assumed based on 310,158,500 shares outstanding of ETHE for the same date and a distribution ratio of one share of the Trust for every one share of ETHE; a 1:1 ratio. The actual number of shares issued will not be known until the record date for the Initial Distribution.
- (d) Principal market net asset value per Share:
 - Represents the fair value of the underlying Ether held in the Trust as a proportion of the total shares outstanding in the Trust in connection with the Initial Distribution. The fair value of the underlying Ether held in the Trust used to compute the Principal market net asset value per Share as of January 1, 2023 and March 31, 2024, was determined using the price provided at 4:00 p.m. New York time, by the Digital Asset Trading Platform Market considered to be the Trust's principal market (Coinbase). The Shares outstanding used to compute the Principal market net asset value per Share as of March 31, 2024, assumes a distribution ratio of 1:1; one share of the Trust for every one share of ETHE.

Autonomous Entity Adjustments:

(e) Investment in Ether, at fair value:

- The Initial Distribution amount of 303,763.14252286 Ether was reduced by an aggregate amount of 757.63357634 Ether via fifteen monthly withdrawals during the period from January 1, 2023 through March 31, 2024 and represents the total amount of Ether utilized to satisfy the Sponsor's Fee Payable, as calculated in the Sponsor's Fee, related party note below. The remaining Ether totaling 303,005.50894652 was then valued at \$3,637.95 per Ether which was the price provided at 4:00 p.m. New York time, by the Digital Asset Trading Platform Market considered to be the Trust's principal market (Coinbase) on March 31, 2024. The difference between the original value of the tokens initially received by the Trust, reduced by the value of the aggregate amount of tokens used to pay the Sponsor's Fee, compared to the value of the remaining tokens, which was reduced by the aggregate amount of tokens used to pay the Sponsor's Fee, was \$738,455 and is included in the "Autonomous Entity Adjustments" column of the Unaudited Pro Forma Statement of Assets and Liabilities.

(f) Sponsor's Fee, related party:

- Represents the Sponsor's Fee, which is the Trust's only ordinary recurring expense, for the year ended December 31, 2023. The Sponsor's Fee is the daily accrual, in U.S. dollars, at the illustrative annual rate of 0.20% of the NAV Fee Basis Amount of the Trust as of 4:00 p.m., New York time, on each day during the period beginning January 1, 2023 and ended December 31, 2023; provided that for a day that is not a business day, the calculation was based on the NAV Fee Basis Amount from the most recent business day, reduced by the accrued and unpaid Sponsor's Fee for such most recent business day and for each day after such most recent business day and prior to the relevant calculation date. It is assumed that the fee was paid in twelve monthly payments during the period beginning January 1, 2023 and ended December 31, 2023.
- This dollar amount for each daily accrual was then converted into Ether by reference to the same Index Price used to determine such accrual. The Sponsor's fee resulted in an aggregate amount of 606.92082471 Ether being paid to the Sponsor for the period ending December 31, 2023 in the Pro Forma financial statements for an aggregate dollar amount of \$1,089. The average Ether price used for this calculation was \$1,793.91. This calculation is performed and presented in the exact same manner as it was calculated for ETHE and using the exact same daily price of Ether with the only assumption being the illustrative application annual rate of 0.20% for the Sponsor's Fee for the period beginning January 1, 2023 and ended December 31, 2023.

(g) Net realized gain on investment in Ether:

- The adjustment to the net realized gain on investment in Ether represents the impact of the change in the fair value of the Ether when recognized in the Trust compared to the fair value of the Ether when withdrawn from the Trust. It is assumed that the withdrawals took place at the end of each calendar month during 2023. These calculations assumed Ether was withdrawn to satisfy the Sponsor's Fee due from the Trust. The adjustment represents the change in the fair value of the Ether accrued to satisfy the Sponsor's Fee compared to the fair value of the Ether when withdrawn to pay the Sponsor's Fee. The 606.92082471 Ether utilized to pay the Sponsor's Fee had a cost basis of \$1,200.85 per Ether resulting in the gain of \$360 when such Ether, which had an average fair value of \$1,793.91 at the time of payment, was utilized to satisfy the Sponsor's Fee. Redemptions were not considered for these assumptions. This calculation is performed in the same manner and used the same prices of Ether as it was calculated for ETHE for the period beginning January 1, 2023 and ended December 31, 2023.

- (h) Net change in unrealized appreciation (depreciation) on investment in Ether:
- The adjustment to the net change in unrealized appreciation (depreciation) on investment in Ether represents the impact of the price appreciation/depreciation on the underlying Ether held in the Trust for the year ended December 31, 2023. For these calculations the Trust assumes Coinbase is the Digital Asset Trading Platform Market considered to be the principal market. Therefore, the Trust uses the price provided at 4:00 p.m. New York time, by Coinbase to determine the unrealized appreciation (depreciation) of the underlying Ether held. This calculation is performed in the exact same manner as it was calculated for ETHE for the period beginning January 1, 2023 and ended December 31, 2023. The difference between the value of the Ether initially received compared to the value of the remaining Ether was \$327,485 and is also recognized in the “Autonomous Entity Adjustments” column of the Unaudited Pro Forma Statement of Assets and Liabilities.
- (i) Sponsor’s Fee, related party:
- Represents the Sponsor’s Fee, which is the Trust’s only ordinary recurring expense, for the three months ended March 31, 2024. The Sponsor’s Fee is the daily accrual, in U.S. dollars, at the illustrative annual rate of 0.20% of the NAV Fee Basis Amount of the Trust as of 4:00 p.m., New York time, on each day during the period beginning January 1, 2024 and ended March 31, 2024; provided that for a day that is not a business day, the calculation was based on the NAV Fee Basis Amount from the most recent business day, reduced by the accrued and unpaid Sponsor’s Fee for such most recent business day and for each day after such most recent business day and prior to the relevant calculation date. It is assumed that the fee was paid in three monthly payments during the period beginning January 1, 2024 and ended March 31, 2024.
 - This dollar amount for each daily accrual was then converted into Ether by reference to the same Index Price used to determine such accrual. The Sponsor’s fee resulted in an aggregate amount of 150.71275163 Ether being paid to the Sponsor for the period beginning January 1, 2024 and ended March 31, 2024 in the Pro Forma financial statements for an aggregate dollar amount of \$439. The average Ether price used for this calculation was \$2,914.62. This calculation is performed and presented in the exact same manner as it was calculated for ETHE and using the exact same daily price of Ether with the only assumption being the illustrative application annual rate of 0.20% for the Sponsor’s Fee for the period beginning January 1, 2024 and ended March 31, 2024.
- (j) Net realized gain on investment in Ether:
- The adjustment to the net realized gain on investment in Ether represents the impact of the change in the fair value of the Ether when recognized in the Trust compared to the fair value of the Ether when withdrawn from the Trust. It is assumed that the withdrawals took place at the end of each calendar month during the three months ended March 31, 2024. These calculations assumed Ether was withdrawn to satisfy the Sponsor’s Fee due from the Trust. The adjustment represents the change in the fair value of the Ether accrued to satisfy the Sponsor’s Fee compared to the fair value of the Ether when withdrawn to pay the Sponsor’s Fee. The 150.71275163 Ether utilized to pay the Sponsor’s Fee had a cost basis of \$1,200.85 per Ether resulting in the gain of \$258 when such Ether, which had an average fair value of \$2,914.62 at the time of payment, was utilized to satisfy the Sponsor’s Fee. Redemptions were not considered for these assumptions. This calculation is performed in the same manner and used the same prices of Ether as it was calculated for ETHE for the period beginning January 1, 2024 and ended March 31, 2024.
- (k) Net change in unrealized appreciation (depreciation) on investment in Ether:
- The adjustment to the net change in unrealized appreciation (depreciation) on investment in Ether represents the impact of the price appreciation/depreciation on the underlying Ether

held in the Trust for the three months ended March 31, 2024. For these calculations the Trust assumes Coinbase is the Digital Asset Trading Platform Market considered to be the principal market. Therefore, the Trust uses the price provided at 4:00 p.m. New York time, by Coinbase to determine the unrealized appreciation (depreciation) of the underlying Ether held. This calculation is performed in the exact same manner as it was calculated for ETHE for the period beginning January 1, 2024 and ended March 31, 2024. The difference between the fair value of Ether as of December 31, 2023 reduced by the cost of the Ether used to pay the sponsor fee compared to the value of the remaining Ether was \$410,970 for the three months ended March 31, 2024.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read together with, and is qualified in its entirety by reference to, our audited financial statements and related notes included elsewhere in this prospectus, which have been prepared in accordance with generally accepted accounting principles in the United States ("GAAP"). The following discussion may contain forward-looking statements based on assumptions we believe to be reasonable. Our actual results could differ materially from those discussed in these forward-looking statements. Factors that could cause or contribute to these differences include, but are not limited to, those discussed below and elsewhere in this prospectus, particularly in "Risk Factors" and "Forward-Looking Statements."

Trust Overview

The Trust is a passive entity that is managed and administered by the Sponsor and does not have any officers, directors or employees. The Trust holds Ether and, from time to time on a periodic basis, will issue Creation Baskets in exchange for deposits of Ether (or cash to acquire Ether) and redeem Baskets in exchange for Ether (or proceeds from the disposition of Ether) from the Trust. As a passive investment vehicle, the Trust's investment objective is for the value of the Shares (based on Ether per Share) to reflect the value of Ether held by the Trust, determined by reference to the Index Price, less the Trust's expenses and other liabilities. While an investment in the Shares is not a direct investment in Ether, the Shares are designed to provide investors with a cost-effective and convenient way to gain investment exposure to Ether. The Trust will not utilize leverage, derivatives or any similar arrangements in seeking to meet its investment objective. The Trust is not managed like a business corporation or an active investment vehicle.

Critical Accounting Policies and Estimates

Investment Transactions and Revenue Recognition

The Trust considers investment transactions to be the receipt of Ether by the Trust in connection with Share creations and the delivery of Ether by the Trust in connection with Share redemptions or for payment of expenses in Ether. The Trust records its investment transactions on a trade date basis and changes in fair value are reflected as net change in unrealized appreciation or depreciation on investments. Realized gains and losses are calculated using the specific identification method. Realized gains and losses are recognized in connection with transactions including settling obligations for the Sponsor's Fee in Ether.

Principal Market and Fair Value Determination

To determine which market is the Trust's principal market (or in the absence of a principal market, the most advantageous market) for purposes of calculating the Trust's net asset value in accordance with U.S. GAAP ("Principal Market NAV"), the Trust follows Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 820-10, which outlines the application of fair value accounting. ASC 820-10 determines fair value to be the price that would be received for Ether in a current sale, which assumes an orderly transaction between market participants on the measurement date. ASC 820-10 requires the Trust to assume that Ether is sold in its principal market to market participants or, in the absence of a principal market, the most advantageous market. Market participants are defined as buyers and sellers in the principal or most advantageous market that are independent, knowledgeable, and willing and able to transact.

The Trust only receives Ether, via a Liquidity Provider, in connection with a creation order from the Authorized Participant and does not itself transact on any Digital Asset Markets. Therefore, the Trust looks to market-based volume and level of activity for Digital Asset Markets. The Authorized Participant(s) (subject to In-Kind Regulatory Approval), or a Liquidity Provider, may transact in a Brokered Market, a Dealer Market,

Principal-to-Principal Markets and Exchange Markets (referred to as “Trading Platform Markets”), each as defined in the FASB ASC Master Glossary (collectively, “Digital Asset Markets”). In determining which of the eligible Digital Asset Markets is the Trust’s principal market, the Trust reviews these criteria in the following order:

- First, the Trust reviews a list of Digital Asset Markets that maintain practices and policies designed to comply with AML and KYC regulations, and non-Digital Asset Trading Platform Markets that the Trust reasonably believes are operating in compliance with applicable law, including federal and state licensing requirements, based upon information and assurances provided to it by each market.
- Second, the Trust sorts these Digital Asset Markets from high to low by market-based volume and level of activity of Ether traded on each Digital Asset Market in the trailing twelve months.
- Third, the Trust then reviews pricing fluctuations and the degree of variances in price on Digital Asset Markets to identify any material notable variances that may impact the volume or price information of a particular Digital Asset Market.
- Fourth, the Trust then selects a Digital Asset Market as its principal market based on the highest market-based volume, level of activity and price stability in comparison to the other Digital Asset Markets on the list. Based on information reasonably available to the Trust, Trading Platform Markets have the greatest volume and level of activity for the asset. The Trust therefore looks to accessible Trading Platform Markets as opposed to the Brokered Market, Dealer Market and Principal-to-Principal Markets to determine its principal market. As a result of the aforementioned analysis, a Trading Platform Market has been selected as the Trust’s principal market.

The Trust determines its principal market (or in the absence of a principal market the most advantageous market) annually and conducts a quarterly analysis to determine (i) if there have been recent changes to each Digital Asset Market’s trading volume and level of activity in the trailing twelve months, (ii) if any Digital Asset Markets have developed that the Trust has access to, or (iii) if recent changes to each Digital Asset Market’s price stability have occurred that would materially impact the selection of the principal market and necessitate a change in the Trust’s determination of its principal market.

The cost basis of Ether received by the Trust in connection with a creation order is recorded by the Trust at the fair value of Ether at 4:00 p.m., New York time, on the creation date for financial reporting purposes. The cost basis recorded by the Trust may differ from proceeds collected by the Authorized Participant from the sale of the corresponding Shares to investors.

Investment Company Considerations

The Trust is an investment company for GAAP purposes and follows accounting and reporting guidance in accordance with the FASB ASC Topic 946, Financial Services – Investment Companies. The Trust uses fair value as its method of accounting for Ether in accordance with its classification as an investment company for accounting purposes. The Trust is not a registered investment company under the Investment Company Act of 1940. GAAP requires management to make estimates and assumptions that affect the reported amounts in the financial statements and accompanying notes. Actual results could differ from those estimates and these differences could be material.

Review of Financial Results

Cash Resources and Liquidity

The Trust only receives and holds cash in order to facilitate creations and redemptions pursuant to Cash Orders, and does not otherwise have or maintain a cash balance at any time. When selling Ether and, subject to NYSE Arca obtaining regulatory approval from the SEC, Incidental Rights and/or IR Virtual Currency in the

Digital Asset Market to pay Additional Trust Expenses on behalf of the Trust, the Sponsor endeavors to sell the exact number of Ether, Incidental Rights and/or IR Virtual Currency needed to pay expenses in order to minimize the Trust's holdings of assets other than Ether. In addition, upon the consummation or deemed failure of a Cash Order to create or redeem Baskets, the Trust will promptly return any excess cash it continues to hold with respect to such Cash Order to the applicable counterparty. As a consequence, the Sponsor expects that the Trust will not record any cash flow from its operations and that its cash balance will be zero at the end of each reporting period. Furthermore, the Trust is not a party to any off-balance sheet arrangements.

In exchange for the Sponsor's Fee, the Sponsor has agreed to assume most of the expenses incurred by the Trust. As a result, the only ordinary expense of the Trust expected to be incurred is the Sponsor's Fee and, if applicable, any Additional Trust Expenses. The Trust is not aware of any trends, demands, conditions or events that are reasonably likely to result in material changes to its liquidity needs.

Quantitative and Qualitative Disclosures about Market Risk

The Trust Agreement does not authorize the Trust to borrow for payment of the Trust's ordinary expenses. The Trust does not engage in transactions in foreign currencies which could expose the Trust or holders of Shares to any foreign currency related market risk. The Trust does not invest in derivative financial instruments and has no foreign operations or long-term debt instruments.

BUSINESS

Overview of the Trust and the Shares

Grayscale Ethereum Mini Trust (ETH) (the “Trust”) is a Delaware Statutory Trust that was formed on April 23, 2024 by the filing of the Certificate of Trust with the Delaware Secretary of State in accordance with the provisions of the Delaware Statutory Trust Act. The Trust’s purpose is to hold “Ether”, which are digital assets that are created and transmitted through the operations of the peer-to-peer Ethereum Network, a decentralized network of computers that operates on cryptographic protocols. There are several key features of the Ethereum Network. Ether has an unlimited supply and a circulating supply of approximately 120 million coins as of June 30, 2024. As of June 30, 2024, the 24-hour trading volume of Ether was approximately \$3.0 billion. As of June 30, 2024, the aggregate market value of Ether was \$413 billion. As of June 30, 2024, Ether was the second largest digital asset by market capitalization, as tracked by CoinMarketCap.com.

As a passive investment vehicle, the Trust’s investment objective is for the value of the Shares (based on Ether per Share) to reflect the value of the Ether held by the Trust, determined by reference to the Index Price, less the Trust’s expenses and other liabilities. The Trust does not seek to generate returns beyond tracking the price of Ether. There can be no assurance that the Trust will be able to achieve its investment objective. The Trust will not utilize leverage, derivatives or any similar arrangements in seeking to meet its investment objective.

From and after the date of this prospectus, the Trust intends to issue Shares on an ongoing basis pursuant to this registration statement, intends to rely on an exemption or other relief from the SEC under Regulation M to operate a redemption program, and intends to list the Shares on NYSE Arca under the symbol “ETH.” The Shares will be distributed by Authorized Participants who will be able to take advantage of arbitrage opportunities to keep the value of the Shares closely linked to the Index Price (referred to as the “arbitrage mechanism”). In particular, upon listing on NYSE Arca, the Sponsor expects there to be a net creation of Shares if the Shares trade at a premium to NAV per Share and a net redemption of Shares if the Shares trade at a discount to NAV per Share, representing the effective functioning of the arbitrage mechanism.

Thereafter, it is expected that the Shares will be sold by the Authorized Participants to the public at varying prices to be determined by reference to, among other considerations, the price of the Ether represented by each Share and the trading price of the Shares on NYSE Arca at the time of each sale.

Grayscale Investments, LLC is the sponsor (the “Sponsor”) of the Trust, CSC Delaware Trust Company is the trustee (the “Trustee”) of the Trust, The Bank of New York Mellon is the transfer agent (in such capacity, the “Transfer Agent”) and the administrator (in such capacity, the “Administrator”) of the Trust, Coinbase, Inc. is the prime broker (the “Prime Broker”) of the Trust and Coinbase Custody Trust Company, LLC is the custodian (the “Custodian”) of the Trust.

The Trust issues Shares only in one or more blocks of 10,000 Shares (a block of 10,000 Shares is called a “Basket”) to certain authorized participants (“Authorized Participants”) from time to time. Baskets are offered in exchange for Ether (or cash to acquire Ether). Through its redemption program, the Trust will redeem Shares from Authorized Participants on an ongoing basis. The U.S. dollar value of a Basket of Shares at 4:00 p.m., New York time, on the trade date of a creation or redemption order is equal to the Basket Amount, which is the number of Ether required to create or redeem a Basket of Shares, multiplied by the “Index Price,” which is the U.S. dollar value of an Ether derived from the Digital Asset Trading Platforms that are reflected in the CoinDesk Ether Price Index (ETX) (the “Index”) at 4:00 p.m., New York time, on each business day. The Index Price is calculated using non-GAAP methodology and is not used in the Trust’s financial statements. See “—Overview of the Ethereum Industry and Market—The Index and the Index Price.”

The Basket Amount on any trade date is determined by dividing (x) the number of Ether owned by the Trust at 4:00 p.m., New York time, on such trade date, after deducting the number of Ether representing the U.S. dollar

value of accrued but unpaid fees and expenses of the Trust (converted using the Index Price at such time, and carried to the eighth decimal place), by (y) the number of Shares outstanding at such time (with the quotient so obtained calculated to one one-hundred-millionth of one Ether (i.e., carried to the eighth decimal place)), and multiplying such quotient by 10,000.

The Trust will create Baskets of Shares only upon receipt of Ether and will redeem Shares only by distributing Ether or proceeds from the disposition of Ether. At this time, Authorized Participants may only submit orders to create or redeem Shares through transactions that are referred to as “Cash Orders” in this prospectus. Cash Orders are made through the participation of a Liquidity Provider (as defined herein) and facilitated by the Transfer Agent, as described in “Description of Creation and Redemption of Shares.” Authorized Participants must pay a Variable Fee (as defined herein) in connection with certain Cash Orders.

The Shares are neither interests in nor obligations of the Sponsor or the Trustee. As provided under the Trust Agreement, the Trust’s assets will not be loaned or pledged, or serve as collateral for any loan, margin, rehypothecation, or other similar activity to which the Sponsor, the Trust or any of their respective affiliates are a party.

The Sponsor maintains an Internet website at www.etfs.grayscale.com/eth. Additional information regarding the Trust may also be found on the SEC’s EDGAR database at www.sec.gov.

The contents of the websites referred to above and any websites referred to herein are not incorporated into this filing or any other report or documents we file with or furnish to the SEC. Further, our references to the URLs for these websites are intended to be inactive textual references only.

Investment Objective

The Trust’s investment objective is for the value of the Shares (based on Ether per Share) to reflect the value of the Ether held by the Trust, determined by reference to the Index Price, less the Trust’s expenses and other liabilities. There can be no assurance that the Trust will be able to achieve its investment objective. Although we expect the arbitrage mechanism to keep the value of the Shares closely linked to the Index Price, the Shares may trade at a premium or discount to the value of the Ether held by the Trust, determined by reference to the Index Price, less the Trust’s expenses and other liabilities, and any such premium or discount may be significant.

While an investment in the Shares is not a direct investment in Ether, the Shares are designed to provide investors with a cost-effective and convenient way to gain investment exposure to Ether. A substantial direct investment in Ether may require expensive and sometimes complicated arrangements in connection with the acquisition, security and safekeeping of the Ether and may involve the payment of substantial fees to acquire such Ether from third-party facilitators through cash payments of U.S. dollars. Because the value of the Shares is designed to be correlated with the value of the Ether held by the Trust, it is important to understand the investment attributes of, and the market for, Ether.

The Trust’s Ether are carried, for financial statement purposes, at fair value as required by U.S. generally accepted accounting principles (“GAAP”). The Trust determines the fair value of Ether based on the price provided by the Digital Asset Market (defined below) that the Trust considers its principal market as of 4:00 p.m., New York time, on the valuation date. The net asset value of the Trust determined on a GAAP basis is referred to in this prospectus as “NAV.” “Digital Asset Market” means a “Brokered Market,” “Dealer Market,” “Principal-to-Principal Market” or “Exchange Market,” as each such term is defined in the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Master Glossary. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies and Estimates—Principal Market and Fair Value Determination” in this prospectus for more information on the Trust’s principal market selection.

The Trust uses the Index Price to calculate its “NAV,” which is the aggregate value, expressed in U.S. dollars, of the Trust’s assets (other than U.S. dollars or other fiat currency), less the U.S. dollar value of the Trust’s expenses and other liabilities calculated in the manner set forth under “—Valuation of Ether and Determination of NAV.” “NAV per Share” is calculated by dividing NAV by the number of Shares then outstanding.

NAV and NAV per Share are not measures calculated in accordance with GAAP. NAV is not intended to be a substitute for the Trust’s Principal Market NAV calculated in accordance with GAAP, and NAV per Share is not intended to be a substitute for the Trust’s Principal Market NAV per Share calculated in accordance with GAAP.

Pursuant to the terms of the Trust Agreement, the Trust is required to dissolve under certain circumstances. In addition, the Sponsor may, in its sole discretion, dissolve the Trust for a number of reasons, including if the Sponsor determines, in its sole discretion, that it is desirable or advisable for any reason to discontinue the affairs of the Trust. For example, if the Sponsor determines that Ether is a security under the federal securities laws, whether that determination is initially made by the Sponsor itself, or because a federal court upholds an allegation that Ether is a security, the Sponsor does not intend to permit the Trust to continue holding Ether in a way that would violate the federal securities laws (and therefore would either dissolve the Trust or potentially seek to operate the Trust in a manner that complies with the federal securities laws, including the Investment Company Act of 1940 (the “Investment Company Act”). See “—Description of the Trust Agreement—Termination of the Trust” for additional discussion of the circumstances under which the Trust could be dissolved. See “Risk Factors—Risk Factors Related to the Trust and the Shares—A determination that Ether or any other digital asset is a “security” may adversely affect the value of Ether and the value of the Shares, and result in potentially extraordinary, nonrecurring expenses to, or termination of, the Trust.”

Characteristics of the Shares

The Shares are intended to offer investors an opportunity to gain exposure to digital assets through an investment in securities. The logistics of accepting, transferring and safekeeping of Ether are dealt with by the Sponsor and Custodian, and the related expenses are built into the value of the Shares. Therefore, shareholders do not have additional tasks or costs over and above those generally associated with investing in any other security.

The Shares have certain other key characteristics, including the following:

- *Easily Accessible and Relatively Cost Efficient.* Investors in the Shares can also directly access the Digital Asset Markets. The Sponsor believes that investors will be able to more effectively implement strategic and tactical asset allocation strategies that use Ether by using the Shares instead of directly purchasing and holding Ether, and for many investors, transaction costs related to the Shares will be lower than those associated with the direct purchase, storage and safekeeping of Ether.
- *Market-Traded and Transparent.* The Shares are expected to be listed on NYSE Arca. The Sponsor believes the listing of the Shares on NYSE Arca will provide investors with an efficient means to implement various investment strategies. The Trust will not hold or employ any derivative securities. Furthermore, the value of the Trust’s assets will be reported each day on www.etsf.grayscale.com/eth.
- *Minimal Credit Risk.* The Shares represent an interest in actual Ether owned by the Trust. The Trust’s Ether are not subject to borrowing arrangements with third parties and are subject to counterparty and minimal credit risk with respect to the Custodian. This contrasts with the other financial products such as CoinShares exchange-traded notes, TeraExchange swaps and Ether futures and options traded on the Chicago Mercantile Exchange and the Intercontinental Exchange through which investors gain exposure to digital assets through the use of derivatives that are subject to counterparty and credit risks.

- *Safekeeping System.* The Custodian has been appointed to control and secure the Ether for the Trust using offline storage, or cold storage, mechanisms to secure the Trust’s private key “shards”. The hardware, software, administration and continued technological development that are used by the Custodian may not be available or cost-effective for many investors.

The Trust differentiates itself from many competing digital asset financial vehicles in the following ways:

- *Custodian.* The Custodian that holds the private key shards associated with the Trust’s Ether is Coinbase Custody Trust Company, LLC. Other digital asset financial vehicles that use cold storage may not use a custodian to hold their private keys.
- *Cold Storage of Private Keys.* The private key shards associated with the Trust’s Ether are kept in cold storage, which means that the Trust’s Ether are disconnected and/or deleted entirely from the internet. See “—Custody of the Trust’s Ether” for more information relating to the storage and retrieval of the Trust’s private keys to and from cold storage. Other digital asset financial vehicles may not utilize cold storage or may utilize less effective cold storage-related hardware and security protocols.
- *Location of Private Vaults.* Private key shards associated with the Trust’s Ether are distributed geographically by the Custodian in secure vaults around the world, including in the United States. The locations of the secure vaults may change regularly and are kept confidential by the Custodian for security purposes.
- *Enhanced Security.* Transfers from the Trust’s Vault Balance require certain security procedures, including but not limited to, multiple encrypted private key shards, usernames, passwords and 2-step verification. Multiple private key shards held by the Custodian must be combined to reconstitute the private key to sign any transaction in order to transfer the Trust’s Ether. Private key shards are distributed geographically in secure vaults around the world, including in the United States. As a result, if any one secure vault is ever compromised, this event will have no impact on the ability of the Trust to access its assets, other than a possible delay in operations, while one or more of the other secure vaults is used instead. These security procedures are intended to remove single points of failure in the protection of the Trust’s Ether.
- *Custodian Audits.* The Custodian has agreed to allow the Trust and the Sponsor to take such steps as necessary to verify that satisfactory internal control systems and procedures are in place.
- *Directly Held Ether.* The Trust directly owns actual Ether held through the Custodian. This may differ from other digital asset financial vehicles that provide Ether exposure through other means, such as the use of financial or derivative instruments.
- *Sponsor’s Fee.* The Sponsor’s Fee is a competitive factor that may influence the value of the Shares.

Activities of the Trust

The activities of the Trust are limited to (i) issuing Baskets in exchange for Ether (or cash to acquire Ether) transferred to the Trust as consideration in connection with the creations, (ii) transferring or selling Ether as necessary to cover the Sponsor’s Fee and/or any Additional Trust Expenses, (iii) transferring or disposing of Ether to retire Baskets surrendered for redemption, (iv) causing the Sponsor to sell Ether on the termination of the Trust, (v) making distributions of Incidental Rights and/or IR Virtual Currency or cash from the sale thereof (subject to NYSE Arca obtaining regulatory approval from the SEC), as described in “—Incidental Rights and IR Virtual Currency” below, and (vi) engaging in all administrative and security procedures necessary to accomplish such activities in accordance with the provisions of the Trust Agreement, the Prime Broker Agreement, the Index License Agreement, the Participant Agreements and the Liquidity Provider Agreements.

The Trust may engage in any lawful activity necessary or desirable in order to facilitate shareholders’ access to Incidental Rights or IR Virtual Currency (subject to NYSE Arca obtaining regulatory approval from the SEC),

provided that such activities do not conflict with the terms of the Trust Agreement. The Trust will not be actively managed. It will not engage in any activities designed to obtain a profit from, or to ameliorate losses caused by changes in the market prices of Ether.

Incidental Rights and IR Virtual Currency

The Sponsor has committed to cause the Trust to abandon irrevocably for no direct or indirect consideration, effective immediately prior to each time at which the Trust creates or redeems Shares (each, a “Creation Time” or “Redemption Time”, respectively), all Incidental Rights and IR Virtual Currency to which it would otherwise be entitled as of such time. In furtherance of that commitment, the Prime Broker Agreement provides that the Trust is abandoning irrevocably, for no direct or indirect consideration, effective immediately prior to each Creation Time and each Redemption Time, all Incidental Rights or IR Virtual Currency to which it would otherwise be entitled as of such time (such provision, as amended or supplemented from time to time, the “Pre-Creation/Redemption Abandonment Notice”). An abandonment made pursuant to the Pre-Creation/Redemption Abandonment Notice is referred to herein as a “Pre-Creation/Redemption Abandonment.” Pursuant to the Pre-Creation/Redemption Abandonment Notice, a Pre-Creation/Redemption Abandonment would not apply to any Incidental Rights or IR Virtual Currency if (i) the Trust has taken, or is taking at such time, an “Affirmative Action” to acquire or abandon such Incidental Rights or IR Virtual Currency at any time prior to the relevant Creation Time or Redemption Time or (ii) such Incidental Rights or IR Virtual Currency has been subject to a previous Pre-Creation/Redemption Abandonment. An “Affirmative Action” refers to a written notification from the Sponsor to the Prime Broker, the Custodian or Coinbase Credit, Inc. (“Coinbase Credit”) of the Trust’s intention (i) to acquire and/or retain an Incidental Right and/or IR Virtual Currency or (ii) to abandon, with effect prior to the relevant Creation Time or Redemption Time, an Incidental Right and/or IR Virtual Currency.

The Trust has no right to receive any Incidental Right or IR Virtual Currency that it has abandoned. Furthermore, the Prime Broker, the Custodian and Coinbase Credit have no authority, pursuant to the Prime Broker Agreement or otherwise, to exercise, obtain or hold, as the case may be, any such abandoned Incidental Right or IR Virtual Currency on behalf of the Trust or to transfer any such abandoned Incidental Right or IR Virtual Currency to the Trust if the Trust terminates its custodial arrangement with the Prime Broker, the Custodian and Coinbase Credit. In addition, the Sponsor has committed to cause the Trust not to take any Affirmative Action to acquire any Incidental Rights or IR Virtual Currency, thereby irrevocably abandoning any Incidental Rights and IR Virtual Currency to which the Trust may become entitled in the future.

Because the Sponsor has committed to causing the Trust to irrevocably abandon all Incidental Rights and IR Virtual Currency to which the Trust otherwise would become entitled in the future, the Trust will not receive any direct or indirect consideration for the Incidental Rights or IR Virtual Currency and thus the value of the Shares will not reflect the value of the Incidental Rights or IR Virtual Currency. In addition, in the event the Sponsor seeks to change the Trust’s policy with respect to Incidental Rights or IR Virtual Currency, an application would need to be filed with the SEC by NYSE Arca seeking approval to amend its listing rules to permit the Trust to distribute the Incidental Rights or IR Virtual Currency in-kind to an agent of the shareholders for resale by such agent. However, there can be no assurance as to whether or when the Sponsor would make such a decision, or when NYSE Arca will seek or obtain this approval, if at all. See “Risk Factors—Risks Related to the Trust and the Shares—Shareholders will not receive the benefits of any forks or airdrops.”

The Sponsor has controls in place to monitor for material hard forks or airdrops. The Sponsor will notify investors of any material change to its policy with respect to Incidental Rights and IR Virtual Currency by filing a current report on Form 8-K.

Secondary Market Trading

While the Trust’s investment objective is for the value of the Shares (based on Ether per Share) to reflect the value of Ether held by the Trust, determined by reference to the Index Price, less the Trust’s expenses and other

liabilities, the Shares may trade in the Secondary Market on NYSE Arca (or on another Secondary Market in the future) at prices that are lower or higher than the NAV per Share. The amount of the discount or premium in the trading price relative to the NAV per Share may be influenced by non-concurrent trading hours and liquidity between NYSE Arca and larger Digital Asset Trading Platforms. While the Shares are expected to be listed on NYSE Arca and trade during NYSE Arca's Core Trading Session from 9:30 a.m. to 4:00 p.m., New York time, liquidity in the Digital Asset Markets may fluctuate depending upon the volume and availability of larger Digital Asset Trading Platforms. As a result, during periods in which Digital Asset Market liquidity is limited or a major Digital Asset Trading Platform is off-line, trading spreads, and the resulting premium or discount, on the Shares may widen.

Overview of the Ethereum Industry and Market

Ether is a digital asset that is created and transmitted through the operations of the peer-to-peer Ethereum Network, a decentralized network of computers that operates on cryptographic protocols. No single entity owns or operates the Ethereum Network, the infrastructure of which is collectively maintained by a decentralized user base. The Ethereum Network allows people to exchange tokens of value, called Ether, which are recorded on a public transaction ledger known as a blockchain. Ether can be used to pay for goods and services, including computational power on the Ethereum Network, or it can be converted to fiat currencies, such as the U.S. dollar, at rates determined on Digital Asset Markets or in individual end-user-to-end-user transactions under a barter system. Furthermore, the Ethereum Network also allows users to write and implement smart contracts—that is, general-purpose code that executes on every computer in the network and can instruct the transmission of information and value based on a sophisticated set of logical conditions. Using smart contracts, users can create markets, store registries of debts or promises, represent the ownership of property, move funds in accordance with conditional instructions and create digital assets other than Ether on the Ethereum Network. Smart contract operations are executed on the Ethereum Blockchain in exchange for payment of Ether. The Ethereum Network is one of a number of projects intended to expand blockchain use beyond just a peer-to-peer money system.

The Ethereum Network was originally described in a 2013 white paper by Vitalik Buterin, a programmer involved with Bitcoin, with the goal of creating a global platform for decentralized applications powered by smart contracts. The formal development of the Ethereum Network began through a Swiss firm called Ethereum Switzerland GmbH in conjunction with several other entities. Subsequently, the Ethereum Foundation, a Swiss non-profit organization, was set up to oversee the protocol's development. The Ethereum Network went live on July 30, 2015. Unlike other digital assets, such as Bitcoin, which are solely created through a progressive mining process, 72.0 million Ether were created in connection with the launch of the Ethereum Network. For additional information on the initial Ether distribution, see “—Creation of New Ether.” Coinciding with the network launch, it was decided that EthSuisse would be dissolved, designating the Ethereum Foundation as the sole organization dedicated to protocol development.

The Ethereum Network is decentralized in that it does not require governmental authorities or financial institution intermediaries to create, transmit or determine the value of Ether. Rather, following the initial Ether distribution, Ether is created, burned and allocated by the Ethereum Network protocol through a process that is currently subject to an issuance and burn rate as further described under “—Limits on Ether Supply” below. The value of Ether is determined by the supply of and demand for Ether on the Digital Asset Trading Platforms or in private end-user-to-end-user transactions.

New Ether are created and rewarded to the validators of a block in the Ethereum Blockchain for verifying transactions. The Ethereum Blockchain is effectively a decentralized database that includes all blocks that have been validated and it is updated to include new blocks as they are validated. Each Ether transaction is broadcast to the Ethereum Network and, when included in a block, recorded in the Ethereum Blockchain. As each new block records outstanding Ether transactions, and outstanding transactions are settled and validated through such recording, the Ethereum Blockchain represents a complete, transparent and unbroken history of all transactions of the Ethereum Network. For further details, see “—Creation of New Ether.”

Among other things, Ether is used to pay for transaction fees and computational services (*i.e.*, smart contracts) on the Ethereum Network; users of the Ethereum Network pay for the computational power of the machines executing the requested operations with Ether. Requiring payment in Ether on the Ethereum Network incentivizes developers to write quality applications and increases the efficiency of the Ethereum Network because wasteful code costs more. It also ensures that the Ethereum Network remains economically viable by compensating people for their contributed computational resources.

Smart Contracts and Development on the Ethereum Network

Smart contracts are programs that run on a blockchain that can execute automatically when certain conditions are met. Smart contracts facilitate the exchange of anything representative of value, such as money, information, property, or voting rights. Using smart contracts, users can send or receive digital assets, create markets, store registries of debts or promises, represent ownership of property or a company, move funds in accordance with conditional instructions and create new digital assets.

Development on the Ethereum Network involves building more complex tools on top of smart contracts, such as decentralized apps (DApps); organizations that are autonomous, known as decentralized autonomous organizations (DAOs); and entirely new decentralized networks. For example, a company that distributes charitable donations on behalf of users could hold donated funds in smart contracts that are paid to charities only if the charity satisfies certain pre-defined conditions.

Moreover, the Ethereum Network has also been used as a platform for creating new digital assets and conducting their associated initial coin offerings. As of June 30, 2024, a majority of digital assets were built on the Ethereum Network, with such assets representing a significant amount of the total market value of all digital assets.

More recently, the Ethereum Network has been used for decentralized finance (DeFi) or open finance platforms, which seek to democratize access to financial services, such as borrowing, lending, custody, trading, derivatives and insurance, by removing third-party intermediaries. DeFi can allow users to lend and earn interest on their digital assets, exchange one digital asset for another and create derivative digital assets such as stablecoins, which are digital assets pegged to a reserve asset such as fiat currency. Over the course of 2023, between \$20 billion and \$30 billion worth of digital assets were locked up as collateral on DeFi platforms on the Ethereum Network.

In addition, the Ethereum Network and other smart contract platforms have been used for creating non-fungible tokens, or NFTs. Unlike digital assets native to smart contract platforms which are fungible and enable the payment of fees for smart contract execution. Instead, NFTs allow for digital ownership of assets that convey certain rights to other digital or real world assets. This new paradigm allows users to own rights to other assets through NFTs, which enable users to trade them with others on the Ethereum Network. For example, an NFT may convey rights to a digital asset that exists in an online game or a DApp, and users can trade their NFT in the DApp or game, and carry them to other digital experiences, creating an entirely new free-market internet-native economy that can be monetized in the physical world.

The DAO and Ethereum Classic

In July 2016, the Ethereum Network experienced what is referred to as a permanent hard fork that resulted in two different versions of its blockchain: Ethereum and Ethereum Classic.

In April 2016, a blockchain solutions company known as Slock.it announced the launch of a decentralized autonomous organization, known as “The DAO” on the Ethereum Network. The DAO was designed as a decentralized crowdfunding model, in which anyone could contribute Ether tokens to The DAO in order to become a voting member and equity stakeholder in the organization. Members of The DAO could then make

proposals about different projects to pursue and put them to a vote. By committing to profitable projects, members would be rewarded based on the terms of a smart contract and their proportional interest in The DAO. As of May 27, 2016, \$150 million, or approximately 14% of all Ether outstanding, was contributed to, and invested in, The DAO.

On June 17, 2016, an anonymous hacker exploited The DAO smart contract code to syphon approximately \$60 million, or 3.6 million Ether, into a segregated account. Upon the news of the breach, the price of Ether was quickly cut in half as investors liquidated their holdings and members of the Ethereum community worked to determine a solution.

In the days that followed, several attempts were made to retrieve the stolen funds and secure the Ethereum Network. However, it soon became apparent that direct interference with the protocol (*i.e.*, a hard fork) would be necessary. The argument for the hard fork was that it would create an entirely new version of the Ethereum Blockchain, erasing any record of the theft, and restoring the stolen funds to their original owners. The counterargument was that it would be antithetical to the core principle of immutability of the Ethereum Blockchain.

The decision over whether or not to hard fork the Ethereum Blockchain was put to a vote of Ethereum community members. A majority of votes were cast in favor of a hard fork. On July 15, 2016, a hard fork specification was implemented by the Ethereum Foundation. On July 20, 2016, the Ethereum Network completed the hard fork, and a new version of the blockchain, without recognition of the theft, was born.

Many believed that after the hard fork the original version of the Ethereum Blockchain would dissipate entirely. However, a group of miners continued to mine the original Ethereum Blockchain for philosophical and economic reasons. On July 20, 2016, the original Ethereum protocol was rebranded as Ethereum Classic, and its native token as Ether classic (“ETC”), preserving the untampered transaction history (including The DAO theft). Following the hard fork of Ethereum, each holder of Ether automatically received an equivalent number of ETC tokens.

Overview of the Ethereum Network’s Operations

In order to own, transfer or use Ether directly on the Ethereum Network, as opposed to through an intermediary, such as a custodian, a person generally must have internet access to connect to the Ethereum Network. Ether transactions may be made directly between end-users without the need for a third-party intermediary. To prevent the possibility of double-spending Ether, a user must notify the Ethereum Network of the transaction by broadcasting the transaction data to its network peers. The Ethereum Network provides confirmation against double-spending by memorializing every transaction in the Ethereum Blockchain, which is publicly accessible and transparent. This memorialization and verification against double-spending is accomplished through the Ethereum Network validation process, which adds “blocks” of data, including recent transaction information, to the Ethereum Blockchain.

Summary of an Ether Transaction

Prior to engaging in Ether transactions directly on the Ethereum Network, a user generally must first install on its computer or mobile device an Ethereum Network software program that will allow the user to generate a private and public key pair associated with an Ether address, commonly referred to as a “wallet.” The Ethereum Network software program and the Ether address also enable the user to connect to the Ethereum Network and transfer Ether to, and receive Ether from, other users.

Each Ethereum Network address, or wallet, is associated with a unique “public key” and “private key” pair. To receive Ether, the Ether recipient must provide its public key to the party initiating the transfer. This activity is analogous to a recipient for a transaction in U.S. dollars providing a routing address in wire instructions to the

payor so that cash may be wired to the recipient's account. The payor approves the transfer to the address provided by the recipient by "signing" a transaction that consists of the recipient's public key with the private key of the address from where the payor is transferring the Ether. The recipient, however, does not make public or provide to the sender its related private key.

Neither the recipient nor the sender reveal their private keys in a transaction, because the private key authorizes transfer of the funds in that address to other users. Therefore, if a user loses his or her private key, the user may permanently lose access to the Ether contained in the associated address. Likewise, Ether is irretrievably lost if the private key associated with them is deleted and no backup has been made. When sending Ether, a user's Ethereum Network software program must validate the transaction with the associated private key. In addition, since every computation on the Ethereum Network requires processing power, there is a transaction fee involved with the transfer that is paid by the payor. The resulting digitally validated transaction is sent by the user's Ethereum Network software program to the Ethereum Network validators to allow transaction confirmation.

As discussed in greater detail below in "—Creation of New Ether," Ethereum Network validators record and confirm transactions when they validate and add blocks of information to the Ethereum Blockchain. In proof-of-stake, validators compete to be randomly selected to validate transactions. When a validator is selected to validate a block, it creates that block, which includes data relating to (i) the verification of newly submitted and accepted transactions and (ii) a reference to the prior block in the Ethereum Blockchain to which the new block is being added. The validator becomes aware of outstanding, unrecorded transactions through the data packet transmission and distribution discussed above.

Upon the addition of a block included in the Ethereum Blockchain, the Ethereum Network software programs of both the spending party and the receiving party will show confirmation of the transaction on the Ethereum Blockchain and reflect an adjustment to the Ether balance in each party's Ethereum Network public key, completing the Ether transaction. Once a transaction is confirmed on the Ethereum Blockchain, it is irreversible.

Some Ether transactions are conducted "off-blockchain" and are therefore not recorded in the Ethereum Blockchain. These "off-blockchain transactions" involve the transfer of control over, or ownership of, a specific digital wallet holding Ether or the reallocation of ownership of certain Ether in a pooled-ownership digital wallet, such as a digital wallet owned by a Digital Asset Trading Platform. In contrast to on-blockchain transactions, which are publicly recorded on the Ethereum Blockchain, information and data regarding off-blockchain transactions are generally not publicly available. Therefore, off-blockchain transactions are not truly Ether transactions in that they do not involve the transfer of transaction data on the Ethereum Network and do not reflect a movement of Ether between addresses recorded in the Ethereum Blockchain. For these reasons, off-blockchain transactions are subject to risks as any such transfer of Ether ownership is not protected by the protocol behind the Ethereum Network or recorded in, and validated through, the blockchain mechanism.

Ether Markets

In addition to using Ether to engage in transactions, investors may purchase and sell Ether to speculate as to the value of Ether in the Ether market, or as a long-term investment to diversify their portfolio. The value of Ether within the market is determined, in part, by the supply of and demand for Ether in the global Ether market, market expectations for the adoption of Ether as a store of value, the number of merchants that accept Ether as a form of payment, and the volume of peer-to-peer transactions, among other factors.

Centralized spot Ether markets typically permit investors to open accounts with the trading platform and then purchase and sell Ether via websites or through mobile applications. Prices for trades on centralized spot Ether markets are typically reported publicly. An investor opening a trading account must deposit an accepted government-issued currency into their account with the spot market, or a previously acquired digital asset, before

they can purchase or sell assets on the spot market. The process of establishing an account with a centralized Ether market and trading Ether is different from, and should not be confused with, the process of users sending Ether from one Ether address to another Ether address on the Ethereum Blockchain or decentralized on-chain trading platforms. This latter process is an activity that occurs on the Ethereum Network, while the former is an activity that occurs entirely within the order book operated by the centralized spot market. The centralized spot market typically records the investor's ownership of Ether in its internal books and records, rather than on the Ethereum Blockchain. The centralized spot market ordinarily does not transfer Ether to the investor on the Ethereum Blockchain unless the investor makes a request to the Digital Asset Trading Platform to withdraw the Ether in their account to an off-exchange Ether wallet.

See “—Ether Value” below for a discussion of historical spot Ether prices on Digital Asset Trading Platforms and how such prices may differ from the Index Price.

Outside of the spot markets, Ether can be traded over-the-counter (“OTC”). The OTC market is largely institutional in nature, and OTC market participants generally consist of institutional entities, such as firms that offer two-sided liquidity for Ether, investment managers, proprietary trading firms, high-net-worth individuals that trade Ether on a proprietary basis, entities with sizable Ether holdings, and family offices. The OTC market provides a relatively flexible market in terms of quotes, price, quantity, and other factors, although it tends to involve large blocks of Ether. The OTC market has no formal structure and no open-outcry meeting place. Parties engaging in OTC transactions will agree upon a price—often via phone or email—and then one of the two parties will initiate the transaction. For example, a seller of Ether could initiate the transaction by sending the Ether to the buyer's Ether address. The buyer would then wire U.S. dollars to the seller's bank account. OTC trades are sometimes hedged and eventually settled with concomitant trades on Ether spot markets.

In addition, Ether futures and options trading occurs on exchanges in the U.S. regulated by the CFTC. The market for CFTC-regulated trading of Ether derivatives has developed substantially. As of July 15, 2024, regulated Ether futures represented approximately \$0.97 billion in notional trading volume on the Chicago Mercantile Exchange (“CME”). Ether futures on the CME traded around \$683.8 million per day in the one year ended July 15, 2024, and represented around \$737.4 million in open interest per day. Through the common membership of NYSE Arca and the CME Ethereum Futures market in the Intermarket Surveillance Group (“ISG”), NYSE Arca may obtain information regarding trading in the Shares and listed Ether derivatives from the CME Ethereum Futures market via the ISG and from other exchanges who are members or affiliates of the ISG. Such an arrangement with the ISG and the CME Ethereum Futures market allows for the surveillance of Ether futures market conditions and price movements on a real-time and ongoing basis in order to detect and prevent price distortions, including price distortions caused by manipulative efforts. The sharing of surveillance information between NYSE Arca and the CME Ethereum Futures market regarding market trading activity, clearing activity and customer identity assists in detecting, investigating and deterring fraudulent and manipulative misconduct, as well as violations of NYSE Arca's rules and the applicable federal securities laws and rules. NYSE Arca has also implemented surveillance procedures to monitor the trading of the Shares on NYSE Arca during all trading sessions and to deter and detect violations of NYSE Arca rules and the applicable federal securities laws.

Creation of New Ether

Initial Creation of Ether

Unlike other digital assets such as Bitcoin, which are solely created through a progressive mining process, 72.0 million Ether were created in connection with the launch of the Ethereum Network. The initial 72.0 million Ether were distributed as follows:

- **Initial Ether Distribution:** 60.0 million Ether, or 83.33% of the supply, was sold to the public in a crowd sale conducted between July and August 2014 that raised approximately \$18 million.

- Ethereum Foundation: 6.0 million Ether, or 8.33% of the supply, was distributed to the Ethereum Foundation for operational costs.
- Ethereum Developers: 3.0 million Ether, or 4.17% of the supply, was distributed to developers who contributed to the Ethereum Network.
- Developer Purchase Program: 3.0 million Ether, or 4.17% of the supply, was distributed to members of the Ethereum Foundation to purchase at the initial crowd sale price.

Following the launch of the Ethereum Network, Ether supply initially increased through a progressive mining process. Following the introduction of EIP-1559, described below, Ether supply and issuance rate varies based on factors such as recent use of the network.

Proof-of-Work Mining Process

Prior to September 2022, Ethereum operated using a proof-of-work consensus mechanism. Under proof-of-work, in order to incentivize those who incurred the computational costs of securing the network by validating transactions, there was a reward given to the computer that was able to create the latest block on the chain. Every 14 seconds, on average, a new block was added to the Ethereum Blockchain with the latest transactions processed by the network, and the computer that generated this block was awarded a variable amount of Ether, depending on use of the network at the time. In certain mining scenarios, Ether was sometimes sent to another miner if they were also able to find a solution, but their block was not included. This is referred to as an uncle/aunt reward. Due to the nature of the algorithm for block generation, this process (generating a “proof-of-work”) was guaranteed to be random. The process by which a digital asset was “mined” resulted in new blocks being added to such digital asset’s blockchain and new digital assets being issued to the miners. Prior to the Merge upgrade, described below, computers on the Ethereum Network engaged in a set of prescribed complex mathematical calculations in order to add a block to the Ethereum Blockchain and thereby confirm Ether transactions included in that block’s data.

Proof-of-Stake Process

In the second half of 2020, the Ethereum Network began the first of several stages of an upgrade that was initially known as “Ethereum 2.0.” and eventually became known as the “Merge” to transition the Ethereum Network from a proof-of-work consensus mechanism to a proof-of-stake consensus mechanism. The Merge was completed on September 15, 2022 and the Ethereum Network has operated on a proof-of-stake model since such time.

Unlike proof-of-work, in which miners expend computational resources to compete to validate transactions and are rewarded coins in proportion to the amount of computational resources expended, in proof-of-stake, miners (sometimes called validators) risk or “stake” coins to compete to be randomly selected to validate transactions and are rewarded coins in proportion to the amount of coins staked. Any malicious activity, such as validating multiple blocks, disagreeing with the eventual consensus or otherwise violating protocol rules, results in the forfeiture or “slashing” of a portion of the staked coins. Proof-of-stake is viewed as more energy efficient and scalable than proof-of-work and is sometimes referred to as “virtual mining”. As of June 30, 2024, every 12 seconds, approximately, a new block is added to the Ethereum Blockchain with the latest transactions processed by the network, and the validator that generated this block is awarded Ether.

In common with other spot Ether exchange-traded products at this time, neither the Trust, nor the Sponsor, nor the Custodian, nor any other person associated with the Trust will, directly or indirectly, engage in Staking, meaning no action will be taken pursuant to which any portion of the Trust’s Ether becomes subject to Ethereum proof-of-stake validation or is used to earn additional Ether or generate income or other earnings, and there can be no assurance that the Trust, the Sponsor, the Custodian or any other person associated with the Trust will ever be permitted to engage in such activity in the future. See “Risk Factors—Risk Factors Related to the Trust and the Shares—The Trust is not permitted to engage in Staking, which could negatively affect the value of the Shares.”

Limits on Ether Supply

The rate at which new Ether are issued and put into circulation is expected to vary. In September 2022 the Ethereum Network converted from proof-of-work to a new proof-of-stake consensus mechanism. As of June 30, 2024, following the Merge, approximately 2,554 Ether are issued per day, though the issuance rate varies based on the number of validators on the network. In addition, the issuance of new Ether could be partially or completely offset by the burn mechanism introduced by the EIP-1559 modification, under which Ether are removed from supply at a rate that varies with network usage. For example, when offset for Ether removed from circulation as part of the burn mechanism, the average net change in Ether over the same time period was a net decrease of 508 Ether per day. See “—Modifications to the Ethereum Protocol.” On occasion, the Ether supply has been deflationary over a 24-hour period as a result of the burn mechanism. The attributes of the new consensus algorithm are subject to change, but in sum, the new consensus algorithm and related modifications reduced total new Ether issuances and could turn the Ether supply deflationary over the long term.

As of June 30, 2024, approximately 120 million Ether were outstanding.

Modifications to the Ethereum Protocol

The Ethereum Network is an open source project with no official developer or group of developers that controls it. However, the Ethereum Network’s development has historically been overseen by the Ethereum Foundation and other core developers. The Ethereum Foundation and core developers are able to access and alter the Ethereum Network source code and, as a result, they are responsible for quasi-official releases of updates and other changes to the Ethereum Network’s source code.

For example, in 2019 the Ethereum Network completed a network upgrade called Metropolis that was designed to enhance the usability of the Ethereum Network and was introduced in two stages. The first stage, called Byzantium, was implemented in October 2017. The purpose of Byzantium was to increase the network’s privacy, security, and scalability and reduce the block reward from 5.0 Ether to 3.0 Ether. The second stage, called Constantinople, was implemented in February 2019, along with another upgrade, called St. Petersburg. Another network upgrade, called Istanbul, was implemented in December 2019. The purpose of Istanbul was to make the network more resistant to denial of service attacks, enable greater Ether and Zcash interoperability as well as other Equihash-based proof-of-work digital assets, and to increase the scalability and performance for solutions on zero-knowledge privacy technology like SNARKs and STARKs. The purpose of these upgrades was to prepare the Ethereum Network for the introduction of a proof-of-stake algorithm and reduce the block reward from 3.0 Ether to 2.0 Ether. In the second half of 2020, the Ethereum Network began the first of several stages of an upgrade culminating in the Merge. The Merge amended the Ethereum Network’s consensus mechanism to include proof-of-stake. In April 2023, the Ethereum Network completed a network upgrade called Shapella, which enabled users to unstake their previously-staked Ether and remove it from the relevant smart contract. In March 2024, the Dencun upgrade enabling “proto-danksharding” was completed. The purpose of proto-danksharding is to increase scalability of the Ethereum Network by allowing easy synchronization with Layer 2 networks capable of processing many more transactions than the Ethereum Blockchain alone. The intended effect is to increase the rate of transactions that can be processed by the Ethereum Network. Forthcoming planned upgrades include Pectra, which is scheduled for late 2024 or early 2025, and intends to improve scalability and functionality of transactions on the Ethereum Network.

In 2021, the Ethereum Network implemented the EIP-1559 upgrade. EIP-1559 changed the methodology used to calculate the fees paid to miners (now validators). This new methodology splits fees into two components: a base cost and priority fee. The base cost is now removed from circulation, or “burnt”, and the priority fee is paid to validators. EIP-1559 has reduced the total net issuance of Ether fees to validators. The release of updates to the Ethereum Network’s source code does not guarantee that the updates will be automatically adopted. Users and validators must accept any changes made to the Ethereum source code by downloading the proposed modification of the Ethereum Network’s source code. A modification of the Ethereum Network’s source code is effective only with respect to the Ethereum users and validators that download it. If a

modification is accepted by only a percentage of users and validators, a division in the Ethereum Network will occur such that one network will run the pre-modification source code and the other network will run the modified source code. Such a division is known as a “fork.” See “Risk Factors Related to Digital Assets—A temporary or permanent “fork” or a “clone” could adversely affect the value of the Shares.” Consequently, as a practical matter, a modification to the source code becomes part of the Ethereum Network only if accepted by participants collectively having most of the validation power on the Ethereum Network.

Core development of the Ethereum source code has increasingly focused on modifications of the Ethereum protocol to increase speed and scalability and also allow for financial and non-financial next generation uses. The Trust’s activities will not directly relate to such projects, though such projects may utilize Ether as tokens for the facilitation of their non-financial uses, thereby potentially increasing demand for Ether and the utility of the Ethereum Network as a whole. Conversely, projects that operate and are built within the Ethereum Blockchain may increase the data flow on the Ethereum Network and could either “bloat” the size of the Ethereum Blockchain or slow confirmation times.

Ether Value

Digital Asset Trading Platform Valuation

The value of Ether is determined by the value that various market participants place on Ether through their transactions. The most common means of determining the value of an Ether is by surveying one or more Digital Asset Trading Platforms where Ether is traded publicly and transparently (e.g., Coinbase, Kraken, LMAX Digital and Crypto.com). Additionally, there are over-the-counter dealers or market makers that transact in Ether.

Digital Asset Trading Platform Public Market Data

On each online Digital Asset Trading Platform, Ether is traded with publicly disclosed valuations for each executed trade, measured by one or more fiat currencies such as the U.S. dollar or euro, or by the widely used cryptocurrency Bitcoin. Over-the-counter dealers or market makers do not typically disclose their trade data.

The Digital Asset Trading Platforms initially expected to be included in the Index are Coinbase, Kraken, LMAX Digital and Crypto.com. As further described below, the Sponsor and the Trust reasonably believe each of these Digital Asset Trading Platforms are in material compliance with applicable U.S. federal and state licensing requirements and maintain practices and policies designed to comply with AML and KYC regulations.

Coinbase: A U.S.-based trading platform registered as a money services business (“MSB”) with the Financial Crimes Enforcement Network (“FinCEN”) and licensed as a virtual currency business under the New York State Department of Financial Services (“NYDFS”) BitLicense.

Crypto.com: A Singapore-based trading platform registered as an MSB with FinCEN and licensed as a money transmitter in various U.S. states. Crypto.com does not hold a BitLicense.

Kraken: A U.S.-based trading platform registered as an MSB with FinCEN and licensed as a money transmitter in various U.S. states. Kraken does not hold a BitLicense.

LMAX Digital: A U.K.-based trading platform registered as a broker with FCA. LMAX Digital does not hold a BitLicense.

Currently, there are several Digital Asset Trading Platforms operating worldwide, and online Digital Asset Trading Platforms represent a substantial percentage of Ether buying and selling activity and provide the most data with respect to prevailing valuations of Ether. These trading platforms include established trading platforms such as trading platforms included in the Index which provide a number of options for buying and selling Ether.

The below table reflects the trading volume in Ether and market share of the ETH-U.S. dollar trading pairs of each of the Digital Asset Trading Platforms initially expected to be included in the Index using data reported by the Index Provider from May 1, 2015 to June 30, 2024:

<u>Digital Asset Trading Platforms initially expected to be included in the Index⁽¹⁾</u>	<u>Volume (Ether)</u>	<u>Market Share⁽²⁾</u>
Coinbase	434,986,200	34.86%
Kraken	138,579,315	11.11%
LMAX Digital	73,620,833	5.90%
Crypto.com	34,980,599	2.80%
Total Ether-U.S. Dollar trading pair	<u>682,116,947</u>	<u>54.67%</u>

- (1) The Digital Asset Trading Platforms initially expected to be included in the Index are Coinbase, Kraken, LMAX Digital and Crypto.com.
- (2) Market share is calculated using trading volume (in Ether) for certain Digital Asset Trading Platforms, including Coinbase, Kraken, LMAX Digital and Crypto.com, as well as certain other large U.S.-dollar denominated Digital Asset Trading Platforms that are not initially expected to be included in the Index, including Bitstamp, Binance.US (data included from April 1, 2020), Bittrex (data included from July 31, 2018), Bitfinex, Bitflyer (data included from November 13, 2022), Cboe Digital (data included from October 1, 2020), Gemini, HitBTC (data included from June 13, 2019 through March 31, 2020), itBit (data included from December 27, 2018), OKCoin (data included from December 25, 2018) and FTX.US (data included from July 1, 2021 through November 12, 2022).

The domicile, regulation and legal compliance of the Digital Asset Trading Platforms included in the Index varies. Information regarding each Digital Asset Trading Platform may be found, where available, on the websites for such Digital Asset Trading Platforms, among other places.

Although the Index is designed to accurately capture the market price of Ether, third parties may be able to purchase and sell Ether on public or private markets not included among the constituent Digital Asset Trading Platforms of the Index, and such transactions may take place at prices materially higher or lower than the Index Price. Moreover, there may be variances in the prices of Ether on the various Digital Asset Trading Platforms, including as a result of differences in fee structures or administrative procedures on different Digital Asset Trading Platforms. For example, based on data provided by the Index Provider, on any given day during the twelve months ended June 30, 2024, the maximum differential between the 4:00 p.m., New York time, spot price of any single Digital Asset Trading Platform initially expected to be included in the Index and the Index Price was 0.48% and the average of the maximum differentials of the 4:00 p.m., New York time, spot price of each Digital Asset Trading Platform initially expected to be included in the Index and the Index Price was 0.31%. During this same period, the average differential between the 4:00 p.m., New York time, spot prices of all the Digital Asset Trading Platforms initially expected to be included in the Index and the Index Price was 0.001%. To the extent such prices differ materially from the Index Price, investors may lose confidence in the Shares' ability to track the market price of Ether.

The Index and the Index Price

The Index is a U.S. dollar-denominated composite reference rate for the price of Ether. The Index is designed to (1) mitigate the effects of fraud, manipulation and other anomalous trading activity from impacting the Ether reference rate, (2) provide a real-time, volume-weighted fair value of Ether and (3) appropriately handle and adjust for non-market related events.

The Index Price is determined by the Index Provider through a process in which trade data is cleansed and compiled in such a manner as to algorithmically reduce the impact of anomalous or manipulative trading. This is

accomplished by adjusting the weight of each data input based on price deviation relative to the observable set, as well as recent and long-term trading volume at each venue relative to the observable set. The Index Price is calculated using non-GAAP methodology and is not used in the Trust's financial statements.

All references to the NAV and NAV per Share of the Trust in this prospectus have been calculated using the Index Price unless indicated otherwise.

Constituent Trading Platform Selection

The Digital Asset Trading Platforms to be included in the Index are selected by the Index Provider utilizing a methodology that is guided by the International Organization of Securities Commissions ("IOSCO") principles for financial benchmarks. For a trading platform to become a Constituent Trading Platform, it must satisfy the criteria listed below (the "Inclusion Criteria"):

- Sufficient USD liquidity relative to the size of the listed assets;
- No evidence in the past 12 months of trading restrictions on individuals or entities that would otherwise meet the trading platform's eligibility requirements to trade;
- No evidence in the past 12 months of undisclosed restrictions on deposits or withdrawals from user accounts;
- Real-time price discovery;
- Limited or no capital controls;
- Transparent ownership including a publicly-owned ownership entity;
- Publicly available language and policies addressing legal and regulatory compliance in the U.S., including KYC (Know Your Customer), AML (Anti-Money Laundering) and other policies designed to comply with relevant regulations that might apply to it;
- Be a U.S.-domiciled trading platform or a non-U.S. domiciled trading platform that is able to service U.S. investors; and
- Offer programmatic spot trading of the trading pair, and reliably publish trade prices and volumes on a real-time basis through Rest and Websocket APIs.

A Digital Asset Trading Platform is removed from the Constituent Trading Platforms when it no longer satisfies the Inclusion Criteria. The Index Provider does not currently include data from over-the-counter markets or derivatives platforms among the Constituent Trading Platforms. Over-the-counter data is not currently included because of the potential for trades to include a significant premium or discount paid for larger liquidity, which creates an uneven comparison relative to more active markets. There is also a higher potential for over-the-counter transactions to not be arms-length, and thus not be representative of a true market price. Ether derivative markets are also not currently included. While the Index Provider has no plans to include data from over-the-counter markets or derivative platforms at this time, the Index Provider will consider IOSCO principles for financial benchmarks, the management of trading venues of Ether derivatives and the aforementioned Inclusion Criteria when considering whether to include over-the-counter or derivative platform data in the future.

The Index Provider and the Sponsor have entered into the index license agreement, dated as of February 1, 2022 (as amended, the "Index License Agreement"), governing the Sponsor's use of the Index Price. Pursuant to the terms of the Index License Agreement, the Index Provider may adjust the calculation methodology for the Index Price without notice to, or consent of, the Trust or its shareholders. The Index Provider may decide to change the calculation methodology to maintain the integrity of the Index Price calculation should it identify or become aware of previously unknown variables or issues with the existing methodology that it believes could materially impact its performance and/or reliability. The Index Provider has sole discretion over the

determination of Index Price and may change the methodologies for determining the Index Price from time to time. Shareholders will be notified of any material changes to the calculation methodology or the Index Price in the Trust's current reports and will be notified of all other changes that the Sponsor considers significant in the Trust's periodic or current reports. The Sponsor will determine the materiality of any changes to the Index Price on a case-by-case basis, in consultation with external counsel.

The Index Provider may change the trading venues that are used to calculate the Index or otherwise change the way in which the Index is calculated at any time. For example, the Index Provider has scheduled quarterly reviews in which it may add or remove Constituent Trading Platforms that satisfy or fail the Inclusion Criteria. The Index Provider does not have any obligation to consider the interests of the Sponsor, the Trust, the shareholders, or anyone else in connection with such changes. While the Index Provider is not required to publicize or explain the changes or to alert the Sponsor to such changes, we anticipate that it will notify the Sponsor of any material changes to the Constituent Trading Platforms, including any additions or removals of the Constituent Trading Platforms, in addition to issuing press releases in connection with the same. The Sponsor will notify investors of any such material event by filing a current report on Form 8-K. Although the Index methodology is designed to operate without any manual intervention, rare events would justify manual intervention. Intervention of this kind would be in response to non-market-related events, such as the halting of deposits or withdrawals of funds on a Digital Asset Trading Platform, the unannounced closure of operations on a Digital Asset Trading Platform, insolvency or the compromise of user funds. In the event that such an intervention is necessary, the Index Provider would issue a public announcement through its website, API and other established communication channels with its clients.

Determination of the Index Price

The Index applies an algorithm to the price of Ether on the Constituent Trading Platforms calculated on a per second basis over a 24-hour period. The Index's algorithm is expected to reflect a four-pronged methodology to calculate the Index Price from the Constituent Trading Platforms:

- **Volume Weighting:** Constituent Trading Platforms with greater liquidity receive a higher weighting in the Index, increasing the ability to execute against (i.e., replicate) the Index in the underlying spot markets.
- **Price-Variance Weighting:** The Index Price reflects data points that are discretely weighted in proportion to their variance from the rest of the Constituent Trading Platforms. As the price at a particular trading platform diverges from the prices at the rest of the Constituent Trading Platforms, its weight in the Index Price consequently decreases.
- **Inactivity Adjustment:** The Index Price algorithm penalizes stale activity from any given Constituent Trading Platform. When a Constituent Trading Platform does not have recent trading data, its weighting in the Index Price is gradually reduced until it is de-weighted entirely. Similarly, once trading activity at a Constituent Trading Platform resumes, the corresponding weighting for that Constituent Trading Platform is gradually increased until it reaches the appropriate level.
- **Manipulation Resistance:** In order to mitigate the effects of wash trading and order book spoofing, the Index only includes executed trades in its calculation. Additionally, the Index only includes Constituent Trading Platforms that charge trading fees to its users in order to attach a real, quantifiable cost to any manipulation attempts.

The Index Provider re-evaluates the weighting algorithm on a periodic basis, but maintains discretion to change the way in which an Index Price is calculated based on its periodic review or in extreme circumstances. The exact methodology to calculate the Index Price is not publicly available. Still, the Index is designed to limit exposure to trading or price distortion of any individual Digital Asset Trading Platform that experiences periods of unusual activity or limited liquidity by discounting, in real-time, anomalous price movements at individual Digital Asset Trading Platforms.

The Sponsor believes the Index Provider's selection process for Constituent Trading Platforms as well as the methodology of the Index Price's algorithm provides a more accurate picture of Ether price movements than a simple average of Digital Asset Trading Platform spot prices, and that the weighting of Ether prices on the Constituent Trading Platforms limits the inclusion of data that is influenced by temporary price dislocations that may result from technical problems, limited liquidity or fraudulent activity elsewhere in the Ether spot market. By referencing multiple trading venues and weighting them based on trade activity, the Sponsor believes that the impact of any potential fraud, manipulation or anomalous trading activity occurring on any single venue is reduced.

If the Index Price becomes unavailable, or if the Sponsor determines in good faith that such Index Price does not reflect an accurate price for Ether, then the Sponsor will, on a best efforts basis, contact the Index Provider to obtain the Index Price directly from the Index Provider. If after such contact such Index Price remains unavailable or the Sponsor continues to believe in good faith that such Index Price does not reflect an accurate price for the Ether, then the Sponsor will employ a cascading set of rules to determine the Index Price, as described below in “—Determination of the Index Price When Index Price is Unavailable.”

The Trust values its Ether for operational purposes by reference to the Index Price. The Index Price is the value of an Ether as represented by the Index, calculated at 4:00 p.m., New York time, on each business day.

Illustrative Example

For the purposes of illustration, outlined below are examples of how the attributes that impact weighting and adjustments in the aforementioned methodology may be utilized to generate the Index Price for a digital asset. For example, Constituent Trading Platforms used to calculate the Index Price of the digital asset may include trading platforms such as Coinbase, Kraken, LMAX Digital and Bitstamp.

- **Volume Weighting:** Each Constituent Trading Platform will be weighted to appropriately reflect the trading volume share of the Constituent Trading Platform relative to all the Constituent Trading Platforms during this same period. For example, an average hourly weighting of 67.06%, 11.88%, 14.57%, and 6.49% for Coinbase, Kraken, LMAX Digital and Bitstamp, respectively, would represent each Constituent Trading Platform's share of trading volume during the same period.
- **Inactivity Adjustment:** Assume that a Constituent Trading Platform represented a 14% weighting on the Index Price of the digital asset, which is based on the per-second calculations of its trading volume and price-variance relative to the cohort of Constituent Trading Platforms included in such Index, and then went offline for approximately two hours. The index algorithm would automatically recognize inactivity and start de-weighting the Constituent Trading Platform at the 3-minute mark and continue to do so over a 7-minute period until its influence was effectively zero, 10 minutes after becoming inactive. As soon as trading activity resumed at the Constituent Trading Platform, the index algorithm would re-weight it to the appropriate weighting based on trading volume and price-variance relative to the cohort of Constituent Trading Platforms included in the Index. Due to the period of inactivity, it would re-weight the Constituent Trading Platform activity to a weight lower than its original weighting—for example, to 12%.
- **Price-Variance Weighting:** The price-variance weighting adjustment is a relative measure of each trading platform versus the cohort of trading platforms. The further the price at a constituent trading platform is from the mean price of the cohort, the less influence that trading platform's price will have on the algorithm that produces the Index Price, as the trading platform data is discretely weighted in proportion to their variance from the rest of the trading platforms on a per-second basis and there is no minimum threshold the variance must meet for this adjustment to take place. For example, assume that for a one-hour period, the digital asset's execution prices on one Constituent Trading Platform were trading more than 7% higher than the average execution prices on another Constituent Trading Platform. The algorithm will automatically detect the anomaly (price variance) and reduce that specific

Constituent Trading Platform's weighting during that one-hour period, ensuring a reliable spot reference price that is unaffected by the localized event and that is reflective of broader market activity.

Determination of the Index Price When Index Price is Unavailable

The Sponsor uses the following cascading set of rules to calculate the Index Price. For the avoidance of doubt, the Sponsor will employ the below rules sequentially and in the order as presented below, should one or more specific rule(s) fail:

1. Index Price = The price set by the Index as of 4:00 p.m., New York time, on the valuation date. If the Index becomes unavailable, or if the Sponsor determines in good faith that the Index does not reflect an accurate price, then the Sponsor will, on a best efforts basis, contact the Index Provider to obtain the Index Price directly from the Index Provider. If after such contact the Index remains unavailable or the Sponsor continues to believe in good faith that the Index does not reflect an accurate price, then the Sponsor will employ the next rule to determine the Index Price. There are no predefined criteria to make a good faith assessment and it will be made by the Sponsor in its sole discretion.
2. Index Price = The price set by Coin Metrics Real-Time Rate (the "Secondary Index") as of 4:00 p.m., New York time, on the valuation date (the "Secondary Index Price"). The Secondary Index Price is a real-time reference rate price, calculated using trade data from constituent markets selected by Coin Metrics Inc. (the "Secondary Index Provider"). The Secondary Index Price is calculated by applying weighted-median techniques to such trade data where half the weight is derived from the trading volume on each constituent market and half is derived from inverse price variance, where a constituent market with high price variance as a result of outliers or market anomalies compared to other constituent markets is assigned a smaller weight. The Secondary Index Provider and the Sponsor have entered into the master services agreement, dated as of August 4, 2020, and order forms thereunder, pursuant to which the Sponsor may obtain and use the Secondary Index and the Secondary Index Price from the Secondary Index Provider. If the Secondary Index becomes unavailable, or if the Sponsor determines in good faith that the Secondary Index does not reflect an accurate price, then the Sponsor will, on a best efforts basis, contact the Secondary Index Provider to obtain the Secondary Index Price directly from the Secondary Index Provider. If after such contact the Secondary Index remains unavailable or the Sponsor continues to believe in good faith that the Secondary Index does not reflect an accurate price, then the Sponsor will employ the next rule to determine the Index Price. There are no predefined criteria to make a good faith assessment and it will be made by the Sponsor in its sole discretion.
3. Index Price = The price set by the Trust's principal market (the "Tertiary Pricing Option") as of 4:00 p.m., New York time, on the valuation date. The Tertiary Pricing Option is a spot price derived from the principal market's public data feed that is believed to be consistently publishing pricing information as of 4:00 p.m., New York time, and is provided to the Sponsor via an application programming interface. If the Tertiary Pricing Option becomes unavailable, or if the Sponsor determines in good faith that the Tertiary Pricing Option does not reflect an accurate price, then the Sponsor will, on a best efforts basis, contact the Tertiary Pricing Provider to obtain the Tertiary Pricing Option directly from the Tertiary Pricing Provider. If after such contact the Tertiary Pricing Option remains unavailable after such contact or the Sponsor continues to believe in good faith that the Tertiary Pricing Option does not reflect an accurate price, then the Sponsor will employ the next rule to determine the Index Price. There are no predefined criteria to make a good faith assessment and it will be made by the Sponsor in its sole discretion.
4. Index Price = The Sponsor will use its best judgment to determine a good faith estimate of the Index Price. There are no predefined criteria to make a good faith assessment and it will be made by the Sponsor in its sole discretion.

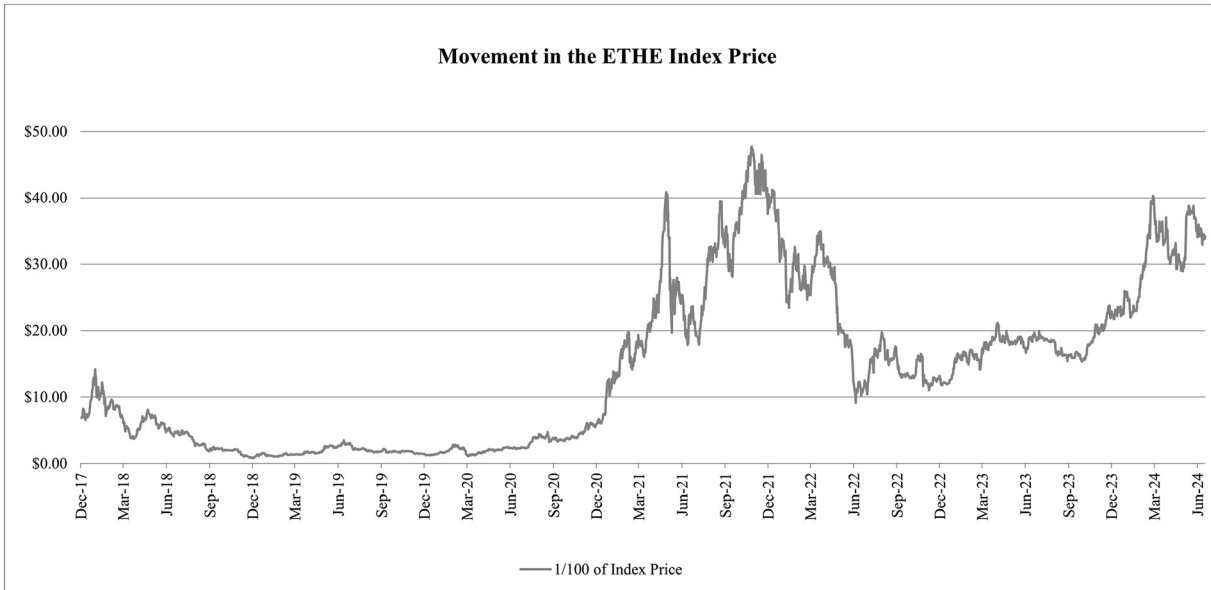

In the event of a fork, the Index Provider may calculate the Index Price based on a digital asset that the Sponsor does not believe to be the appropriate asset that is held by the Trust. In this event, the Sponsor has full discretion to use a different index provider or calculate the Index Price itself using its best judgment.

The Sponsor may, in its sole discretion, select a different index provider, select a different index price provided by the Index Provider, calculate the Index Price by using the cascading set of rules set forth above, or change the cascading set of rules set forth above at any time. The Sponsor will provide notice of any such changes in the Trust’s periodic or current reports and, if the Sponsor makes such a change other than on an ad hoc or temporary basis, will file a proposed rule change with the SEC.

Historical Ether Prices

As movements in the price of Ether will directly affect the price of the Shares, investors should understand historical movements in the price of Ether. Investors, however, should also be aware that past movements in the Ether price are not indicators of future movements. Movements may be influenced by various factors, including, but not limited to, government regulation, security breaches experienced by service providers, as well as political and economic uncertainties around the world.

For illustrative purposes only, the following chart illustrates the movement in the ETHE Index Price from December 14, 2017 to June 30, 2024 using a methodology identical to the Index Price methodology that is described under “—Overview of the Ethereum Industry and Market—The Index and the Index Price.”

The following table illustrates the movements in the ETHE Index Price from July 1, 2019 to June 30, 2024 using a methodology identical to the Index Price methodology that is described under “—Overview of the Ethereum Industry and Market—The Index and the Index Price.” During such period, the ETHE Index Price ranged from \$109.83 to \$4,776.32, with the straight average being \$1,703.32 through June 30, 2024. The Sponsor has not observed a material difference between the ETHE Index Price (and does not expect there to be a material

difference between the Index Price), on the one hand, and average prices from the constituent Digital Asset Trading Platforms individually or as a group, on the other.

<u>Period</u>	<u>Average</u>	<u>High</u>		<u>Low</u>		<u>End of period</u>	<u>Last business day</u>
		<u>Index Price</u>	<u>Date</u>	<u>Index Price</u>	<u>Date</u>		
Twelve months ended June 30, 2020	\$ 190.49	\$ 310.45	7/8/2019	\$ 109.83	3/16/2020	\$ 225.16	\$ 225.16
Twelve months ended June 30, 2021	\$1,236.03	\$4,090.65	5/12/2021	\$ 225.27	7/5/2020	\$2,243.96	\$2,243.96
Twelve months ended June 30, 2022	\$3,028.51	\$4,776.32	11/9/2021	\$ 913.51	6/18/2022	\$1,018.72	\$1,018.72

Twelve months ended June 30, 2024	\$2,498.38	\$4,033.10	3/11/2024	\$1,531.25	10/12/2023	\$3,423.17	\$3,371.40
July 1, 2019 to June 30, 2024	\$1,703.32	\$4,776.32	11/9/2021	\$ 109.83	3/16/2020	\$3,423.17	\$3,371.40

Forms of Attack Against the Ethereum Network

All networked systems are vulnerable to various kinds of attacks. As with any computer network, the Ethereum Network contains certain flaws. For example, the Ethereum Network is currently vulnerable to a “51% attack” where, if a validator or group of validators acting in concert were to gain control of more than 50% of the staked Ether, a malicious actor would be able to gain full control of the network and the ability to manipulate the Ethereum Blockchain. For more information, see “Risk Factors—Risk Factors Related to Digital Assets—If a malicious actor or botnet obtains control of more than 33% of the validating power on the Ethereum Network, or otherwise obtains control over the Ethereum Network through its influence over core developers or otherwise, such actor or botnet could manipulate the Blockchain to adversely affect the value of the Shares or the ability of the Trust to operate.” As of the date of this prospectus, the top three largest staking pools controlled approximately 50% of the Ether staked on the Ethereum Network.

In addition, many digital asset networks have been subjected to a number of denial of service attacks, which has led to temporary delays in block creation and the transfer of digital assets, including Ether. Any similar attacks on the Ethereum Network that impact the ability to transfer Ether could have a material adverse effect on the price of Ether and the value of the Shares.

Market Participants

Validators

In proof-of-stake, validators risk or “stake” coins to compete to be randomly selected to validate transactions and are rewarded coins in proportion to the amount of coins staked. Any malicious activity, such as validating multiple blocks, disagreeing with the eventual consensus or otherwise violating protocol rules, results in the forfeiture or “slashing” of a portion of the staked coins.

A validator is a node on a proof of stake blockchain that is responsible for securing the network, storing the history of transactions and confirming the validity of new transactions added to the next block in the chain. On the Ethereum Network, a validator must stake 32 Ether in order to participate in maintaining the network. When a validator confirms a transaction, the validator receives a fee, sometimes referred to as a block reward. Validators range from Ether enthusiasts to professional operations that design and build dedicated machines and data centers. During the course of ordering transactions and validating blocks, validators may be able to prioritize certain transactions in return for increased transaction fees, an incentive system known as “Maximal Extractable Value” or MEV. For example, in blockchain networks that facilitate DeFi protocols in particular, such as the Ethereum Network, users may attempt to gain an advantage over other users by increasing offered transaction fees. Certain software solutions, such as Flashbots, have been developed which facilitate validators in capturing MEV produced by these increased fees. See “—Creation of New Ether” and “—Proof-of-Stake Process” above.

Investment and Speculative Sector

This sector includes the investment and trading activities of both private and professional investors and speculators. Historically, larger financial services institutions are publicly reported to have limited involvement in investment and trading in digital assets, although the participation landscape is beginning to change. Currently, there is relatively limited use of digital assets in the retail and commercial marketplace in comparison to relatively extensive use by speculators, and a significant portion of demand for digital assets is generated by speculators and investors seeking to profit from the short- or long-term holding of digital assets.

Retail Sector

The retail sector includes users transacting in direct peer-to-peer Ether transactions through the direct sending of Ether over the Ethereum Network. While the use of Bitcoin to purchase goods and services from commercial or service businesses is developing, Ether has not yet been accepted in the same manner because Ether has a slightly different purpose than Bitcoin. Ether's primary purpose is its use as payment for transaction fees and computational services (i.e., smart contracts) on the Ethereum Network. In the month ended June 30, 2024, the Ethereum Network facilitated daily transaction values between approximately \$1.9 billion and approximately \$11.1 billion. For reference, the Bitcoin network facilitated daily transaction values between approximately \$2.9 billion and \$19.3 billion over the same period. If Ethereum's smart contract capabilities are not more widely utilized, it may struggle to compete with other digital assets.

Service Sector

This sector includes companies that provide a variety of services including the buying, selling, payment processing and storing of Ether. For example, Coinbase, Kraken, LMAX Digital and Crypto.com are some of the largest Digital Asset Trading Platforms by volume traded. Coinbase Custody Trust Company, LLC, the Custodian for the Trust, is a digital asset custodian that provides custodial accounts that store Ether for users. As the Ethereum Network continues to grow in acceptance, it is anticipated that service providers will expand the currently available range of services and that additional parties will enter the service sector for the Ethereum Network.

Competition

Thousands of digital assets, as tracked by CoinMarketCap.com as of June 30, 2024, have been developed since the inception of Bitcoin, which is currently the most developed digital asset because of the length of time it has been in existence, the investment in the infrastructure that supports it, and the network of individuals and entities that are using Bitcoin in transactions. While Ether has enjoyed some success in its limited history, the aggregate value of outstanding Ether is smaller than that of Bitcoin and may be eclipsed by the more rapid development of other digital assets. In addition, while Ether was the first digital asset with a network that served as a smart contracts platform, a number of newer digital assets also function as smart contracts platforms, including Solana, Avalanche and Cardano. Some industry groups have also created private, permissioned blockchains. For example, J.P. Morgan is developing a platform called Onyx, which is described as a blockchain-based platform designed for use by the financial services industry.

Government Oversight

As digital assets have grown in both popularity and market size, the U.S. Congress and a number of U.S. federal and state agencies (including FinCEN, SEC, CFTC, FINRA, the CFPB, the Department of Justice, the Department of Homeland Security, the Federal Bureau of Investigation, the IRS, the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, the Federal Reserve and state financial institution and securities regulators) have been examining the operations of digital asset networks, digital asset users and the Digital Asset Markets, with particular focus on the extent to which digital assets can be used to launder the

proceeds of illegal activities or fund criminal or terrorist enterprises and the safety and soundness of trading platforms and other service providers that hold or custody digital assets for users. Many of these state and federal agencies have issued consumer advisories regarding the risks posed by digital assets to investors. President Biden's March 9, 2022 Executive Order, asserting that technological advances and the rapid growth of the digital asset markets "necessitate an evaluation and alignment of the United States Government approach to digital assets," signals an ongoing focus on digital asset policy and regulation in the United States. A number of reports issued pursuant to the Executive Order have focused on various risks related to the digital asset ecosystem, and have recommended additional legislation and regulatory oversight. In addition, federal and state agencies, and other countries and international bodies have issued rules or guidance about the treatment of digital asset transactions or requirements for businesses engaged in digital asset activity. Moreover, the failure of FTX in November 2022 and the resulting market turmoil substantially increased regulatory scrutiny in the United States and globally and led to SEC and criminal investigations, enforcement actions and other regulatory activity across the digital asset ecosystem.

In addition, the SEC, U.S. state securities regulators and several foreign governments have issued warnings and instituted legal proceedings in which they argue that certain digital assets may be classified as securities and that both those digital assets and any related initial coin offerings or other primary and secondary market transactions are subject to securities regulations. For example, in June 2023, the SEC brought charges against Binance and Coinbase, and in November 2023, the SEC brought charges against Kraken, alleging that they operated unregistered securities exchanges, brokerages and clearing agencies. In its complaints, the SEC asserted that several digital assets are securities under the federal securities laws. The outcomes of these proceedings, as well as ongoing and future regulatory actions, have had a material adverse effect on the digital asset industry as a whole and on the price of Ether, and may alter, perhaps to a materially adverse extent, the nature of an investment in the Shares and/or the ability of the Trust to continue to operate. Additionally, U.S. state and federal, and foreign regulators and legislatures have taken action against virtual currency businesses or enacted restrictive regimes in response to adverse publicity arising from hacks, consumer harm, or criminal activity stemming from virtual currency activity.

The CFTC has regulatory jurisdiction over the Ether futures markets. In addition, because the CFTC has determined that Ether is a non-security "commodity" under the CEA and the rules thereunder, it has jurisdiction to prosecute fraud and manipulation in the cash, or spot, market for Ether. Beyond instances of fraud or manipulation, the CFTC generally does not oversee cash or spot market exchanges, spot Digital Asset Trading Platforms or transactions involving spot Ether that do not utilize collateral, leverage, or financing. The National Futures Association ("NFA") is the self-regulatory agency for the U.S. futures industry, and as such has jurisdiction over Ether futures. However, the NFA does not have regulatory oversight authority for the cash or spot market for Ether trading or transactions.

In February 2021, certain designated contract markets ("DCMs") registered with the CFTC, including the CME, launched new contracts for Ether futures products. DCMs are boards of trades (commonly referred to as exchanges) that operate under the regulatory oversight of the CFTC, pursuant to Section 5 of the CEA. To obtain and maintain designation as a DCM, an exchange must comply on an initial and ongoing basis with twenty-three Core Principles established under Section 5(d) of the CEA. Among other things, DCMs are required to establish self-regulatory programs designed to enforce the DCM's rules, prevent market manipulation and customer and market abuses, and ensure the recording and safe storage of trade information. The CFTC engaged in a "heightened review" of the self-certification of Ether futures, which required DCMs to enter direct or indirect information sharing agreements with spot market platforms to allow access to trade and trader data; monitor data from cash markets with respect to price settlements and other Ether prices more broadly, and identify anomalies and disproportionate moves in the cash markets compared to the futures markets; engage in inquiries, including at the trade settlement level when necessary; and agree to regular coordination with CFTC surveillance staff on trade activities, including providing the CFTC surveillance team with trade settlement data upon request.

In August 2021, the chair of the SEC stated that he believed investors using digital asset trading platforms are not adequately protected, and that activities on the platforms can implicate the securities laws, commodities

laws and banking laws, raising a number of issues related to protecting investors and consumers, guarding against illicit activity, and ensuring financial stability. The chair expressed a need for the SEC to have additional authorities to prevent transactions, products, and platforms from “falling between regulatory cracks,” as well as for more resources to protect investors in “this growing and volatile sector.” The chair called for federal legislation centering on digital asset trading, lending, and decentralized finance platforms, seeking “additional plenary authority” to write rules for digital asset trading and lending. However, the chair has subsequently stated that the SEC already has explicit authority under existing laws to regulate the digital asset sector and several enforcement actions were filed against digital asset trading platforms during the first half of 2023.

The SEC has taken steps to interpret its existing authorities as covering various digital asset activities. For example, the SEC has recently proposed amendments to the custody rules under Rule 406(4)-2 of the Investment Advisers Act. The proposed rule changes would amend the definition of a “qualified custodian” under Rule 206(4)-2(d)(6) and expand the current custody rule under Rule 406(4)-2 to cover digital assets and related advisory activities. If enacted as proposed, these rules would likely impose additional regulatory requirements with respect to the custody and storage of digital assets and could lead to additional regulatory oversight of the digital asset ecosystem more broadly. See “Risk Factors—Risk Factors Related to the Regulation of Digital Assets, the Trust and the Shares—Regulatory changes or actions by the U.S. Congress or any U.S. federal or state agencies may affect the value of the Shares or restrict the use of Ether, validating activity or the operation of the Ethereum Network or the Digital Asset Markets in a manner that adversely affects the value of the Shares,” and “Risk Factors—Risk Factors Related to the Regulation of Digital Assets, the Trust and the Shares—A determination that Ether or any other digital asset is a “security” may adversely affect the value of Ether and the value of the Shares, and result in potentially extraordinary, nonrecurring expenses to, or termination of, the Trust.”

Various foreign jurisdictions have, and may continue to, in the near future, adopt laws, regulations or directives that affect a digital asset network, the Digital Asset Markets, and their users, particularly Digital Asset Trading Platforms and service providers that fall within such jurisdictions’ regulatory scope. For example:

- China has made transacting in cryptocurrencies illegal for Chinese citizens in mainland China, and additional restrictions may follow. China has banned initial coin offerings and there have been reports that Chinese regulators have taken action to shut down a number of China-based Digital Asset Trading Platforms.
- South Korea determined to amend its Financial Information Act in March 2020 to require virtual asset service providers to register and comply with its AML and counter-terrorism funding framework. These measures also provide the government with the authority to close Digital Asset Trading Platforms that do not comply with specified processes. South Korea has also banned initial coin offerings.
- The Reserve Bank of India in April 2018 banned the entities it regulates from providing services to any individuals or business entities dealing with or settling digital assets. In March 2020, this ban was overturned in the Indian Supreme Court, although the Reserve Bank of India is currently challenging this ruling.
- The United Kingdom’s Financial Conduct Authority published final rules in October 2020 banning the sale of derivatives and exchange-traded notes that reference certain types of digital assets, contending that they are “ill-suited” to retail investors citing extreme volatility, valuation challenges and association with financial crime. A new law, the Financial Services and Markets Act 2023 (“FSMA”), received royal assent in June 2023. The FSMA brings digital asset activities within the scope of existing laws governing financial institutions, markets and assets.
- The Parliament of the European Union approved the text of the Markets in Crypto-Assets Regulation (“MiCA”) in April 2023, establishing a regulatory framework for digital asset services across the

European Union. MiCA is intended to serve as a comprehensive regulation of digital asset markets and imposes various obligations on digital asset issuers and service providers. The main aims of MiCA are industry regulation, consumer protection, prevention of market abuse and upholding the integrity of digital asset markets. MiCA was formally approved by the European Union's member states in 2023. Certain parts of MiCA became effective as of June 2024 and the remainder will start to apply as of December 2024.

There remains significant uncertainty regarding foreign governments' future actions with respect to the regulation of digital assets and Digital Asset Trading Platforms. Such laws, regulations or directives may conflict with those of the United States and may negatively impact the acceptance of Ether by users, merchants and service providers outside the United States and may therefore impede the growth or sustainability of the Ethereum ecosystem in the United States and globally, or otherwise negatively affect the value of Ether held by the Trust. The effect of any future regulatory change on the Trust or the Ether held by the Trust is impossible to predict, but such change could be substantial and adverse to the Trust and the value of the Shares.

See "Risk Factors—Risk Factors Related to the Regulation of Digital Assets, the Trust and the Shares—Regulatory changes or actions by the U.S. Congress or any U.S. federal or state agencies may affect the value of the Shares or restrict the use of Ether, validating activity or the operation of the Ethereum Network or the Digital Asset Markets in a manner that adversely affects the value of the Shares."

Description of the Trust

The Trust is a Delaware Statutory Trust that was formed on April 23, 2024 by the filing of the Certificate of Trust with the Delaware Secretary of State in accordance with the provisions of the Delaware Statutory Trust Act ("DSTA"). The Trust operates pursuant to the Trust Agreement.

The Shares represent units of fractional undivided beneficial interest in and ownership of the Trust. The Trust is passive and is not managed like a corporation or an active investment vehicle. The Trust's Ether are held by the Custodian on behalf of the Trust. The Trust's Ether will be transferred out of the Vault Balance only in the following circumstances: (i) transferred to pay the Sponsor's Fee or any Additional Trust Expenses, (ii) sold on an as-needed basis to pay Additional Trust Expenses or redeem Baskets or (iii) sold on behalf of the Trust in the event the Trust terminates and liquidates its assets or as otherwise required by law or regulation. Assuming that the Trust is treated as a grantor trust for U.S. federal income tax purposes, each delivery or sale of Ether by the Trust to pay the Sponsor's Fee or any Additional Trust Expenses will be a taxable event for shareholders. Gains or losses from the sale of Ether to fund cash redemptions are expected to be treated as incurred only by the shareholder that is being redeemed See "Material U.S. Federal Income Tax Consequences—Tax Consequences to U.S. Holders."

The Trust is not a registered investment company under the Investment Company Act and the Sponsor believes that the Trust is not required to register under the Investment Company Act. The Trust will not trade, buy, sell or hold Ether derivatives, including Ether futures contracts, on any futures exchange. The Trust is authorized solely to take immediate delivery of actual Ether. The Sponsor does not believe the Trust's activities are required to be regulated by the CFTC under the CEA as a "commodity pool" under current law, regulation and interpretation. The Trust will not be operated by a CFTC-regulated commodity pool operator because it will not trade, buy, sell or hold Ether derivatives, including Ether futures contracts, on any futures exchange. Investors in the Trust will not receive the regulatory protections afforded to investors in regulated commodity pools, nor may the COMEX division of the New York Mercantile Exchange or any futures exchange enforce its rules with respect to the Trust's activities. In addition, investors in the Trust will not benefit from the protections afforded to investors in Ether futures contracts on regulated futures exchanges.

The Trust creates Shares from time to time but only in Baskets. A Basket equals a block of 10,000 Shares. The number of outstanding Shares is expected to increase from time to time as a result of the creation of Baskets.

The creation of Baskets will require the delivery to the Trust of the number of Ether (or cash to acquire the number of Ether) represented by the Baskets being created. The creation of a Basket will be made only upon the delivery to the Trust of the number of whole and fractional Ether represented by each Basket being created, the number of which is determined by dividing (x) the number of Ether owned by the Trust at 4:00 p.m., New York time, on the relevant trade date, after deducting the number of Ether representing the U.S. dollar value of accrued but unpaid fees and expenses of the Trust (converted using the Index Price at such time, and carried to the eighth decimal place) by (y) the number of Shares outstanding at such time (with the quotient so obtained calculated to one one-hundred-millionth of one Ether (i.e., carried to the eighth decimal place)), and multiplying such quotient by 10,000.

The Shares are redeemable in accordance with the provisions of the Trust Agreement and the relevant Participant Agreement. The operation of a redemption program allows Authorized Participants to take advantage of arbitrage opportunities created when the market value of the Shares deviates from the value of the Trust's Ether, less the Trust's expenses and other liabilities, which may have the effect of reducing any premium at which the Shares trade on NYSE Arca over such value or cause the Shares to trade at a discount to such value.

Based on the number of ETHE Shares and amount of Ether held by ETHE as of the Record Date for the Initial Distribution, the Sponsor anticipates that the Trust will hold approximately _____ Ether immediately following the consummation of the Initial Distribution, reflecting an illustrative per share price of \$ _____ for the Trust's Shares as of such date. The number of Ether required to create a Basket is expected to gradually decrease over time due to the transfer or sale of the Trust's Ether to pay the Sponsor's Fee and any Additional Trust Expenses.

The Sponsor will determine the Trust's NAV on each business day as of 4:00 p.m., New York time, or as soon thereafter as practicable. The Sponsor will also determine the NAV per Share, which equals the NAV divided by the number of outstanding Shares. Each business day, the Sponsor will publish the Trust's NAV and NAV per Share on the Trust's website, www.ets.grayscale.com/eth, as soon as practicable after the Trust's NAV and NAV per Share have been determined by the Sponsor. See “—Valuation of Ether and Determination of NAV.”

The Trust's assets will consist solely of Ether, cash proceeds from the sale of Ether and any rights of the Trust pursuant to any agreements, other than the Trust Agreement, to which the Trust is a party. The Sponsor has committed to cause the Trust not to take any Affirmative Action to acquire any Incidental Rights or IR Virtual Currency, thereby irrevocably abandoning any Incidental Rights and IR Virtual Currency to which the Trust may become entitled in the future. As a result, the Trust does not expect to hold any Incidental Rights or IR Virtual Currency or to take any Incidental Rights or IR Virtual Currency into account for the purposes of determining the NAV or the NAV per Share.

Each Share represents a proportional interest, based on the total number of Shares outstanding, in each of the Trust's assets as determined in the case of Ether by reference to the Index Price, less the Trust's expenses and other liabilities (which include accrued but unpaid fees and expenses). The Sponsor expects that the market price of the Shares will fluctuate over time in response to the market prices of Ether. In addition, because the Shares reflect the estimated accrued but unpaid expenses of the Trust, the number of Ether represented by a Share will gradually decrease over time as the Trust's Ether are used to pay the Trust's expenses.

Ether pricing information is available on a 24-hour basis from various financial information service providers or Ethereum Network information sites, such as CoinMarketCap.com. The spot price and bid/ask spreads may also be available directly from Digital Asset Trading Platforms. The constituent Digital Asset Trading Platforms of the Index are initially expected to be Coinbase, Kraken, LMAX Digital and Crypto.com. The Index Provider may remove or add Digital Asset Trading Platforms to the Index in the future at its

discretion. Market prices for the Shares will be available from a variety of sources, including brokerage firms, information websites and other information service providers. In addition, on each business day the Trust's website will provide pricing information for the Shares.

The Trust has no fixed termination date.

Service Providers of the Trust

The Sponsor

The Trust's Sponsor is Grayscale Investments, LLC, a Delaware limited liability company formed on May 29, 2013 and a wholly owned subsidiary of DCG. The Sponsor's principal place of business is 290 Harbor Drive, 4th Floor, Stamford, Connecticut 06902, and its telephone number is (212) 668-1427. Under the Delaware Limited Liability Company Act and the governing documents of the Sponsor, DCG, the sole member of the Sponsor, is not responsible for the debts, obligations and liabilities of the Sponsor solely by reason of being the sole member of the Sponsor.

The Sponsor is neither an investment adviser registered with the SEC nor a commodity pool operator registered with the CFTC, and will not be acting in either such capacity with respect to the Trust, and the Sponsor's provision of services to the Trust will not be governed by the Investment Advisers Act or the CEA.

The Sponsor arranged for the creation of the Trust. As partial consideration for its receipt of the Sponsor's Fee from the Trust, the Sponsor is obligated to pay the Sponsor-paid Expenses. The Sponsor also paid the costs of the Trust's organization and the costs of the initial sale of the Shares.

The Sponsor is generally responsible for the day-to-day administration of the Trust under the provisions of the Trust Agreement. This includes (i) preparing and providing periodic reports and financial statements on behalf of the Trust for investors, (ii) processing orders to create Baskets and coordinating the processing of such orders with the Custodian and the Transfer Agent, (iii) calculating and publishing the NAV and the NAV per Share of the Trust each business day as of 4:00 p.m., New York time, or as soon thereafter as practicable, (iv) selecting and monitoring the Trust's service providers and from time to time engaging additional, successor or replacement service providers, (v) instructing the Custodian to transfer the Trust's Ether as needed to pay the Sponsor's Fee and any Additional Trust Expenses, (vi) upon dissolution of the Trust, distributing cash proceeds of the sale of the Trust's remaining Ether, or interests in any liquidating trust or other vehicle formed to hold Ether to the owners of record of the Shares and (vii) establishing the principal market for GAAP valuation. In addition, if there is a fork in the Ethereum Network after which there is a dispute as to which network resulting from the fork is the Ethereum Network, the Sponsor has the authority to select the network that it believes in good faith is the Ethereum Network, unless such selection or authority would otherwise conflict with the Trust Agreement.

The Sponsor does not store, hold, or maintain custody or control of the Trust's Ether but instead has entered into the Prime Broker Agreement with the Custodian to facilitate the security of the Trust's Ether.

The Sponsor may transfer all or substantially all of its assets to an entity that carries on the business of the Sponsor if at the time of the transfer the successor assumes all of the obligations of the Sponsor under the Trust Agreement. In such an event, the Sponsor will be relieved of all further liability under the Trust Agreement.

The Sponsor's Fee is paid by the Trust to the Sponsor as compensation for services performed under the Trust Agreement and as partial consideration for the Sponsor's agreement to pay the Sponsor-paid Expenses. See "—Expenses; Sales of Ether."

The Sponsor may, in its sole discretion, select a different index provider, select a different index price provided by the Index Provider, calculate the Index Price by using the cascading set of rules set forth under "—Overview of the Ethereum Industry and Market—The Index and the Index Price—Determination of the Index Price When Index Price is Unavailable" above, or change the cascading set of rules set forth above at any time.

Marketing Agent Agreement

The Sponsor, on behalf of the Trust, is party to a marketing agent agreement dated May 23, 2024 (the “Marketing Agent Agreement”) with Foreside Fund Services, LLC (the “Marketing Agent”). Under the Marketing Agent Agreement, the Marketing Agent will provide the following services to the Sponsor: (i) assist the Sponsor in facilitating Participation Agreements between and among Authorized Participants, the Sponsor, on behalf of the Trust, and the Transfer Agent; (ii) provide prospectuses to Authorized Participants; (iii) work with the Transfer Agent to review and approve orders placed by the Authorized Participants and transmitted to the Transfer Agent; (iv) review and file applicable marketing materials with FINRA and (v) maintain, reproduce and store applicable books and records related to the services provided under the Marketing Agent Agreement. The Sponsor will pay the Marketing Agent an annual fee, as well as certain out-of-pocket fees and expenses of the Marketing Agent incurred in connection with its assistance in the marketing of the Trust and its Shares.

Index License Agreement

The Sponsor has entered into the Index License Agreement with CoinDesk Indices, Inc., the Index Provider, governing the Sponsor’s use of the Index for calculation of the Index Price. The Index Provider may adjust the calculation methodology for the Index without notice to, or consent of, the Trust or its shareholders. Under the Index License Agreement, the Sponsor pays a monthly fee and a fee based on the NAV of the Trust to the Index Provider in consideration of its license to the Sponsor of Index-related intellectual property. The Index License Agreement will automatically renew on an annual basis, unless a notice of non-renewal is provided. The Index License Agreement is terminable by either party upon written notice in the event of a material breach that remains uncured for thirty days after initial written notice of such breach. Further, either party may terminate the Index License Agreement immediately upon notice under certain circumstances, including with respect to the other party’s (i) insolvency, bankruptcy or analogous event or (ii) violation of money transmission, taxation or trading regulations that materially adversely affect either party’s ability to perform under the Index License Agreement.

Administration and Accounting Agreement

The Sponsor has entered into a Fund Administration and Accounting Agreement with BNY Mellon Asset Servicing, a division of The Bank of New York Mellon, to provide administration and accounting services to the Trust. Pursuant to the terms of the Agreement and under the supervision and direction of the Sponsor and the Trust, BNY Mellon Asset Servicing keeps the operational records of the Trust and prepares and files certain regulatory filings on behalf of the Trust. BNY Mellon Asset Servicing may also perform other services for the Trust pursuant to the Agreement as mutually agreed upon by the Sponsor, the Trust and BNY Mellon Asset Servicing from time to time. The Administrator’s fees are paid on behalf of the Trust by the Sponsor.

The Trustee

CSC Delaware Trust Company serves as Delaware trustee of the Trust under the Trust Agreement. The Trustee has its principal office at 251 Little Falls Drive, Wilmington, Delaware 19808. The Trustee is unaffiliated with the Sponsor. A copy of the Trust Agreement is available for inspection at the Sponsor’s principal office identified above and is filed as an exhibit to the registration statement of which this prospectus forms a part.

The Trustee is appointed to serve as the trustee of the Trust in the State of Delaware for the sole purpose of satisfying the requirement of Section 3807(a) of the DSTA that the Trust have at least one trustee with a principal place of business in the State of Delaware. The duties of the Trustee will be limited to (i) accepting legal process served on the Trust in the State of Delaware and (ii) the execution of any certificates required to be filed with the Delaware Secretary of State which the Delaware Trustee is required to execute under the

DSTA. To the extent that, at law or in equity, the Trustee has duties (including fiduciary duties) and liabilities relating thereto to the Trust or the shareholders, such duties and liabilities will be replaced by the duties and liabilities of the Trustee expressly set forth in the Trust Agreement. The Trustee will have no obligation to supervise, nor will it be liable for, the acts or omissions of the Sponsor, Transfer Agent, Custodian, Prime Broker or any other person.

Neither the Trustee, either in its capacity as trustee or in its individual capacity, nor any director, officer or controlling person of the Trustee is, or has any liability as, the issuer, director, officer or controlling person of the issuer of Shares. The Trustee's liability in connection with the issuance and sale of Shares is limited solely to the express obligations of the Trustee as set forth in the Trust Agreement.

The Trustee has not prepared or verified, and will not be responsible or liable for, any information, disclosure or other statement in this prospectus or in any other document issued or delivered in connection with the sale or transfer of the Shares. The Trust Agreement provides that the Trustee will not be responsible or liable for the genuineness, enforceability, collectability, value, sufficiency, location or existence of any of the Ether or other assets of the Trust. See “—Description of the Trust Agreement.”

The Trustee is permitted to resign upon at least 180 days' notice to the Trust. The Trustee will be compensated by the Sponsor and indemnified by the Sponsor and the Trust against any expenses it incurs relating to or arising out of the formation, operation or termination of the Trust, or the performance of its duties pursuant to the Trust Agreement except to the extent that such expenses result from gross negligence, willful misconduct or bad faith of the Trustee. The Sponsor has the discretion to replace the Trustee.

Fees paid to the Trustee are a Sponsor-paid Expense.

The Transfer Agent

The Bank of New York Mellon serves as the Transfer Agent of the Trust pursuant to the terms and provisions of the Transfer Agency and Service Agreement (the “Transfer Agency and Service Agreement”). The Transfer Agent: (1) facilitates the issuance and redemption of Shares of the Trust; (2) responds to correspondence by Trust shareholders and others relating to its duties; (3) maintains shareholder accounts; and (4) makes periodic reports to the Trust. The Transfer Agent has its principal office at 240 Greenwich Street, New York, New York 10286. A copy of the Transfer Agency and Service Agreement is available for inspection at the Sponsor's principal office identified herein.

Continental Stock Transfer & Trust Company, a Delaware corporation, serve as a co-transfer agent for the Trust (the “Co-Transfer Agent”) pursuant to the terms and provisions of the Co-Transfer Agency Agreement (the “Co-Transfer Agency Agreement”). The Co-Transfer Agent has its principal office at 1 State Street, 30th Floor, New York, New York 10004. A copy of the Co-Transfer Agency and Service Agreement is available for inspection at the Sponsor's principal office identified herein.

Fees paid to the Transfer Agent and Co-Transfer Agent are a Sponsor-paid Expense.

The Bank of New York Mellon also serves as the administrator for the Trust.

Authorized Participants

An Authorized Participant must enter into a “Participant Agreement” with the Sponsor and the Trust to govern its placement of orders to create and redeem Baskets. The Participant Agreement sets forth the procedures for the creation and redemption of Baskets, the delivery of Ether or cash required for creations and the delivery of Baskets or cash required for redemptions. A copy of the form of Participant Agreement is available for inspection at the Sponsor's principal office identified herein and is filed as an exhibit to the registration statement of which this prospectus forms a part.

Each Authorized Participant must (i) be a registered broker-dealer and (ii) have entered into a Participant Agreement with the Sponsor and the Transfer Agent. Subject to In-Kind Regulatory Approval, in the future any Authorized Participants creating and redeeming Shares through In-Kind Orders must also own, or their AP Designee (as defined below) must own, an Ether wallet address that is known to the Custodian as belonging to the Authorized Participant or its AP Designee and maintain an account with the Custodian.

The Trust issues and redeems Shares on an ongoing basis, but only in one or more whole Baskets of 10,000 Shares each. The creation and redemption of Baskets requires the delivery to or acquisition by the Trust, or the distribution or other disposition by the Trust, of the number of Ether represented by the Baskets being created or redeemed, the number of which is equal to the “Basket Amount” as of 4:00 p.m., New York time, on the trade date of a creation or redemption order multiplied by the number of Baskets being created or redeemed (the “Total Basket Amount”). The number of Ether required to create a Basket, or to be delivered or sold upon the redemption of a Basket, will gradually decrease over time due to the transfer of the Trust’s Ether to pay the Sponsor’s Fee and the delivery or sale of the Trust’s Ether to pay any Trust expenses not assumed by the Sponsor. See “Description of Creation and Redemption of Shares” in this prospectus.

Although the Trust creates Baskets only upon the receipt of Ether, and redeems Baskets only by distributing Ether or proceeds from the disposition of Ether, at this time an Authorized Participant can only submit Cash Orders, pursuant to which the Authorized Participant will deposit cash into, or accept cash from, the Cash Account in connection with the creation and redemption of Baskets. Cash Orders will be facilitated by the Transfer Agent and Grayscale Investments, LLC, which will engage one or more Liquidity Providers that is not an agent of, or otherwise acting on behalf of, any Authorized Participant to obtain or receive Ether in connection with such orders. The Sponsor may in its sole discretion limit the number of Shares created pursuant to Cash Orders on any specified day without notice to the Authorized Participants and may direct the Marketing Agent to reject any Cash Orders in excess of such capped amount. The redemption of Shares pursuant to Cash Orders will only take place if approved by the Sponsor in writing, in its sole discretion and on a case-by-case basis.

The Trust is currently able to accept Cash Orders. However, and in common with other spot digital asset exchange-traded products, the Trust is not at this time able to create and redeem shares via in-kind transactions with Authorized Participants, and there has yet to be definitive regulatory guidance on whether and how registered broker-dealers can hold and deal in Ether in compliance with the federal securities laws. Subject to In-Kind Regulatory Approval, in the future the Trust may also create and redeem Baskets via In-Kind Orders, pursuant to which an Authorized Participant or its AP Designee would deposit Ether directly with the Trust or receive Ether directly from the Trust. However, because In-Kind Regulatory Approval has not been obtained, at this time Baskets will not be created or redeemed through In-Kind Orders and will only be created or redeemed through Cash Orders. There can be no assurance as to when such regulatory clarity will emerge, or when NYSE Arca will seek or obtain such regulatory approval, if at all. See “Risk Factors—Risk Factors Related to the Trust and the Shares—The lack of ability to facilitate in-kind creations and redemptions of Shares could have adverse consequences for the Trust.” See “Description of Creation and Redemption of Shares.”

As of the date of this prospectus, the Sponsor has entered into Participant Agreements with Jane Street Capital, LLC, Virtu Americas LLC, Macquarie Capital (USA) Inc. and ABN AMRO Clearing USA LLC pursuant to which, Jane Street Capital, LLC, Virtu Americas LLC, Macquarie Capital (USA) Inc. and ABN AMRO Clearing USA LLC have agreed to act as an Authorized Participants of the Trust.

No Authorized Participant has any obligation or responsibility to the Sponsor or the Trust to effect any sale or resale of Shares.

Liquidity Providers

Liquidity Providers facilitate the purchase and sale of Ether in connection with Cash Orders for creations or redemptions of Baskets. The Liquidity Providers with which Grayscale Investments, LLC, acting in its capacity as the Liquidity Engager, will engage in Ether transactions are third parties that are not affiliated with the Sponsor or the Trust and are not acting as agents of the Trust, the Sponsor, or any Authorized Participant, and

such transactions will be done on an arms-length basis. Except for the contractual relationships between each Liquidity Provider and Grayscale Investments, LLC in its capacity as the Liquidity Engager, there is no other pre-existing contractual relationship between each Liquidity Provider, on the one hand, and the Trust, the Sponsor, or any Authorized Participant, on the other hand.

A Liquidity Provider must enter into a “Liquidity Provider Agreement” with the Liquidity Engager and the Sponsor (on behalf of the Trust), which will obligate it to obtain or receive Ether in connection with creations and redemptions pursuant to Cash Orders.

As of the date of this prospectus, the Liquidity Engager has engaged JSCT, LLC, Virtu Financial Singapore Pte. Ltd., Flow Traders B.V., Cumberland DRW LLC and Flowdesk as Liquidity Providers. The Liquidity Engager intends to engage additional Liquidity Providers who are unaffiliated with the Trust in the future.

The Custodian and Prime Broker

Coinbase Custody Trust Company, LLC is a fiduciary under § 100 of the New York Banking Law and a qualified custodian for purposes of Rule 206(4)-2(d)(6) under the Investment Advisers Act. The Custodian is authorized to serve as the Trust’s custodian under the Trust Agreement and pursuant to the terms and provisions of the Prime Broker Agreement. The Custodian has its principal office at 200 Park Avenue South, Suite 1208, New York, NY 10003. A copy of the Prime Broker Agreement is available for inspection at the Sponsor’s principal office identified herein and is filed as an exhibit to the registration statement of which this prospectus forms a part.

Under the Prime Broker Agreement, the Custodian controls and secures the Trust’s “Vault Balance,” a segregated custody account to store private keys, which allow for the transfer of ownership or control of the Trust’s Ether, on the Trust’s behalf. The Custodian’s services (i) allow Ether to be deposited from a public blockchain address to the Trust’s Vault Balance and (ii) allow the Trust or Sponsor to withdraw Ether from the Trust’s Vault Balance to a public blockchain address the Trust or Sponsor controls (the “Custodial Services”). The Vault Balance uses offline storage, or “cold” storage, mechanisms to secure the Trust’s private keys. The term cold storage refers to a safeguarding method by which the private keys corresponding to digital assets are disconnected.

The Custodian will withdraw from the Trust’s Vault Balance the number of Ether necessary to pay the Trust’s expenses.

Fees paid to the Custodian are a Sponsor-paid Expense.

Under the Prime Broker Agreement, each of the Custodian and the Trust has agreed to indemnify and hold harmless the other party from any third-party claim or third-party demand (including reasonable and documented attorneys’ fees and any fines, fees or penalties imposed by any regulatory authority) arising out of or related to the Custodian’s or the Trust’s, as the case may be, breach of the Prime Broker Agreement, inaccuracy in any of the Custodian’s or the Trust’s, as the case may be, representations or warranties in the Prime Broker Agreement, or the Trust’s violation, or the Custodian’s knowing violation, of any law, rule or regulation, or the rights of any third party, except where such claim directly results from the negligence, fraud or willful misconduct of the other such party. In addition, the Trust has agreed to indemnify the Custodian with respect to any Incidental Rights or IR Virtual Currency abandoned by the Trust and any tax liability relating thereto or arising therefrom.

The Custodian and its affiliates may from time to time purchase or sell Ether for their own accounts and as agent for their customers or Shares for their own accounts. The foregoing notwithstanding, Ether in the Vault Balance are not treated as general assets of the Custodian and cannot be commingled with any other digital assets held by the Custodian. The Custodian serves as a fiduciary and custodian on the Trust’s behalf, and the Ether in the Vault Balance are considered fiduciary assets that remain the Trust’s property at all times.

Once each calendar year, the Sponsor or the Trust may request that the Custodian deliver a certificate signed by a duly authorized officer to certify that all representations and warranties made by the Custodian in the Prime Broker Agreement are true and correct on and as of the date of such certificate, and have been true and correct throughout the preceding year. In addition, the Custodian has agreed to allow the Trust and the Sponsor to take any necessary steps to verify that satisfactory internal control system and procedures are in place, and to visit and inspect the systems on which the Custodian's coins are held.

If the Custodian resigns in its capacity as custodian, the Sponsor may appoint an additional or replacement custodian and enter into a custodian agreement on behalf of the Trust with such custodian. Furthermore, the Sponsor and the Trust may use Ether custody services or similar services provided by entities other than Coinbase Custody Trust Company, LLC at any time without prior notice to Coinbase Custody Trust Company, LLC.

Custody of the Trust's Ether

Digital assets and digital asset transactions are recorded and validated on blockchains, the public transaction ledgers of a digital asset network. Each digital asset blockchain serves as a record of ownership for all of the units of such digital asset, even in the case of certain privacy-preserving digital assets, where the transactions themselves are not publicly viewable. All digital assets recorded on a blockchain are associated with a public blockchain address, also referred to as a digital wallet. Digital assets held at a particular public blockchain address may be accessed and transferred using a corresponding private key.

Key Generation

Public addresses and their corresponding private keys are generated by the Custodian in secret key generation ceremonies at secure locations inside faraday cages, which are enclosures used to block electromagnetic fields and thus mitigate against attacks. The Custodian uses quantum random number generators to generate the public and private key pairs.

Once generated, private keys are encrypted, separated into "shards", and then further encrypted. After the key generation ceremony, all materials used to generate private keys, including computers, are destroyed. All key generation ceremonies are performed offline. No party other than the Custodian has access to the private key shards of the Trust, including the Trust itself.

Key Storage

Private key shards are distributed geographically by the Custodial Entities in secure vaults around the world, including in the United States. The locations of the secure vaults may change regularly and are kept confidential by the Custodian and the Prime Broker for security purposes.

The Vault Balance primarily uses "cold" storage mechanisms to secure a substantial portion of the Trust's private keys. A substantial portion of the Trust's Ether holdings are held in cold storage at all times, with a portion of the Settlement Balance held temporarily in "hot" storage from time to time, for purposes of facilitating the receipt and distribution of Ether in connection with the creation and redemption of Baskets. Any Ether credited to the Trust's Settlement Balance is stored in omnibus accounts, either on the Prime Broker's systems or at Coinbase Connected Venues, using a combination of cold and hot storage mechanisms to secure the private keys representing the assets credited to the Trust's Settlement Balance.

Cold storage is a safeguarding method with multiple layers of protections and protocols, by which the private keys corresponding to the Trust's Ether are generated and stored in an offline manner. A digital wallet may receive deposits of digital assets but may not send digital assets without use of the digital assets' corresponding private keys. In order to send digital assets from a digital wallet in which the private keys are kept

in cold storage, either the private keys must be retrieved from cold storage and entered into an online, or hot, digital asset software program to sign the transaction, or the unsigned transaction must be transferred to the cold server in which the private keys are held for signature by the private keys and then transferred back to the online digital asset software program. At that point, the user of the digital wallet can transfer its digital assets. While private keys held in hot storage are more accessible and therefore enable more efficient transfers, such assets are more vulnerable to theft, loss or damage.

Security Procedures

The Custodian and the Prime Broker hold the Trust's private keys in custody in accordance with the terms and provisions of the Prime Broker Agreement. Transfers to and from the Vault Balance and, where held in cold storage, the Trust's Settlement Balance, require certain security procedures, including but not limited to, multiple encrypted private key shards, usernames, passwords and 2-step verification. Multiple private key shards held by the applicable Custodial Entity or Entities must be combined to reconstitute the private key to sign any transaction in order to transfer the Trust's assets. Private key shards are distributed geographically by the Custodial Entities in secure vaults around the world, including in the United States.

As a result, if any one secure vault is ever compromised, this event will have no impact on the ability of the Trust to access its assets, other than a possible delay in operations, while one or more of the other secure vaults is used instead. These security procedures are intended to remove single points of failure in the protection of the Trust's assets.

Transfers of Ether to the Vault Balance from the Settlement Balance will be available to the Trust once processed on the Ether Blockchain, subject to the availability of the Prime Broker's online platform. When Ether is credited to the Settlement Balance, certain movements to allocate the balance among (i) omnibus cold storage wallets and omnibus hot storage wallets on the Prime Broker's platform; or (ii) omnibus accounts at Coinbase Connected Venues may not be viewable by the Trust via the Prime Broker's online portal. In addition, on a monthly basis the Custodial Entities will provide the Sponsor with an account statement identifying the amount of cash and Ether in the Trust's Accounts at the end of the period and listing all account activity during that period.

The process of accessing and withdrawing Ether from the Trust to redeem a Basket by an Authorized Participant follows the same general procedure as transferring Ether to the Trust to create a Basket by an Authorized Participant, only in reverse. See "Description of Creation and Redemption of Shares."

The Marketing Agent

Foreside Fund Services, LLC is the marketing agent of the Shares. Foreside Fund Services, LLC is a registered broker-dealer with the SEC and is a member of FINRA.

In its capacity as marketing agent, Foreside Fund Services, LLC provides the following services to the Sponsor: (i) assist the Sponsor in facilitating Participation Agreements between and among Authorized Participants, the Sponsor, on behalf of the Trust, and the Transfer Agent; (ii) provide prospectuses to Authorized Participants; (iii) work with the Transfer Agent to review and approve orders placed by the Authorized Participants and transmitted to the Transfer Agent; (iv) review and file applicable marketing materials with FINRA and (v) maintain, reproduce and store applicable books and records related to the services provided under the Marketing Agent Agreement.

The Sponsor has entered into a Marketing Agent Agreement with Foreside Fund Services, LLC. The Sponsor may engage additional or successor marketing agents in the future.

Valuation of Ether and Determination of NAV

The Sponsor will evaluate the Ether held by the Trust and determine the NAV of the Trust in accordance with the relevant provisions of the Trust Documents. The following is a description of the material terms of the Trust Documents as they relate to valuation of the Trust's Ether and the NAV calculations, which is calculated using non-GAAP methodology and is not used in the Trust's financial statements.

On each business day at 4:00 p.m., New York time, or as soon thereafter as practicable (the "Evaluation Time"), the Sponsor will evaluate the Ether held by the Trust and calculate and publish the NAV of the Trust. To calculate the NAV, the Sponsor will:

1. Determine the Index Price as of such business day.
2. Multiply the Index Price by the Trust's aggregate number of Ether owned by the Trust as of 4:00 p.m., New York time, on the immediately preceding day, less the aggregate number of Ether payable as the accrued and unpaid Sponsor's Fee as of 4:00 p.m., New York time, on the immediately preceding day.
3. Add the U.S. dollar value of Ether, calculated using the Index Price, receivable under pending creation orders, if any, determined by multiplying the number of the Creation Baskets represented by such creation orders by the Basket Amount and then multiplying such product by the Index Price.
4. Subtract the U.S. dollar amount of accrued and unpaid Additional Trust Expenses, if any.
5. Subtract the U.S. dollar value of the Ether, calculated using the Index Price, which are either (i) to be distributed under pending redemption orders, if any, determined by multiplying the number of Baskets to be redeemed represented by such redemption orders by the Basket Amount and then multiplying such product by the Index Price, or (ii) to be distributed to Shareholders pursuant to a binding obligation of the Trust following the declaration of an in-kind dividend (including through interests in any liquidating trust or other vehicle formed to hold such Ether) (the amount derived from steps 1 through 5 above, the "NAV Fee Basis Amount").
6. Subtract the U.S. dollar amount of the Sponsor's Fee that accrues for such business day, as calculated based on the NAV Fee Basis Amount for such business day.

In the event that the Sponsor determines that the primary methodology used to determine the Index Price is not an appropriate basis for valuation of the Trust's Ether, the Sponsor will utilize the cascading set of rules as described in "—Overview of the Ethereum Industry and Market—The Index and the Index Price."

The Sponsor will publish the Index Price, the Trust's NAV and the NAV per Share on the Trust's website as soon as practicable after its determination. If the NAV and NAV per Share have been calculated using a price per Ether other than the Index Price for such Evaluation Time, the publication on the Trust's website will note the valuation methodology used and the price per Ether resulting from such calculation.

In the event of a hard fork of the Ethereum Network, the Sponsor will, if permitted by the terms of the Trust Agreement, use its discretion to determine, in good faith, which peer-to-peer network, among a group of incompatible forks of the Ethereum Network, is generally accepted as the network for Ether and should therefore be considered the appropriate network for the Trust's purposes. The Sponsor will base its determination on a variety of then relevant factors, including (but not limited to) the following: (i) the Sponsor's beliefs regarding expectations of the core developers of Ether, users, services, businesses, validators and other constituencies and (ii) the actual continued acceptance of, validating power on, and community engagement with the Ethereum Network.

The shareholders may rely on any evaluation furnished by the Sponsor. The determinations that the Sponsor makes will be made in good faith upon the basis of, and the Sponsor will not be liable for any errors contained in, information reasonably available to it. The Sponsor will not be liable to the Authorized Participants, the

shareholders or any other person for errors in judgment. However, the preceding liability exclusion will not protect the Sponsor against any liability resulting from gross negligence, willful misconduct or bad faith in the performance of its duties.

Expenses; Sales of Ether

The Trust's only ordinary recurring expense is expected to be the Sponsor's Fee. Subject to the temporary waiver of a portion of the Sponsor's Fee as discussed below under "Expenses to Be Paid by the Sponsor," the Sponsor's Fee will accrue daily in U.S. dollars at an annual rate of 0.25% of the NAV Fee Basis Amount of the Trust as of 4:00 p.m., New York time, on each day; provided that for a day that is not a business day, the calculation will be based on the NAV Fee Basis Amount from the most recent business day, reduced by the accrued and unpaid Sponsor's Fee for such most recent business day and for each day after such most recent business day and prior to the relevant calculation date. This dollar amount for each daily accrual will then be converted into Ether by reference to the same Index Price used to determine such accrual. The Sponsor's Fee is payable in Ether to the Sponsor daily in arrears.

Expenses to Be Paid by the Sponsor

The Trust pays the Sponsor's Fee to the Sponsor. As partial consideration for its receipt of the Sponsor's Fee from the Trust, the Sponsor is obligated under the Trust Agreement to assume and pay all fees and other expenses incurred by the Trust in the ordinary course of its affairs, excluding taxes, but including: (i) the Marketing Fee; (ii) the Administrator Fee, if any; (iii) the Custodian Fee and fees for any other security vendor engaged by the Trust; (iv) the Transfer Agent Fee; (v) the Trustee fee; (vi) fees and expenses related to the listing, quotation or trading of the Shares on any Secondary Market (including customary legal, marketing and audit fees and expenses) in an amount up to \$600,000 in any given fiscal year; (vii) ordinary course legal fees and expenses; (viii) audit fees; (ix) regulatory fees, including, if applicable, any fees relating to registration of the Shares under the Securities Act or the Exchange Act; (x) printing and mailing costs; (xi) the costs of maintaining the Trust's website; and (xii) applicable license fees (each a "Sponsor-paid Expense"), provided that any expense that qualifies as an Additional Trust Expense will be deemed to be an Additional Trust Expense and not a Sponsor-paid Expense. The Sponsor, from time to time, may temporarily waive all or a portion of the Sponsor's Fee in its sole discretion. The Sponsor has determined to waive a portion of the Sponsor's Fee for the first 12 months beginning on the commencement of trading of the Shares on NYSE Arca, so that the fee will be 0.12% of the NAV of the Trust for the first \$2.0 billion of the Trust's assets. If the Trust's assets exceed \$2.0 billion prior to the end of the 12-month period, the Sponsor's Fee charged on assets over \$2.0 billion will be 0.25%. All investors will incur the same Sponsor's Fee, which is the weighted average of those fee rates. After the 12-month waiver period is over, the Sponsor's Fee will be 0.25%. Other than as disclosed herein, the Sponsor does not presently intend to waive any of the Sponsor's Fee and there are no other circumstances under which the Sponsor has determined it will definitely waive the fee. The Sponsor is under no obligation to waive any portion of its fees and any such waiver shall create no obligation to waive any such fees during any period not covered by the waiver.

The Sponsor's Fee will generally be paid in Ether. After the Trust's payment of the Sponsor's Fee to the Sponsor, the Sponsor may elect to convert the Ether received as payment of the Sponsor's Fee into U.S. dollars. The rate at which the Sponsor converts such Ether to U.S. dollars may differ from the rate at which the relevant Sponsor's Fee was determined. The Trust will not be responsible for any fees and expenses incurred by the Sponsor to convert Ether received in payment of the Sponsor's Fee into U.S. dollars.

Extraordinary and Other Expenses

In certain extraordinary circumstances, the Trust may incur certain extraordinary, non-recurring expenses that are not Sponsor-paid Expenses, including, but not limited to: taxes and governmental charges; expenses and costs of any extraordinary services performed by the Sponsor (or any other service provider) on behalf of the

Trust to protect the Trust or the interests of shareholders; any indemnification of the Custodian or other agents, service providers or counterparties of the Trust; the fees and expenses related to the listing, quotation or trading of the Shares on any Secondary Market (including legal, marketing and audit fees and expenses) to the extent exceeding \$600,000 in any given fiscal year; and extraordinary legal fees and expenses, including any legal fees and expenses incurred in connection with litigation, regulatory enforcement or investigation matters (collectively, “Additional Trust Expenses”). If Additional Trust Expenses are incurred, the Trust will be required to pay these Additional Trust Expenses by selling or delivering Ether. Generally, the Sponsor will cover such expenses on behalf of the Trust and the Trust will reimburse the Sponsor by delivering to the Sponsor Ether in an amount equal to such expenses. When the Trust and the Sponsor, acting on behalf of the Trust, sell or deliver, as applicable, Ether, they generally do not transact directly with counterparties other than the Authorized Participant, a Liquidity Provider or other similarly eligible financial institutions that are subject to federal and state licensing requirements and maintain practices and policies designed to comply with AML and KYC regulations.

The Sponsor or any of its affiliates may be reimbursed only for the actual cost to the Sponsor or such affiliate of any expenses that it advances on behalf of the Trust for payment of which the Trust is responsible. In addition, the Trust Agreement prohibits the Trust from paying to the Sponsor or such affiliate for indirect expenses incurred in performing services for the Trust in its capacity as the Sponsor (or an affiliate of the Sponsor) of the Trust, such as salaries and fringe benefits of officers and directors, rent or depreciation, utilities and other administrative items generally falling within the category of the Sponsor’s “overhead.”

Disposition of ETH

To cause the Trust to pay the Sponsor’s Fee, the Sponsor will instruct the Custodian to (i) withdraw from the Vault Balance the number of Ether, determined as described above in “—Expenses; Sales of Ether,” equal to the accrued but unpaid Sponsor’s Fee and (ii) transfer such Ether to an account maintained by the Custodian for the Sponsor at such times as the Sponsor determines in its absolute discretion. In addition, if the Trust incurs any Additional Trust Expenses, the Sponsor or its delegates (i) will instruct the Custodian to withdraw from the Vault Balance Ether in such quantity as may be necessary to permit payment of such Additional Trust Expenses and (ii) may either (x) cause the Trust to convert such Ether into U.S. dollars or other fiat currencies at the Actual Exchange Rate or (y) when the Sponsor incurs such expenses on behalf of the Trust, cause the Trust (or its delegate) to deliver such Ether in kind to the Sponsor, in each case in such quantity as may be necessary to permit payment of such Additional Trust Expenses. The Sponsor’s Fee and Additional Trust Expenses payable by the Trust will generally be paid in Ether. Shareholders do not have the option of choosing to pay their proportionate shares of Additional Trust Expenses in lieu of having their shares of Additional Trust Expenses paid by the Trust’s delivery or disposition of Ether. Assuming that the Trust is a grantor trust for U.S. federal income tax purposes, the transfer or sale of Ether to pay the Trust’s expenses will be a taxable event for shareholders. See “Material U.S. Federal Income Tax Consequences—Tax Consequences to U.S. Holders.”

Because the number of Ether held by the Trust will decrease as a consequence of the payment of the Sponsor’s Fee in Ether or the sale of Ether to pay Additional Trust Expenses (and the Trust will incur additional fees associated with converting Ether into U.S. dollars), the number of Ether represented by a Share will decline at such time and the Trust’s NAV may also decrease. Accordingly, the shareholders will bear the cost of the Sponsor’s Fee and any Additional Trust Expenses. New Ether deposited into the Vault Balance in exchange for additional new Baskets issued by the Trust will not reverse this trend.

The Sponsor will also cause the sale of the Trust’s Ether if the Sponsor determines that sale is required by applicable law or regulation or in connection with the termination and liquidation of the Trust. The Sponsor will not be liable or responsible in any way for depreciation or loss incurred by reason of any sale of Ether.

The quantity of Ether to be delivered to the Sponsor or other relevant payee in payment of the Sponsor’s Fee or any Additional Trust Expenses, or sold to permit payment of Additional Trust Expenses, will vary from time

to time depending on the level of the Trust’s expenses and the value of Ether held by the Trust. See “—Expenses; Sales of Ether.” Assuming that the Trust is a grantor trust for U.S. federal income tax purposes, each delivery or sale of Ether by the Trust for the payment of expenses will be a taxable event to shareholders. See “Material U.S. Federal Income Tax Consequences—Tax Consequences to U.S. Holders.”

Hypothetical Expense Example

The following table illustrates the anticipated impact of the payment of the Trust’s expenses on the number of Ether represented by each outstanding Share for three years. It assumes that the only transfers of Ether will be those needed to pay the Sponsor’s Fee and that the price of Ether and the number of Shares remain constant during the three-year period covered. The table does not show the impact of any Additional Trust Expenses. Any Additional Trust Expenses, if and when incurred, will accelerate the decrease in the fractional number of Ether represented by each Share. In addition, the table does not show the effect of any waivers of the Sponsor’s Fee that may be in effect from time to time.

	Year		
	1	2	3
Hypothetical price per Ether, beginning	\$ 100.00	\$ 100.00	\$ 100.00
Sponsor’s Fee	%	%	%
Shares of Trust, beginning	100,000.00	100,000.00	100,000.00
Ether in Trust, beginning	10,000.00		
Hypothetical value of Ether in Trust	\$1,000,000.00	\$	\$
Beginning NAV of the Trust	\$1,000,000.00	\$	\$
Ether to be delivered to cover the Sponsor’s Fee			
Ether in Trust, ending			
Ending NAV of the Trust	\$	\$	\$
Ending NAV per share	\$	\$	\$
Hypothetical price per Ether, ending	\$ 100.00	\$ 100.00	\$ 100.00

Discretion of the Index Provider

The Index Provider has sole discretion over the determination of Index Price and may change the methodologies for determining the Index Price from time to time.

Description of the Trust Agreement

The following is a description of the material terms of the Trust Agreement. The Trust Agreement establishes the roles, rights and duties of the Sponsor and the Trustee.

The Sponsor

Liability of the Sponsor and Indemnification

Neither the Sponsor nor the Trust insure the Trust’s Ether. The Sponsor and its affiliates (each a “Covered Person”) will not be liable to the Trust or any shareholder for any loss suffered by the Trust which arises out of any action or inaction of such Covered Person if such Covered Person determined in good faith that such course of conduct was in the best interests of the Trust. However, the preceding liability exclusion will not protect any Covered Person against any liability resulting from its own willful misconduct, bad faith or gross negligence in the performance of its duties.

Each Covered Person will be indemnified by the Trust against any loss, judgment, liability, expense incurred or amount paid in settlement of any claim sustained by it in connection with the Covered Person’s

activities for the Trust, provided that (i) the Covered Person was acting on behalf of, or performing services for, the Trust and had determined, in good faith, that such course of conduct was in the best interests of the Trust and such liability or loss was not the result of fraud, gross negligence, bad faith, willful misconduct or a material breach of the Trust Agreement on the part of such Covered Person and (ii) any such indemnification will be recoverable only from the property of the Trust. Any amounts payable to an indemnified party will be payable in advance under certain circumstances.

Fiduciary and Regulatory Duties of the Sponsor

The Sponsor is not effectively subject to the duties and restrictions imposed on “fiduciaries” under both statutory and common law. Rather, the general fiduciary duties that would apply to the Sponsor are defined and limited in scope by the Trust Agreement.

Under Delaware law, a shareholder may bring a derivative action if the shareholder is a shareholder at the time the action is brought and either (i) was a shareholder at the time of the transaction at issue or (ii) acquired the status of shareholder by operation of law or the Trust’s governing instrument from a person who was a shareholder at the time of the transaction at issue. Additionally, Section 3816(e) of the Delaware Statutory Trust Act specifically provides that “a beneficial owner’s right to bring a derivative action may be subject to such additional standards and restrictions, if any, as are set forth in the governing instrument of the statutory trust, including, without limitation, the requirement that beneficial owners owning a specified beneficial interest in the statutory trust join in the bringing of the derivative action.” In addition to the requirements of applicable law, the Trust Agreement provides that no shareholder will have the right, power or authority to bring or maintain a derivative action, suit or other proceeding on behalf of the Trust unless two or more shareholders who (i) are not “Affiliates” (as defined in the Trust Agreement and below) of one another and (ii) collectively hold at least 10.0% of the outstanding Shares join in the bringing or maintaining of such action, suit or other proceeding. The Trust selected the 10.0% ownership threshold because the Trust believed that this was a threshold that investors would be comfortable with based on market precedent.

This provision applies to any derivative action brought in the name of the Trust other than claims brought under the federal securities laws or the rules and regulations thereunder, to which Section 7.4 does not apply. Due to this additional requirement, a shareholder attempting to bring a derivative action in the name of the Trust will be required to locate other shareholders with which it is not affiliated and that have sufficient Shares to meet the 10.0% threshold based on the number of Shares outstanding on the date the claim is brought and thereafter throughout the duration of the action, suit or proceeding.

“Affiliate” is defined in the Trust Agreement to mean any natural person, partnership, limited liability company, statutory trust, corporation, association or other legal entity (each, a “Person”) directly or indirectly owning, controlling or holding with power to vote 10% or more of the outstanding voting securities of such Person, (ii) any Person 10% or more of whose outstanding voting securities are directly or indirectly owned, controlled or held with power to vote by such Person, (iii) any Person, directly or indirectly, controlling, controlled by or under common control of such Person, (iv) any employee, officer, director, member, manager or partner of such Person, or (v) if such Person is an employee, officer, director, member, manager or partner, any Person for which such Person acts in any such capacity.

Any shareholders seeking to bring a derivative action may determine whether the 10.0% ownership threshold required to bring a derivative action has been met by dividing the number Shares owned by such shareholders by the total number of Shares outstanding. Following the effectiveness of the registration statement of which this prospectus forms a part, shareholders may determine the total number of Shares outstanding by reviewing the Trust’s annual filings on Form 10-K, quarterly filings on Form 10-Q and current reports on Form 8-K reporting sales of unregistered securities pursuant to Item 3.02 thereof, or by requesting the number of Shares outstanding at any time from the Sponsor pursuant to Sections 7.2 and 8.1 of the Trust Agreement and Section 3819(a) of the DSTA. Because the Trust is a grantor trust, it may only issue one class of securities, the Shares.

The Trust offers Shares on a periodic basis at such times and for such periods as the Sponsor determines in its sole discretion. As a result, in order to maintain the 10.0% ownership threshold required to maintain a derivative action, shareholders may need to increase their holdings or locate additional shareholders during the pendency of a claim. The Trust will post the number of Shares outstanding as of the end of each month on its website and as of the end of each quarter in its annual and quarterly filings with the SEC. The Trust additionally will report sales of unregistered securities on Form 8-K pursuant to Item 3.02 thereof. Following the effectiveness of the registration statement of which this prospectus forms a part, shareholders may monitor the number of Shares outstanding at any time for purposes of calculating their ownership threshold by reviewing the Trust's website and SEC filings and by requesting the number of Shares outstanding on any date from the Sponsor at any time pursuant to Sections 7.2 and 8.1 of the Trust Agreement. Shareholders have the opportunity at any time to increase their holdings or locate other shareholders to maintain the 10.0% threshold throughout the duration of a derivative claim. Shareholders may do so by contacting shareholders that are required to file Schedule 13Ds or Schedule 13Gs with the SEC or by requesting from the Sponsor the list of the names and last known address of all shareholders pursuant to Sections 7.2 and 8.1 of the Trust Agreement and Section 3819(a) of the DSTA.

The Sponsor is not aware of any reason to believe that Section 7.4 of the Trust Agreement is not enforceable under state or federal law. The Court of Chancery of Delaware has stated that “[t]he DSTA is enabling in nature and, as such, permits a trust through its declarations of trust to delineate additional standards and requirements with which a stockholder-plaintiff must comply to proceed derivatively in the name of the trust.” *Hartsel v. Vanguard Group, Inc.*, Del. Ch. June 15, 2011. However, there is limited case law addressing the enforceability of provisions like Section 7.4 under state and federal law and it is possible that this provision would not be enforced by a court in another jurisdiction or under other circumstances.

Beneficial owners may have the right, subject to certain legal requirements, to bring class actions in federal court to enforce their rights under the federal securities laws and the rules and regulations promulgated thereunder by the SEC. Beneficial owners who have suffered losses in connection with the purchase or sale of their beneficial interests may be able to recover such losses from the Sponsor where the losses result from a violation by the Sponsor of the anti-fraud provisions of the federal securities laws.

Actions Taken to Protect the Trust

The Sponsor may prosecute, defend, settle or compromise actions or claims at law or in equity that it considers necessary or proper to protect the Trust or the interests of the shareholders. The expenses incurred by the Sponsor in connection therewith (including the fees and disbursements of legal counsel) will be expenses of the Trust and are deemed to be Additional Trust Expenses. The Sponsor will be entitled to be reimbursed for the Additional Trust Expenses it pays on behalf of the Trust.

Successor Sponsors

If the Sponsor is adjudged bankrupt or insolvent, the Trust may dissolve and a Liquidating Trustee may be appointed to terminate and liquidate the Trust and distribute its remaining assets. The Trustee will have no obligation to appoint a successor sponsor or to assume the duties of the Sponsor, and will have no liability to any person because the Trust is or is not terminated. However, if a certificate of dissolution or revocation of the Sponsor's charter is filed (and ninety (90) days have passed after the date of notice to the Sponsor of revocation without a reinstatement of the Sponsor's charter) or the withdrawal, removal, adjudication or admission of bankruptcy or insolvency of the Sponsor has occurred, shareholders holding at least a majority (over 50%) of the Shares may agree in writing to continue the affairs of the Trust and to select, effective as of the date of such event, one or more successor Sponsors within ninety (90) days of any such event.

The Trustee

The Trustee is a fiduciary under the Trust Agreement and must satisfy the requirements of Section 3807 of the Delaware Trust Statute. However, the fiduciary duties, responsibilities and liabilities of the Trustee are limited by, and are only those specifically set forth in, the Trust Agreement.

Limitation on Trustee's Liability

Under the Trust Agreement, the Sponsor has exclusive control of the management of all aspects of the activities of the Trust and the Trustee has only nominal duties and liabilities to the Trust. The Trustee is appointed to serve as the trustee for the sole purpose of satisfying Section 3807(a) of the DSTA which requires that the Trust have at least one trustee with a principal place of business in the State of Delaware. The duties of the Trustee are limited to (i) accepting legal process served on the Trust in the State of Delaware and (ii) the execution of any certificates required to be filed with the Delaware Secretary of State which the Trustee is required to execute under the DSTA.

To the extent the Trustee has duties (including fiduciary duties) and liabilities to the Trust or the shareholders under the DSTA, such duties and liabilities will be replaced by the duties and liabilities of the Trustee expressly set forth in the Trust Agreement. The Trustee will have no obligation to supervise, nor will it be liable for, the acts or omissions of the Sponsor, Transfer Agent, Custodian or any other person. Neither the Trustee, either in its capacity as trustee or in its individual capacity, nor any director, officer or controlling person of the Trustee is, or has any liability as, the issuer, director, officer or controlling person of the issuer of Shares. The Trustee's liability is limited solely to the express obligations of the Trustee as set forth in the Trust Agreement.

Under the Trust Agreement, the Sponsor has the exclusive management, authority and control of all aspects of the activities of the Trust. The Trustee has no duty or liability to supervise or monitor the performance of the Sponsor, nor does the Trustee have any liability for the acts or omissions of the Sponsor. The existence of a trustee should not be taken as an indication of any additional level of management or supervision over the Trust. The Trust Agreement provides that the management authority with respect to the Trust is vested directly in the Sponsor and that the Trustee is not responsible or liable for the genuineness, enforceability, collectability, value, sufficiency, location or existence of any of the Ether or other assets of the Trust.

Possible Repayment of Distributions Received by Shareholders; Indemnification by Shareholders

The Shares are limited liability investments. Investors may not lose more than the amount that they invest plus any profits recognized on their investment. Although it is unlikely, the Sponsor may, from time to time, make distributions to the shareholders. However, shareholders could be required, as a matter of bankruptcy law, to return to the estate of the Trust any distribution they received at a time when the Trust was in fact insolvent or in violation of its Trust Agreement. In addition, the Trust Agreement provides that shareholders will indemnify the Trust for any harm suffered by it as a result of shareholders' actions unrelated to the activities of the Trust.

The foregoing repayment of distributions and indemnity provisions (other than the provision for shareholders indemnifying the Trust for taxes imposed upon it by a state, local or foreign taxing authority, which is included only as a formality due to the fact that many states do not have statutory trust statutes therefore the tax status of the Trust in such states might, theoretically, be challenged) are commonplace in statutory trusts and limited partnerships.

Indemnification of the Trustee

The Trustee and any of the officers, directors, employees and agents of the Trustee will be indemnified by the Trust as primary obligor and the Sponsor as secondary obligor and held harmless against any loss, damage,

liability, claim, action, suit, cost, expense, disbursement (including the reasonable fees and expenses of counsel), tax or penalty of any kind and nature whatsoever, arising out of, imposed upon or asserted at any time against such indemnified person in connection with the performance of its obligations under the Trust Agreement, the creation, operation or termination of the Trust or the transactions contemplated therein; provided, however, that neither the Trust nor the Sponsor will be required to indemnify any such indemnified person for any such expenses which are a result of the willful misconduct, bad faith or gross negligence of such indemnified person. If the Trust has insufficient assets or improperly refuses to pay such an indemnified person within 60 days of a request for payment owed under the Trust Agreement, the Sponsor will, as secondary obligor, compensate or reimburse the Trustee or indemnify, defend and hold harmless such an indemnified person as if it were the primary obligor under the Trust Agreement. Any amount payable to such an indemnified person under the Trust Agreement may be payable in advance under certain circumstances and will be secured by a lien on the Trust property. The obligations of the Sponsor and the Trust to indemnify such indemnified persons under the Trust Agreement will survive the termination of the Trust Agreement.

Holding of Trust Property

The Trust will hold and record the ownership of the Trust's assets in a manner such that it will be owned for the benefit of the shareholders for the purposes of, and subject to and limited by the terms and conditions set forth in, the Trust Agreement. The Trust will not create, incur or assume any indebtedness or borrow money from or loan money to any person. The Trustee may not commingle its assets with those of any other person.

The Trustee may employ agents, attorneys, accountants, auditors and nominees and will not be answerable for the conduct or misconduct of any such custodians, agents, attorneys or nominees if such custodians, agents, attorneys and nominees have been selected with reasonable care.

Resignation, Discharge or Removal of Trustee; Successor Trustees

The Trustee may resign as Trustee by written notice of its election so to do, delivered to the Sponsor with at least 180 days' notice. The Sponsor may remove the Trustee in its discretion. If the Trustee resigns or is removed, the Sponsor, acting on behalf of the shareholders, will appoint a successor trustee. The successor Trustee will become fully vested with all of the rights, powers, duties and obligations of the outgoing Trustee.

If the Trustee resigns and no successor trustee is appointed within 180 days after the Trustee notifies the Sponsor of its resignation, the Trustee will terminate and liquidate the Trust and distribute its remaining assets.

Amendments to the Trust Agreement

In general, the Sponsor may amend the Trust Agreement without the consent of any shareholder. In particular, the Sponsor may, without the approval of the shareholders, amend the Trust Agreement if the Trust is advised at any time by the Trust's accountants or legal counsel that the amendments are necessary to permit the Trust to take the position that it is a grantor trust for U.S. federal income tax purposes. However, the Sponsor may not make an amendment, or otherwise supplement the Trust Agreement, if such amendment or supplement would permit the Sponsor, the Trustee or any other person to vary the investment of the shareholders (within the meaning of applicable Treasury Regulations) or would otherwise adversely affect the status of the Trust as a grantor trust for U.S. federal income tax purposes. In addition, no amendments to the Trust Agreement that materially adversely affect the interests of shareholders may be made without the vote of at least a majority (over 50%) of the Shares (not including any Shares held by the Sponsor or its affiliates). A shareholder will be deemed to have consented to a modification or amendment of the Trust Agreement if the Sponsor has notified the shareholders in writing of the proposed modification or amendment and the shareholder has not, within 20 calendar days of such notice, notified the Sponsor in writing the shareholder objects to such modification or amendment.

Termination of the Trust

The Trust will dissolve if any of the following events occur:

- a U.S. federal or state regulator requires the Trust to shut down or forces the Trust to liquidate its Ether or seizes, impounds or otherwise restricts access to Trust assets;
- any ongoing event exists that either prevents the Trust from making or makes impractical the Trust's reasonable efforts to make a fair determination of the Index Price;
- any ongoing event exists that either prevents the Trust from converting or makes impractical the Trust's reasonable efforts to convert Ether to U.S. dollars; or
- a certificate of dissolution or revocation of the Sponsor's charter is filed (and 90 days have passed since the date of notice to the Sponsor of revocation without a reinstatement of its charter) or the withdrawal, removal, adjudication or admission of bankruptcy or insolvency of the Sponsor has occurred, unless (i) at the time there is at least one remaining Sponsor and that remaining Sponsor carries on the Trust or (ii) within 90 days of any such event shareholders holding at least a majority (over 50%) of Shares, not including Shares held by the Sponsor and its affiliates, agree in writing to continue the activities of the Trust and to select, effective as of the date of such event, one or more successor Sponsors.

The Sponsor may, in its sole discretion, dissolve the Trust if any of the following events occur:

- the SEC determines that the Trust is an investment company required to be registered under the Investment Company Act of 1940;
- the CFTC determines that the Trust is a commodity pool under the CEA;
- the Trust is determined to be a "money service business" under the regulations promulgated by FinCEN under the authority of the U.S. Bank Secrecy Act and is required to comply with certain FinCEN regulations thereunder;
- the Trust is required to obtain a license or make a registration under any state law regulating money transmitters, money services businesses, providers of prepaid or stored value or similar entities, or virtual currency businesses;
- the Trust becomes insolvent or bankrupt;
- the Custodian resigns or is removed without replacement;
- all of the Trust's assets are sold;
- the Sponsor determines that the aggregate net assets of the Trust in relation to the expenses of the Trust make it unreasonable or imprudent to continue the affairs of the Trust;
- the Sponsor receives notice from the IRS or from counsel for the Trust or the Sponsor that the Trust fails to qualify for treatment, or will not be treated, as a grantor trust under the U.S. Internal Revenue Code of 1986, as amended (the "Code");
- if the Trustee notifies the Sponsor of the Trustee's election to resign and the Sponsor does not appoint a successor trustee within 180 days; or
- the Sponsor determines, in its sole discretion, that it is desirable or advisable for any reason to discontinue the affairs of the Trust.

The Sponsor may determine that it is desirable or advisable to discontinue the affairs of the Trust for a variety of reasons. For example, the Sponsor may terminate the Trust if a federal court upholds an allegation that Ether is a security under the federal securities laws.

The death, legal disability, bankruptcy, insolvency, dissolution, or withdrawal of any shareholder (as long as such shareholder is not the sole shareholder of the Trust) will not result in the termination of the Trust, and such shareholder, his or her estate, custodian or personal representative will have no right to a redemption or value such shareholder's Shares. Each shareholder (and any assignee thereof) expressly agrees that in the event of his or her death, he or she waives on behalf of himself or herself and his or her estate, and he or she directs the legal representative of his or her estate and any person interested therein to waive the furnishing of any inventory, accounting or appraisal of the assets of the Trust and any right to an audit or examination of the books of account for the Trust, except for such rights as are set forth in Article VIII of the Trust Agreement relating to the books of account and reports of the Trust.

Upon dissolution of the Trust and surrender of Shares by the shareholders, shareholders will receive a distribution in U.S. dollars or interests in any liquidating trust or other vehicle formed to hold Ether at the sole discretion of the Sponsor, after the Sponsor has sold the Trust's Ether, if applicable, and has paid or made provision for the Trust's claims and obligations.

If the Trust is forced to liquidate, the Trust will be liquidated under the Sponsor's direction. The Sponsor, on behalf of the Trust, will engage directly with Digital Asset Markets to liquidate the Trust's Ether as promptly as possible while obtaining the best fair value possible. The proceeds therefrom will be applied and distributed in the following order of priority: (a) to the expenses of liquidation and termination and to creditors, including shareholders who are creditors, to the extent otherwise permitted by law, in satisfaction of liabilities of the Trust other than liabilities for distributions to shareholders and (b) to the holders of Shares pro rata in accordance with the respective percentage of percentages of Shares that they hold. It is expected that the Sponsor would be subject to the same regulatory requirements as the Trust, and therefore, the markets available to the Sponsor will be the same markets available to the Trust.

Governing Law

The Trust Agreement and the rights of the Sponsor, Trustee and shareholders under the Trust Agreement are governed by the laws of the State of Delaware.

Description of the Prime Broker Agreement

The Prime Broker Agreement establishes the rights and responsibilities of the Custodian, the Prime Broker, the Sponsor and the Trust with respect to the Trust's Ether which is held in accounts maintained and operated by the Custodian, as a fiduciary with respect to the Trust's assets, and the Prime Broker (together with the Custodian, the "Custodial Entities") on behalf of the Trust. For a general description of the Custodian's obligations, see "—Service Providers of the Trust—The Custodian and Prime Broker."

Account; Location of Ether

All of the Trust's Ether, other than that which is credited to a settlement balance maintained with the Prime Broker (the "Settlement Balance"), is held in custody accounts maintained on the books of the Custodian, as to which the Custodian controls the private keys which allow for the transfer of ownership or control of the Trust's Ether on the Trust's behalf (the "Vault Balance"). The Prime Broker Agreement provides that the Trust's Vault Balance will be held by the Custodian in segregated wallets or accounts. The Custodian will keep all of the private keys associated with the Trust's Ether held in the Vault Balance in an offline manner. The term "cold storage" refers to a safeguarding method where the storage of private keys may involve keeping such keys' materials on a non-networked computer or electronic device or storing the private keys on a storage device. Cold storage is a safeguarding method with multiple layers of protections and protocols, by which the private keys corresponding to the Trust's Ether are generated and stored in an offline manner. The term "hot storage" refers to the safeguarding method by which the private keys are held online, where they are more accessible, leading to more efficient transfers, though they are potentially more vulnerable to theft, loss or damage. Additionally, at the Sponsor's discretion, a portion of the Trust's Ether holdings may be credited to the Settlement Balance, which

will be reflected in a ledger maintained on the books of the Prime Broker. The Prime Broker Agreement provides that any Ether credited to the Trust's Settlement Balance will be held (i) in omnibus cold storage wallets; (ii) in omnibus hot storage wallets; or (iii) in omnibus accounts with one of the third-party venues to which Coinbase has established connections (each, a "Coinbase Connected Venue"). The Settlement Balance shall be separate from the Vault Balance and any other account(s) the Trust or the Sponsor maintain with the Custodian. From time to time, the Prime Broker may temporarily keep a portion of the private keys associated with the Ether credited to the Trust's Settlement Balance in hot storage for purposes of facilitating the receipt and distribution of Ether in connection with the creation and redemption of Baskets.

Private key shards associated with the Trust's Ether are distributed geographically by the Custodial Entities in secure vaults around the world, including in the United States. The locations of the secure vaults may change and are kept confidential by the Custodian for security purposes.

The Prime Broker Agreement states that the Custodian serves as a fiduciary and custodian on the Trust's behalf with respect to the Trust's Ether held in the Vault Balance and the Ether in the Vault Balance are considered fiduciary assets that remain the Trust's property at all times and are not treated as general assets of the Custodian. Under the Prime Broker Agreement, the Custodian represents and warrants that it has no right, interest, or title in the Ether in the Trust's Vault Balance, and agrees that it will not, directly or indirectly, lend, pledge, hypothecate or rehypothecate such digital assets. The Custodian does not reflect such digital assets as assets on the balance sheet of the Custodian, but does reflect the obligation to safeguard such digital assets with a corresponding asset measured at fair value for such obligation. With respect to the Trust's Ether credited to the Settlement Balance, the Prime Broker maintains an internal ledger that specifies the Ether credited to the Trust's Settlement Balance. The Prime Broker Agreement states that the Prime Broker treats such Ether as custodial assets held for the benefit of the Trust, and shall not be considered the property of the Prime Broker. Additionally, under the Prime Broker Agreement, the Prime Broker represents and warrants that it will not, directly or indirectly, sell, transfer, loan, rehypothecate or otherwise alienate the Trust's Ether credited to the Settlement Balance.

The Prime Broker Agreement also contains an agreement by the parties to treat the digital assets credited to the Trust's Vault Balance and Settlement Balance as "financial assets" under Article 8 of the New York Uniform Commercial Code ("Article 8") and to treat the Vault Balance and Settlement Balance as "securities accounts" with respect to which the Trust is the "entitlement holder" within the meaning of Article 8. The Custodial Entities' ultimate parent, Coinbase Global, Inc. ("Coinbase Global"), has stated in its most recent public securities filings that in light of the inclusion in its custody agreements of provisions relating to Article 8 it believes that a court would not treat custodied digital assets as part of its general estate, although due to the novelty of digital assets courts have not yet considered this type of treatment for custodied digital assets. See "Risk Factors—The Trust relies on third-party service providers to perform certain functions essential to the affairs of the Trust and the replacement of such service providers could pose a challenge to the safekeeping of the Trust's Ether and to the operations of the Trust."

Safekeeping of Ether

The Custodian will use commercially reasonable efforts to keep in safe custody on behalf of the Trust all Ether received by the Custodian. All Ether credited to the Vault Balance will (i) be held in the Vault Balance at all times, and the Vault Balance will be controlled by the Custodian; (ii) be labeled or otherwise appropriately identified as being held for the Trust; (iii) be held on a non-fungible basis; (iv) not be commingled with other digital assets held by the Custodian, whether held for the Custodian's own account or the account of other clients other than the Trust; and (v) not without the prior written consent of the Trust be deposited or held with any third-party depository, custodian, clearance system or wallet. Additionally, the Custodian will use commercially reasonable efforts to keep the private key or keys for the Vault Balance secure, and will not disclose such keys to the Trust, the Sponsor or to any other individual or entity except to the extent that any keys are disclosed consistent with a standard of commercially reasonable efforts and as part of a multiple signature solution that

would not result in the Trust or the Sponsor “storing, holding, or maintaining custody or control of” the Ether “on behalf of others” within the meaning of the New York BitLicense Rule (23 NYCRR Part 200) as in effect as of June 24, 2015 such that it would require the Trust or the Sponsor to become licensed under such law.

Ether credited to the Trust’s Settlement Balance may be held in omnibus wallets maintained by the Prime Broker and/or at Coinbase Connected Venues. While the Ether credited to the Trust’s Settlement Balance could be commingled with other assets, the Ether in the Trust’s Settlement Balance will represent entitlement to a pro-rata share of the Ether held in such omnibus wallets and/or at Coinbase Connected Venues. In all circumstances the Prime Broker will keep an internal ledger that specifies the assets credited to the Settlement Balance such that the Trust, its auditors and regulators can identify the Trust’s pro-rata share of the Ether held in omnibus wallets and/or at Coinbase Connected Venues. Neither the Trust nor the Sponsor have a contractual relationship with the Coinbase Connected Venues utilized by the Custodial Entities.

Insurance

Pursuant to the terms of the Prime Broker Agreement, the Custodian is required to maintain insurance in such types and amounts as are commercially reasonable for the custodial services it provides. The Custodian has advised the Sponsor that it has insurance coverage pursuant to policies held by Coinbase Global, which procures fidelity (or crime) insurance coverage at commercially reasonable amounts for the custodial services provided. This insurance coverage is limited to losses of the digital assets the Custodian custodies on behalf of its clients, including the Trust’s Ether, resulting from theft, including internal theft by employees of Coinbase and its subsidiaries and theft or fraud by a director of Coinbase if the director is acting in the capacity of an employee of Coinbase or its subsidiaries. Although the Prime Broker is not required to maintain insurance under the terms of the Prime Broker Agreement, the Custodial Entities have also advised the Sponsor that they maintain insurance coverage pursuant to such policies held by Coinbase Global.

Deposits, Withdrawals and Storage

The Custodian and the Prime Broker provide for: (i) holding of the Trust’s Ether in the Vault Balance and the Settlement Balance; (ii) transfer of the Trust’s Ether between the relevant Vault Balance and the Settlement Balance; (iii) the deposit of Ether from a public blockchain address into the respective account or accounts in which the Vault Balance or the Settlement Balance are maintained; and (iv) the withdrawal of Ether from the Vault Balance to a public blockchain address the Trust controls (each such transaction is a “Custody Transaction”) (collectively, the “Custodial and Prime Broker Services”).

The Custodian reserves the right to refuse to process or to cancel any pending Custody Transaction as required by law or in response to a subpoena, court order, or other binding government order or to enforce transaction, threshold, and condition limits, in each case as communicated to the Trust as soon as reasonably practicable where the Custodian is permitted to do so, or if the Custodian reasonably believes that the Custody Transaction may violate or facilitate the violation of an applicable law, regulation or applicable rule of a governmental authority or self-regulatory organization. The Custodial Entities may suspend, restrict or terminate the Trust’s and the Sponsor’s access to the Custodial and Prime Broker Services, and/or suspend, restrict or close the Accounts if the Trust or Sponsor has taken certain actions, including any prohibited use or prohibited business as set forth in the Prime Broker Agreement or if either or both of the Custodial Entities are required to do so by a subpoena, court order, or other binding government order.

From the time the Custodian has verified the authorization of a complete set of instructions to withdraw Ether from the Vault Balance, the Custodian will have a limited amount of time to process and complete such withdrawal. The Custodian will ensure that initiated deposits are processed in a timely manner but the Custodian makes no representations or warranties regarding the amount of time needed to complete processing which is dependent upon many factors outside of the Custodian’s control. Transactions relating to Ether held in the Settlement Balance occur on the Ethereum Blockchain.

The Custodial Entities make no other representations or warranties with respect to the availability and/or accessibility of Ether or the availability and/or accessibility of the Vault Balance, the Settlement Balance or the Custodial and Prime Broker Services.

Security of the Accounts

The Custodial Entities securely store all digital asset private keys held by the Custodian on secure servers or offline, in cold storage. Under the Prime Broker Agreement, the Custodian must use commercially reasonable efforts to keep the private key or keys to the Vault Balance secure, and may not disclose such private keys to the Sponsor, Trust or any other individual or entity.

The Custodial Entities have implemented and will maintain reasonable information security programs that include policies and procedures that are reasonably designed to safeguard the Custodial Entities' electronic systems and the Trust's and the Sponsor's confidential information from, among other things, unauthorized access or misuse. In the event of a Data Security Event (as defined in the Prime Broker Agreement), the Custodial Entities will promptly (subject to any legal or regulatory requirements) notify the Trust and the Sponsor.

Record Keeping; Inspection and Auditing

The Custodian will keep timely and accurate records as to the deposit, disbursement, investment and reinvestment of the Ether in the Vault Balance, and such records must be retained by the Custodian for no less than seven years. The Prime Broker Agreement also provides that each Custodial Entity will permit, to the extent it may legally do so, the Trust's third-party representatives, upon thirty days' notice, to inspect, take extracts from and audit the records that it maintains, take such steps as necessary to verify that satisfactory internal control systems and procedures are in place, as the Trust may reasonably request. The Prime Broker is obligated to notify the Trust of any audit report prepared by its internal or independent auditors if such report reveals any material deficiencies or makes any material objections.

The Trust and the Sponsor obtain and perform a comprehensive review of the Services Organization Controls ("SOC") 1 report and SOC 2 each year. For additional information, see "—Description of Trust Documents—Description of the Prime Broker Agreement." In addition to the review of SOC 1 and SOC 2 reports, the Trust, the Sponsor and/or their respective auditors may inspect or audit the Custodian's records in a variety of manners if considered necessary. Such processes may include validating the existing balances as reflected on the Custodian's user interface to nodes of the underlying blockchain and confirming that such digital assets are associated with its public keys to validate the existence and exclusive ownership of the digital assets. To validate software functionality of the private keys, the Trust may transfer a portion of its digital assets from one public key to another public key of the Trust.

The Trust, the Sponsor and their independent auditors may evaluate the Custodian's protection of private keys and other customer information, including review of supporting documentation related to the processes surrounding key lifecycle management, the key generation process (hardware, software, and algorithms associated with generation) the infrastructure used to generate and store private keys, how private keys are stored (for example, cold wallets), the segregation of duties in the authorization of digital asset transactions, and the number of users required to process a transaction and the monitoring of addresses for any unauthorized activity. For additional information, see "—Custody of the Trust's Ether."

Once each calendar year, the Trust and the Sponsor will be entitled to request that the Custodial Entities provide a copy of the Services Organization Controls ("SOC") 1 report and SOC 2 report once per calendar year. Such reports are required to be dated within one year prior to such request. The Custodial Entities reserve the right to combine the SOC 1 and SOC 2 reports into a comprehensive report. In the event that the Custodial Entities do not deliver a SOC 1 Report or SOC 2 Report, as applicable, the Sponsor and the Trust will be entitled

to terminate the Prime Broker Agreement. In addition to the review of SOC 1 and SOC 2 reports, the Trust may also request letters of representation on a quarterly basis between SOC reports regarding any known changes or conclusions to the SOC 1 and SOC 2 report.

Standard of Care; Limitations of Liability

The Custodian will use commercially reasonable efforts to keep in safe custody on behalf of the Trust all Ether received by the Custodian. The Custodial Entities are liable to the Sponsor and the Trust for the loss of any Ether to the extent such loss resulted from the negligence, fraud or willful misconduct of the Custodial Entities. To the extent any loss is caused by a Custodial Entity's negligence, fraud or willful misconduct, the Custodial Entities are required to return to the Trust a quantity of Ether equal to the quantity of any such lost Ether.

The Custodial Entities' or Trust's total liability under the Prime Broker Agreement will not exceed the greater of: (i) the value of the Ether or cash involved in the event, including but not limited to transaction(s) or deliveries(s), giving rise to such liability at the time of the event giving rise to such liability; (ii) the aggregate amount of fees paid by the Trust to the Custodial Entities in respect of the Custodial and Prime Broker Services in the 12-month period prior to the event giving rise to such liability; or (iii) five million U.S. dollars. The Custodian's total liability under the Prime Broker Agreement will not exceed the greater of: (i) the aggregate amount of fees paid by the Trust to the Custodian in respect of the custodial services in the 12-month period prior to the event giving rise to such liability; or (ii) the value of the Ether on deposit in the Vault Balance at the time of the events giving rise to the liability occurred, the value of which will be determined in accordance with the Prime Broker Agreement. In addition, the Custodian's maximum liability in respect of each cold storage address that holds Ether shall be limited to \$100 million (the "Cold Storage Threshold"). The Sponsor monitors the value of Ether deposited in cold storage addresses for whether the Cold Storage Threshold has been met by determining the U.S. dollar value of Ether deposited in each cold storage address on business days. Although the Cold Storage Threshold has to date not been met for a given cold storage address, to the extent it is met the Trust would not have a claim against the Custodian with respect to the digital assets held in such address to the extent the value exceeds the Cold Storage Threshold.

The Custodial Entities and the Trust are not liable to each other for any special, incidental, indirect, punitive, or consequential damages, whether or not the other party had been advised of such losses or knew or should have known of the possibility of such damages. In addition, the Custodial Entities are not liable to the Trust for circumstances resulting from certain force majeure events.

Indemnity

The Trust and the Custodial Entities have agreed to indemnify one another from and against certain claims or losses, subject to customary exceptions and limitations.

Fees and Expenses

The Sponsor will pay an annualized fee to the Coinbase Entities, covering the Trust's use of the Custodial and Prime Broker Services, that is accrued on a monthly basis as a percentage of the Trust's monthly assets under custody. The Sponsor will also pay a monthly fee to the Prime Broker, covering withdrawals and deposits to or from the Settlement Balance in connection with the creation and redemption of Shares.

Term; Termination and Suspension

The Prime Broker Agreement will remain in effect until either party terminates the Prime Broker Agreement; provided, however, that the Coinbase Entities shall not restrict, suspend, or modify any Prime Broker Services following termination of the Prime Broker Agreement by a Custodial Entity without Cause (as defined in the Prime Broker Agreement) or by the Trust until the end of the applicable notice period and neither party's termination of the Prime Broker Agreement will be effective until the Trust and/or the Custodial Entities, as the case may be, have fully satisfied their obligations thereunder.

The Trust may terminate the Prime Broker Agreement in whole or in part upon thirty days' prior written notice to the applicable Custodial Entity; and (ii) for Custodian Cause (as defined in the Prime Broker Agreement) at any time by written notice to the Prime Broker, effective immediately, or on such later date as may be specified in such notice. The Trust will also be entitled to terminate the Prime Broker Agreement in the event that the Custodial Entities do not deliver a SOC 1 Report or SOC 2 Report, as applicable. See “—Record Keeping; Inspection and Auditing.”

The Custodial Entities may terminate the Prime Broker Agreement (i) upon one hundred eighty days' prior written notice to the Trust; and (ii) for Cause at any time by written notice to the Trust, effective immediately, or on such later date as may be specified in the notice.

In the event that either the Trust or the Custodial Entities terminate the Prime Broker Agreement without Cause, the Custodial Entities shall use reasonable efforts to assist the Trust with transferring any digital assets, fiat currency or funds associated with the Trust's Accounts to another custodial services provider within ninety days of receipt of the applicable termination notice.

Governing Law

The Prime Broker Agreement is governed by New York law.

Legal Proceedings

The Sponsor and certain of its affiliates are currently parties to certain legal proceedings described below. Although the Trust is not a party to these proceedings, the Trust may in the future be subject to legal proceedings or disputes.

On January 30, 2023, Osprey Funds, LLC (“Osprey”) filed a suit in Connecticut Superior Court against the Sponsor alleging that statements the Sponsor made in its advertising and promotion of Grayscale Bitcoin Trust (BTC) violated the Connecticut Unfair Trade Practices Act, and seeking statutory damages and injunctive relief. On April 17, 2023, the Sponsor filed a motion to dismiss the complaint and, following briefing, a hearing on the motion to dismiss was held on June 26, 2023. On October 23, 2023, the Court denied the Sponsor's motion to dismiss. On November 6, 2023, the Sponsor filed a motion for reargument of the Court's order denying the Sponsor's motion to dismiss. On November 16, 2023, Osprey filed an opposition to the Sponsor's motion for reargument, and on November 30, 2023, the Sponsor filed a reply in further support of its motion for reargument. On March 11, 2024, the Court denied the Sponsor's motion for reargument. On March 25, 2024, the Sponsor filed an application for interlocutory appeal. On March 28, 2024, Osprey filed an opposition to the Sponsor's application for interlocutory appeal. On April 1, 2024, the Court denied the Sponsor's application for interlocutory appeal. On April 10, 2024, Osprey filed a motion to amend the complaint. The Sponsor believes this lawsuit is without merit and intends to vigorously defend against it.

As of the date of this prospectus, the Sponsor does not expect the foregoing proceedings, either individually or in the aggregate, to have a material adverse effect on the Trust's business, financial condition or results of operations.

KEY PERSONNEL OF THE SPONSOR

The Trust does not have any directors, officers or employees. Under the Trust Agreement, all management functions of the Trust have been delegated to and are conducted by the Sponsor, its agents and its affiliates, including without limitation, the Custodian and its agents. As an officer of the Sponsor, Edward McGee, the principal executive officer and the principal financial officer of the Sponsor, may take certain actions and execute certain agreements and certifications for the Trust, in his capacity as the principal officer of the Sponsor.

The Sponsor has a board of directors (the “Board”) that is responsible for managing and directing the affairs of the Sponsor. The Board consists of Mark Shifke, Matthew Kummell and Mr. McGee, who also retain the authority granted to them as officers under the limited liability company agreement of the Sponsor.

The Sponsor has an Audit Committee. The Audit Committee has the responsibility for overseeing the financial reporting process of the Trust, including the risks and controls of that process and such other oversight functions as are typically performed by an audit committee of a public company. The Audit Committee consists of Mr. McGee and Hugh Ross, Chief Operating Officer of the Sponsor.

The Sponsor has a code of ethics (the “Code of Ethics”) that applies to its executive officers and agents. The Code of Ethics is available by writing the Sponsor at 290 Harbor Drive, 4th Floor, Stamford, Connecticut 06902 or calling the Sponsor at (212) 668-1427. The Sponsor’s Code of Ethics is intended to be a codification of the business and ethical principles that guide the Sponsor, and to deter wrongdoing, to promote honest and ethical conduct, to avoid conflicts of interest, and to foster compliance with applicable governmental laws, rules and regulations, the prompt internal reporting of violations and accountability for adherence to this code.

Mark Shifke, 64, is the Chief Financial Officer of DCG and has served as chairman of the Board since January 2024. Since March 2021, Mr. Shifke has served on the board of directors of Dock Ltd., a full-stack payments and digital banking platform. Since September 2023, Mr. Shifke has served on the board of directors of Luno, a cryptocurrency platform. Mr. Shifke has nearly four decades of financial and fintech experience, and more than eight years of CFO experience leading two publicly-traded companies. Prior to joining DCG, Mr. Shifke served as CFO of Billtrust, a company focused on providing AR and cloud-based solutions around payments, and as CFO of Green Dot (NYSE: GDOT), a mobile banking company and payments platform. Previously, Mr. Shifke led teams at JPMorgan Chase and Goldman Sachs, specializing in M&A Structuring and Advisory, as well as Tax Asset Investments. Mr. Shifke also served as the Head of International Structured Finance Group at KPMG. Mr. Shifke began his career at Davis Polk, where he was a partner. He is a graduate of Tulane University (B.A./J.D.) and the New York University School of Law (LL.M. in Taxation).

Matthew Kummell, 48, is Senior Vice President of Operations at DCG and has served as a director of the Sponsor since January 2024. In his role at DCG, Mr. Kummell leads the business’s post-investment efforts, including investment operations and value creation with regard to DCG’s portfolio companies. Since December 2023, Mr. Kummell has served as a member of the board of directors of Foundry, a digital asset mining and staking company. Until November 2023, Mr. Kummell served on the board of directors of CoinDesk, Inc., a digital media, events and information services company for the crypto asset and blockchain technology community. Until January 2012, Mr. Kummell served on the board of directors of Derivix Corporation, a financial services software company. Prior to joining DCG, Mr. Kummell was the Head of North America for Citi’s Business Advisory Services team, a strategic consulting practice focused on institutional investor clients in Citi’s Markets division. Mr. Kummell has also held strategic and front-office leadership roles at Citadel, Balyasny Asset Management, and S.A.C. Capital Advisors, the predecessor to Point 72 Asset Management. Previously, Mr. Kummell served as a case team leader at Bain & Company in its Boston headquarters. Mr. Kummell is an Adjunct Professor at the Tuck School of Business at Dartmouth College. He is a graduate of the University of California, Los Angeles (B.A.) and the Tuck School of Business at Dartmouth College (MBA).

Edward McGee, 40, has been the Chief Financial Officer of the Sponsor since January 2022 and has served as a director of the Sponsor since January 2024. Effective May 20, 2024 Mr. McGee assumed the role of principal executive officer, in addition to his existing roles as principal financial officer and principal accounting officer, of the Sponsor. Before serving as CFO, Mr. McGee was Vice President, Finance and Controller of the Sponsor since June 2019. Prior to taking on his role at the Sponsor, Mr. McGee served as a Vice President, Accounting Policy at Goldman, Sachs & Co. providing coverage to their SEC Financial Reporting team facilitating the preparation and review of their financial statements and provided U.S. GAAP interpretation, application and policy development while servicing their Special Situations Group, Merchant Banking Division and Urban Investments Group from 2014 to 2019. From 2011 to 2014, Mr. McGee was an auditor at Ernst & Young providing assurance services to publicly listed companies. Mr. McGee earned his Bachelor of Science degree in accounting from the John H. Sykes College of Business at the University of Tampa and graduated with honors while earning his Master of Accountancy in Financial Accounting from the Rutgers Business School at the State University of New Jersey. Mr. McGee is a Certified Public Accountant licensed in the state of New York.

Hugh Ross, 56, has been the Chief Operating Officer of the Sponsor since February 2021. Prior to joining the Sponsor, Mr. Ross served twelve years as Chief Operating Officer of Horizon Kinetics LLC, a New York-based investment manager where he was responsible for the operating infrastructure and various digital asset initiatives. During the ten years immediately preceding his tenure at Horizon Kinetics, Mr. Ross was a Vice President with Goldman Sachs & Co. where he served as Chief Operating Officer of the long-only investment manager research team then-known as Global Manager Strategies, within Goldman Sachs Asset Management (“GSAM”). Mr. Ross also served as a compliance officer for both GSAM and Goldman’s Private Wealth Management business. Prior to joining Goldman Sachs, Mr. Ross worked as an in-house counsel for a transfer agent and started his career as a securities industry attorney representing broker-dealers and investment advisers. Mr. Ross is a graduate of the Goizueta Business School at Emory University (B.B.A.) and New York Law School (J.D.).

CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

General

The Sponsor has not established formal procedures to resolve all potential conflicts of interest. Consequently, shareholders may be dependent on the good faith of the respective parties subject to such conflicts to resolve them equitably. Although the Sponsor attempts to monitor these conflicts, it is extremely difficult, if not impossible, for the Sponsor to ensure that these conflicts do not, in fact, result in adverse consequences to the Trust.

The Sponsor presently intends to assert that shareholders have, by subscribing for Shares of the Trust, consented to the following conflicts of interest in the event of any proceeding alleging that such conflicts violated any duty owed by the Sponsor to investors.

Digital Currency Group, Inc.

Digital Currency Group, Inc. is (i) a minority interest holder in Coinbase, Inc., which operates Coinbase, one of the Digital Asset Trading Platforms expected to be included in the Index, and which is also the parent company of the Custodian, representing less than 1.0% of its equity and (ii) a minority interest holder in Kraken, one of the Digital Asset Trading Platforms expected to be included in the Index, representing less than 1.0% of its equity.

Digital Currency Group, Inc. has investments in a large number of digital assets and companies involved in the digital asset ecosystem, including trading platforms and custodians. Digital Currency Group, Inc.'s positions on changes that should be adopted in the Ethereum Network could be adverse to positions that would benefit the Trust or its shareholders. Additionally, before or after a hard fork, Digital Currency Group, Inc.'s position regarding which fork among a group of incompatible forks of the Ethereum Network should be considered the "true" Ethereum, could be adverse to positions that would most benefit the Trust.

The Sponsor

The Sponsor has a conflict of interest in allocating its own limited resources among, when applicable, different clients and potential future business ventures, to each of which it owes fiduciary duties. Additionally, the professional staff of the Sponsor also services other affiliates of the Trust, including several other digital asset investment vehicles, and their respective clients. Although the Sponsor and its professional staff cannot and will not devote all of its or their respective time or resources to the management of the affairs of the Trust, the Sponsor intends to devote, and to cause its professional staff to devote, sufficient time and resources to manage properly the affairs of the Trust consistent with its or their respective fiduciary duties to the Trust and others.

The Sponsor and Grayscale Securities are affiliates of each other, and the Sponsor may engage other affiliated service providers in the future. Because of the Sponsor's affiliated status, it may be disincentivized from replacing affiliated service providers. In connection with this conflict of interest, shareholders should understand that affiliated service providers will receive fees for providing services to the Trust. Clients of the affiliated service providers may pay commissions at negotiated rates which are greater or less than the rate paid by the Trust.

The Sponsor and any affiliated service provider may, from time to time, have conflicting demands in respect of their obligations to the Trust and, in the future, to other clients. It is possible that future business ventures of the Sponsor and affiliated service providers may generate larger fees, resulting in increased payments to employees, and therefore, incentivizing the Sponsor and/or the affiliated service providers to allocate its/their limited resources accordingly to the potential detriment of the Trust.

There is an absence of arm's length negotiation with respect to some of the terms of the Trust, and, where applicable, there has been no independent due diligence conducted with respect to the Trust. The Sponsor will,

however, not retain any affiliated service providers for the Trust which the Sponsor has reason to believe would knowingly or deliberately favor any other client over the Trust.

Proprietary Trading/Other Clients

Because the officers of the Sponsor may trade Ether for their own personal trading accounts (subject to certain internal trading policies and procedures) at the same time as they are managing the account of the Trust, the activities of the officers of the Sponsor, subject to their fiduciary duties, may, from time-to-time, result in their taking positions in their personal trading accounts which are opposite of the positions taken for the Trust. Records of the Sponsor's officers' personal trading accounts will not be available for inspection by shareholders.

DESCRIPTION OF THE SHARES

The Trust is authorized under the Trust Agreement to create and issue an unlimited number of Shares. Shares will be issued only in Baskets (a Basket equals a block of 10,000 Shares) in connection with creations. The Shares represent units of fractional undivided beneficial interest in and ownership of the Trust and have no par value. The Shares are expected to be listed on NYSE Arca under the ticker symbol “ETH”.

Description of Limited Rights

The Shares do not represent a traditional investment and should not be viewed as similar to “shares” of a corporation operating a business enterprise with management and a board of directors. A shareholder will not have the statutory rights normally associated with the ownership of shares of a corporation. Each Share is transferable, is fully paid and non-assessable and entitles the holder to vote on the limited matters upon which shareholders may vote under the Trust Agreement. For example, shareholders do not have the right to elect or remove directors and will not receive dividends. The Shares do not entitle their holders to any conversion or pre-emptive rights or, except as discussed below, any redemption rights or rights to distributions.

Voting and Approvals

The shareholders take no part in the management or control of the Trust. Under the Trust Agreement, shareholders have limited voting rights. For example, in the event that the Sponsor withdraws, a majority of the shareholders may elect and appoint a successor sponsor to carry out the affairs of the Trust. In addition, no amendments to the Trust Agreement that materially adversely affect the interests of shareholders may be made without the vote of at least a majority (over 50%) of the Shares (not including any Shares held by the Sponsor or its affiliates). However, the Sponsor may make any other amendments to the Trust Agreement in its sole discretion without shareholder consent provided that the Sponsor provides 20 days’ notice of any such amendment.

Distributions

Pursuant to the terms of the Trust Agreement, the Trust may make distributions on the Shares in-cash or in-kind. In addition, if the Trust is terminated and liquidated, the Sponsor will distribute to the shareholders any amounts of the cash proceeds of the liquidation remaining after the satisfaction of all outstanding liabilities of the Trust and the establishment of reserves for applicable taxes, other governmental charges and contingent or future liabilities as the Sponsor will determine. See “—Description of the Trust Agreement—Termination of the Trust.” Shareholders of record on the record date fixed by the Transfer Agent for a distribution will be entitled to receive their *pro rata* portions of any distribution.

Creation of Shares

The Trust creates Shares at such times and for such periods as determined by the Sponsor, but only in one or more whole Baskets. A Basket equals 10,000 Shares. See “Description of Creation and Redemption of Shares.” The creation of a Basket requires the delivery to the Trust of the number of Ether represented by one Share immediately prior to such creation multiplied by 10,000. The Trust may from time to time halt creations, including for extended periods of time, for a variety of reasons, including in connection with forks, airdrops and other similar occurrences.

Redemption of Shares

Shares are redeemable only in accordance with the provisions of the Trust Agreement and the relevant Participant Agreement. Through its redemption program, the Trust redeems Shares from Authorized Participants

on an ongoing basis. Although the Trust redeems Baskets by distributing Ether or proceeds from the disposition of Ether, at this time an Authorized Participant can only submit Cash Orders, pursuant to which the Authorized Participant will accept cash from the Cash Account in connection with the redemption of Baskets. Cash Orders will be facilitated by the Transfer Agent and Grayscale Investments, LLC, which will engage one or more Liquidity Providers that is not an agent of, or otherwise acting on behalf of, any Authorized Participant receiving Ether in connection with such orders. Subject to In-Kind Regulatory Approval, in the future the Trust may also redeem Baskets via In-Kind Orders, pursuant to which an Authorized Participant or its AP Designee would receive Ether directly from the Trust. However, because In-Kind Regulatory Approval has not been obtained, at this time Baskets will not be redeemed through In-Kind Orders and will only be redeemed through Cash Orders. See “Description of Creation and Redemption of Shares.”

Book-Entry Form

Shares are held primarily in book-entry form by the Transfer Agent. The Sponsor or its delegate will direct the Transfer Agent to credit or debit, as applicable, the number of Baskets to the applicable Authorized Participant. The Transfer Agent will issue or cancel Baskets, as applicable. Transfers will be made in accordance with standard securities industry practice. The Sponsor may cause the Trust to issue Shares in certificated form in limited circumstances in its sole discretion.

Share Splits

In its discretion, the Sponsor may direct the Transfer Agent to declare a split or reverse split in the number of Shares outstanding and to make a corresponding change in the number of Shares constituting a Basket. For example, if the Sponsor believes that the per Share price in the secondary market for Shares has risen or fallen outside a desirable trading price range, it may declare such a split or reverse split.

DESCRIPTION OF CREATION AND REDEMPTION OF SHARES

The following is a description of the material terms of the Trust Documents as they relate to the creation and redemption of the Trust's Shares on an ongoing basis.

General

The Trust issues Shares to and redeems Shares from Authorized Participants on an ongoing basis, but only in one or more Baskets (with a Basket being a block of 10,000 Shares). The Trust will not issue fractions of a Basket. The Sponsor believes that the creation and redemption order size of 10,000 Shares will enable Authorized Participants to manage inventory and facilitate an effective arbitrage mechanism for the Trust. However, the Sponsor may in the future adjust the creation and redemption order size in order to improve the effectiveness of the activities of Authorized Participants in the secondary market for the Shares if the Sponsor determines it to be necessary or advisable. The Sponsor does not expect that the size of the Baskets will have an impact on the arbitrage mechanism.

The creation and redemption of Baskets will be made only upon the delivery to the Trust, or the distribution or other disposition by the Trust, of the number of whole and fractional Ether represented by each Basket being created or redeemed, which is determined by dividing (x) the number of Ether owned by the Trust at 4:00 p.m., New York time, on the trade date of a creation or redemption order, after deducting the number of Ether representing the U.S. dollar value of accrued but unpaid fees and expenses of the Trust (converted using the Index Price at such time, and carried to the eighth decimal place), by (y) the number of Shares outstanding at such time (with the quotient so obtained calculated to one one-hundred-millionth of one Ether (i.e., carried to the eighth decimal place)), and multiplying such quotient by 10,000 (the "Basket Amount"). The U.S. dollar value of a Basket is calculated by multiplying the Basket Amount by the Index Price as of the trade date (the "Basket NAV"). The Basket NAV multiplied by the number of Baskets being created or redeemed is referred to as the "Total Basket NAV." All questions as to the calculation of the Basket Amount will be conclusively determined by the Sponsor and will be final and binding on all persons interested in the Trust. One or more major market data vendors may provide an intra-day indicative value ("IIV") per Share updated every 15 seconds, as calculated by NYSE Arca or a third-party financial data provider during NYSE Arca's Core Trading Session (9:30 a.m. to 4:00 p.m., New York time). Such IIV will be calculated using the same methodology as the NAV per Share of the Trust, specifically by using the prior day's closing NAV per Share as a base and updating that value during the NYSE Arca Core Trading Session to reflect changes in the value of the Trust's NAV during the trading day. The IIV on a per Share basis disseminated during the Core Trading Session should not be viewed as a real-time update of the NAV, which is calculated once a day. The number of Ether represented by a Share will gradually decrease over time as the Trust's Ether are used to pay the Trust's expenses.

Authorized Participants are the only persons that may place orders to create and redeem Baskets. Each Authorized Participant must (i) be a registered broker-dealer and (ii) enter into a Participant Agreement with the Sponsor and the Transfer Agent. Subject to In-Kind Regulatory Approval, in the future any Authorized Participants creating and redeeming Shares through In-Kind Orders must also own an Ether wallet address that is known to the Custodian as belonging to the Authorized Participant and maintain an account with the Custodian (or if the Authorized Participant does not itself trade in Ether, a designee of such Authorized Participant (each, an "AP Designee") must own an Ether wallet address that is known to the Custodian as belonging to such AP Designee and maintain an account with the Custodian).

An Authorized Participant may act for its own account or as agent for broker-dealers, custodians and other securities market participants that wish to create or redeem Baskets. Shareholders who are not Authorized Participants will only be able to create or redeem their Shares through an Authorized Participant.

The creation of Baskets requires the delivery to the Trust of the Total Basket Amount (or cash to acquire the Total Basket Amount) and the redemption of Baskets requires the distribution or other disposition by the Trust of

the Total Basket Amount. Although the Trust creates Baskets only upon the receipt of Ether, and redeems Baskets only by distributing or otherwise disposing of Ether, at this time an Authorized Participant can only submit Cash Orders, pursuant to which the Authorized Participant will deposit cash into, or accept cash from, a segregated account maintained by the Transfer Agent in the name of the Trust for purposes of receiving and distributing cash in connection with the creation and redemption of Baskets (such account, the “Cash Account”).

Cash Orders will be facilitated by the Transfer Agent and Grayscale Investments, LLC. On an order-by-order basis, Grayscale Investments, LLC, acting in its capacity as Liquidity Engager, will engage one or more Liquidity Providers to obtain or receive Ether in exchange for cash in connection with such order, as described in more detail below. Each Liquidity Provider must enter into a Liquidity Provider Agreement with the Liquidity Engager and the Sponsor (on behalf of the Trust), which will obligate it to obtain or receive Ether in connection with creations and redemptions pursuant to Cash Orders.

Unless the Sponsor requires that a Cash Order be effected at actual execution prices (an “Actual Execution Cash Order”), each Authorized Participant that submits a Cash Order to create or redeem Baskets will pay a fee (the “Variable Fee”) based on the Total Basket NAV (a “Variable Fee Cash Order”), and any price differential between (x) the Total Basket NAV on the trade date and (y) the price realized in acquiring or disposing of the corresponding Total Basket Amount, as the case may be, will be borne solely by the Liquidity Provider until such Ether have been received or liquidated by the Trust. The Variable Fee is intended to cover all of a Liquidity Provider’s expenses in connection with the creation or redemption order, including any exchange fees that the Liquidity Provider incurs in connection with buying or selling Ether. The amount may be changed by the Sponsor in its sole discretion at any time, and Liquidity Providers will communicate to the Sponsor in advance the Variable Fee they would be willing to accept in connection with a Variable Fee Cash Order, based on market conditions and other factors existing at the time of such Variable Fee Cash Order. See “—Creation Procedures—Variable Fee Cash Orders” and “—Redemption Procedures—Variable Fee Cash Orders.”

Alternatively, the Sponsor may require that a Cash Order be effected as an Actual Execution Cash Order, in its sole discretion based on market conditions and other factors existing at the time of such Cash Order, and under such circumstances, any price differential between (x) the Total Basket NAV on the trade date and (y) the price realized in acquiring or disposing of the corresponding Total Basket Amount, as the case may be, will be borne solely by the Authorized Participant until such Ether have been received or liquidated by the Trust. See “—Creation Procedures—Actual Execution Cash Orders” and “—Redemption Procedures—Actual Execution Cash Orders.”

In the case of creations pursuant to Cash Orders, to transfer the Total Basket Amount to the Trust’s Vault Balance, the Liquidity Provider will transfer Ether to one of the public key addresses associated with the Vault Balance and as provided by the Sponsor. In the case of redemptions pursuant to Cash Orders, the same procedure is conducted, but in reverse, using the public key addresses associated with the wallet of the Liquidity Provider, and as provided by such party. All such transactions will be conducted on the Blockchain and parties acknowledge and agree that such transfers may be irreversible if done incorrectly. See “Risk Factors—Risk Factors Related to the Trust and the Shares—Ether transactions are irrevocable and stolen or incorrectly transferred Ether may be irretrievable. As a result, any incorrectly executed Ether transactions could adversely affect the value of the Shares.”

In common with other spot digital asset exchange-traded products, the Trust is not at this time able to create and redeem shares via in-kind transactions with Authorized Participants, and there has yet to be definitive regulatory guidance on whether and how registered broker-dealers can hold and deal in Ether in compliance with the federal securities laws. Subject to In-Kind Regulatory Approval, in the future the Trust may also create and redeem Baskets via In-Kind Orders, pursuant to which an Authorized Participant or its AP Designee would deposit Ether directly with the Trust or receive Ether directly from the Trust. However, because In-Kind Regulatory Approval has not been obtained, at this time Baskets will not be created or redeemed through In-Kind Orders and will only be created or redeemed through Cash Orders. There can be no assurance as to when such

regulatory clarity will emerge, or when NYSE Arca will seek or obtain such regulatory approval, if at all. See “Risk Factors—Risk Factors Related to the Trust and the Shares—The lack of ability to facilitate in-kind creations and redemptions of Shares could have adverse consequences for the Trust.”

Authorized Participants do not pay a transaction fee to the Trust in connection with the creation or redemption of Baskets, but there may be transaction fees associated with the validation of the transfer of Ether by the Ethereum Network, which will be paid by the Custodian in the case of redemptions and the Authorized Participant, its AP Designee or the Liquidity Provider in the case of creations. Service providers may charge Authorized Participants or AP Designees administrative fees for order placement and other services related to the creation of Baskets. As discussed above, Authorized Participants will also pay the Variable Fee in connection with Variable Fee Cash Orders. As discussed in further detail below under “—Creation Procedures—Actual Execution Cash Orders” and “—Redemption Procedures—Actual Execution Cash Orders”, under certain circumstances Authorized Participants may also be required to deposit additional cash in the Cash Account, or be entitled to receive excess cash from the Cash Account, in connection with creations and redemptions pursuant to Actual Execution Cash Orders. Authorized Participants will receive no fees, commissions or other form of compensation or inducement of any kind from either the Sponsor or the Trust and no such person has any obligation or responsibility to the Sponsor or the Trust to effect any sale or resale of Shares.

The Participant Agreements and the related procedures attached thereto may be amended by the Sponsor and the relevant Authorized Participant. Under the Participant Agreements, the Sponsor has agreed to indemnify each Authorized Participant against certain liabilities, including liabilities under the Securities Act.

The following description of the procedures for the creation and redemption of Baskets is only a summary and shareholders should refer to the relevant provisions of the Trust Agreement and the form of Participant Agreement for more detail.

Creation Procedures

On any business day, an Authorized Participant may place an order with the Transfer Agent to create one or more Baskets. Cash Orders for creation must be placed with the Transfer Agent no later than 1:59:59 p.m., New York time (the “Order Cutoff Time”).

The Sponsor may in its sole discretion limit the number of Shares created pursuant to Cash Orders on any specified day without notice to the Authorized Participants and may direct the Marketing Agent to reject any Cash Orders in excess of such capped amount. In exercising its discretion to limit the number of Shares created pursuant to Cash Orders, the Sponsor expects to take into consideration a number of factors, including (i) the availability of Liquidity Providers to facilitate Cash Orders and (ii) to the extent In-Kind Regulatory Approval has been obtained, the cost of processing Cash Orders relative to the cost of processing In-Kind Orders. If the Sponsor decides to limit Cash Orders and the Trust is otherwise unable to satisfy creation orders made in cash, the Trust’s ability to create new Shares could be negatively impacted or, if In-Kind Regulatory Approval has not been obtained as of such time, would be unavailable, which could impact the Shares’ liquidity and/or cause the Shares to trade at premiums to the NAV per Share, and otherwise have a negative impact on the value of the Shares. In addition, if the Sponsor decides to limit Cash Orders at a time when the Shares are trading at a premium to the NAV per Share, and In-Kind Regulatory Approval has not been obtained as of such time or the in-kind creation is otherwise unavailable for any reason, the arbitrage mechanism may fail to effectively function, which could impact the Shares’ liquidity and/or cause the Shares to trade at premiums to the NAV per Share, and otherwise have a negative impact on the value of the Shares. See “Risk Factors—Risk Factors Related to the Trust and the Shares—The lack of ability to facilitate in-kind creations and redemptions of Shares could have adverse consequences for the Trust.”

Creations pursuant to Cash Orders will take place as follows, where “T” is the trade date and each day in the sequence must be a business day. Before a creation order is placed, the Sponsor determines if such creation order

will be a Variable Fee Cash Order or an Actual Execution Cash Order, which determination is communicated to the Authorized Participant.

Trade Date (T)	Settlement Date (T+1, or T+2, as established at the time of order placement)
<ul style="list-style-type: none"> • The Authorized Participant places a creation order with the Transfer Agent. • The Marketing Agent accepts (or rejects) the creation order, which is communicated to the Authorized Participant by the Transfer Agent. • The Sponsor notifies the Liquidity Provider of the creation order. • The Sponsor determines the Total Basket NAV and any Variable Fee and Additional Creation Cash as soon as practicable after 4:00 p.m., New York time. 	<ul style="list-style-type: none"> • The Authorized Participant delivers to the Cash Account: <ul style="list-style-type: none"> (x) in the case of a Variable Fee Cash Order, the Total Basket NAV, plus any Variable Fee; or (y) in the case of an Actual Execution Cash Order, the Total Basket NAV, plus any Additional Creation Cash, less any Excess Creation Cash, if applicable (such amount, as applicable, the “Required Creation Cash”). • The Liquidity Provider transfers the Total Basket Amount to the Trust’s Vault Balance. • Once the Trust is in simultaneous possession of (x) the Total Basket Amount and (y) the Required Creation Cash, the Trust issues the aggregate number of Shares corresponding to the Baskets ordered by the Authorized Participant, which the Transfer Agent holds for the benefit of the Authorized Participant. • Cash equal to the Required Creation Cash is delivered to the Liquidity Provider from the Cash Account. • The Transfer Agent delivers Shares to the Authorized Participant by crediting the number of Baskets created to the Authorized Participant’s DTC account.

Variable Fee Cash Orders

Unless the Sponsor determines otherwise in its sole discretion based on market conditions and other factors existing at the time of such Cash Order, all creations pursuant to Cash Orders are expected to be executed as Variable Fee Cash Orders, and any price differential between (x) the Total Basket NAV on the trade date and (y) the price realized in acquiring the corresponding Total Basket Amount will be borne solely by the Liquidity Provider until such Ether have been received by the Trust.

The Sponsor anticipates that the Trust’s cost to acquire the Total Basket Amount in connection with a Variable Fee Cash Order will equal the sum of the corresponding Total Basket NAV and Variable Fee to be delivered by the Authorized Participant to the Trust. In the event that, by 12:00 p.m., New York time on the settlement date of a creation pursuant to a Variable Fee Cash Order, either (x) the Trust’s Vault Balance has not been credited with Ether in an amount equal to the Total Basket Amount or (y) the Cash Account has not been credited with the Total Basket NAV, plus any Variable Fee, such Cash Order will be deemed a failed trade, with

any consideration that has been delivered by the Authorized Participant or the Liquidity Provider in respect of such Cash Order being returned by the Trust.

The Transfer Agent shall under no circumstances cause the Trust to issue Shares in respect of a Variable Fee Cash Order until such time as each of (x) the Total Basket Amount and (y) the Total Basket NAV, plus any Variable Fee, has been delivered to the Trust, and the Trust is in simultaneous possession of both.

Actual Execution Cash Orders

With respect to a creation pursuant to an Actual Execution Cash Order, as between the Trust and an Authorized Participant, the Authorized Participant is responsible for the dollar cost of the difference between the Ether price utilized in calculating Total Basket NAV on the trade date and the price at which the Trust acquires the Ether on the settlement date. If the price realized in acquiring the corresponding Total Basket Amount is higher than the Total Basket NAV, the Authorized Participant will bear the dollar cost of such difference by delivering cash in the amount of such difference (the “Additional Creation Cash”) to the Cash Account. If the price realized in acquiring the corresponding Total Basket Amount is lower than the Total Basket NAV, the Authorized Participant will benefit from such difference, with the Trust promptly returning cash in the amount of such excess (the “Excess Creation Cash”) to the Authorized Participant.

In the event that, by 12:00 p.m., New York time on the settlement date of a creation pursuant to an Actual Execution Cash Order, either (x) the Trust’s Vault Balance has not been credited with Ether in an amount equal to the Total Basket Amount or (y) the Cash Account has not been credited with the Total Basket NAV (net of any Additional Creation Cash or Excess Creation Cash, if applicable), such Cash Order will be deemed a failed trade, with any consideration that has been delivered by the Authorized Participant or the Liquidity Provider in respect of such Cash Order being returned by the Trust.

The Transfer Agent shall under no circumstances cause the Trust to issue Shares in respect of a Cash Order until such time as each of (x) the Total Basket Amount and (y) the Total Basket NAV (net of any Additional Creation Cash or Excess Creation Cash, if applicable) has been delivered to the Trust, and the Trust is in simultaneous possession of both.

Redemption Procedures

The procedures by which an Authorized Participant can redeem one or more Baskets mirror the procedures for the creation of Baskets. On any business day, an Authorized Participant may place a redemption order specifying the number of Baskets to be redeemed.

The redemption of Shares pursuant to Cash Orders will only take place if approved by the Sponsor in writing, in its sole discretion and on a case-by-case basis. In exercising its discretion to approve the redemption of Shares pursuant to Cash Orders, the Sponsor expects to take into consideration a number of factors, including (i) the availability of Liquidity Providers to facilitate Cash Orders and (ii) to the extent In-Kind Regulatory Approval has been obtained, the cost of processing Cash Orders relative to the cost of processing In-Kind Orders. If the Sponsor decides to limit Cash Orders and the Trust is unable to satisfy redemption orders made in cash, the Trust’s ability to redeem new Shares could be negatively impacted or, if In-Kind Regulatory Approval has not been obtained as of such time, would be unavailable, which could impact the Shares’ liquidity and/or cause the Shares to trade at discounts, and could have a negative impact on the value of the Shares. In addition, if the Sponsor decides to limit Cash Orders at a time when the Shares are trading at a discount to the NAV per Share, and In-Kind Regulatory Approval has not been obtained as of such time or the in-kind redemption of Shares is otherwise unavailable, the arbitrage mechanism may fail to effectively function, which could impact the Shares’ liquidity and/or cause the Shares to trade at discounts to the NAV per Share, and otherwise have a negative impact on the value of the Shares. See “Risk Factors—Risk Factors Related to the Trust and the Shares—The lack of ability to facilitate in-kind creations and redemptions of Shares could have adverse consequences for the Trust.”

Cash Orders for redemption must be placed no later than 1:59:59 p.m., New York time on each business day. The Authorized Participants may only redeem Baskets and cannot redeem any Shares in an amount less than a Basket.

Redemptions pursuant to Cash Orders will take place as follows, where “T” is the trade date and each day in the sequence must be a business day. Before a redemption order is placed, the Sponsor determines if such redemption order will be a Variable Fee Cash Order or an Actual Execution Cash Order, which determination is communicated to the Authorized Participant.

Trade Date (T)	Settlement Date (T+1 (or T+2 on case-by-case basis, as approved by Sponsor))
<ul style="list-style-type: none"> • The Authorized Participant places a redemption order with the Transfer Agent. • The Marketing Agent accepts (or rejects) the redemption order, which is communicated to the Authorized Participant by the Transfer Agent. • The Sponsor notifies the Liquidity Provider of the redemption order. • The Sponsor determines the Total Basket NAV and, in the case of a Variable Fee Cash Order, any Variable Fee, as soon as practicable after 4:00 p.m., New York time. 	<ul style="list-style-type: none"> • The Authorized Participant delivers Baskets to be redeemed from its DTC account to the Transfer Agent. • The Liquidity Provider delivers to the Cash Account: <ul style="list-style-type: none"> (x) in the case of a Variable Fee Cash Order, the Total Basket NAV less any Variable Fee; or (y) in the case of an Actual Execution Cash Order, the actual proceeds to the Trust from the liquidation of the Total Basket Amount (such amount, as applicable, the “Required Redemption Cash”). • Once the Trust is in simultaneous possession of (x) the Total Basket Amount and (y) the Required Redemption Cash, the Transfer Agent cancels the Shares comprising the number of Baskets redeemed by the Authorized Participant. • The Custodian sends the Liquidity Provider the Total Basket Amount, and cash equal to the Required Redemption Cash is delivered to the Authorized Participant from the Cash Account.

Variable Fee Cash Orders

Unless the Sponsor determines otherwise in its sole discretion based on market conditions and other factors existing at the time of such Cash Order, all redemptions pursuant to Cash Orders are expected to be executed as Variable Fee Cash Orders, and any price differential between (x) the Total Basket NAV on the trade date and (y) the price realized in disposing of the corresponding Total Basket Amount will be borne solely by the Liquidity Provider.

The Sponsor anticipates that the Trust’s proceeds from liquidating the Total Basket Amount in connection with a Variable Fee Cash Order will equal the corresponding Total Basket NAV less the Variable Fee to be delivered by the Liquidity Provider to the Trust. In the event that, by 12:00 p.m. (New York time) on the settlement date of a redemption pursuant to a Variable Fee Cash Order, either (x) the Transfer Agent’s account at DTC has not been credited with the total number of Shares corresponding to the total number of Baskets to be

redeemed or (y) the Cash Account has not been credited with the Total Basket NAV, less any Variable Fee, such Cash Order will be deemed a failed trade, with any consideration that has been delivered by the Authorized Participant or the Liquidity Provider in respect of such Cash Order being returned by the Trust.

The Transfer Agent shall under no circumstances deliver the Required Redemption Cash to the Authorized Participant in respect of a Variable Fee Cash Order until such time as (x) the Baskets to be redeemed have been delivered to the Transfer Agent and (y) the Total Basket NAV, less any Variable Fee, has been delivered to the Cash Account, and the Trust and/or the Transfer Agent is in simultaneous possession of both.

Actual Execution Cash Orders

With respect to a redemption pursuant to an Actual Execution Cash Order, as between the Trust and an Authorized Participant, the Authorized Participant is responsible for the dollar cost of the difference between the Ether price utilized in calculating Total Basket NAV on the trade date and the price at which the Trust disposes of the Ether on the settlement date. If the price realized in disposing the corresponding Total Basket Amount on the settlement date is lower than the Total Basket NAV on the trade date, the Authorized Participant will bear the dollar cost of such difference (the “Redemption Cash Shortfall”), with the amount of cash to be delivered to the Authorized Participant being reduced by the amount of such Redemption Cash Shortfall. If the price realized in disposing the corresponding Total Basket Amount on the settlement date is higher than the Total Basket NAV on the trade date, the Trust will deliver cash in the amount of such excess (the “Additional Redemption Cash”) to the Authorized Participant.

In the event that, by 12:00 p.m. (New York time) on the settlement date of a redemption pursuant to an Actual Execution Cash Order, either (x) the Transfer Agent’s account at DTC has not been credited with the total number of Shares corresponding to the total number of Baskets to be redeemed or (y) the Cash Account has not been credited with the Total Basket NAV (plus any Additional Redemption Cash or net of any Redemption Cash Shortfall), such Cash Order will be deemed a failed trade, with any consideration that has been delivered by the Authorized Participant or the Liquidity Provider in respect of such Cash Order being returned by the Trust.

The Transfer Agent shall under no circumstances deliver the Required Redemption Cash to the Authorized Participant in respect of a Cash Order until such time as (x) the Total Basket Amount has been delivered to the Transfer Agent and (y) the Total Basket NAV (plus any Additional Redemption Cash or net of any Redemption Cash Shortfall, if applicable) has been delivered to the Trust, and the Trust and/or the Transfer Agent is in simultaneous possession of both.

Suspension or Rejection of Orders and Total Basket Amount

The creation or redemption of Shares may be suspended generally, or refused with respect to particular requested creations or redemptions, during any period when the transfer books of the Transfer Agent are closed or if circumstances outside the control of the Sponsor or its delegates make it for all practical purposes not feasible to process creation orders or redemption orders or for any other reason at any time or from time to time. The Marketing Agent may reject an order or, after accepting an order, may cancel such order, if: (i) such order is not presented in proper form as described in the Participant Agreement, (ii) to the extent In-Kind Regulatory Approval has been obtained, in the case of In-Kind Orders, the transfer of the Total Basket Amount comes from an account other than an Ether wallet address that is known to the Custodian as belonging to the Authorized Participant or its AP Designee or (iii) the fulfillment of the order, in the opinion of counsel, might be unlawful, among other reasons. None of the Sponsor or its delegates will be liable for the suspension, rejection or acceptance of any creation order or redemption order.

The Sponsor will notify investors of any suspension of creations or redemptions of Shares by filing a current report on Form 8-K. Suspension of the creation or redemption of Shares could negatively impact the Shares’ liquidity and/or cause the Shares to trade at premiums and discounts, and otherwise have a negative impact on the value of the Shares.

Tax Responsibility

Authorized Participants are responsible for any transfer tax, sales or use tax, stamp tax, recording tax, value-added tax or similar tax or governmental charge applicable to the creation and redemption of Baskets, regardless of whether such tax or charge is imposed directly on the Authorized Participant, and agree to indemnify the Sponsor and the Trust if the Sponsor or the Trust is required by law to pay any such tax, together with any applicable penalties, additions to tax or interest thereon.

MATERIAL U.S. FEDERAL INCOME TAX CONSEQUENCES

The following discussion addresses the material U.S. federal income tax consequences of the ownership of Shares. Subject to the limitations and qualifications, and based on the assumptions described herein and in the opinion letter filed as Exhibit 8.1 to this registration statement, the statements of law and legal conclusions set forth in the following discussion constitute the opinion of Davis Polk & Wardwell LLP (“Davis Polk”) as to the material U.S. federal income tax consequences of the ownership and disposition of Shares that generally may apply to a “U.S. Holder” or a “non-U.S. Holder” (in each case, as defined below). This discussion does not describe all of the tax consequences that may be relevant to a beneficial owner of Shares in light of the beneficial owner’s particular circumstances, including tax consequences applicable to beneficial owners subject to special rules, such as:

- financial institutions;
- dealers in securities or commodities;
- traders in securities or commodities that have elected to apply a mark-to-market method of tax accounting in respect thereof;
- persons holding Shares as part of a hedge, “straddle,” integrated transaction or similar transaction;
- Authorized Participants (as defined below);
- U.S. Holders (as defined below) whose functional currency is not the U.S. dollar;
- entities or arrangements classified as partnerships for U.S. federal income tax purposes;
- real estate investment trusts;
- regulated investment companies; and
- tax-exempt entities, including individual retirement accounts.

This discussion applies only to Shares that are held as capital assets and does not address alternative minimum tax consequences or consequences of the Medicare contribution tax on net investment income.

If an entity or arrangement that is classified as a partnership for U.S. federal income tax purposes holds Shares, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and the activities of the partnership. Partnerships holding Shares and partners in those partnerships are urged to consult their tax advisers about the particular U.S. federal income tax consequences of owning Shares.

This discussion is based on the Code, administrative pronouncements, judicial decisions and final, temporary and proposed Treasury regulations as of the date hereof, changes to any of which subsequent to the date hereof may affect the tax consequences described herein. For the avoidance of doubt, this summary does not discuss any tax consequences arising under the laws of any state, local or foreign taxing jurisdiction.

Shareholders are urged to consult their tax advisers about the application of the U.S. federal income tax laws to their particular situations, as well as any tax consequences arising under the laws of any state, local or foreign taxing jurisdiction.

Tax Treatment of the Trust

The Sponsor intends to take the position that the Trust is properly treated as a grantor trust for U.S. federal income tax purposes. Assuming that the Trust is a grantor trust, the Trust will not be subject to U.S. federal income tax. Rather, if the Trust is a grantor trust, each beneficial owner of Shares will be treated as directly owning its pro rata share of the Trust’s assets and a pro rata portion of the Trust’s income, gain, losses and deductions will “flow through” to each beneficial owner of Shares.

Although not free from doubt due to the lack of authority directly addressing certain aspects of the Trust's affairs, in the opinion of Davis Polk the Trust should be classified as a "grantor trust" for U.S. federal income tax purposes. However, there can be no complete assurance that the Trust will be treated as a grantor trust for those purposes. An opinion of counsel is not binding on the IRS or any court, and there are significant uncertainties regarding the application of existing authorities to certain aspects of Ether and the Trust.

In particular, the Trust expects to take certain positions with respect to the tax consequences of Incidental Rights and its receipt of IR Virtual Currency. If the IRS were to disagree with, and successfully challenge, any of these positions, the Trust might not qualify as a grantor trust. The Prime Broker Agreement provides that the Trust is abandoning irrevocably, for no direct or indirect consideration, effective immediately prior to each Creation Time and Redemption Time, all Incidental Rights or IR Virtual Currency to which it would otherwise be entitled as of such time and with respect to which it has not taken any Affirmative Action at or prior to such time. Prospectively, the Sponsor has committed to causing the Trust to irrevocably abandon all Incidental Rights and IR Virtual Currency to which the Trust might otherwise become entitled. There can be no complete assurance that these abandonments will be treated as effective for U.S. federal income tax purposes. If the Trust were treated as owning any asset other than Ether as of any date on which it creates or redeems Shares, it might cease to qualify as a grantor trust for U.S. federal income tax purposes.

In addition, and in common with other spot digital asset exchange-traded products, at this time the Trust is not permitted to create or redeem Shares via in-kind transactions with Authorized Participants. Unless and until In-Kind Regulatory Approval is obtained, Baskets will be created or redeemed only through Cash Orders. In general, investment vehicles intended to be treated as grantor trusts for U.S. federal income tax purposes historically have created additional trust interests only in kind, and there is no authority directly addressing whether a grantor trust may create or redeem trust interests under procedures similar to those that govern Cash Orders. Accordingly, there can be no complete assurance that the creation or redemption of Shares under the procedures governing Cash Orders will not cause the Trust to fail to qualify as a grantor trust for U.S. federal income tax purposes.

Moreover, because of the evolving nature of digital assets, it is not possible to predict potential future developments that may arise with respect to digital assets, including forks, airdrops and other similar occurrences. Assuming that the Trust is currently a grantor trust for U.S. federal income tax purposes, certain future developments could render it impossible, or impracticable, for the Trust to continue to be treated as a grantor trust for such purposes.

If the Trust is not properly classified as a grantor trust, the Trust might be classified as a partnership for U.S. federal income tax purposes. However, due to the uncertain treatment of digital assets for U.S. federal income tax purposes, there can be no assurance in this regard. If the Trust were classified as a partnership for U.S. federal income tax purposes, the tax consequences of owning Shares generally would not be materially different from the tax consequences described herein, although there might be certain differences, including with respect to timing of the recognition of taxable income or loss. In addition, tax information reports provided to beneficial owners of Shares would be made in a different form. If the Trust were not classified as either a grantor trust or a partnership for U.S. federal income tax purposes, it would be classified as a corporation for such purposes. In that event, the Trust would be subject to entity-level U.S. federal income tax (currently at the rate of 21%) on its net taxable income and certain distributions made by the Trust to shareholders would be treated as taxable dividends to the extent of the Trust's current and accumulated earnings and profits. Any such dividend distributed to a beneficial owner of Shares that is a non-U.S. person for U.S. federal income tax purposes would be subject to U.S. federal withholding tax at a rate of 30% (or such lower rate as provided in an applicable tax treaty).

The remainder of this discussion is based on the assumption that the Trust will be treated as a grantor trust for U.S. federal income tax purposes.

Uncertainty Regarding the U.S. Federal Income Tax Treatment of Digital Assets

Each beneficial owner of Shares will be treated for U.S. federal income tax purposes as the owner of an undivided interest in the Ether (and any Incidental Rights and/or IR Virtual Currency) held in the Trust. Due to the new and evolving nature of digital assets and the absence of comprehensive guidance with respect to digital assets, many significant aspects of the U.S. federal income tax treatment of digital assets are uncertain.

In 2014, the Internal Revenue Service (“IRS”) released a notice (the “Notice”) discussing certain aspects of the treatment of “convertible virtual currency” (that is, digital assets that have an equivalent value in fiat currency or that acts as substitutes for fiat currency) for U.S. federal income tax purposes. In the Notice, the IRS stated that, for U.S. federal income tax purposes, such digital assets (i) are “property,” (ii) are not “currency” for purposes of the provisions of the Code relating to foreign currency gain or loss and (iii) may be held as a capital asset. In 2019, the IRS released a revenue ruling and a set of “Frequently Asked Questions” (the “Ruling & FAQs”) that provide some additional guidance, including guidance to the effect that, under certain circumstances, hard forks of digital assets are taxable events giving rise to ordinary income and guidance with respect to the determination of the tax basis of digital assets. However, the Notice and the Ruling & FAQs do not address other significant aspects of the U.S. federal income tax treatment of digital assets. Moreover, although the Ruling & FAQs address the treatment of hard forks, there continues to be significant uncertainty with respect to the timing and amount of the income inclusions. While the Ruling & FAQs do not address most situations in which airdrops occur, it is clear from the reasoning of the Ruling & FAQs that the IRS generally would treat an airdrop as a taxable event giving rise to ordinary income.

There can be no assurance that the IRS will not alter its position with respect to digital assets in the future or that a court would uphold the treatment set forth in the Notice and the Ruling & FAQs. It is also unclear what additional guidance on the treatment of digital assets for U.S. federal income tax purposes may be issued in the future. Any such alteration of the current IRS positions or additional guidance could result in adverse tax consequences for shareholders and could have an adverse effect on the prices of digital assets, including the price of Ether in the Digital Asset Market, and therefore could have an adverse effect on the value of Shares. Future developments that may arise with respect to digital assets may increase the uncertainty with respect to the treatment of digital assets for U.S. federal income tax purposes. For example, the Notice addresses only digital assets that are “convertible virtual currency,” and it is conceivable that, as a result of a fork, airdrop or similar occurrence, a Trust will hold certain types of digital assets that are not within the scope of the Notice.

The remainder of this discussion assumes that Ether, and any Incidental Rights or IR Virtual Currency that the Trust may hold, is properly treated for U.S. federal income tax purposes as property that may be held as a capital asset and that is not currency for purposes of the provisions of the Code relating to foreign currency gain and loss.

Shareholders are urged to consult their tax advisers regarding the tax consequences of an investment in the Trust and in digital assets in general, including, in the case of shareholders that are generally exempt from U.S. federal income taxation, whether such shareholders may recognize “unrelated business taxable income” (“UBTI”) as a consequence of a fork, airdrop or similar occurrence.

Tax Consequences to U.S. Holders

As used herein, the term “U.S. Holder” means a beneficial owner of a Share for U.S. federal income tax purposes that is:

- an individual who is a citizen or resident of the United States for U.S. federal income tax purposes;
- a corporation, or other entity treated as a corporation for U.S. federal income tax purposes, created or organized in or under the laws of the United States or of any political subdivision thereof; or
- an estate or trust the income of which is subject to U.S. federal income taxation regardless of its source.

Except as specifically noted, the discussion below assumes that each U.S. Holder will acquire all of its Shares on the same date for the same price per Share and solely for cash (or, if In-Kind Regulatory Approval is obtained in the future, solely for Ether that were originally acquired by the U.S. Holder for cash on the same date).

As discussed in the section entitled “Creation and Redemption of Shares,” if In-Kind Regulatory Approval is obtained in the future, a U.S. Holder may be able to acquire Shares of the Trust by contributing Ether in kind to the Trust (either directly or through an Authorized Participant acting as agent of the U.S. Holder). Assuming that the Trust is properly treated as a grantor trust for U.S. federal income tax purposes, such a contribution should not be a taxable event to the U.S. Holder.

For U.S. federal income tax purposes, each U.S. Holder will be treated as owning an undivided interest in the Ether held in the Trust and will be treated as directly realizing its pro rata share of the Trust’s income, gains, losses and deductions. When a U.S. Holder purchases Shares solely for cash, (i) the U.S. Holder’s initial tax basis in its pro rata share of the Ether held in the Trust will be equal to the amount paid for the Shares and (ii) the U.S. Holder’s holding period for its pro rata share of such Ether will begin on the date of such purchase. If, in the future, In-Kind Regulatory Approval is obtained and a U.S. Holder acquires Shares in exchange for Ether, (i) the U.S. Holder’s initial tax basis in its pro rata share of the Ether held in the Trust would be equal to the U.S. Holder’s tax basis in the Ether that the U.S. Holder transferred to the Trust and (ii) the U.S. Holder’s holding period for its pro rata share of such Ether generally would include the period during which the U.S. Holder held the Ether that the U.S. Holder transferred to the Trust. The Ruling & FAQs confirm that if a taxpayer acquires tokens of a digital asset at different times and for different prices, the taxpayer has a separate tax basis in each lot of such tokens. Under the Ruling & FAQs, if, in the future, In-Kind Regulatory Approval is obtained and a U.S. Holder that owns more than one lot of Ether contributes a portion of its Ether to the Trust in exchange for Shares, the U.S. Holder could designate the lot(s) from which such contribution will be made, provided that the U.S. Holder is able to identify specifically which Ether it is contributing and to substantiate its tax basis in that Ether. In general, if a U.S. Holder acquires Shares solely for cash at different prices, the U.S. Holder’s share of the Trust’s Ether will consist of separate lots with separate tax bases. In addition, in this situation, the U.S. Holder’s holding period for the separate lots may be different.

Gains or losses from the sale of Ether to fund cash redemptions are expected to be treated as incurred only by the shareholder that is being redeemed. However, when the Trust transfers Ether to the Sponsor as payment of the Sponsor’s Fee, or sells Ether to fund payment of any Additional Trust Expenses, each U.S. Holder will be treated as having sold its pro rata share of that Ether for their fair market value at that time (which, in the case of Ether sold by the Trust, generally will be equal to the cash proceeds received by the Trust in respect thereof). As a result, each U.S. Holder will recognize gain or loss in an amount equal to the difference between (i) the fair market value of the U.S. Holder’s pro rata share of the Ether transferred and (ii) the U.S. Holder’s tax basis for its pro rata share of the Ether transferred. Any such gain or loss will be short-term capital gain or loss if the U.S. Holder’s holding period for its pro rata share of the Ether is one year or less and long-term capital gain or loss if the U.S. Holder’s holding period for its pro rata share of the Ether is more than one year. A U.S. Holder’s tax basis in its pro rata share of any Ether transferred by the Trust generally will be determined by multiplying the tax basis of the U.S. Holder’s pro rata share of all of the Ether held in the Trust immediately prior to the transfer by a fraction the numerator of which is the amount of Ether transferred and the denominator of which is the total amount of Ether held in the Trust immediately prior to the transfer. Immediately after the transfer, the U.S. Holder’s tax basis in its pro rata share of the Ether remaining in the Trust will be equal to the tax basis of its pro rata share of the Ether held in the Trust immediately prior to the transfer, less the portion of that tax basis allocable to its pro rata share of the Ether transferred.

As noted above, the IRS has taken the position in the Ruling & FAQs that, under certain circumstances, a hard fork of a digital asset constitutes a taxable event giving rise to ordinary income, and it is clear from the reasoning of the Ruling & FAQs that the IRS generally would treat an airdrop as a taxable event giving rise to ordinary income. As described above, the Sponsor has committed to causing the Trust to abandon all Incidental

Rights and IR Virtual Currency to which the Trust otherwise might become entitled. If, however, the Trust were to receive and retain IR Virtual Currency in the future, a U.S. Holder would have a basis in that IR Virtual Currency equal to the amount of income the U.S. Holder recognizes as a result of such fork or airdrop and the U.S. Holder's holding period for such IR Virtual Currency would begin as of the time it recognizes such income.

U.S. Holders' pro rata shares of the expenses incurred by the Trust will be treated as "miscellaneous itemized deductions" for U.S. federal income tax purposes. As a result, for taxable years beginning after December 31, 2017 and before January 1, 2026, a non-corporate U.S. Holder's share of these expenses will not be deductible for U.S. federal income tax purposes. For taxable years beginning on or after January 1, 2026, a non-corporate U.S. Holder's share of these expenses will be deductible for regular U.S. federal income tax purposes only to the extent that the U.S. Holder's share of the expenses, when combined with other "miscellaneous itemized deductions," exceeds 2% of the U.S. Holder's adjusted gross income for the particular year, will not be deductible for U.S. federal alternative minimum tax purposes and will be subject to certain other limitations on deductibility.

On a sale or other disposition of Shares, a U.S. Holder will be treated as having sold the Ether underlying such Shares. Accordingly, the U.S. Holder generally will recognize gain or loss in an amount equal to the difference between (i) the amount realized on the sale of the Shares and (ii) the portion of the U.S. Holder's tax basis in its pro rata share of the Ether held in the Trust that is attributable to the Shares that were sold or otherwise subject to a disposition. Such tax basis generally will be determined by multiplying the tax basis of the U.S. Holder's pro rata share of all of the Ether held in the Trust immediately prior to such sale or other disposition by a fraction the numerator of which is the number of Shares disposed of and the denominator of which is the total number of Shares held by such U.S. Holder immediately prior to such sale or other disposition (such fraction, expressed as a percentage, the "Share Percentage"). If the U.S. Holder's share of the Trust's Ether consists of separate lots with separate tax bases and/or holding periods, the U.S. Holder will be treated as having sold the Share Percentage of each such lot. Gain or loss recognized by a U.S. Holder on a sale or other disposition of Shares will generally be short-term capital gain or loss if the U.S. Holder's holding period for the Ether underlying such Shares is one year or less and long-term capital gain or loss if the U.S. Holder's holding period for the Ether underlying such Shares is more than one year. The deductibility of capital losses is subject to significant limitations.

If, in the future, In-Kind Regulatory Approval is obtained and the Trust redeems all or a portion of a U.S. Holder's Shares in exchange for the underlying Ether represented by the redeemed Shares, such redemption generally would not be a taxable event to the U.S. Holder. The U.S. Holder's tax basis in the Ether received in the redemption generally would be the same as the U.S. Holder's tax basis for the portion of its pro rata share of the Ether held in the Trust immediately prior to the redemption that was attributable to the Shares redeemed, determined as described above, and the U.S. Holder's tax basis in its remaining pro rata portion, if any, of the Ether held in the Trust after the redemption would be equal to the tax basis of its pro rata share of the total amount of the Ether held in the Trust immediately prior to the redemption, less the U.S. Holder's tax basis in the Ether received in the redemption. The U.S. Holder's holding period with respect to the Ether received would generally include the period during which the U.S. Holder held the Shares so redeemed. A subsequent sale of the Ether received in such redemption would generally be a taxable event.

After any sale or other disposition of fewer than all of a U.S. Holder's Shares, the U.S. Holder's tax basis in its pro rata share of the Ether held in the Trust immediately after the disposition will equal the tax basis in its pro rata share of the total amount of the Ether held in the Trust immediately prior to the disposition, less the portion of that tax basis that is taken into account in determining the amount of gain or loss recognized by the U.S. Holder on the disposition (or, in the case of a redemption pursuant to an In-Kind Order, if In-Kind Regulatory Approval is obtained, that is treated as the basis of the Ether received by the U.S. Holder in the redemption).

Any brokerage or other transaction fee incurred by a U.S. Holder in purchasing Shares generally will be added to the U.S. Holder's tax basis in the underlying assets of the Trust. Similarly, any brokerage fee or other

transaction fee incurred by a U.S. Holder in selling Shares generally will reduce the amount realized by the U.S. Holder with respect to the sale.

In the absence of guidance to the contrary, it is possible that any income recognized by a U.S. tax-exempt shareholder as a consequence of a hard fork, airdrop or similar occurrence would constitute UBTI. A tax-exempt shareholder should consult its tax adviser regarding whether such shareholder may recognize some UBTI as a consequence of an investment in Shares.

Tax Consequences to Non-U.S. Holders

As used herein, the term “non-U.S. Holder” means a beneficial owner of a Share for U.S. federal income tax purposes that is not a U.S. Holder. The term “non-U.S. Holder” does not include (i) a nonresident alien individual who is present in the United States for 183 days or more in a taxable year, (ii) a former U.S. citizen or U.S. resident or an entity that has expatriated from the United States; (iii) a person whose income in respect of Shares is effectively connected with the conduct of a trade or business in the United States; or (iv) an entity that is treated as a partnership for U.S. federal income tax purposes. Shareholders described in the preceding sentence should consult their tax advisers regarding the U.S. federal income tax consequences of owning Shares.

A non-U.S. Holder generally will not be subject to U.S. federal income or withholding tax with respect to its share of any gain recognized on the Trust’s transfer of Ether in payment of the Sponsor’s Fee or any Additional Trust Expense or on the Trust’s sale or other disposition of Ether. In addition, assuming that the Trust holds no asset other than Ether, a non-U.S. Holder generally will not be subject to U.S. federal income or withholding tax with respect to any gain it recognizes on a sale or other disposition of Shares. A non-U.S. Holder also will generally not be subject to U.S. federal income or withholding tax with respect to any distribution received from the Trust, whether in cash or in-kind.

Provided that it does not constitute income that is treated as “effectively connected” with the conduct of a trade or business in the United States, U.S.-source “fixed or determinable annual or periodical” (“FDAP”) income received, or treated as received, by a non-U.S. Holder will generally be subject to U.S. withholding tax at the rate of 30% (subject to possible reduction or elimination pursuant to an applicable tax treaty and to statutory exemptions such as the portfolio interest exemption). Although the Sponsor has committed to causing the Trust to abandon all Incidental Rights and IR Virtual Currency to which the Trust may become entitled in the future, and although there is no guidance on point, if the Trust were to receive and retain IR Virtual Currency arising from a future fork, airdrop or similar occurrence, it is likely that any ordinary income recognized by a non-U.S. Holder as a result would constitute FDAP income. It is unclear, however, whether any such FDAP income would be properly treated as U.S.-source or foreign-source FDAP income. Non-U.S. Holders should assume that, in the absence of guidance, a withholding agent (including the Sponsor) is likely to withhold 30% from a non-U.S. Holder’s pro rata share of any such income. A non-U.S. Holder that is a resident of a country that maintains an income tax treaty with the United States may be eligible to claim the benefits of that treaty to reduce or eliminate, or to obtain a partial or full refund of, the 30% U.S. withholding tax on its share of any such income, but only if the non-U.S. Holder’s home country treats the Trust as “fiscally transparent,” as defined in applicable Treasury regulations.

In order to prevent the possible imposition of U.S. “backup” withholding and (if applicable) to qualify for a reduced rate of withholding tax at source under a treaty, a non-U.S. Holder must comply with certain certification requirements (generally, by delivering a properly executed IRS Form W-8BEN or W-8BEN-E to the relevant withholding agent).

U.S. Information Reporting and Backup Withholding

The Trust or the appropriate broker will file certain information returns with the IRS and provide shareholders with information regarding their annual income (if any) and expenses with respect to the Trust in accordance with applicable Treasury regulations.

A U.S. Holder will generally be subject to information reporting requirements and backup withholding unless (i) the U.S. Holder is a corporation or other exempt recipient or (ii) in the case of backup withholding, the U.S. Holder provides a correct taxpayer identification number and certifies that it is not subject to backup withholding. In order to avoid the information reporting and backup withholding requirements, a non-U.S. Holder may have to comply with certification procedures to establish that it is not a U.S. person. The amount of any backup withholding will be allowed as a credit against the shareholder's U.S. federal income tax liability and may entitle the holder to a refund, provided that the required information is furnished to the IRS.

FATCA

As discussed above, it is unclear whether any ordinary income recognized by a non-U.S. Holder as a result of a fork, airdrop or similar occurrence would constitute U.S.-source FDAP income. Provisions of the Code commonly referred to as "FATCA" require withholding of 30% on payments of U.S.-source FDAP income and, subject to the discussion of proposed U.S. Treasury regulations below, of gross proceeds of dispositions of certain types of property that produce U.S.-source FDAP income to, "foreign financial institutions" (which is broadly defined for this purpose and in general includes investment vehicles) and certain other non-U.S. entities unless various U.S. information reporting and due diligence requirements (generally relating to ownership by U.S. persons of interests in or accounts with those entities) have been satisfied, or an exemption applies. An intergovernmental agreement between the United States and an applicable foreign country may modify these requirements. In addition, regulations proposed by the U.S. Treasury Department (the preamble to which indicates that taxpayers may rely on the regulations pending their finalization) would eliminate the requirement under FATCA of withholding on gross proceeds. If FATCA withholding is imposed, a beneficial owner that is not a foreign financial institution generally may obtain a refund of any amounts withheld by filing a U.S. federal income tax return (which may entail significant administrative burden). Shareholders should consult their tax advisers regarding the effects of FATCA on an investment in the Trust.

ERISA AND RELATED CONSIDERATIONS

ERISA and Section 4975 of the Code impose certain requirements on employee benefit plans and certain other plans and arrangements, including individual retirement accounts (“IRAs”) and annuities, Keogh plans, and certain collective investment funds or insurance company general or separate accounts in which such plans or arrangements are invested, that are subject to ERISA and/or the Section 4975 of the Code (collectively, “Plans”), and on persons who are fiduciaries with respect to the investment of Plan assets. Government plans, non-U.S. plans and certain church plans (collectively, “Non-ERISA Arrangements”) are not subject to the fiduciary responsibility or prohibited transaction provisions of ERISA or Section 4975 of the Code, but may be subject to similar rules under other federal, state, local, non-U.S. or other applicable laws (“Similar Laws”).

General Fiduciary Matters

In contemplating an investment of a portion of Plan assets in Shares, the Plan fiduciary responsible for making such investment should carefully consider, taking into account the facts and circumstances of the Plan, the risks discussed in this prospectus, and whether such investment is consistent with its fiduciary responsibilities, including, but not limited to (i) whether the fiduciary has the authority to make the investment under the appropriate governing plan instrument, (ii) whether the investment would constitute a direct or indirect non-exempt prohibited transaction under ERISA or the Code, (iii) the Plan’s funding objectives, and (iv) whether under the general fiduciary standards of investment prudence and diversification such investment is appropriate for the Plan, taking into account the overall investment policy of the Plan, the composition of the Plan’s investment portfolio and the Plan’s need for sufficient liquidity to pay benefits when due. Fiduciaries of Non-ERISA Arrangements should carefully consider whether an investment in Shares would violate any applicable Similar Laws.

Plan Asset Issues

Under the Department of Labor’s regulations at section 2510.3-101, as amended by Section 3(42) of ERISA (the “Plan Asset Regulations”), if a Plan invests in an equity interest of an entity that is “a publicly-offered security,” the entity will not be deemed to hold “plan assets” subject to ERISA, and a party managing the assets of such entity will not be subject to the fiduciary responsibility and prohibited transaction rules of ERISA and Section 4975 of the Code. A “publicly-offered security” is a security that is freely transferable, part of a class of securities that is widely held, and is either (i) part of a class of securities registered under section 12(b) or 12(g) of the Exchange Act or (ii) sold to the plan as part of an offering of securities to the public pursuant to an effective registration statement under the Securities Act and the class of securities of which such security is a part is registered under the Exchange Act within 120 days (or such later time as may be allowed by the Securities and Exchange Commission) after the end of the fiscal year of the issuer during which the offering of such securities to the public occurred. Whether a security is “freely transferable” is a factual question determined on the basis of facts and circumstances. A class of securities is “widely-held” if it is a class of securities that is owned by 100 or more investors independent of the issuer and of one another. It is anticipated that the Shares will constitute “publicly-offered securities” as defined in the Plan Asset Regulations. Accordingly, Shares held by a Plan, and not the underlying Ether held in the Trust represented by the Shares, should be treated as assets of the Plan, for purposes of applying the fiduciary responsibility and prohibited transaction rules of ERISA and the Code.

Investment by Certain Retirement Plans

IRAs and participant-directed accounts under tax-qualified retirement plans are limited in the types of investments they may make under the Code. Potential purchasers of Shares that are IRAs or participant-directed accounts under a Code Section 401(a) plan should consult with their own advisors as to the consequences of an investment in Shares.

Ineligible Purchasers

In general, Shares may not be purchased with the assets of a Plan if the Trustee, the Sponsor, the distributor or any of their respective affiliates or employees either: (i) has investment discretion with respect to the investment of such Plan assets; (ii) has authority or responsibility to give or regularly gives investment advice with respect to such Plan assets, for a fee, and pursuant to an agreement or understanding that such advice will serve as a primary basis for investment decisions with respect to such Plan assets and that such advice will be based on the particular investment needs of the Plan; or (iii) is an employer maintaining or contributing to such Plan. A party that is described in clause (i) or (ii) of the preceding sentence is a fiduciary under ERISA and the Code with respect to the Plan, and any such purchase might result in a prohibited transaction under ERISA and/or the Code.

Representation

Accordingly, by acceptance of Shares, each purchaser and subsequent transferee of Shares will be deemed to have represented and warranted that either (i) no portion of the assets used by such purchaser or transferee to acquire or hold the Shares constitutes assets of any Plan or Non-ERISA Arrangement or (ii) the acquisition, holding and subsequent disposition of the Shares by such purchaser or transferee will not constitute or result in any non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code or violate any applicable Similar Law.

Except as otherwise set forth, the foregoing statements regarding the consequences under ERISA and the Code of an investment in the Trust are based on the provisions of the Code and ERISA as currently in effect, and the existing administrative and judicial interpretations thereunder. No assurance can be given that administrative, judicial or legislative changes will not occur that may make the foregoing statements incorrect or incomplete.

ACCEPTANCE OF SUBSCRIPTIONS ON BEHALF OF PLANS OR NON-ERISA ARRANGEMENTS IS IN NO RESPECT A REPRESENTATION BY THE SPONSOR OR ANY OTHER PARTY RELATED TO THE TRUST THAT THIS INVESTMENT MEETS THE RELEVANT LEGAL REQUIREMENTS WITH RESPECT TO INVESTMENTS BY ANY PARTICULAR PLAN OR NON-ERISA ARRANGEMENT OR PLANS OR NON-ERISA ARRANGEMENTS GENERALLY, OR THAT THIS INVESTMENT IS APPROPRIATE FOR ANY PARTICULAR PLAN OR NON-ERISA ARRANGEMENT OR PLANS OR NON-ERISA ARRANGEMENTS GENERALLY. THE PERSON WITH INVESTMENT DISCRETION WITH RESPECT FOR ANY PLAN OR NON-ERISA ARRANGEMENT SHOULD CONSULT WITH ITS OWN COUNSEL AND ADVISERS AS TO THE PROPRIETY OF AN INVESTMENT IN THE TRUST, IN LIGHT OF THE CIRCUMSTANCES OF THE PARTICULAR PLAN OR NON-ERISA ARRANGEMENT BEFORE PURCHASING SHARES. NEITHER THIS DISCUSSION NOR ANYTHING IN THIS PROSPECTUS IS OR IS INTENDED TO BE INVESTMENT ADVICE DIRECTED AT ANY POTENTIAL PURCHASER THAT IS A PLAN OR NON-ERISA ARRANGEMENT, OR AT SUCH PURCHASERS GENERALLY.

SEED SHARES

On May 31, 2024, the Sponsor purchased \$100,000 in Shares (the “Seed Shares”), comprising 10,000 Shares at a per Share price of \$10. The Seed Shares are currently anticipated to be redeemed for cash in connection with, and immediately prior to the consummation of, the Initial Distribution. The \$100,000 in proceeds the Trust received in consideration for the sale of the Seed Shares served as the basis for the audit described in the section entitled “Index to Financial Statements—Report of Independent Registered Public Accounting Firm.”

There will be no costs or transaction fees payable by the Trust associated with the redemption of the Seed Shares for cash, or otherwise in connection with the Initial Distribution.

THE INITIAL DISTRIBUTION

Prior to the creation of any Baskets through Authorized Participants pursuant to this prospectus, the Sponsor currently intends to effectuate the initial creation of Shares of the Trust (the “Initial Distribution Basket Creation”) through the contribution by Grayscale Ethereum Trust (ETH) (“ETHE”) of a certain amount of Ether to the Trust as consideration and in exchange for newly created Shares of the Trust. The newly created Shares of the Trust will then be distributed to shareholders of ETHE (“ETHE Shareholders”) as of 4:00 PM ET on July 18, 2024 (the “Record Date”), pro rata based on a 1:1 ratio, such that for each one (1) share of ETHE (“ETHE Shares”) held by each ETHE Shareholder on the Record Date, such ETHE Shareholder will be entitled to receive one (1) Share of the Trust on a subsequent date to be determined by the Sponsor (the “Distribution Date”) (such transactions collectively, the “Initial Distribution”).

As a result of the contemplated Initial Distribution, following the Distribution Date (and prior to the creation of any Baskets through Authorized Participants pursuant to this prospectus), the Trust will hold approximately 10% of the Ether that was held by ETHE as of the Record Date and ETHE would hold the remaining approximately 90% of the Ether that was held by ETHE as of the Record Date (the “ETHE Ether Portion”) (in the case of the ETHE Ether Portion only, reduced by the portion of the Sponsor’s Fee attributable to such Ether accrued and paid between the Record Date and the Distribution Date). For illustrative purposes only, using the number of ETHE Shares outstanding and amount of Ether held by ETHE as of March 31, 2024 the Sponsor anticipates that approximately 310,158,500 Shares will be distributed to ETHE Shareholders in the aggregate, and that the Trust will hold approximately 294,427.07395424 Ether immediately following the consummation of the Initial Distribution. Such amounts are included for illustrative purposes only, and are subject to change using the actual amounts of Ether held by ETHE and ETHE Shares outstanding as of the Record Date. See “Unaudited Pro Forma Financial Statements” for more information. Prior to the creation of any Baskets through Authorized Participants pursuant to this prospectus, such Shares will represent all of the outstanding Shares of the Trust.

Neither the number of outstanding ETHE Shares nor the exposure of ETHE Shareholders to Ether underlying their aggregate shareholdings (including ETHE Shares and Shares of the Trust) are expected to change as a result of the contemplated Initial Distribution. No consent, authorization, approval or proxy is being sought from ETHE Shareholders in connection with the Initial Distribution, and ETHE Shareholders will not need to pay any consideration, exchange or surrender existing ETHE Shares or take any other action to receive Shares of the Trust on the Distribution Date. Following the Initial Distribution, the Trust and ETHE will operate as independent NYSE Arca listed exchanged-traded commodity products, and neither will have any share ownership, beneficial or otherwise, in the other.

The Sponsor does not expect the Initial Distribution to be a taxable event for ETHE or its shareholders.

ETHE has filed an Information Statement on Schedule 14C with the SEC, describing the terms and conditions of the contemplated Initial Distribution.

PLAN OF DISTRIBUTION

In addition to, and independent of the initial purchase of the Seed Shares by the Sponsor or the Shares issued in connection with the Initial Distribution, the Trust issues Shares in Baskets only to Authorized Participants in exchange for deposits of Ether via a Liquidity Provider, together with corresponding deposits of cash from such Authorized Participants, on an ongoing continuous basis. The Trust does not issue fractions of a Basket. Although the Trust creates Baskets only upon the receipt of Ether, at this time an Authorized Participant can only submit Cash Orders, pursuant to which the Authorized Participant will deposit cash into the Cash Account (and a Liquidity Provider will transfer to the Trust's Vault Balance the corresponding Ether) in connection with the creation and redemption of Baskets. Subject to In-Kind Regulatory Approval, in the future the Trust may also create and redeem Baskets via In-Kind Orders, pursuant to which an Authorized Participant or its AP Designee would deposit Ether directly with the Trust or receive Ether directly from the Trust. However, because In-Kind Regulatory Approval has not been obtained, at this time Baskets will not be created or redeemed through In-Kind Orders and will only be created or redeemed through Cash Orders. There can be no assurance as to when In-Kind Regulatory Approval will be sought or obtained, if at all.

Cash Orders will be facilitated by the Transfer Agent and Grayscale Investments, LLC, which will engage one or more eligible companies (each, a "Liquidity Provider") that is not an agent of, or otherwise acting on behalf of, any Authorized Participant to obtain or receive Ether in connection with such orders. Authorized Participants may create a Basket pursuant to a Cash Order by delivering to the Cash Account (x) in the case of a Variable Fee Cash Order, the Basket NAV and any Variable Fee, or (y) in the case of an Actual Execution Cash Order, the Basket NAV, plus any Additional Creation Cash, less any Excess Creation Cash (such amount, as applicable, the "Required Creation Cash"), and the Liquidity Provider transferring the corresponding Basket Amount to the Trust's Vault Balance. The Basket Amount equals the number of Ether owned by the Trust at 4:00 p.m., New York time, on each trade date (after deducting the number of Ether representing the U.S. dollar value of accrued but unpaid fees and expenses of the Trust) by the number of Shares outstanding at such time and multiplying such quotient by 10,000. The Basket NAV equals the U.S. dollar value of a Basket calculated by multiplying the Basket Amount by the Index Price as of the trade date. Shares will only be created and delivered to the Authorized Participant after the Trust is in simultaneous possession of (i) the Basket Amount and (ii) the Required Creation Cash.

It is expected that Authorized Participants that create Shares will sell Shares to the public at varying prices to be determined by reference to, among other considerations, the price of Ether and the trading price of the Shares on the NYSE Arca at the time of each sale.

While the arbitrage mechanism is expected to keep the value of the Shares closely linked to the Index Price, due to price volatility and differentials, trading volume, and closings of Digital Asset Trading Platforms due to fraud, failure, security breaches or otherwise, there can be no assurance that the value of the Shares will reflect the value of the Trust's Ether, less the Trust's expenses and other liabilities, and the Shares may trade at a substantial premium over, or a substantial discount to, the value of the Trust's Ether, less the Trust's expenses and other liabilities. This risk may be exacerbated to the extent in-kind creations and redemptions of Shares continue to be unavailable for any reason. See "Risk Factors—Risk Factors Related to the Trust and the Shares—The lack of ability to facilitate in-kind creations and redemptions of Shares could have adverse consequences for the Trust." Moreover, there may be variances in the prices of Ether on the various Digital Asset Trading Platforms, including as a result of differences in fee structures or administrative procedures on different Digital Asset Trading Platforms, which could enhance or inhibit the arbitrage mechanism in a manner that is beyond our control.

Because new Shares can be created and issued on an ongoing basis at any point during the life of the Trust, a "distribution," as such term is used in the Securities Act, will be occurring. Authorized Participants, other broker-dealers and other persons are cautioned that some of their activities will result in their being deemed participants in a distribution in a manner which would render them statutory underwriters and subject them to the

prospectus delivery and liability provisions of the Securities Act. For example, an Authorized Participant, other broker-dealer firm or its client will be deemed a statutory underwriter if it purchases a Basket from the Trust, breaks the Basket down into its constituent Shares and sells the Shares directly to its customers, or if it chooses to couple the creation of a new Basket with an active selling effort involving solicitation of secondary market demand for the Shares. A determination of whether a particular market participant is an underwriter must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to designation as an underwriter and subject them to the prospectus delivery and liability provisions of the Securities Act.

Investors that purchase shares through a brokerage account (whether commission-based or fee-based) may pay commissions or fees charged by the brokerage account.

Dealers that are not “underwriters” but are participating in a distribution (as contrasted to ordinary secondary trading transactions), and thus dealing with Shares that are part of an “unsold allotment” within the meaning of Section 4(3)(C) of the Securities Act, would be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act.

The Sponsor intends to qualify the Shares in states selected by the Sponsor and that sales be made through broker-dealers who are members of FINRA. Investors intending to create or redeem Baskets through Authorized Participants in transactions not involving a broker-dealer registered in such investor’s state of domicile or residence should consult their legal advisor regarding applicable broker-dealer or securities regulatory requirements under the state securities laws prior to such creation or redemption.

Authorized Participants will not receive from the Trust or the Sponsor any compensation in connection with an offering or reoffering of the Shares. Accordingly, there is, and will be, no payment of underwriting compensation in connection with any such offering of Shares in excess of 10% of the gross proceeds of the offering.

Pursuant to a Marketing Agent Agreement (the “Marketing Agent Agreement”) to be entered into between the Sponsor and Foreside Fund Services, LLC, as Marketing Agent (the “Marketing Agent”), the Marketing Agent will be paid by the Sponsor an annual fee. In addition, the Sponsor will pay certain out-of-pocket fees and expenses of the Marketing Agent incurred in connection with its assistance in the marketing of the Trust and its Shares.

Under the Marketing Agent Agreement, the Marketing Agent will provide the following services to the Sponsor:

- Assist the Sponsor in facilitating Participation Agreements between and among Authorized Participants, the Trust, the Transfer Agent;
- Provide prospectuses to Authorized Participants;
- Work with the Transfer Agent to review and approve orders placed by the Authorized Participants and transmitted to the Transfer Agent;
- Review and file applicable marketing materials with FINRA; and
- Maintain, reproduce and store applicable books and records related to the services provided under the Marketing Agent Agreement.

The Trust intends to list the Shares on NYSE Arca under the symbol “ETH.”

LEGAL MATTERS

The validity of the Shares will be passed upon by Richards, Layton & Finger, P.A., as special Delaware counsel to the Trust. Davis Polk & Wardwell LLP, as special tax counsel to the Trust, will render an opinion regarding the material U.S. federal income tax consequences of the ownership of Shares.

EXPERTS

KPMG LLP, an independent registered public accounting firm, has audited the Trust's statement of assets and liabilities as of May 31, 2024 (date of seeding) included in this registration statement, as set forth in their report. Such financial statement is included in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

WHERE YOU CAN FIND MORE INFORMATION

We have filed with the SEC a registration statement on Form S-1 under the Securities Act with respect to the Shares offered hereby. This prospectus does not contain all of the information set forth in the registration statement and the exhibits and schedules thereto. For further information with respect to the Trust and its Shares, reference is made to the registration statement and the exhibits and any schedules filed therewith. Statements contained in this prospectus as to the contents of any contract or other document referred to are not necessarily complete and, in each instance, if such contract or document is filed as an exhibit, reference is made to the copy of such contract or other document filed as an exhibit to the registration statement, each statement being qualified in all respects by such reference. The SEC maintains an Internet site at www.sec.gov that contains reports, proxy and information statements we have filed electronically with the SEC.

As a result of the offering, we will be required to file periodic reports and other information with the SEC. We also maintain an Internet site at www.etfs.grayscale.com/eth. Our website and the information contained therein or connected thereto shall not be deemed to be incorporated into this prospectus or the registration statement of which it forms a part.

We intend to make available to holders of the Shares annual reports containing consolidated financial statements audited by an independent registered public accounting firm.

GLOSSARY OF DEFINED TERMS

In this prospectus, each of the following terms has the meaning set forth below.

“Account”—The accounts associated with the Trust’s Vault Balance and Settlement Balance.

“Actual Exchange Rate”—With respect to any particular asset, at any time, the price per single unit of such asset (determined net of any associated fees) at which the Trust is able to sell such asset for U.S. dollars (or other applicable fiat currency) at such time to enable the Trust to timely pay any Additional Trust Expenses, through use of the Sponsor’s commercially reasonable efforts to obtain the highest such price.

“Actual Execution Cash Order”—A Cash Order pursuant to which any price differential between (x) the Total Basket NAV on the trade date and (y) the price realized in acquiring or disposing of the corresponding Total Basket Amount, as the case may be, will be borne solely by the Authorized Participant.

“Additional Creation Cash”—In connection with a creation pursuant to an Actual Execution Cash Order, the amount of additional cash required to be delivered by the Authorized Participant in the event the price realized in acquiring the corresponding Total Basket Amount is higher than the Total Basket NAV on the trade date.

“Additional Redemption Cash”—In connection with a redemption pursuant to an Actual Execution Cash Order, the amount of additional cash to be delivered to the Authorized Participant in the event the price realized in disposing the corresponding Total Basket Amount is higher than the Total Basket NAV on the trade date.

“Additional Trust Expenses”—Together, any expenses incurred by the Trust in addition to the Sponsor’s Fee that are not Sponsor-paid Expenses, including, but not limited to, (i) taxes and governmental charges, (ii) expenses and costs of any extraordinary services performed by the Sponsor (or any other service provider) on behalf of the Trust to protect the Trust or the interests of shareholders, (iii) any indemnification of the Custodian or other agents, service providers or counterparties of the Trust, (iv) the fees and expenses related to the listing, quotation or trading of the Shares on any Secondary Market (including legal, marketing and audit fees and expenses) to the extent exceeding \$600,000 in any given fiscal year and (v) extraordinary legal fees and expenses, including any legal fees and expenses incurred in connection with litigation, regulatory enforcement or investigation matters.

“Administrator”—The Bank of New York Mellon, a New York corporation authorized to do a banking business.

“Administrator Fee”—The fee payable to any administrator of the Trust for services it provides to the Trust, which the Sponsor will pay such administrator as a Sponsor-paid Expense.

“Affirmative Action”—A decision by the Trust to acquire or abandon specific Incidental Rights and IR Virtual Currency at any time prior to the time of a creation or redemption of Shares.

“AP Designee”—An Authorized Participant’s designee in connection with In-Kind Orders (to the extent In-Kind Regulatory Approval is obtained).

“Authorized Participant”—Certain eligible financial institutions that have entered into an agreement with the Trust and the Sponsor concerning the creation or redemption of Shares. Each Authorized Participant (i) is a registered broker-dealer and (ii) has entered into a Participant Agreement with the Sponsor and the Transfer Agent. Subject to In-Kind Regulatory Approval, in the future any Authorized Participants creating and redeeming Shares through In-Kind Orders must also own, or their AP Designee (as defined above) must own, an Ether wallet address that is known to the Custodian as belonging to the Authorized Participant or its AP Designee and maintain an account with the Custodian.

“Basket”—A block of 10,000 Shares.

“Basket Amount”—On any trade date, the number of Ether required as of such trade date for the creation or redemption of a Basket, as determined by dividing (x) the number of Ether owned by the Trust at 4:00 p.m., New York time, on such trade date, after deducting the number of Ether representing the U.S. dollar value of accrued but unpaid fees and expenses of the Trust (converted using the Index Price at such time, and carried to the eighth decimal place), by (y) the number of Shares outstanding at such time (with the quotient so obtained calculated to one one-hundred-millionth of one Ether (i.e., carried to the eighth decimal place)), and multiplying such quotient by 10,000.

“Basket NAV”—The U.S. dollar value of a Basket calculated by multiplying the Basket Amount by the Index Price as of the trade date.

“Bitcoin”—A type of digital asset based on an open-source cryptographic protocol existing on the Bitcoin network.

“Blockchain” or **“Ethereum Blockchain”**—The public transaction ledger of the Ethereum Network on which transactions in Ether are recorded.

“Cash Account”—The segregated account maintained by the Transfer Agent in the name of the Trust for purposes of receiving cash from Authorized Participants in connection with creations of Shares and distributing cash to Authorized Participants in connection with redemptions of Shares.

“Cash Order”—An order for the creation or redemption of Shares pursuant to procedures facilitated by the Transfer Agent and pursuant to which a Liquidity Provider is engaged to facilitate the purchase or sale of Ether. A Cash Order may be executed as either a Variable Fee Cash Order or an Actual Execution Cash Order. Unless the Sponsor determines otherwise in its sole discretion based on market conditions and other factors existing at the time of such Cash Order, all creations and redemptions pursuant to Cash Orders are expected to be executed as Variable Fee Cash Orders.

“CEA”—Commodity Exchange Act of 1936, as amended.

“CFTC”—The U.S. Commodity Futures Trading Commission, an independent agency with the mandate to regulate commodity futures and option markets in the United States.

“CME”—The Chicago Mercantile Exchange.

“Code”—The U.S. Internal Revenue Code of 1986, as amended.

“Coinbase Credit”—Coinbase Credit, Inc.

“Covered Person”—The Sponsor and its affiliates. See “Business—Description of the Trust Agreement—The Sponsor—Liability of the Sponsor and Indemnification.”

“Creation Basket”—Basket of Shares issued by the Trust upon deposit of the Basket Amount required for each such Creation Basket.

“Creation Time”—With respect to the creation of any Shares by the Trust, the time at which the Trust creates such Shares.

“Custodial and Prime Broker Services”—The services of the Custodian and the Prime Broker that provide for: (i) holding of the Trust’s Ether in the Vault Balance and the Settlement Balance; (ii) transfer of the Trust’s Ether between the relevant Vault Balance and the Settlement Balance; (iii) the deposit of Ether from a public blockchain address into the respective account or accounts in which the Vault Balance or the Settlement Balance are maintained; and (iv) the withdrawal of Ether from the Vault Balance to a public blockchain address the Trust controls.

“**Custodian**”—Coinbase Custody Trust Company, LLC.

“**Custodian Fee**”—Fee payable to the Custodian and the Prime Broker for services they provide to the Trust, which the Sponsor shall pay to the Custodian and the Prime Broker as a Sponsor-paid Expense.

“**DCG**”—Digital Currency Group, Inc.

“**DCM**”—A designated contract market, which is a board of trade (commonly referred to as an exchange) that operates under the regulatory oversight of the CFTC.

“**Digital Asset Market**”—A “Brokered Market,” “Dealer Market,” “Principal-to-Principal Market” or “Exchange Market,” as each such term is defined in the Financial Accounting Standards Board Accounting Standards Codification Master Glossary.

“**Digital Asset Trading Platform**”—An electronic marketplace where trading platform participants may trade, buy and sell Ether based on bid-ask trading. The largest Digital Asset Trading Platforms are online and typically trade on a 24-hour basis, publishing transaction price and volume data.

“**Digital Asset Trading Platform Market**”—The global exchange market for the trading of Ether, which consists of transactions on electronic Digital Asset Trading Platforms.

“**Distribution Date**”— , 2024, the anticipated distribution date of the Trust’s shares to ETHE Shareholders in the Initial Distribution.

“**DSTA**”—The Delaware Statutory Trust Act, as amended.

“**DTC**”—The Depository Trust Company. DTC is a limited purpose trust company organized under New York law, a member of the U.S. Federal Reserve System and a clearing agency registered with the SEC. DTC will act as the securities depository for the Shares.

“**ERISA**”—The U.S. Employee Retirement Income Security Act of 1974, as amended.

“**ETC**” or “**Ethereum Classic**”—Ether Classic tokens, which are a type of digital asset based on an open-source cryptographic protocol existing on the Ethereum Classic Network.

“**ETHE**”—Grayscale Ethereum Trust (ETH), another Delaware Statutory Trust whose purpose is to hold Ether and which is sponsored by the Sponsor.

“**ETHE Index Price**”—the index price utilized by ETHE and which uses a methodology identical to the Index Price.

“**Ether**”—Ethereum tokens, which are a type of digital asset based on an open source cryptographic protocol existing on the Ethereum Network, comprising units that constitute the assets underlying the Trust’s Shares.

“**Ether Account**”—Collectively, the Vault Balance, the Settlement Balance and any subaccounts associated therewith.

“**Ethereum Classic Network**”—The online, end-user-to-end-user network hosting a public transaction ledger, known as the Ethereum Classic blockchain, and the source code comprising the basis for the cryptographic and algorithmic protocols governing the Ethereum Classic network.

“**Ethereum Network**”—The online, end-user-to-end-user network hosting the public transaction ledger, known as the Ethereum Blockchain, and the source code comprising the basis for the cryptographic and algorithmic protocols governing the Ethereum Network.

“Excess Creation Cash”—In connection with a creation pursuant to an Actual Execution Cash Order, the amount of excess cash to be returned to the Authorized Participant in the event the price realized in acquiring the corresponding Total Basket Amount is lower than the Total Basket NAV on the trade date.

“Exchange Act”—The Securities Exchange Act of 1934, as amended.

“FCA” — The Financial Conduct Authority.

“FDIC”— The Federal Deposit Insurance Corporation.

“FinCEN”—The Financial Crimes Enforcement Network, a bureau of the U.S. Department of the Treasury.

“FINRA”—The Financial Industry Regulatory Authority, Inc., which is the primary regulator in the United States for broker-dealers, including Authorized Participants.

“GAAP”—United States generally accepted accounting principles.

“Incidental Rights”—Rights to acquire, or otherwise establish dominion and control over, any virtual currency or other asset or right, which rights are incident to the Trust’s ownership of Ether and arise without any action of the Trust, or of the Sponsor or Trustee on behalf of the Trust.

“Index”—The CoinDesk Ether Price Index (ETX).

“Index License Agreement”—The license agreement, dated as of February 1, 2022, between the Index Provider and the Sponsor governing the Sponsor’s use of the Index for calculation of the Index Price, as amended by Amendment No. 1 thereto and as the same may be amended from time to time.

“Index Price”—The U.S. dollar value of an Ether derived from the Digital Asset Trading Platforms that are reflected in the Index, calculated at 4:00 p.m., New York time, on each business day. See “Business—Overview of the Ethereum Industry and Market—The Index and the Index Price” for a description of how the Index Price is calculated. For purposes of the Trust Agreement, the term ETHE Index Price shall mean the Index Price as defined herein.

“Index Provider”—CoinDesk Indices, Inc., a Delaware corporation that publishes the Index. Prior to its sale to an unaffiliated third party on November 20, 2023, DCG was the indirect parent company of CoinDesk Indices, Inc. As a result, CoinDesk Indices, Inc. was an affiliate of the Sponsor and the Trust and was considered a related party of the Trust.

“Initial Distribution”—The contemplated contribution by ETHE of a certain amount of Ether to the Trust, in exchange for newly created Shares of the Trust, which will then be distributed on the Distribution Date to ETHE Shareholders as of the Record Date to be determined by the Sponsor, pro rata based on a 1:1 ratio.

“Initial Distribution Basket Creation”—The initial creation of Shares of the Trust through the Initial Distribution, resulting from a contribution by Grayscale Ethereum Trust (ETH) (“ETHE”) of a certain amount of Ether to the Trust.

“In-Kind Order”—An order for the creation or redemption of Shares pursuant to which the Authorized Participant (or its AP Designee) will deliver or receive Ether directly from the Trust’s Vault Balance. Because In-Kind Regulatory Approval has not been obtained, at this time Shares will not be created or redeemed through In-Kind Orders.

“In-Kind Regulatory Approval”—The necessary regulatory approval to permit NYSE Arca to list the Shares of the Trust utilizing a structure that allows the Trust to create and redeem Shares via in-kind transactions with Authorized Participants or their AP Designees in exchange for Ether. In common with other spot digital asset exchange-traded products, the Trust is not at this time able to create and redeem shares via in-kind transactions with Authorized Participants, and there has yet to be definitive regulatory guidance on whether and how registered broker-dealers can hold and deal in Ether in compliance with the federal securities laws. To the extent further regulatory clarity emerges, the Sponsor expects NYSE Arca to seek the necessary regulatory approval to amend its listing rules to permit the Trust to create and redeem Shares through In-Kind Orders. There can be no assurance as to when such regulatory clarity will emerge, or when NYSE Arca will seek or obtain such regulatory approval, if at all.

“ISG”—The Intermarket Surveillance Group.

“Investment Advisers Act”—Investment Advisers Act of 1940, as amended.

“Investment Company Act”—Investment Company Act of 1940, as amended.

“Investor”—Any investor that has entered into a subscription agreement with an Authorized Participant, pursuant to which such Authorized Participant will act as agent for the investor.

“IRS”—The U.S. Internal Revenue Service, a bureau of the U.S. Department of the Treasury.

“IR Virtual Currency”—Any virtual currency tokens, or other asset or right, acquired by the Trust through the exercise (subject to the applicable provisions of the Trust Agreement) of any Incidental Right.

“Liquidity Engager”—Grayscale Investments, LLC, in its capacity of engaging one or more Liquidity Providers.

“Liquidity Provider”—One or more eligible companies that facilitate the purchase and sale of Ether in connection with creations or redemptions pursuant to Cash Orders. The Liquidity Providers with which Grayscale Investments, LLC, acting in its capacity as the Liquidity Engager, will engage in Ether transactions are third parties that are not affiliated with the Sponsor or the Trust and are not acting as agents of the Trust, the Sponsor, or any Authorized Participant, and all transactions will be done on an arms-length basis. Except for the contractual relationships between each Liquidity Provider and Grayscale Investments, LLC in its capacity as the Liquidity Engager, there is no contractual relationship between each Liquidity Provider and the Trust, the Sponsor, or any Authorized Participant.

“Marketing Agent”—Foreside Fund Services, LLC.

“Marketing Fee”—Fee payable to the marketer for services it provides to the Trust, which the Sponsor will pay to the marketer as a Sponsor-paid Expense.

“NAV”—The aggregate value, expressed in U.S. dollars, of the Trust’s assets (other than U.S. dollars or other fiat currency), less its liabilities (which include estimated accrued but unpaid fees and expenses) calculated in the manner set forth under “Business—Valuation of Ether and Determination of NAV.” See also “Business—Trust Objective and Determination of Principal Market NAV and NAV” for a description of the Trust’s NAV, as calculated in accordance with GAAP.

“NAV Fee Basis Amount”—The amount on which the Sponsor’s Fee for the Trust is based, as calculated in the manner set forth under “Valuation of Ether and Determination of NAV”.

“NYSE Arca”—NYSE Arca, Inc.

“Participant Agreement”—An agreement entered into by an Authorized Participant with the Sponsor and the Transfer Agent, that provides the procedures for the creation and redemption of Baskets via a Liquidity Provider.

“Pre-Creation/Redemption Abandonment”—The abandonment by the Trust, irrevocably for no direct or indirect consideration, all Incidental Rights and IR Virtual Currency to which the Trust would otherwise be entitled, effective immediately prior to a Creation Time or a Redemption Time (as the case may be) for the Trust.

“Pre-Creation/Redemption Abandonment Notice”—The provision, as amended or supplemented from time to time, in the Prime Broker Agreement providing that the Trust is abandoning irrevocably for no direct or indirect consideration, effective immediately prior to each Creation Time or Redemption Time (as the case may be), all Incidental Rights and IR Virtual Currency to which it would otherwise be entitled as of such time and with respect to which the Trust has not taken any Affirmative Action at or prior to such time.

“Prime Broker”—Coinbase, Inc.

“Prime Broker Agreement”—The Prime Broker Agreement, dated as of May 22, 2024, by and among the Trust, the Sponsor and the Prime Broker, on behalf of itself, the Custodian and Coinbase Credit, that governs the Trust’s and the Sponsor’s use of the Custodial and Prime Broker Services provided by the Custodian and the Prime Broker.

“Principal Market NAV”—The net asset value of the Trust determined on a GAAP basis.

“Record Date”—4:00 PM ET on July 18, 2024, the record date for the Initial Distribution.

“Redemption Cash Shortfall”—In connection with a redemption pursuant to an Actual Execution Cash Order, the amount by which the cash to be delivered to the Authorized Participant is reduced in the event the price realized in disposing the corresponding Total Basket Amount is lower than the Total Basket NAV on the trade date.

“Redemption Time”—With respect to the redemption of any Shares by the Trust, the time at which the Trust redeems such Shares.

“SEC”—The U.S. Securities and Exchange Commission.

“Secondary Index”—The Coin Metrics Real-Time Rate.

“Secondary Index Price”—The price set by Coin Metrics Real-Time Rate as of 4:00 p.m., New York time, on the valuation date. See “Business—Overview of the Ethereum Industry and Market—The Index and the Index Price—Determination of the Index Price When Index Price is Unavailable” for a description of how the Secondary Index Price is utilized when the Index Price is unavailable.

“Secondary Index Provider”—Coin Metrics Inc., a Delaware corporation that publishes the Secondary Index.

“Secondary Market”—Any marketplace or other alternative trading system, as determined by the Sponsor, on which the Shares may then be listed, quoted or traded, including but not limited to, NYSE Arca.

“Securities Act”—The Securities Act of 1933, as amended.

“Seed Shares”—10,000 Shares at a per-Share price equal to \$10, delivered on May 31, 2024 in exchange for \$100,000 in proceeds to the Trust. The Seed Shares are currently anticipated to be redeemed for cash in connection with, and immediately prior to the consummation of, the Initial Distribution.

“Settlement Balance”—An account controlled and maintained by the Custodian to which cash and digital assets of the Trust are credited on the Trust’s behalf.

“**Shares**”—Common units of fractional undivided beneficial interest in, and ownership of, the Trust.

“**SIPC**”—The Securities Investor Protection Corporation.

“**Sponsor**”—Grayscale Investments, LLC.

“**Sponsor-paid Expenses**”—The fees and expenses incurred by the Trust in the ordinary course of its affairs that the Sponsor is obligated to assume and pay, excluding taxes, but including: (i) the Marketing Fee, (ii) the Administrator Fee, (iii) the Custodian Fee and fees for any other security vendor engaged by the Trust, (iv) the Transfer Agent fee, (v) the Trustee fee, (vi) the fees and expenses related to the listing, quotation or trading of the Shares on any Secondary Market (including customary legal, marketing and audit fees and expenses) in an amount up to \$600,000 in any given fiscal year, (vii) ordinary course, legal fees and expenses, (viii) audit fees, (ix) regulatory fees, including, if applicable, any fees relating to the registration of the Shares under the Securities Act or the Exchange Act, (x) printing and mailing costs, (xi) costs of maintaining the Trust’s website and (xii) applicable license fees, provided that any expense that qualifies as an Additional Trust Expense will be deemed to be an Additional Trust Expense and not a Sponsor-paid Expense.

“**Sponsor’s Fee**”—A fee, payable in Ether, which accrues daily in U.S. dollars at an annual rate of 0.25% of the NAV Fee Basis Amount of the Trust as of 4:00 p.m., New York time, on each day; *provided* that for a day that is not a business day, the calculation of the Sponsor’s Fee will be based on the NAV Fee Basis Amount from the most recent business day, reduced by the accrued and unpaid Sponsor’s Fee for such most recent business day and for each day after such most recent business day and prior to the relevant calculation date. The Sponsor has determined to waive a portion of the Sponsor’s Fee for the first 12 months beginning on the commencement of trading of the Shares on NYSE Arca, as described in more detail under “The Offering—Trust Expenses.”

“**Staking**”—Using Ether, or permitting Ether to be used, directly or indirectly, through an agent or otherwise, in the Ethereum Network’s proof-of-stake validation protocol, in exchange for the receipt of consideration, including, but not limited to, staking rewards paid in fiat currency or paid in kind.

“**Total Basket Amount**”—With respect to any creation or redemption order, the applicable Basket Amount multiplied by the number of Baskets being created or redeemed.

“**Total Basket NAV**”—The applicable Basket NAV Amount multiplied by the number of Baskets being created or redeemed.

“**Transfer Agency and Service Agreement**”—The agreement between the Sponsor and the Transfer Agent which sets forth the obligations and responsibilities of the Transfer Agent with respect to transfer agency services and related matters.

“**Transfer Agent**”—The Bank of New York Mellon, a New York corporation authorized to do a banking business.

“**Transfer Agent Fee**”—Fee payable to the Transfer Agent for services it provides to the Trust, which the Sponsor will pay to the Transfer Agent as a Sponsor-paid Expense.

“**Treasury Regulations**”—The regulations, including proposed or temporary regulations, promulgated under the Code.

“**Trust**”—Grayscale Ethereum Mini Trust (ETH), a Delaware statutory trust, formed on April 23, 2024 under the DSTA.

“**Trust Agreement**”—The Amended and Restated Declaration of Trust and Trust Agreement, dated as of July 17, 2024 between the Trustee and the Sponsor establishing and governing the operations of the Trust, and as may be amended from time to time.

“Trustee”—CSC Delaware Trust Company, a Delaware trust company, is the Delaware trustee of the Trust.

“U.S.”—United States.

“U.S. dollar” or **“\$”**—United States dollar or dollars.

“Variable Fee”—An amount in cash based on the Total Basket NAV, which shall be paid by the Authorized Participant in connection with Variable Fee Cash Orders. The amount may be changed by the Sponsor in its sole discretion at any time.

“Variable Fee Cash Order”—A Cash Order pursuant to which any price differential between (x) the Total Basket NAV on the trade date and (y) the price realized in acquiring or disposing of the corresponding Total Basket Amount, as the case may be, will be borne solely by the applicable Liquidity Provider.

“Vault Balance”—A segregated custody account controlled and secured by the Custodian to store private keys, which allow for the transfer of ownership or control of the Trust’s Ether on the Trust’s behalf.

“Zcash” or **“ZEC”**—A type of digital asset based on an open source cryptographic protocol existing on the Zcash network.

INDEX TO FINANCIAL STATEMENTS

Grayscale Ethereum Mini Trust (ETH) Annual Financial Statements	<u>Page</u>
Report of Independent Registered Public Accounting Firm	F-2
Statement of Assets and Liabilities at May 31, 2024	F-3
Notes to Financial Statements	F-4

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholder and the Sponsor of
Grayscale Ethereum Mini Trust (ETH):

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of Grayscale Ethereum Mini Trust (ETH) (the Trust) as of May 31, 2024, and the related notes (collectively, the financial statements). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Trust as of May 31, 2024, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Trust in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

/s/ KPMG LLP

We have served as the Trust's auditor since 2024.

See accompanying notes to the financial statements.

GRAYSCALE ETHEREUM MINI TRUST (ETH) NOTES TO THE FINANCIAL STATEMENTS

1. Organization

Grayscale Ethereum Mini Trust (ETH) (the “Trust”) is a Delaware Statutory Trust that was formed on April 23, 2024. Grayscale Investments, LLC (“Grayscale” or the “Sponsor”) acts as the Sponsor of the Trust and is a wholly owned subsidiary of Digital Currency Group, Inc. (“DCG”). The Sponsor is responsible for the day-to-day administration of the Trust pursuant to the provisions of the Trust Agreement. The administrator for the Trust (the “Administrator”) is BNY Mellon Asset Servicing, a division of The Bank of New York Mellon. BNY Mellon Asset Servicing provides administration and accounting services to the Trust. The Administrator’s fees are paid on behalf of the Trust by the Sponsor.

In general, the Trust intends to hold Ethereum (“Ether”) and, from time to time, issues common units of fractional undivided beneficial interest (“Shares”) in exchange for Ether. The Trust will seek to create and redeem Shares at such times and for such periods as determined by the Sponsor, but only in one or more whole Baskets. A Basket shall equal 10,000 Shares. The creation of a Basket will require the delivery to the Trust the number of Ether represented by one Share immediately prior to such creation multiplied by 10,000. The redemption of a Basket will require distribution by the Trust the number of Ether represented by one Share immediately prior to such redemption multiplied by 10,000. The Trust may from time to time halt creations and redemptions for a variety of reasons, including in connection with forks, airdrops and other similar occurrences.

The Trust has had no operations other than a sale to Grayscale Securities, the Seed Capital Investor, of 10,000 shares of common stock for \$100,000 (\$10.00 per share). The Seed Capital Investor is an affiliate of the Sponsor. The Seed Capital Investor will not receive from the Trust, the Sponsor or any of their affiliates any fee or other compensation in connection with the initial seed sale.

The Trust’s investment objective is for the value of the Shares (based on Ether per Share) to reflect the value of Ether held by the Trust, less the Trust’s expenses and other liabilities.

2. Summary of Significant Accounting Policies

The following is a summary of significant accounting policies followed by the Trust:

The financial statement has been prepared in accordance with generally accepted accounting principles in the United States (“GAAP”). The Trust intends to qualify as an investment company for accounting purposes pursuant to the accounting and reporting guidance under Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 946, *Financial Services—Investment Companies*. The Trust will use fair value as its method of accounting for Ether in accordance with its classification as an investment company for accounting purposes. The Trust is not a registered investment company under the Investment Company Act of 1940. GAAP requires management to make estimates and assumptions that affect the reported amounts in the financial statements and accompanying notes. Actual results could differ from those estimates and these differences could be material.

Indemnifications

In the normal course of business, the Trust enters into certain contracts that provide a variety of indemnities, including contracts with the Sponsor and affiliates of the Sponsor, DCG and its officers, directors, employees, subsidiaries and affiliates, and Coinbase Custody Trust Company, LLC (the “Custodian”) as well as others relating to services provided to the Trust. The Trust’s maximum exposure under these and its other indemnities is unknown. However, although the Sponsor has determined that there are no liabilities that currently exist under these indemnities, there can be no assurances in this regard, there is no expectation that any will occur in the future.

Cash and Cash Equivalents

Cash includes non-interest bearing, non-restricted cash maintained with one banking institution that does not exceed U.S. federally insured limits.

Fair Value Measurement

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the ‘exit price’) in an orderly transaction between market participants at the measurement date.

GAAP utilizes a fair value hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Trust. Unobservable inputs reflect the Trust’s assumptions about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

The fair value hierarchy is categorized into three levels based on the inputs as follows:

- Level 1 – Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Trust has the ability to access. Since valuations are based on quoted prices that are readily and regularly available in an active market, these valuations do not entail a significant degree of judgment.
- Level 2 – Valuations based on quoted prices in markets that are not active or for which significant inputs are observable, either directly or indirectly.
- Level 3 – Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

The availability of valuation techniques and observable inputs can vary by investment. To the extent that valuations are based on sources that are less observable or unobservable in the market, the determination of fair value requires more judgment. Fair value estimates do not necessarily represent the amounts that may be ultimately realized by the Trust.

Calculation of Net Asset Value

The Trust’s Ether will be carried, for financial statement purposes, at fair value, as required by GAAP. The Trust’s policy will be to determine the fair value of Ether based on the price provided by the Digital Asset Market that the Trust considers its principal market as of 4:00 p.m., New York time, on the valuation date. The net asset value of the Trust determined on a GAAP basis is referred to as Principal Market NAV.

The Trust will use the Index Price to calculate its net asset value (“NAV”) which is the aggregate value, expressed in U.S. dollars, of the Trust’s assets (other than U.S. dollars or other fiat currency), less the U.S. dollar value of the Trust’s expenses and other liabilities. NAV per Share is calculated by dividing NAV by the number of Shares currently outstanding. NAV and NAV per Share are not measures calculated in accordance with GAAP. NAV is not intended to be a substitute for the Trust’s Principal Market NAV calculated in accordance with GAAP, and NAV per Share is not intended to be a substitute for the Trust’s Principal Market NAV per Share calculated in accordance with GAAP.

Federal Income Taxes

The Trust is treated as a grantor trust for federal income tax purposes, and, therefore, no provision for federal income taxes is required. Any interest, expenses, gains and losses are passed through to the holders of Shares of

the Trust. The Sponsor has reviewed the tax positions as of May 31, 2024 and has determined that there are no uncertain tax positions taken by the Trust, and that no provision for income tax is required in the Trust's financial statement.

3. Trust Expenses

The Trust will pay to the Sponsor a Sponsor's fee in accordance with the Trust agreement. The Sponsor's fee shall be included in the Trust agreement prior to the commencement of trading of Shares on the NYSE Arca. In exchange for the Sponsor's Fee, the Sponsor shall assume and pay all fees and other expenses incurred by the Trust in the ordinary course of its affairs, excluding taxes, but including: (i) the Marketing Fee, (ii) the Administrator Fee, (iii) the Custodian Fee, (iv) the Transfer Agent fee, (v) the Trustee fee, (vi) the fees and expenses related to the listing, quotation or trading of the Shares on any Secondary Market (including customary legal, marketing and audit fees and expenses) in an amount up to \$600,000 in any given Fiscal Year, (vii) ordinary course legal fees and expenses, (viii) audit fees, (ix) regulatory fees, including, if applicable, any fees relating to the registration of the Shares under the Securities Act or the Exchange Act, (x) printing and mailing costs, (xi) costs of maintaining the Trust's website and (xii) applicable license fees.

The Sponsor, from time to time, may temporarily waive all or a portion of the Sponsor's Fee of the Trust in its discretion for stated periods of time. Presently, the Sponsor does not intend to waive any of the Sponsor's Fee for the Trust and there are no circumstances under which the Sponsor has determined it will definitely waive the fee.

There have been no Sponsor's fees incurred to date.

4. Related Parties

The Trust considered the following entities, their directors, and certain employees to be related parties of the Trust: DCG, Genesis, Grayscale and Grayscale Securities.

The Sponsor's parent, an affiliate of the Trust, holds a minority interest in Coinbase, Inc., the parent company of the Custodian, that represents less than 1.0% of Coinbase Inc.'s ownership.

As of May 31, 2024, Grayscale Securities, an affiliate of the Sponsor, owned 10,000 Shares of the Trust.

As of May 31, 2024, there are no amounts due to or from the related parties of the Trust.

5. Commitments and Contingent Liabilities

In the normal course of business, the Trust may enter into contracts with service providers that contain general indemnification clauses, as disclosed in Note 2, Indemnifications. The Trust's maximum exposure under these arrangements is unknown as this would involve future claims that may be against the Trust which cannot be predicted with any certainty.

6. Subsequent Events

There are no known events that have occurred that require adjustment or additional disclosure other than that which has already been disclosed in these notes to the financial statements.

PRELIMINARY PROSPECTUS
—————

, 2024

PART II
INFORMATION NOT REQUIRED IN PROSPECTUS

Item 13. Other Expenses of Issuance and Distribution

The Registrant (“Registrant” or “Trust”) does not bear any expenses incurred in connection with the issuance and distribution of the securities being registered. These expenses will be paid by Grayscale Investments, LLC, the sponsor of the Registrant (“Sponsor”).

Item 14. Indemnification of Directors and Officers

Section 2.4(a) of the Trust Agreement (“Trust Agreement”) between CSC Delaware Trust Company, the Registrant’s Trustee (“Trustee”), and the Sponsor provides that the Trustee and any of the officers, directors, employees and agents of the Trustee (the “Indemnified Persons”) shall be indemnified by the Trust as primary obligor and held harmless against any loss, damage, liability, claim, action, suit, cost, expense, disbursement (including the reasonable fees and expenses of counsel), tax or penalty of any kind and nature whatsoever (collectively, “Expenses”), arising out of, imposed upon or asserted at any time against such Indemnified Person in connection with the performance of its obligations under the Trust Agreement, the creation, operation or termination of the Trust or the transactions contemplated therein; provided, however, that neither the Trust nor the Sponsor shall be required to indemnify any Indemnified Person for any Expenses which are a result of the willful misconduct, bad faith or gross negligence of the Indemnified Person. If the Trust shall have insufficient assets or improperly refuses to pay an Indemnified Person within 60 days of a request for payment owed under Section 2.4 of the Trust Agreement, the Sponsor shall, as secondary obligor, compensate or reimburse the Trustee or indemnify, defend and hold harmless an Indemnified Person as if it were the primary obligor under Section 2.4 of the Trust Agreement. Any amount payable to an Indemnified Person under Section 2.4 of the Trust Agreement may be payable in advance and shall be secured by a lien on the Trust property. The obligations of the Sponsor and the Trust to indemnify the Indemnified Persons under this Section 2.4 shall survive the termination of the Trust Agreement.

Section 6.7 of the Trust Agreement provides that the Sponsor, its affiliates and their respective members, managers, directors, officers, employees, agents and controlling persons (each a “Sponsor Indemnified Party”) shall be indemnified by the Trust against any loss, judgment, liability, expense and amount paid in settlement of any claims sustained by it in connection with its activities for the Trust, provided that (i) the Sponsor Indemnified Party was acting on behalf of or performing services for the Trust and has determined, in good faith, that such course of conduct was in the best interests of the Trust and such liability or loss was not the result of fraud, gross negligence, bad faith, willful misconduct, or a material breach of the Trust Agreement on the part of the Sponsor Indemnified Party and (ii) any such indemnification will only be recoverable from the Ether and proceeds from the disposition of Ether on deposit in the Trust’s accounts as well as any rights of the Trust pursuant to any other agreements to which the Trust is a party.

All rights to indemnification permitted in Section 6.7 of the Trust Agreement and payment of associated expenses shall not be affected by the dissolution or other cessation to exist of the Sponsor Indemnified Party, or the withdrawal, adjudication of bankruptcy or insolvency of the Sponsor Indemnified Party, or the filing of a voluntary or involuntary petition in bankruptcy under Title 11 of the Internal Revenue Code of 1986, as amended, by or against the Sponsor Indemnified Party.

Notwithstanding the other provisions of Section 6.7 of the Trust Agreement, the Sponsor Indemnified Party and any person acting as broker-dealer for the Trust shall not be indemnified for any losses, liabilities or expenses arising from or out of an alleged violation of U.S. federal or state securities laws unless (i) there has been a successful adjudication on the merits of each count involving alleged securities law violations as to the particular indemnitee and the court approves the indemnification of such expenses (including, without limitation, litigation costs), (ii) such claims have been dismissed with prejudice on the merits by a court of competent

jurisdiction as to the particular indemnitee and the court approves the indemnification of such expenses (including, without limitation, litigation costs) or (iii) a court of competent jurisdiction approves a settlement of the claims against a particular indemnitee and finds that indemnification of the settlement and related costs should be made. The Trust shall not incur the cost of that portion of any insurance which insures any party against any liability, the indemnification of which is prohibited by the Trust Agreement. Expenses incurred in defending a threatened or pending civil, administrative or criminal action suit or proceeding against the Sponsor Indemnified Party shall be paid by the Trust in advance of the final disposition of such action, suit or proceeding, if (i) the legal action relates to the performance of duties or services by the Sponsor Indemnified Party on behalf of the Trust; (ii) the legal action is initiated by a third party who is not a shareholder of the Trust or the legal action is initiated by a shareholder of the Trust and a court of competent jurisdiction specifically approves such advance; and (iii) the Sponsor Indemnified Party undertakes to repay the advanced funds with interest to the Trust in cases in which it is not entitled to indemnification under Section 6.7 of the Trust Agreement. In the event the Trust is made a party to any claim, dispute, demand or litigation or otherwise incurs any loss, liability, damage, cost or expense as a result of or in connection with any shareholder of the Trust's (or assignee's) obligations or liabilities unrelated to Trust business, such shareholder of the Trust (or assignees cumulatively) shall indemnify, defend, hold harmless, and reimburse the Trust for all such loss, liability, damage, cost and expense incurred, including attorneys' and accountants' fees.

Item 15. Recent Sales of Unregistered Securities

The following sets forth information regarding securities sold or issued by the registrant in the three years preceding the date of this registration statement without registration under the Securities Act of 1933:

On May 31, 2024, the Sponsor purchased the Seed Shares, comprising 10,000 Shares at a per Share price of \$10. The issuance was exempt from registration under the Securities Act pursuant to Section 4(a)(2) thereof as a transaction not involving a public offering.

In addition, the Sponsor currently intends to effectuate the Initial Distribution Basket Creation of the Trust through the Initial Distribution, resulting from a contribution by Grayscale Ethereum Trust (ETH) (“ETHE”) of a certain amount of Ether to the Trust. The newly created Shares of the Trust will then be distributed on the Distribution Date to ETHE Shareholders (determined as of a Record Date to be determined by the Sponsor), pro rata based on a 1:1 ratio, on the Distribution Date. No consideration will be paid by ETHE Shareholders, and such issuances will be exempt from registration under the Securities Act as they do not involve a “sale” of securities for purposes of Section 5 of the Securities Act.

Item 16. Exhibits and Financial Statement Schedules

(a) The following exhibits are filed as part of this registration statement:

Exhibit Number	Description
3.1#	Certificate of Trust.
4.1	Amended and Restated Declaration of Trust and Trust Agreement, by and among CSC Delaware Trust Company, as trustee, and Grayscale Investments, LLC, as sponsor.
4.2#	Form of Participant Agreement.
5.1	Opinion of Richards, Layton & Finger, P.A., as special Delaware counsel to the Trust.

Exhibit Number	Description
8.1	Opinion of Davis Polk & Wardwell LLP, as special tax counsel to the Trust.
10.1†#	Prime Broker Agreement.
10.2#	Fund Administration and Accounting Agreement.
10.3†#	Index License Agreement, dated February 1, 2022, between the Sponsor, and the Index Provider.
10.4†#	Amendment No. 1 to the Index License Agreement, dated June 20, 2023, between the Sponsor and Index Provider.
10.5†#	Marketing Agent Agreement.
10.6#	Transfer Agency and Service Agreement.
23.1	Consent of KPMG LLP, Independent Registered Certified Public Accounting Firm.
23.2	Consent of Richards, Layton & Finger, P.A., as special Delaware counsel to the Trust, included in Exhibit 5.1.
23.3	Consent of Davis Polk & Wardwell LLP, as special tax counsel to the Trust, included in Exhibit 8.1.
24.1#	Power of Attorney of certain officers and directors of the Sponsor (included on the signature page of the original filing of this Registration Statement).
107#	Filing Fee Table.

† Portions of this exhibit (indicated by asterisks) have been omitted as the Registrant has determined that (i) the omitted information is not material and (ii) the omitted information is of the type that the Registrant treats as private or confidential.

Previously filed.

(b) No financial statement schedules are provided because the information called for is not required or is shown either in the financial statements or the notes hereto.

Item 17. Undertakings

- (a) The undersigned registrant hereby undertakes:
- (1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:
 - (i) To include any prospectus required by section 10(a)(3) of the Securities Act of 1933;
 - (ii) To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than 20% change in the maximum aggregate offering price set forth in the “Calculation of Filing Fee Tables or “Calculation of Registration Fee” table, as applicable in the effective registration statement; and

- (iii) To include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement.

Provided, however, that:

Paragraphs (1)(i), (ii), and (iii) of this section do not apply if the registration statement is on Form S-1 and the information required to be included in a post-effective amendment by those paragraphs is contained in reports filed with or furnished to the Commission by the registrant pursuant to section 13 or section 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m or 78o(d)) that are incorporated by reference in the registration statement; and

- (2) That, for the purpose of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.
- (3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.
- (4) That, for the purpose of determining liability under the Securities Act of 1933 to any purchaser:
 - (i) If the registrant is relying on Rule 430B:
 - (A) Each prospectus filed by the registrant pursuant to Rule 424(b)(3) shall be deemed to be part of the registration statement as of the date the filed prospectus was deemed part of and included in the registration statement; and
 - (B) Each prospectus required to be filed pursuant to Rule 424(b)(2), (b)(5), or (b)(7) as part of a registration statement in reliance on Rule 430B relating to an offering made pursuant to Rule 415(a)(1)(i), (vii), or (x) for the purpose of providing the information required by section 10(a) of the Securities Act of 1933 shall be deemed to be part of and included in the registration statement as of the earlier of the date such form of prospectus is first used after effectiveness or the date of the first contract of sale of securities in the offering described in the prospectus. As provided in Rule 430B, for liability purposes of the issuer and any person that is at that date an underwriter, such date shall be deemed to be a new effective date of the registration statement relating to the securities in the registration statement to which that prospectus relates, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof. Provided, however, that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such effective date, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such effective date; or
 - (ii) If the registrant is subject to Rule 430C, each prospectus filed pursuant to Rule 424(b) as part of a registration statement relating to an offering, other than registration statements relying on Rule 430B or other than prospectuses filed in reliance on Rule 430A, shall be deemed to be part of and included in the registration statement as of the date it is first used after effectiveness. Provided, however, that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such

first use, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such date of first use.

- (5) That, for the purpose of determining liability of the registrant under the Securities Act of 1933 to any purchaser in the initial distribution of the securities:

The undersigned registrant undertakes that in a primary offering of securities of the undersigned registrant pursuant to this registration statement, regardless of the underwriting method used to sell the securities to the purchaser, if the securities are offered or sold to such purchaser by means of any of the following communications, the undersigned registrant will be a seller to the purchaser and will be considered to offer or sell such securities to such purchaser:

- (i) Any preliminary prospectus or prospectus of the undersigned registrant relating to the offering required to be filed pursuant to Rule 424;
 - (ii) Any free writing prospectus relating to the offering prepared by or on behalf of the undersigned registrant or used or referred to by the undersigned registrant;
 - (iii) The portion of any other free writing prospectus relating to the offering containing material information about the undersigned registrant or its securities provided by or on behalf of the undersigned registrant; and
 - (iv) Any other communication that is an offer in the offering made by the undersigned registrant to the purchaser.
- (b) The undersigned registrant hereby undertakes that, for purposes of determining any liability under the Securities Act of 1933, each filing of the registrant's annual report pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (and, where applicable, each filing of an employee benefit plan's annual report pursuant to Section 15(d) of the Securities Exchange Act of 1934) that is incorporated by reference in the registration statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.
- (c) Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act of 1933 and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act of 1933 and will be governed by the final adjudication of such issue.
- (1) For purposes of determining any liability under the Securities Act of 1933, the information omitted from the form of prospectus filed as part of this registration statement in reliance upon Rule 430A and contained in a form of prospectus filed by the registrant pursuant to Rule 424(b)(1) or (4) or 497(h) under the Securities Act shall be deemed to be part of this registration statement as of the time it was declared effective.
 - (2) For the purpose of determining any liability under the Securities Act of 1933, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

SIGNATURES

Pursuant to the requirements of the Securities Act of 1933, the registrant has duly caused this registration statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of New York, New York, on July 17, 2024.

GRAYSCALE ETHEREUM MINI TRUST (ETH)

AMENDED AND RESTATED

DECLARATION OF TRUST

AND TRUST AGREEMENT

This **AMENDED AND RESTATED DECLARATION OF TRUST AND TRUST AGREEMENT** of **GRAYSCALE ETHEREUM MINI TRUST (ETH)** is made and entered into as of the 17th day of July, 2024, by and among **GRAYSCALE INVESTMENTS, LLC**, a Delaware limited liability company, **CSC DELAWARE TRUST COMPANY** (formerly known as Delaware Trust Company), a Delaware corporation, as trustee, and the **SHAREHOLDERS** from time to time hereunder.

* * *

RECITALS

WHEREAS, the Sponsor and the Trustee entered into the Declaration of Trust and Trust Agreement dated as of April 23, 2024, (as may be further amended from time to time, the “**Existing Agreement**”);

WHEREAS, on May 31, 2024, the Sponsor purchased \$100,000 in Shares (as defined below) (the “**Seed Shares**”) comprising 10,000 Shares at a per share price of \$10.00;

WHEREAS, it is currently anticipated that, in connection with the Initial Distribution (as defined below), the Trust will issue Shares to the Grayscale Ethereum Trust (ETH) (“**ETHE**”) in consideration for a contribution of Ether from ETHE to the Trust (the “**Initial Issuance**”);

WHEREAS, it is currently anticipated that, substantially concurrent with the Initial Issuance, and immediately prior thereto, the Trust will distribute the aforementioned \$100,000 to the Sponsor in complete redemption of the Seed Shares representing the Sponsor’s beneficial interest in the Trust;

WHEREAS, it is currently anticipated that, immediately following the Initial Issuance, ETHE will distribute all of the Shares issued to it in the Initial Issuance to the shareholders of ETHE as of a previously determined record date (the “**Record Date ETHE Shareholders**”), on a pro rata basis based on the Record Date ETHE Shareholders’ holdings of shares of ETHE as of such record date (the “**Initial Distribution**”), at which time the Record Date ETHE Shareholders shall be admitted as Shareholders of the Trust;

WHEREAS, the Sponsor and the Trustee wish to amend the Existing Agreement pursuant to Section 8 thereof.

NOW, THEREFORE, pursuant to Section 8 of the Existing Agreement, the Trustee and the Sponsor hereby amend and restate the Existing Agreement in its entirety as set forth below.

ARTICLE I

DEFINITIONS; THE TRUST

SECTION 1.1 *Definitions*. As used in this Trust Agreement, the following terms shall have the following meanings unless the context otherwise requires:

“**Actual Exchange Rate**” means, with respect to any particular asset, at any time, the price per single unit of such asset (determined net of any associated fees) at which the Trust is able to sell such asset for U.S. Dollars (or other applicable fiat currency) at such time to enable the Trust to timely pay any Additional Trust Expenses, through use of the Sponsor’s commercially reasonable efforts to obtain the highest such price.

“**Additional Trust Expenses**” has the meaning set forth in Section 6.8(b).

“**Administrator**” means any Person or Persons from time to time engaged by the Sponsor to assist in the administration of the Shares.

“**Administrator Fee**” means the fee payable to any Administrator for services it provides to the Trust, which the Sponsor shall pay as a Sponsor-paid Expense.

“**Affiliate**” means (i) any Person directly or indirectly owning, controlling or holding with power to vote 10% or more of the outstanding voting securities of such Person, (ii) any Person 10% or more of whose outstanding voting securities are directly or indirectly owned, controlled or held with power to vote by such Person, (iii) any Person, directly or indirectly, controlling, controlled by or under common control of such Person, (iv) any employee, officer, director, member, manager or partner of such Person, or (v) if such Person is an employee, officer, director, member, manager or partner, any Person for which such Person acts in any such capacity.

“**Annual Report**” means (i) the Trust’s most recent annual report prepared and publicly disseminated pursuant to the standards of any Secondary Market on which the Shares are then listed, quoted or traded or (ii) if the Shares are then registered under the Exchange Act, the Trust’s most recent annual report on Form 10-K prepared and filed in accordance with the rules and regulations of the SEC.

“**APA Procedures**” has the meaning assigned thereto in Section 3.3(a).

“**Authorized Participant**” means a Person that (i) is a registered broker-dealer, (ii) has entered into an Authorized Participant Agreement, and (iii) in the case of Authorized Participants creating and redeeming Shares through In-Kind Orders, has access to an Authorized Participant Self-Administered Account.

“**Authorized Participant Agreement**” means an agreement among the Trust, the Sponsor, the Transfer Agent and an Authorized Participant, that provides the procedures for the creation and redemption of Baskets.

“**Authorized Participant Self-Administered Account**” means an Ether wallet address known to the Custodian as belonging to such Authorized Participant or its designee.

“**Basket**” means a block of 10,000 Shares.

“**Basket Amount**” means, on any Trade Date, the number of Ether required as of such Trade Date for each Creation Basket or Redemption Basket, as determined by dividing (x) the number of Ether owned by the Trust at 4:00 p.m., New York time, on such Trade Date, after deducting the number of Ether representing the U.S. Dollar value of accrued but unpaid fees and expenses of the Trust (in the case of any such fee and expense other than the Sponsor’s Fee, converted using the Index Price at such time, and carried to the eighth decimal place), by (y) the number of Shares outstanding at such time (with the quotient so obtained calculated to one one-hundred-millionth of one Ether (i.e., carried to the eighth decimal place)), and multiplying such quotient by 10,000.

“**Business Day**” means any day other than a Saturday, Sunday or other day on which national securities exchanges are permitted or required to close for business in New York, New York.

“**Cash Orders**” means orders for creations or redemptions of Shares other than through In-Kind Orders.

“**Certificate of Trust**” means the Certificate of Trust of the Trust, including all amendments thereto, in the form attached hereto as Exhibit A, filed with the Secretary of State of the State of Delaware pursuant to Section 3810 of the Delaware Trust Statute.

“**CFTC**” means the Commodity Futures Trading Commission.

“**Code**” means the Internal Revenue Code of 1986, as amended.

“**Corporate Trust Office**” means the principal office at which at any particular time the corporate trust business of the Trustee is administered, which office at the date hereof is located at 251 Little Falls Drive, Wilmington, DE 19808.

“**Covered Person**” means the Sponsor and its Affiliates and their respective members, managers, directors, officers, employees, agents and controlling persons.

“**Creation Basket**” means a Basket issued by the Trust upon the deposit of the Basket Amount with the Custodian.

“**Creation Order**” has the meaning assigned thereto in Section 3.3(a)(i).

“**Creation Settlement Date**” means, with respect to any Creation Order, the Business Day on which such Creation Order settles, as specified in the APA Procedures.

“**CTA**” has the meaning assigned thereto in Section 13.14.

“**Custodian**” means any Person or Persons from time to time engaged to provide custodian, security or related services (including, for the avoidance of doubt, prime brokerage services) to the Trust pursuant to authority delegated by the Sponsor.

“**Custodian Fee**” means the fee payable to any Custodian for the services it provides to the Trust, which the Sponsor shall pay as a Sponsor-paid Expense.

“**Delaware Trust Statute**” means the Delaware Statutory Trust Act, Chapter 38 of Title 12 of the Delaware Code, 12 Del. C. § 3801 et seq., as the same may be amended from time-to-time.

“**Distributor**” means any Person or Persons from time to time engaged to provide distribution services or related services to the Trust pursuant to authority delegated by the Sponsor.

“**ETHE**” has the meaning set forth in the recitals hereto.

“**Ethereum Network**” means the online, end-user-to-end-user network hosting a public transaction ledger, known as a blockchain, and the source code comprising the basis for the cryptographic and algorithmic protocols governing the Ethereum network.

“**Ether**” means Ethereum, a type of virtual currency based on an open source cryptographic protocol existing on the Ethereum Network as determined by the Sponsor in accordance with [Section 6.2\(m\)](#), and the assets underlying the Trust’s Shares.

“**Ether Account**” means collectively, the Vault Balance, the Settlement Balance and any subaccounts associated therewith.

“**Event of Withdrawal**” has the meaning set forth in [Section 12.1\(a\)\(iv\)](#) hereof.

“**Exchange Act**” means the Securities Exchange Act of 1934, as amended.

“**Existing Agreement**” has the meaning set forth in the recitals hereto.

“**Expenses**” has the meaning set forth in [Section 2.4](#).

“**FinCEN**” means the Financial Crimes Enforcement Network, a bureau of the U.S. Department of Treasury.

“**Fiscal Year**” has the meaning set forth in [Article IX](#) hereof.

“**GAAP**” means U.S. generally accepted accounting principles.

“**In-Kind Orders**” means orders for creations or redemptions in which an Authorized Participant or its designees will deliver Ether from, or receive Ether in, an Authorized Participant Self-Administered Account.

“**Incidental Rights**” means the rights to acquire, or otherwise establish dominion and control over, any virtual currency or other asset or right, which rights are incident to the Trust’s ownership of Ether and arise without any action of the Trust, or of the Sponsor or Trustee on behalf of the Trust.

“**Indemnified Persons**” has the meaning assigned to such term in Section 2.4.

“**Index Price**” has the meaning ascribed to such term in the Trust’s filings with the SEC.

“**Initial Distribution**” has the meaning set forth in the recitals hereto.

“**Initial Issuance**” has the meaning set forth in the recitals hereto.

“**IR Virtual Currency**” means any virtual currency or other asset or right acquired by the Trust through the exercise (subject to Section 1.5(b) and Section 6.4(m)) of any Incidental Right.

“**IRS**” means the U.S. Internal Revenue Service or any successor thereto.

“**Liquidating Trustee**” has the meaning assigned thereto in Section 12.2.

“**Liquidity Provider**” means an entity eligible to facilitate the purchase and sale of Ether in connection with creations or redemptions pursuant to Cash Orders.

“**Liquidity Provider Account**” means, with respect to any Liquidity Provider, an Ether wallet address known to the Custodian as belonging to such Liquidity Provider.

“**Marketing Agent**” means any Person or Persons from time to time engaged to provide marketing services or related services to the Trust pursuant to authority delegated by the Sponsor.

“**Marketing Fee**” means the fee payable to any Marketing Agent for services it provides to the Trust, which the Sponsor shall pay as a Sponsor-paid Expense.

“**NAV**” means, at any time, the aggregate value, expressed in U.S. Dollars, of the Trust’s assets (other than U.S. Dollars or other fiat currency), less its liabilities (which include estimated accrued but unpaid fees and expenses), calculated in accordance with Section 8.4.

“**NAV Fee Basis Amount**” has the meaning assigned thereto in Section 8.4.

“**Percentage Interest**” means, with respect to any Shareholder at any time, a fraction, the numerator of which is the number of Shares held by such Shareholder and the denominator of which is the total number of Shares outstanding, in each case as of 4:00 p.m., New York time, on the date of determination.

“**Person**” means any natural person, partnership, limited liability company, statutory trust, corporation, association or other legal entity.

“**Purchase Agreement**” means an agreement among the Trust, the Sponsor and any Shareholder through which the Shareholder agrees to transfer Ether to the Ether Account in exchange for the creation and issuance of Shares.

“**Quarterly Report**” means (i) the Trust’s most recent quarterly report prepared and publicly disseminated pursuant to the standards of any Secondary Market on which the Shares are then listed, quoted or traded or (ii) if the Shares are then registered under the Exchange Act, the Trust’s most recent quarterly report on Form 10-Q prepared and filed in accordance with the rules and regulations of the SEC.

“**Record Date ETHE Shareholders**” has the meaning set forth in the recitals hereto.

“**Redemption Basket**” means a Basket redeemed by the Trust in exchange for Ether in an amount equal to the Basket Amount.

“**Redemption Order**” has the meaning assigned thereto in Section 5.2(a).

“**Redemption Settlement Date**” means, with respect to any Redemption Order, the Business Day on which such Redemption Order settles, as specified in the APA Procedures.

“**Rules**” has the meaning assigned thereto in Section 13.3.

“**SEC**” means the Securities and Exchange Commission.

“**Secondary Market**” means any marketplace or other alternative trading system, as determined by the Sponsor, on which the Shares may then be listed, quoted or traded, including but not limited to, the OTCQX tier of the OTC Markets Group Inc. and NYSE Arca, Inc.

“**Securities Act**” means the Securities Act of 1933, as amended.

“**Seed Shares**” has the meaning set forth in the recitals hereto.

“**Settlement Balance**” means the one or more omnibus accounts maintained by the Custodian and in which a portion of the Trust’s Ether may be stored from time to time.

“**Shareholder**” means any Person that owns Shares.

“**Shares**” means the common units of fractional undivided beneficial interest in the profits, losses, distributions, capital and assets of, and ownership of, the Trust.

“**Sponsor**” means Grayscale Investments, LLC, or any substitute therefor as provided herein, or any successor thereto by merger or operation of law.

“**Sponsor-paid Expense**” and “**Sponsor-paid Expenses**” have the meaning set forth in Section 6.8(a)(v).

“**Sponsor’s Fee**” has the meaning set forth in Section 6.8(a)(i).

“**Total Basket Amount**” means, with respect to any Creation Order or Redemption Order, the applicable Basket Amount multiplied by the number of Creation Baskets or Redemption Baskets, as specified in the applicable Creation Order or Redemption Order.

“**Trade Date**” means, for any Creation Order or Redemption Order, the Business Day on which the Total Basket Amount with respect to such Creation Order or Redemption Order is determined in accordance with the APA Procedures.

“**Transfer Agent**” means any Person or Persons from time to time engaged to provide transfer agent services or related services to the Trust pursuant to authority delegated by the Sponsor.

“**Treasury Regulations**” means regulations, including proposed or temporary regulations, promulgated under the Code. References herein to specific provisions of proposed or temporary regulations shall include analogous provisions of final Treasury Regulations or other successor Treasury Regulations.

“**Trust**” means Grayscale Ethereum Mini Trust (ETH), a Delaware statutory trust formed pursuant to the Certificate of Trust, the affairs of which are governed by this Trust Agreement.

“**Trust Agreement**” means this Amended and Restated Declaration of Trust and Trust Agreement, as it may at any time or from time-to-time be amended.

“**Trust Counsel**” has the meaning set forth in Section 13.3.

“**Trustee**” means CSC Delaware Trust Company, its successors and assigns, or any substitute therefor as provided herein, acting not in its individual capacity but solely as trustee of the Trust.

“**Trust Estate**” means, without duplication, (i) all the Ether in the Trust’s accounts, including the Ether Account, (ii) all Incidental Rights held by the Trust, (iii) all IR Virtual Currency in the Trust’s accounts, (iv) all proceeds from the sale of Ether, Incidental Rights and IR Virtual Currency pending use of such cash for payment of Additional Trust Expenses or distribution to the Shareholders and (v) any rights of the Trust pursuant to any agreements, other than this Trust Agreement, to which the Trust is a party.

“**Trust Expense**” has the meaning set forth in Section 2.3.

“**U.S. Dollar**” means United States dollars.

“**Vault Balance**” means one or more segregated custody accounts of the Trust maintained by the Custodian to store private keys, which allow for the transfer of ownership or control of the Trust’s Ether on the Trust’s behalf.

SECTION 1.2 *Name*. The name of the Trust is “Grayscale Ethereum Mini Trust (ETH)” in which name the Trustee and the Sponsor shall cause the Trust to carry out its purposes as set forth in Section 1.5, make and execute contracts and other instruments in the name and on behalf of the Trust and sue and be sued in the name and on behalf of the Trust.

SECTION 1.3 *Delaware Trustee; Offices*.

(a) The sole Trustee of the Trust is CSC Delaware Trust Company, which is located at the Corporate Trust Office or at such other address in the State of Delaware as the Trustee may designate in writing to the Shareholders. The Trustee shall receive service of process on the Trust in the State of Delaware at the foregoing address. In the event CSC Delaware Trust Company resigns or is removed as the Trustee, the trustee of the Trust in the State of Delaware shall be the successor Trustee, subject to Section 2.1.

(b) The principal office of the Trust, and such additional offices as the Sponsor may establish, shall be located at such place or places inside or outside the State of Delaware as the Sponsor may designate from time to time in writing to the Trustee and the Shareholders. Initially, the principal office of the Trust shall be at c/o Grayscale Investments, LLC, 290 Harbor Drive, 4th Floor, Stamford, Connecticut 06902.

SECTION 1.4 *Declaration of Trust*. The Trust Estate shall be held in trust for the Shareholders. It is the intention of the parties hereto that the Trust shall be a statutory trust, under the Delaware Trust Statute and that this Trust Agreement shall constitute the governing instrument of the Trust. It is not the intention of the parties hereto to create a general partnership, limited partnership, limited liability company, joint stock association, corporation, bailment or any form of legal relationship other than a Delaware statutory trust that is treated as a grantor trust for U.S. federal income tax purposes and for purposes of applicable state and local tax laws. Nothing in this Trust Agreement shall be construed to make the Shareholders partners or members of a joint stock association. Effective as of the date hereof, the Trustee and the Sponsor shall have all of the rights, powers and duties set forth herein and in the Delaware Trust Statute with respect to accomplishing the purposes of the Trust. The Trustee has filed the certificate of trust required by Section 3810 of the Delaware Trust Statute in connection with the formation of the Trust under the Delaware Trust Statute.

SECTION 1.5 *Purposes and Powers*. (a) The purposes of the Trust shall be to (i) accept Ether for subscriptions of Shares in accordance with Article III hereof or accept cash (to be used to purchase Ether) for subscriptions of Shares in accordance with Section 13.13 hereof, to hold Ether, Incidental Rights and IR Virtual Currency, to distribute Ether (or cash from the sale of Ether) upon redemptions of Shares in accordance with Article V hereof (if authorized in accordance with Section 5.1 hereof) and to distribute shares of a liquidating trust or other vehicle formed to hold Ether,

Incidental Rights and IR Virtual Currency (or cash from the sale thereof) pursuant to Section 3.7 hereof or upon the liquidation of the Trust or at such intervals as the Sponsor may determine (it being understood that the Trust shall not create or redeem Shares at any time that it holds Incidental Rights, IR Virtual Currency or cash from the sale of Ether, Incidental Rights or IR Virtual Currency), and (ii) to enter into any lawful transaction and engage in any lawful activities in furtherance of or incidental to the foregoing. For the avoidance of doubt, such activities include any lawful action necessary or desirable in connection with the Trust's ownership of Incidental Rights, including the acquisition of IR Virtual Currency, except if such action would be prohibited by Section 1.5(b) or any other provision of this Trust Agreement. The Trust shall not engage in any business activity and shall not acquire or own any assets other than (i) Ether, (ii) Incidental Rights, (iii) if permissible under Section 1.5(b) and Section 6.4(m), IR Virtual Currency, and (iv) cash from the sale of any of the foregoing or take any of the actions set forth in Section 6.4. The Trust shall have all of the powers specified in Section 3.1 hereof as powers which may be exercised by a Sponsor on behalf of the Trust under this Trust Agreement.

(b) The Trust shall not take any action that could cause the Trust to be treated other than as a grantor trust for U.S. federal income tax purposes. Without limiting the generality of the foregoing, nothing in this Trust Agreement (including, for the avoidance of doubt, Section 1.5(a)) shall be construed to give the Trustee or the Sponsor the power to vary the investment of the Shareholders within the meaning of Section 301.7701-4(c) or similar provisions of the Treasury Regulations, nor shall the Trustee or the Sponsor take any action that would vary the investment of the Shareholders.

SECTION 1.6 Tax Treatment. Each of the parties hereto, by entering into this Trust Agreement, (i) expresses its intention that the Shares will qualify under applicable tax law as interests in a grantor trust which holds the Trust Estate, (ii) agrees that it will file its own U.S. federal, state and local income, franchise and other tax returns in a manner that is consistent with clause (i) of this Section 1.6 and with the classification of the Trust as a grantor trust, and (iii) agrees to use reasonable efforts to notify the Sponsor promptly upon a receipt of any notice from any taxing authority having jurisdiction over such holders of Shares with respect to the treatment of the Shares as anything other than interests in a grantor trust.

SECTION 1.7 Legal Title. Legal title to all of the Trust Estate shall be vested in the Trust as a separate legal entity; *provided, however*, that if applicable law in any jurisdiction requires legal title to any portion of the Trust Estate to be vested otherwise, the Sponsor may cause legal title to such portion of the Trust Estate to be held by or in the name of the Sponsor or any other Person (other than a Shareholder) as nominee.

ARTICLE II
THE TRUSTEE

SECTION 2.1 *Term; Resignation; Removal.*

(a) CSC Delaware Trust Company has been appointed and hereby agrees to serve as the Trustee of the Trust. The Trust shall have only one Trustee unless otherwise determined by the Sponsor. The Trustee shall serve until such time as the Trust is terminated or if the Sponsor removes the Trustee or the Trustee resigns. The Trustee is appointed to serve as the trustee of the Trust in the State of Delaware and shall at all times satisfy the requirements of Section 3807(a) of the Delaware Trust Statute and be authorized to exercise corporate trust powers under the laws of Delaware, having a combined capital, surplus and undivided profits of at least \$50,000,000 and subject to supervision or examination by federal or state authorities. If the Trustee publishes reports of condition at least annually, pursuant to law or to the requirements of the aforesaid supervising or examining authority, then for the purposes of this Article II the combined capital, surplus and undivided profits of the Trustee shall be deemed to be its combined capital and surplus as set forth in its most recent report of condition so published. In case at any time the Trustee shall cease to be eligible to serve as trustee of the Trust in accordance with the provisions of this Section 2.1, the Trustee shall resign promptly in the manner and with the effect specified in this Article II. The Trustee may have normal banking and trust relationships with the Sponsor and their respective Affiliates; *provided* that none of (i) the Sponsor, (ii) any Person involved in the organization or operation of the Sponsor or the Trust or (iii) any Affiliate of any of them may be the Trustee hereunder. The Trust shall have at least one trustee with a principal place of business in Delaware. It is understood and agreed by the parties hereto that the Trustee shall have none of the duties or liabilities of the Sponsor and shall have no obligation to supervise or monitor the Sponsor or otherwise manage the Trust.

(b) The Trustee is permitted to resign upon at least one hundred and eighty (180) days' notice to the Sponsor upon which date such resignation shall be effective.

(c) If at any time the Trustee shall cease to be eligible to serve as trustee of the Trust in accordance with the provisions of this Trust Agreement, or if at any time the Trustee shall become incapable of acting, or shall be adjudged bankrupt or insolvent, or a receiver of the Trustee or of its property shall be appointed, or any public officer shall take charge or control of the Trustee or of its property or affairs for the purpose of rehabilitation, conservation or liquidation, then the Sponsor may remove the Trustee and appoint a successor trustee by written instrument, in duplicate, which instrument shall be delivered to the Trustee so removed and the successor trustee. The Sponsor may at any time, upon sixty (60) days' prior notice to the Trustee, remove the Trustee and appoint a successor trustee by written instrument or instruments, in triplicate, signed by the Sponsor or its attorney-in-fact duly authorized, one complete set of which instruments shall be delivered to the Trustee so removed and one complete set to the successor so appointed.

SECTION 2.2 *Powers*. Except to the extent expressly set forth in Section 1.3 and this Article II, the duty and authority to manage the affairs of the Trust is vested in the Sponsor, which duty and authority the Sponsor may further delegate as provided herein, all pursuant to Section 3806(b)(7) of the Delaware Trust Statute. The duties of the Trustee shall be limited to (i) accepting legal process served on the Trust in the State of Delaware, (ii) the execution of any certificates required to be filed with the Secretary of State of the State of Delaware which the Trustee is required to execute under Section 3811 of the Delaware Trust Statute and (iii) any other duties specifically allocated to the Trustee in this Trust Agreement. The Trustee shall provide prompt notice to the Sponsor of its performance of any of the foregoing. The Sponsor shall reasonably keep the Trustee informed of any actions taken by the Sponsor with respect to the Trust that would reasonably be expected to affect the rights, obligations or liabilities of the Trustee hereunder or under the Delaware Trust Statute.

SECTION 2.3 *Compensation and Expenses of the Trustee*. The Trustee shall be entitled to receive from the Sponsor, as a Sponsor-paid Expense, reasonable compensation for its services hereunder as set forth in a separate fee agreement and shall be entitled to be reimbursed by the Sponsor on behalf of the Trust for reasonable out-of-pocket expenses incurred by it in the performance of its duties hereunder, including without limitation, the reasonable compensation, out-of-pocket expenses and disbursements of counsel, any experts and such other agents as the Trustee may employ in connection with the exercise and performance of its rights and duties hereunder (together, the “**Trust Expenses**”). To the extent that the Sponsor fails to pay the Trust Expenses, the Trust will be responsible for such Trust Expenses.

SECTION 2.4 *Indemnification*.

(a) The Trust hereby agrees to be primary obligor and shall indemnify, defend and hold harmless the Trustee and any of the officers, directors, employees and agents of the Trustee (the “**Indemnified Persons**”) from and against any and all losses, damages, liabilities, claims, actions, suits, costs, expenses, disbursements (including the reasonable fees and expenses of counsel and fees and expenses incurred in connection with enforcement of its indemnification rights hereunder), taxes and penalties of any kind and nature whatsoever (collectively, “**Expenses**”), to the extent that such Expenses arise out of or are imposed upon or asserted at any time against such Indemnified Persons with respect to the performance of this Trust Agreement, the creation, operation or termination of the Trust or the transactions contemplated hereby; *provided, however*, that the Trust shall not be required to indemnify any Indemnified Person for any Expenses which are a result of the willful misconduct, bad faith or gross negligence of an Indemnified Person. If the Trust shall have insufficient assets or improperly refuses to pay an Indemnified Person within sixty (60) days of a request for payment owed hereunder, the Sponsor shall, as secondary obligor, compensate or reimburse the Trustee or indemnify, defend and hold harmless an Indemnified Person as if it were the primary obligor hereunder; *provided, however*, that the Sponsor shall not be required to indemnify any Indemnified Person for any Expenses which are a result of the willful misconduct, bad faith or gross negligence of an Indemnified Person. To the fullest extent permitted by law and by the requirement for treatment of the Trust as a grantor trust for tax purposes, Expenses to be incurred by an Indemnified Person shall, from time to time, be advanced by, or on behalf of, the Sponsor prior to the final disposition of any matter upon receipt by the Sponsor of an undertaking by, or on behalf of, such Indemnified Person to repay such amount if it shall be determined that the Indemnified Person is not entitled to be indemnified under this Trust Agreement.

(b) As security for any amounts owing to the Trustee hereunder, the Trustee shall have a lien against the Trust property, which lien shall be prior to the rights of the Sponsor or any other Shareholder. The obligations of the Sponsor and the Trust to indemnify the Indemnified Persons under this Section 2.4 shall survive the termination of this Trust Agreement.

SECTION 2.5 *Successor Trustee.*

Upon the resignation or removal of the Trustee, the Sponsor shall appoint a successor Trustee by delivering a written instrument to the outgoing Trustee. Any successor Trustee must satisfy the requirements of Section 3807 of the Delaware Trust Statute. The successor Trustee shall become fully vested with all of the rights, powers, duties and obligations of the outgoing Trustee under this Trust Agreement, with like effect as if originally named as Trustee, and the outgoing Trustee shall be discharged of its duties and obligations under this Trust Agreement. Any business entity into which the Trustee may be merged or converted or with which it may be consolidated, or any entity resulting from any merger, conversion or consolidation to which the Trustee shall be a party, or any entity succeeding to all or substantially all of the corporate trust business of the Trustee, shall be the successor of the Trustee hereunder, to the fullest extent permitted by law without the execution or filing of any paper or any further act on the part of any of the parties hereto.

SECTION 2.6 *Liability of Trustee.*

Except as otherwise provided in this Article II, in accepting the trust created hereby, CSC Delaware Trust Company acts solely as Trustee hereunder and not in its individual capacity, and all Persons having any claim against CSC Delaware Trust Company by reason of the transactions contemplated by this Trust Agreement and any other agreement to which the Trust is a party shall look only to the Trust Estate for payment or satisfaction thereof. The Trustee shall not be liable or accountable hereunder to the Trust or to any other Person or under any other agreement to which the Trust is a party, except for the Trustee's own fraud, gross negligence, bad faith or willful misconduct. In particular, but not by way of limitation:

- (a) The Trustee shall have no liability or responsibility for the validity or sufficiency of this Trust Agreement or for the form, character, genuineness, sufficiency, enforceability, collectability, location, existence, value or validity of the Trust Estate;
- (b) The Trustee has not prepared or verified, and shall not be responsible or liable for, any information, disclosure or other statement or in any document issued or delivered in connection with the sale or transfer of the Shares;
- (c) The Trustee shall not be liable for any actions taken or omitted to be taken by it in accordance with the instructions of the Sponsor or the Liquidating Trustee;
- (d) The Trustee shall not have any liability for the acts or omissions of the Sponsor, the Custodian or their respective delegates;
- (e) The Trustee shall have no duty or obligation to supervise the performance of any obligations of the Sponsor, the Custodian or their respective delegates or any Authorized Participant;

(f) No provision of this Trust Agreement shall require the Trustee to expend or risk its own funds or otherwise incur any financial liability in the performance of any of its rights or powers hereunder;

(g) Under no circumstances shall the Trustee be liable for any obligations of the Trust arising under this Trust Agreement or any other agreements to which the Trust is a party;

(h) The Trustee shall be under no obligation to exercise any of the rights or powers vested in it by this Trust Agreement, or to institute, conduct or defend any litigation under this Trust Agreement or any other agreements to which the Trust is a party, at the request, order or direction of the Sponsor unless the Sponsor has offered to CSC Delaware Trust Company (in its capacity as Trustee and individually) security or indemnity satisfactory to it against the costs, expenses and liabilities that may be incurred by CSC Delaware Trust Company (including, without limitation, the reasonable fees and expenses of its counsel) therein or thereby;

(i) Notwithstanding anything contained herein to the contrary, the Trustee shall not be required to take any action in any jurisdiction other than in the State of Delaware if the taking of such action will (i) require the consent or approval or authorization or order of, or the giving of notice to, or the registration with or taking of any action in respect of, any state or other governmental authority or agency of any jurisdiction other than the State of Delaware, (ii) result in any fee, tax or other governmental charge becoming payable by the Trustee under the laws of any jurisdiction or any political subdivision thereof other than the State of Delaware or (iii) subject the Trustee to personal jurisdiction, other than in the State of Delaware, for causes of action arising from personal acts unrelated to the consummation of the actions of the Trustee contemplated by this Trust Agreement;

(j) To the extent that, at law or in equity, the Trustee has duties (including fiduciary duties) and liabilities relating thereto to the Trust, the Shareholders or any other Person, the Trustee, acting under this Trust Agreement, shall not be liable to the Trust, the Shareholders or any other Person for its good faith reliance on the provisions of this Trust Agreement, and the provisions of this Trust Agreement, to the extent that they restrict or eliminate the duties and liabilities of the Trustee otherwise existing at law or in equity are agreed by the parties hereto to replace such other duties and liabilities of the Trustee; and

(k) The Trustee shall not be liable for punitive, exemplary, consequential or similar damages for a breach of the Trust Agreement under any circumstances.

SECTION 2.7 *Reliance; Advice of Counsel.*

(a) In the absence of bad faith, the Trustee may conclusively rely upon certificates or opinions furnished to the Trustee and conforming to the requirements of this Trust Agreement in determining the truth of the statements and the correctness of the opinions contained therein, and shall incur no liability to anyone in acting or not acting on any signature, instrument, notice, resolution, request, consent, order, certificate, report, opinion, bond or other document or paper believed by it to be genuine and believed by it to be signed by the proper party or parties and need not investigate any fact or matter pertaining to, or contained in, any such document; *provided, however*, that the Trustee shall have examined any certificates and opinions so as to reasonably determine compliance of such certificates and opinions with the requirements of this Trust Agreement. The Trustee may accept a certified copy of a resolution of the board of directors or other governing body of any corporate party as conclusive evidence that such resolution has been duly adopted by such body and that such resolution is in full force and effect. As to any fact or matter the method of the determination of which is not specifically prescribed in this Trust Agreement, the Trustee may for all purposes hereof rely on a certificate, signed by the president, any vice president, the treasurer or any other authorized officers of the relevant party, as to such fact or matter, and such certificate shall constitute full protection to the Trustee for any action taken or omitted to be taken by it in good faith in reliance thereon.

(b) In the exercise or administration of the Trust hereunder and in the performance of its duties and obligations under this Trust Agreement, the Trustee, at the expense of the Trust (i) may act directly or through its agents, attorneys, custodians or nominees pursuant to agreements entered into with any of them, and the Trustee shall not be liable for the conduct or misconduct of such agents, attorneys, custodians or nominees if such agents, attorneys, custodians or nominees shall have been selected by the Trustee with reasonable care and (ii) may consult with counsel, accountants and other skilled professionals to be selected with reasonable care by it. The Trustee shall not be liable for anything done, suffered or omitted in good faith by it in accordance with the opinion or advice of any such counsel, accountant or other such Persons.

SECTION 2.8 *Payments to the Trustee.* Any amounts paid to the Trustee pursuant to this Article II shall be deemed not to be a part of the Trust Estate immediately after such payment. Any amounts owing to the Trustee under this Trust Agreement shall constitute a claim against the Trust Estate. Notwithstanding any other provision of this Trust Agreement, all payments to the Trustee, including fees, expenses and any amounts paid in connection with indemnification of the Trustee in accordance with the terms of this Trust Agreement will be payable only in U.S. Dollars.

ARTICLE III

SHARES; CREATIONS AND ISSUANCE OF CREATION BASKETS

SECTION 3.1 *General.* The Sponsor shall have the power and authority, without action or approval by the Shareholders, to cause the Trust to issue Shares from time to time as it deems necessary or desirable, including, without limitation, the Seed Shares and the Shares to be issued pursuant to the Initial Issuance. The number of Shares authorized shall be unlimited, and the Shares so authorized may be represented in part by fractional Shares, calculated to one one-hundred-millionth of one Ether (i.e., carried to the eighth decimal place). From time to time, the Sponsor may cause the Trust to divide or combine the Shares into a greater or lesser number without thereby changing the

proportionate beneficial interests in the Trust Estate, or in any way affecting the rights, of the Shareholders, without action or approval by the Shareholders. The Trust shall issue Shares solely in exchange for contributions of Ether (or for no consideration if pursuant to a Share distribution or split-up), except with respect to the issuance of the Seed Shares. All Shares when so issued shall be fully paid and non-assessable. Subject to the limitations upon, and requirements for, the issuance of Creation Baskets stated herein and in the APA Procedures (as defined below), the number of Creation Baskets that may be issued by the Trust is unlimited. Every Shareholder, by virtue of having purchased or otherwise acquired a Share, shall be deemed to have expressly consented and agreed to be bound by the terms of this Trust Agreement. Notwithstanding anything to the contrary in this Agreement, the Sponsor, on behalf of the Trust, shall have the power and authority to cause the Trust to issue Shares on such terms and for such consideration as the Sponsor determines in its sole discretion and to cause the Trust to consummate and perform the transactions described in the recitals hereto or as otherwise approved by the Sponsor in connection with the Initial Issuance and Initial Distribution.

SECTION 3.2 Offer of Shares; Procedures for Creation and Issuance of Creation Baskets to Persons Other than Authorized Participants.

On any Business Day, the Trust may create and issue Creation Baskets to any Person that has signed a Purchase Agreement with the Trust upon a transfer of the Total Basket Amount into the Trust's Ether Account; *provided* that the Trust shall create and issue Creation Baskets only if the Sponsor has determined in good faith that such creation and issuance does not conflict with the other terms of this Trust Agreement or with applicable law.

SECTION 3.3 Offer of Shares; Procedures for Creation and Issuance of Creation Baskets to Authorized Participants.

(a) General. The following procedures, as supplemented by the more detailed procedures specified in the exhibits, annexes, attachments and procedures, as applicable, to each Authorized Participant Agreement (the "**APA Procedures**"), which may be amended from time to time in accordance with the provisions of the relevant Authorized Participant Agreement (*provided* that any such amendment shall not constitute an amendment of this Trust Agreement), shall govern the Trust with respect to the creation and issuance of Creation Baskets to Authorized Participants, subject to Section 3.3(b).

(i) On any Business Day, an Authorized Participant may place an order for one or more Creation Baskets (each, a "**Creation Order**") in the manner provided in the APA Procedures.

(ii) The Sponsor or its delegate shall process Creation Orders only from Authorized Participants with respect to which an Authorized Participant Agreement is in full force and effect and only in accordance with the APA Procedures. The Sponsor or its delegate shall maintain and make available at the Trust's principal offices during normal business hours a current list of the Authorized Participants with respect to which an Authorized Participant Agreement is in full force and effect.

(iii) The Trust shall create and issue Creation Baskets only upon deposit with the Custodian on the applicable Creation Settlement Date of the applicable Total Basket Amount by the relevant Authorized Participant or Liquidity Provider, as applicable.

(iv) The Sponsor or its delegate has final determination of all questions as to the calculation of the Total Basket Amount at any time.

(v) Deposits of Ether other than those received from an Authorized Participant Self-Administered Account or a Liquidity Provider Account shall be rejected. The expense and risk of delivery, ownership and safekeeping of Ether, until such Ether have been received and not rejected by the Trust, shall be borne solely by the Authorized Participant or a Liquidity Provider, as applicable.

(vi) Upon the Custodian's receipt of the Total Basket Amount, the Sponsor or its delegate shall (A) if the Total Basket Amount is received into the Settlement Balance, direct the Custodian to transfer the Total Basket Amount to the Vault Balance, (B) direct the Transfer Agent to credit to the Authorized Participant's account the number of Creation Baskets ordered by the Authorized Participant and (C) compensate the Liquidity Provider pursuant to the APA Procedures.

(vii) The Custodian may accept delivery of Ether by such other means as the Sponsor, from time to time, may determine to be acceptable for the Trust.

(b) Rejection or Suspension. The Sponsor or its delegate shall reject a Creation Order if the Creation Order is not in proper form as described in the relevant Authorized Participant Agreement or if the fulfillment of the Creation Order, in the opinion of its counsel, might be unlawful. The issuance of Creation Baskets may be suspended by the Sponsor generally, or refused with respect to a particular Creation Order, during any period when the transfer books of the Transfer Agent are closed or if circumstances outside the control of the Sponsor or its delegate make it for all practicable purposes not feasible to process Creation Orders or for any other reason at any time or from time to time. None of the Sponsor, its delegates or the Custodian shall be liable for the suspension or rejection of any Creation Order.

(c) Conflict. In the event of any conflict between the procedures described in this Section 3.3 and the APA Procedures, the APA Procedures shall control.

(d) Successor Custodian. If a successor to the Custodian shall be employed, the Trust and the Sponsor shall establish procedures acceptable to such successor with respect to the matters addressed in this Section 3.3.

SECTION 3.4 *Book-Entry System.*

(a) Shares shall be held in book-entry form by the Transfer Agent. The Sponsor or its delegate shall direct the Transfer Agent to (i) credit or debit the number of Creation Baskets or Redemption Baskets to the account of the applicable Shareholder and (ii) issue or cancel Creation Baskets or Redemption Baskets, as applicable, at the direction of the Sponsor or its delegate.

(b) The Sponsor or its delegate may cause the Trust to issue Shares in certificated form in its sole discretion.

SECTION 3.5 *Assets of the Trust.* The Trust Estate shall irrevocably belong to the Trust for all purposes, subject only to the rights of creditors of the Trust and shall be so recorded upon the books of account of the Trust.

SECTION 3.6 *Liabilities of the Trust.* The Trust Estate shall be charged with the liabilities of the Trust and with all expenses, costs, charges and reserves attributable to the Trust. The Sponsor shall have full discretion, to the extent not inconsistent with applicable law, to determine which items shall be treated as income and which items as capital, and each such determination and allocation shall be conclusive and binding upon the Shareholders.

SECTION 3.7 *Distributions.*

(a) The Trust may make distributions on Shares either in cash or in kind (which may include shares of a liquidating trust or other vehicle formed to hold Ether), including in such form as is necessary and permissible for the Trust to facilitate the distribution of Ether, Incidental Rights and/or IR Virtual Currency.

(b) Distributions on Shares, if any, may be made with such frequency as the Sponsor may determine, which may be daily or otherwise, to the Shareholders, from the Trust Estate, after providing for actual and accrued liabilities. All distributions on Shares shall be made *pro rata* to the Shareholders in proportion to their respective Percentage Interests at the date and time of record established for such distribution.

(c) If the Trust sells Ether, Incidental Rights and/or IR Virtual Currency in order to pay Additional Trust Expenses, then any cash remaining from these sales after the payment of any Additional Trust Expenses shall promptly be distributed to the Shareholders.

SECTION 3.8 *Voting Rights.* Notwithstanding any other provision hereof, on each matter submitted to a vote of the Shareholders, each Shareholder shall be entitled to a proportionate vote based upon its Percentage Interest at such time.

SECTION 3.9 *Equality.* All Shares shall represent an equal proportionate beneficial interest in the Trust Estate subject to the liabilities of the Trust, and each Share's interest in the Trust Estate shall be equal to each other Share.

ARTICLE IV

TRANSFERS OF SHARES

SECTION 4.1 *General Prohibition*. A Shareholder may not sell, assign, transfer or otherwise dispose of, or pledge, hypothecate or in any manner encumber any or all of its Shares or any part of its right, title and interest in the Trust Estate except as permitted in this Article IV and any act in violation of this Article IV shall not be binding upon or recognized by the Trust (regardless of whether the Sponsor shall have knowledge thereof), unless approved in writing by the Sponsor; *provided, however*, that this Section 4.1 will not prohibit, constrain or otherwise limit ETHE's distribution of Shares pursuant to the Initial Issuance and Initial Distribution.

SECTION 4.2 *Restricted Securities*. Except for Shares transferred in a transaction registered under the Securities Act, the Shares are "restricted securities" that cannot be resold, pledged or otherwise transferred without registration under the Securities Act and state securities laws or exemption therefrom and may not be resold, pledged or otherwise transferred without the prior written consent of the Sponsor, which it may withhold in its sole discretion for any reason or for no reason. The Sponsor may provide any such written consent in any document issued or delivered in connection with the sale or transfer of Shares, including any filings with the SEC.

SECTION 4.3 *Transfer of Shares Generally*. Shares shall be transferable on the books of account for the Trust only by the record holder thereof or by his or her duly authorized agent upon delivery to the Sponsor or the Transfer Agent or similar agent of a duly executed instrument of transfer, and such evidence of the genuineness of each such execution and authorization and of such other matters as may be required by the Sponsor. Upon such delivery, and subject to any further requirements specified by the Sponsor, the transfer shall be recorded on the books of account for the Trust. Until a transfer is so recorded, the Shareholder of record of Shares shall be deemed to be the Shareholder with respect to such Shares for all purposes hereunder and neither the Sponsor nor the Trust, nor the Transfer Agent or any similar agent or registrar or any officer, employee or agent of the Trust, shall be affected by any notice of a proposed transfer.

ARTICLE V

REDEMPTIONS

SECTION 5.1 *Unavailability of Redemption Program*. Unless otherwise determined by the Sponsor in its sole discretion following the Trust's receipt of regulatory approval therefor, the Trust shall not offer a redemption program for the Shares. The Trust may, but shall not be required to, seek regulatory approval to operate a redemption program. If any redemption program is approved, then any redemption authorized by the Sponsor shall be subject to the provisions of this Article V. Notwithstanding anything to the contrary in this Agreement, the Sponsor may cause the Trust to redeem the Seed Shares in a manner determined by the Sponsor in its sole discretion.

SECTION 5.2 *Redemption of Redemption Baskets.*

(a) General. Upon the approval of a redemption program and authorization by the Sponsor, the following procedures, as supplemented by the APA Procedures, which may be amended from time to time in accordance with the provisions of the Authorized Participant Agreement (*provided* that any such amendment shall not constitute an amendment of this Trust Agreement), shall govern the Trust with respect to the redemption of Redemption Baskets, subject to Section 5.2(b).

(i) On any Business Day, an Authorized Participant may place an order to redeem Redemption Baskets (each, a “**Redemption Order**”) in the manner provided in the APA Procedures.

(ii) The Sponsor or its delegates shall process Redemption Orders only from Authorized Participants with respect to which an Authorized Participant Agreement is in full force and effect.

(iii) The Trust shall redeem Redemption Baskets only upon deposit with the Transfer Agent on the Redemption Settlement Date of the total number of Baskets indicated in the Authorized Participant’s Redemption Order.

(iv) Upon receipt of the total number of Baskets indicated in the Authorized Participant’s Redemption Order, the Sponsor or its delegate shall instruct the Transfer Agent to cancel the Shares in the Baskets so redeemed. The Sponsor or its delegate shall also instruct the Custodian to deposit into the Authorized Participant Self-Administered Account or the Liquidity Provider Account, as applicable, a number of Ether equal to the Total Basket Amount.

(v) The Sponsor or its delegate has final determination of all questions as to the determination of the Total Basket Amount at any time.

(vi) The Total Basket Amount shall be delivered only to an Authorized Participant Self-Administered Account or a Liquidity Provider Account.

(vii) The Total Basket Amount shall be subject to the deduction of any applicable tax or other governmental charges that may be due.

(b) Rejection or Suspension. The Sponsor or its delegate shall reject a Redemption Order if the Redemption Order is not in proper form as described in the relevant Authorized Participant Agreement or if the fulfillment of the Redemption Order, in the opinion of its counsel, might be unlawful. The redemption of Baskets may be suspended by the Sponsor generally, or refused with respect to a particular Redemption Order, during any period when the transfer books of the Transfer Agent are closed or if circumstances outside the control of the Sponsor or its delegate make it for all practicable purposes not feasible to process Redemption Orders or for any other reason at any time or from time to time. None of the Sponsor, its delegates or the Custodian shall be liable for the suspension or rejection of any Redemption Order.

(c) Conflict. In the event of any conflict between the procedures described in this Section 5.2 and the APA Procedures, the APA Procedures shall control.

SECTION 5.3 *Other Redemption Procedures*. The Sponsor or its delegates from time to time may, but shall have no obligation to, establish procedures with respect to redemption of Shares in lot sizes smaller than the Redemption Basket and permitting the redemption distribution to be delivered in a manner other than that specified in Section 5.2.

ARTICLE VI

THE SPONSOR

SECTION 6.1 *Management of the Trust*. Pursuant to Section 3806(b)(7) of the Delaware Trust Statute, the Trust shall be managed by the Sponsor in accordance with this Trust Agreement. The Sponsor may delegate, as provided herein, the duty and authority to manage the affairs of the Trust. Any determination as to what is in the interests of the Trust made by the Sponsor in good faith shall be conclusive. In construing the provisions of this Trust Agreement, the presumption shall be in favor of a grant of power to the Sponsor, but subject, for the avoidance of doubt, to the restrictions, prohibitions and limitations expressly set forth in Section 1.5, Section 6.4(m) and otherwise in this Trust Agreement. The enumeration of any specific power in this Trust Agreement shall not be construed as limiting the aforesaid power.

SECTION 6.2 *Authority of Sponsor*: In addition to, and not in limitation of, any rights and powers conferred by law or other provisions of this Trust Agreement, and except as limited, restricted or prohibited by the express provisions of this Trust Agreement or the Delaware Trust Statute, the Sponsor shall have and may exercise on behalf of the Trust, all powers and rights necessary, proper, convenient or advisable to effectuate and carry out the purposes of the Trust, which powers and rights shall include, without limitation, the following:

(a) To enter into, execute, accept, deliver and maintain, and to cause the Trust to perform its obligations under, contracts, agreements and any or all other documents and instruments incidental to the Trust's purposes, and to do and perform all such acts as may be in furtherance of the Trust's purposes, or necessary or appropriate for the offer and sale of the Shares, including, but not limited to, causing the Trust to enter into (i) contracts or agreements with the Sponsor or an Affiliate, *provided* that any such contract or agreement does not conflict with the provisions of Section 1.5(b) of this Trust Agreement, Section 6.4 of this Trust Agreement or clause (ii) of this Section 6.2(a) and (ii) contracts with third parties for various services, it being understood that any document or instrument executed or accepted by the Sponsor in the Sponsor's name shall be deemed executed and accepted on behalf of the Trust by the Sponsor, *provided, however*, that such

services may be performed by an Affiliate or Affiliates of the Sponsor so long as the Sponsor has made a good faith determination that (A) the Affiliate that it proposes to engage to perform such services is qualified to do so (considering the prior experience of the Affiliate or the individuals employed by the Affiliate); (B) the terms and conditions of the agreement pursuant to which such Affiliate is to perform services for the Trust are no less favorable to the Trust than could be obtained from equally-qualified unaffiliated third parties; and (C) the maximum period covered by the agreement pursuant to which such Affiliate is to perform services for the Trust shall not exceed one year, and such agreement shall be terminable without penalty upon one hundred twenty (120) days' prior written notice by the Trust;

(b) To establish, maintain, deposit into, and sign checks and/or otherwise draw upon, accounts on behalf of the Trust with appropriate banking and savings institutions;

(c) To deposit, withdraw, pay, retain and distribute the Trust Estate or any portion thereof in any manner consistent with the provisions of this Trust Agreement;

(d) To supervise the preparation of any confidential private placement memoranda, prospectuses, registration statements and supplements and amendments thereto and any filings of the Trust with the SEC;

(e) To make or authorize the making of distributions to the Shareholders and expenses of the Trust out of the Trust Estate;

(f) To cause the Trust to appoint an agent to act on behalf of the Shareholders pursuant to Section 7.5;

(g) To prepare, or cause to be prepared, and file, or cause to be filed, an application to register any Shares under the Securities Act and/or the Exchange Act and to take any other action and execute and deliver any certificates or documents that may be necessary to effectuate such registration;

(h) To prepare, or cause to be prepared, and file, or cause to be filed, an application to enable the Shares to be listed, quoted or traded on any Secondary Market and to take any other action and execute and deliver any certificates or documents that may be necessary to effectuate such listing, quotation or trading;

(i) To appoint one or more Custodians or other security vendors, including itself or an Affiliate, to provide for custodial or non-custodial security services, or to determine not to appoint any Custodian or other security vendors, and to otherwise take any action with respect to the Custodian or other security vendors to safeguard the Trust Estate;

(j) In the sole and absolute discretion of the Sponsor, to admit an Affiliate or Affiliates of the Sponsor as additional Sponsors;

(k) To delegate those of its duties hereunder as it shall determine from time to time to one or more Distributors, and add any additional service providers, if needed and as applicable;

(l) To perform such other services as the Sponsor believes that the Trust may from time to time require;

(m) To determine, in good faith, which peer-to-peer network, among a group of incompatible forks of the Ethereum Network, is generally accepted as Ether and should therefore be considered “Ether” for the Trust’s purposes, which the Sponsor will determine based on a variety of then relevant factors, including (but not limited to) the following: (i) the Sponsor’s beliefs regarding expectations of the core developers of Ethereum, users, services businesses, miners and other constituencies and (ii) the actual, continued development, acceptance, mining power and community engagement; *provided* that the Sponsor shall not make a determination that would conflict with Section 1.5(b) or Section 6.4(m) of this Trust Agreement; and

(n) In general, but subject to Section 1.5 and Section 6.4 of this Trust Agreement, to do everything necessary, suitable or proper for the accomplishment of any purpose or the furtherance of any power herein set forth, either alone or in association with others, and to do every other act or thing incidental or appurtenant to, or growing out of or connected with, the aforesaid purposes or powers.

SECTION 6.3 *Obligations of the Sponsor:* In addition to the obligations expressly provided by the Delaware Trust Statute or this Trust Agreement, the Sponsor shall:

(a) Devote such of its time to the affairs of the Trust as it shall, in its discretion exercised in good faith, determine to be necessary to carry out the purposes of the Trust, as set forth in Section 1.5, for the benefit of the Shareholders;

(b) Execute, file, record and/or publish all certificates, statements and other documents and do any and all other things as may be appropriate for the formation, qualification and operation of the Trust and for the conduct of its affairs in all appropriate jurisdictions;

(c) Retain independent public accountants to audit the accounts of the Trust;

(d) Employ attorneys to represent the Sponsor and, as necessary, the Trust;

(e) Select and enter into agreements with the Trustee and any other service provider to the Trust;

(f) Use its best efforts to maintain the status of the Trust as a grantor trust for U.S. federal income tax purposes under Subpart E, Part I of Subchapter J of the Code;

(g) Monitor all fees charged to the Trust, and the services rendered by the service providers to the Trust, to determine whether the fees paid by, and the services rendered to, the Trust are at competitive rates and are the best price and services available under the circumstances, and if necessary, renegotiate the fee structure to obtain such rates and services for the Trust;

(h) Have fiduciary responsibility for the safekeeping and use of the Trust Estate, whether or not in the Sponsor's immediate possession or control;

(i) Not employ or permit others to employ the Trust Estate in any manner except for the benefit of the Trust, including, among other things, the utilization of any portion of the Trust Estate as compensating balances for the exclusive benefit of the Sponsor;

(j) At all times act with integrity and good faith and exercise due diligence in all activities relating to the Trust and in resolving conflicts of interest;

(k) Enter into an Authorized Participant Agreement with each Authorized Participant and discharge the duties and responsibilities of the Trust and the Sponsor thereunder;

(l) Receive directly or through its delegates from Authorized Participants and process properly submitted Creation Orders, as described in Section 3.3(a);

(m) Receive directly or through its delegates from Authorized Participants and process properly submitted Redemption Orders (if authorized), as described in Section 5.2(a), or as may from time to time be permitted by Section 5.3;

(n) Interact with the Custodian and any other party as required;

(o) If the Shares are listed, quoted or traded on any Secondary Market, cause the Trust to comply with all rules, orders and regulations of such Secondary Market to which the Trust is subject as a result of the listing, quotation or trading of the Shares on such Secondary Market, and take all such other actions that may reasonably be taken and are necessary for the Shares to remain listed, quoted or traded on such Secondary Market until the Trust is terminated or the Shares are no longer listed, quoted or traded on such Secondary Market;

(p) If the Shares are transferred in a transaction registered under the Securities Act or registered under the Exchange Act, cause the Trust to comply with all rules, orders and regulations of the SEC and take all such other actions as may reasonably be taken and are necessary for the Shares to remain registered under the Exchange Act until the Trust is terminated or the Shares are no longer registered under the Exchange Act; and

(q) Take all actions to prepare and, to the extent required by this Trust Agreement or by law, mail to Shareholders any reports, press releases or statements, financial or otherwise, that the Sponsor determines are required to be provided to Shareholders by applicable law or governmental regulation or the requirements of any Secondary Market on which the Shares are listed, quoted or traded or, if any Shares are transferred in a transaction registered under the Securities Act or registered under the Exchange Act, the SEC, as applicable.

The foregoing clauses of Section 6.2 and Section 6.3 shall be construed as powers, and the foregoing enumeration of specific powers shall not be held to limit or restrict in any manner the general powers of the Sponsor. Any action by the Sponsor hereunder shall be deemed an action on behalf of the Trust, and not an action in an individual capacity.

SECTION 6.4 *General Prohibitions*. The Trust shall not, and the Sponsor shall not have the power to cause the Trust to:

(a) Receive any property other than Ether upon the issuance of Shares;

(b) Hold any property other than (i) Ether, Incidental Rights and IR Virtual Currency, (ii) cash from the sale of Ether, Incidental Rights or IR Virtual Currency and (iii) interests in any liquidating trust or other vehicle formed to hold Ether, Incidental Rights or IR Virtual Currency pending distribution of such interests to the Shareholders;

(c) Hold any cash from the sale of Ether, Incidental Rights or IR Virtual Currency for more than thirty (30) Business Days prior to using such cash to pay Additional Trust Expenses, or to fund the redemption of Redemption Baskets, and distributing any remaining cash to the Shareholders;

(d) If the redemption of Shares is not authorized pursuant to Section 5.1, redeem any Shares other than upon the dissolution of the Trust;

(e) If the redemption of Shares is authorized pursuant to Section 5.1, redeem the Shares other than (i) to satisfy a Redemption Order from an Authorized Participant, (ii) as provided in Section 5.2 or Section 5.3 or (iii) upon the dissolution of the Trust;

(f) Borrow money from, or loan money to, any Shareholder, the Sponsor or any other Person;

(g) Create, incur, assume or suffer to exist any lien, mortgage, pledge conditional sales or other title retention agreement, charge, security interest or encumbrance on or with respect to the Trust Estate, except for (i) liens for taxes not delinquent or being contested in good faith and by appropriate proceedings and for which appropriate reserves have been established and (ii) liens by the Trustee against the Trust property as security for any amounts owing to the Trustee hereunder;

(h) Commingle the Trust Estate with the assets of any other Person; *provided* that, for the avoidance of doubt, a portion of the Trust Estate may be held in the Settlement Balance from time to time in order to facilitate the creation and redemption of Shares;

(i) Permit rebates to be received by the Sponsor or any Affiliate of the Sponsor, or permit the Sponsor or any Affiliate of the Sponsor to engage in any reciprocal business arrangements which would circumvent the foregoing prohibition;

(j) Enter into any contract with the Sponsor or an Affiliate of the Sponsor (A) that, except for selling agreements for the sale of Shares, has a term of more than one year and that does not provide that it may be canceled by the Trust without penalty on one hundred twenty (120) days prior written notice or (B) for the provision of services, except at rates and terms at least as favorable as those that may be obtained from third parties in arm's length negotiations;

(k) Enter into any exclusive brokerage contract;

(l) Elect to be treated as an association taxable as a corporation for U.S. federal income tax purposes; or

(m) Notwithstanding any other provision of this Trust Agreement, including Section 6.4(b), take any action that could cause the Trust to be treated other than as a grantor trust for U.S. federal income tax purposes.

SECTION 6.5 *Liability of Covered Persons.* A Covered Person shall have no liability to the Trust or to any Shareholder or other Covered Person for any loss suffered by the Trust which arises out of any action or inaction of such Covered Person if such Covered Person, in good faith, determined that such course of conduct was in the best interest of the Trust and such course of conduct did not constitute fraud, gross negligence, bad faith or willful misconduct of such Covered Person. Subject to the foregoing, neither the Sponsor nor any other Covered Person shall be personally liable for the return or repayment of all or any portion of the Ether transferred, or the purchase price otherwise paid, by a Shareholder for its Shares, it being expressly agreed that any such return made pursuant to this Trust Agreement shall be made solely from the assets of the Trust without any rights of contribution from the Sponsor or any other Covered Person. A Covered Person shall not be liable for the conduct or misconduct of any delegate selected by the Sponsor with reasonable care.

SECTION 6.6 *Fiduciary Duty.*

(a) To the extent that, at law or in equity, the Sponsor has duties (including fiduciary duties) and liabilities relating thereto to the Trust, the Shareholders or any other Person, the Sponsor acting under this Trust Agreement shall not be liable to the Trust, the Shareholders or any other Person for its good faith reliance on the provisions of this Trust Agreement subject to the standard of care set forth in Section 6.5 herein. The provisions of this Trust Agreement, to the extent that they restrict or eliminate the duties and liabilities of the Sponsor otherwise existing at law or in equity are agreed by the parties hereto to replace such other duties and liabilities of the Sponsor. To the fullest extent permitted by law, no Person other than the Sponsor and the Trustee shall have any duties (including fiduciary duties) or liabilities at law or in equity to the Trust, the Shareholders or any other Person.

(b) Unless otherwise expressly provided herein, (i) whenever a conflict of interest exists or arises between the Sponsor or any of its Affiliates, on the one hand, and the Trust, any Shareholder or any other Person, on the other hand; or (ii) whenever this Trust Agreement or any other agreement contemplated herein provides that the Sponsor shall act in a manner that is, or provides terms that are, fair and reasonable to the Trust, any Shareholder or any other Person, the Sponsor shall resolve such conflict of interest, take such action or provide such terms, considering in each case the relative interest of each party (including its own interest) to such conflict, agreement, transaction or situation and the benefits and burdens relating to such interests, any customary or accepted industry practices, and any applicable generally accepted accounting practices or principles. In the absence of bad faith by the Sponsor, the resolution, action or terms so made, taken or provided by the Sponsor shall not constitute a breach of this Trust Agreement or any other agreement contemplated herein or of any duty or obligation of the Sponsor at law or in equity or otherwise.

(c) The Sponsor and any Affiliate of the Sponsor may engage in or possess an interest in profit-seeking or business ventures of any nature or description, independently or with others, whether or not such ventures are competitive with the Trust and the doctrine of corporate opportunity, or any analogous doctrine, shall not apply to the Sponsor. If the Sponsor acquires knowledge of a potential transaction, agreement, arrangement or other matter that may be an opportunity for the Trust, it shall have no duty to communicate or offer such opportunity to the Trust, and the Sponsor shall not be liable to the Trust or to the Shareholders for breach of any fiduciary or other duty by reason of the fact that the Sponsor pursues or acquires for, or directs such opportunity to, another Person or does not communicate such opportunity or information to the Trust. Neither the Trust nor any Shareholder shall have any rights or obligations by virtue of this Trust Agreement or the trust relationship created hereby in or to such independent ventures or the income or profits or losses derived therefrom, and the pursuit of such ventures, even if competitive with the purposes of the Trust, shall not be deemed wrongful or improper. Except to the extent expressly provided herein, the Sponsor may engage or be interested in any financial or other transaction with the Trust, the Shareholders or any Affiliate of the Trust or the Shareholders.

(d) To the fullest extent permitted by law and notwithstanding any other provision of this Trust Agreement or in any agreement contemplated herein or applicable provisions of law or equity or otherwise, whenever in this Trust Agreement a Person is permitted or required to make a decision (a) in its "sole discretion" or "discretion" or under a grant of similar authority or latitude, the Person shall be entitled to consider only such interests and factors as it desires, including its own interests, and shall have no duty or obligation to give any consideration to any interest of or factors affecting the Trust, the Shareholders or any other Person, or (b) in its "good faith" or under another express standard, the Person shall act under such express standard and shall not be subject to any other or different standard. The term "good faith" as used in this Trust Agreement shall mean subjective good faith as such term is understood and interpreted under Delaware law.

SECTION 6.7 *Indemnification of the Sponsor.*

(a) The Sponsor shall be indemnified by the Trust against any losses, judgments, liabilities, expenses and amounts paid in settlement of any claims sustained by it in connection with its activities for the Trust, provided that (i) the Sponsor was acting on behalf of, or performing services for, the Trust and has determined, in good faith, that such course of conduct was in the best interests of the Trust and such liability or loss was not the result of fraud, gross negligence, bad faith, willful misconduct, or a material breach of this Trust Agreement on the part of the Sponsor and (ii) any such indemnification will be recoverable only from the Trust Estate. All rights to indemnification permitted herein and payment of associated expenses shall not be affected by the dissolution or other cessation of existence of the Sponsor, or the withdrawal, adjudication of bankruptcy or insolvency of the Sponsor, or the filing of a voluntary or involuntary petition in bankruptcy under Title 11 of the United States Code by or against the Sponsor.

(b) Notwithstanding the provisions of Section 6.7(a) above, the Sponsor, any Authorized Participant and any other Person acting as a broker-dealer for the Trust shall not be indemnified for any losses, liabilities or expenses arising from or out of an alleged violation of U.S. federal or state securities laws unless (i) there has been a successful adjudication on the merits of each count involving alleged securities law violations as to the particular indemnitee and the court approves the indemnification of such expenses (including, without limitation, litigation costs), (ii) such claims have been dismissed with prejudice on the merits by a court of competent jurisdiction as to the particular indemnitee and the court approves the indemnification of such expenses (including, without limitation, litigation costs) or (iii) a court of competent jurisdiction approves a settlement of the claims against a particular indemnitee and finds that indemnification of the settlement and related costs should be made.

(c) The Trust shall not incur the cost of that portion of any insurance that insures any party against any liability, the indemnification of which is herein prohibited.

(d) Expenses incurred in defending a threatened or pending civil, administrative or criminal action suit or proceeding against the Sponsor shall be paid by the Trust in advance of the final disposition of such action, suit or proceeding, if (i) the legal action relates to the performance of duties or services by the Sponsor on behalf of the Trust; (ii) the legal action is initiated by a third party who is not a Shareholder or the legal action is initiated by a Shareholder and a court of competent jurisdiction specifically approves such advance; and (iii) the Sponsor undertakes to repay the advanced funds with interest to the Trust in cases in which it is not entitled to indemnification under this Section 6.7.

(e) The term "Sponsor" as used only in this Section 6.7 shall include, in addition to the Sponsor, any other Covered Person performing services on behalf of the Trust and acting within the scope of the Sponsor's authority as set forth in this Trust Agreement.

(f) In the event the Trust is made a party to any claim, dispute, demand or litigation or otherwise incurs any loss, liability, damage, cost or expense as a result of or in connection with any Shareholder's (or assignee's) obligations or liabilities unrelated to Trust affairs, such Shareholder (or assignees cumulatively) shall indemnify, defend, hold harmless, and reimburse the Trust for all such loss, liability, damage, cost and expense incurred, including attorneys' and accountants' fees.

SECTION 6.8 *Expenses and Limitations Thereon.*

(a) Sponsor's Fee.

(i) The Trust shall pay to the Sponsor a fee (the "**Sponsor's Fee**"), payable in Ether (except as provided in Section 6.8(a)(iv)), which shall accrue daily in U.S. Dollars at an annual rate of 0.25% of the NAV Fee Basis Amount of the Trust as of 4:00 p.m., New York time, on each day; *provided* that for a day that is not a Business Day, the calculation shall be based on the NAV Fee Basis Amount from the most recent Business Day, reduced by the accrued and unpaid Sponsor's Fee for such most recent Business Day and for each day after such most recent Business Day and prior to the relevant calculation date. The amount of Ether payable in respect of each daily U.S. Dollar accrual shall be determined by reference to the same Index Price used to determine such accrual. The Sponsor's Fee is payable to the Sponsor daily in arrears.

(ii) Except as provided in Section 6.8(a)(iv), to cause the Trust to pay the Sponsor's Fee, the Sponsor shall instruct the Custodian to withdraw from the Ether Account the number of Ether equal to the accrued but unpaid Sponsor's Fee and transfer such Ether to the account designated by the Sponsor at such times as the Sponsor determines in its absolute discretion.

(iii) After the payment of the Sponsor's Fee to the Sponsor, the Sponsor may elect to convert the Ether it receives into U.S. Dollars. The Shareholders acknowledge that the rate at which the Sponsor converts such Ether to U.S. Dollars may differ from the rate at which the Sponsor's Fee was initially converted into Ether. The Trust shall not be responsible for any fees and expenses incurred by the Sponsor to convert Ether received in payment of the Sponsor's Fee into U.S. Dollars.

(iv) If the Trust holds any Incidental Rights and/or IR Virtual Currency at any time, the Trust may pay the Sponsor's Fee, in whole or in part, with such Incidental Rights and/or IR Virtual Currency by transferring such Incidental Rights and/or IR Virtual Currency to the Sponsor; *provided* that the Trust shall use Incidental Rights and/or IR Virtual Currency to pay the Sponsor's Fee only if such transfer does not otherwise conflict with the terms of this Trust Agreement. In the case of Incidental Rights or IR Virtual Currency, such Incidental Rights or IR Virtual Currency shall be transferred at a value to be determined in good faith by the Sponsor. If the Trust pays the Sponsor's Fee in Incidental Rights and/or IR Virtual Currency, in whole or in part, the amount of Ether that would otherwise have been used to satisfy such payment shall be correspondingly reduced.

(v) The Sponsor may, from time to time, temporarily waive all or a portion of the Sponsor's Fee in its sole discretion.

(vi) As partial consideration for receipt of the Sponsor's Fee, the Sponsor shall assume and pay all fees and other expenses incurred by the Trust in the ordinary course of its affairs, excluding taxes, but including: (i) the Marketing Fee, (ii) the Administrator Fee, (iii) the Custodian Fee, (iv) the Transfer Agent fee, (v) the Trustee fee, (vi) the fees and expenses related to the listing, quotation or trading of the Shares on any Secondary Market (including customary legal, marketing and audit fees and expenses) in an amount up to \$600,000 in any given Fiscal Year, (vii) ordinary course legal fees and expenses, (viii) audit fees, (ix) regulatory fees, including, if applicable, any fees relating to the registration of the Shares under the Securities Act or the Exchange Act, (x) printing and mailing costs, (xi) costs of maintaining the Trust's website and (xii) applicable license fees (each, a "**Sponsor-paid Expense**" and together, the "**Sponsor-paid Expenses**"), *provided* that any expense that qualifies as Additional Trust Expenses as set forth in Section 6.8(b) shall be deemed to be Additional Trust Expenses and not a Sponsor-paid Expense.

(b) Additional Trust Expenses.

(i) The Trust shall pay any expenses incurred by the Trust in addition to the Sponsor's Fee that are not Sponsor-paid Expenses, including, but not limited to, (i) taxes and governmental charges, (ii) expenses and costs of any extraordinary services performed by the Sponsor (or any other service provider) on behalf of the Trust to protect the Trust or the interests of Shareholders (including in connection with any Incidental Rights and any IR Virtual Currency), (iii) any indemnification of the Custodian, Administrator or other agents, service providers or counterparties of the Trust, (iv) the fees and expenses related to the listing, quotation or trading of the Shares on any Secondary Market (including legal, marketing and audit fees and expenses) to the extent exceeding \$600,000 in any given Fiscal Year and (v) extraordinary legal fees and expenses, including any legal fees and expenses incurred in connection with litigation, regulatory enforcement or investigation matters (collectively, "**Additional Trust Expenses**").

(ii) To cause the Trust to pay the Additional Trust Expenses, if any, the Sponsor or its delegates (i) shall instruct the Custodian to withdraw Ether from the Ether Account in such quantity as may be necessary to permit payment of such Additional Trust Expenses and (ii) may either (x) cause the Trust (or its delegate) to convert such Ether into U.S. Dollars or other fiat currencies at the Actual Exchange Rate or (y) cause the Trust (or its delegate) to deliver such Ether in kind in satisfaction of such Additional Trust Expenses.

(iii) If the Trust holds any Incidental Rights and/or IR Virtual Currency at any time, the Trust may pay any Additional Trust Expenses, in whole or in part, with such Incidental Rights and/or IR Virtual Currency by entering into an agreement with the relevant payee and transferring such Incidental Rights and/or IR Virtual Currency to that payee at a value to be determined pursuant to such agreement; *provided* that the Trust shall use Incidental Rights and/or IR Virtual Currency to pay Additional Trust Expenses only if such transfer does not otherwise conflict with the terms of this Trust Agreement. In the case of Incidental Rights or IR Virtual Currency, such Incidental Rights or IR Virtual Currency shall be transferred at a value to be determined in good faith by the Sponsor. If the Trust pays the Additional Trust Expenses in Incidental Rights and/or IR Virtual Currency, in whole or in part, the amount of Ether that would otherwise have been used to satisfy such payment shall be correspondingly reduced.

(c) The Sponsor or any Affiliate of the Sponsor may be reimbursed only for the actual cost to the Sponsor or such Affiliate of any expenses that it advances on behalf of the Trust for payment of which the Trust is responsible. In addition, payment to the Sponsor or such Affiliate for indirect expenses incurred in performing services for the Trust in its capacity as the Sponsor (or an Affiliate of the Sponsor) of the Trust, such as salaries and fringe benefits of officers and directors, rent or depreciation, utilities and other administrative items generally falling within the category of the Sponsor's "overhead," is prohibited.

SECTION 6.9 *Voluntary Withdrawal of the Sponsor*. The Sponsor may withdraw voluntarily as the Sponsor of the Trust only upon one hundred and twenty (120) days' prior written notice to all Shareholders and the Trustee. If the withdrawing Sponsor is the last remaining Sponsor, the Shareholders holding Shares equal to at least a majority (over 50%) of the Shares may vote to elect and appoint, effective as of a date on or prior to the withdrawal, a successor Sponsor who shall carry on the affairs of the Trust. If the Sponsor withdraws and a successor Sponsor is named, the withdrawing Sponsor shall pay all expenses as a result of its withdrawal.

SECTION 6.10 *Litigation*. The Sponsor is hereby authorized to prosecute, defend, settle or compromise actions or claims at law or in equity as may be necessary or proper to enforce or protect the Trust's interests. The Sponsor shall satisfy any judgment, decree or decision of any court, board or authority having jurisdiction or any settlement of any suit or claim prior to judgment or final decision thereon, first, out of any insurance proceeds available therefor, next, out of the Trust's assets and, thereafter, out of the assets (to the extent that it is permitted to do so under the various other provisions of this Trust Agreement) of the Sponsor.

SECTION 6.11 *Bankruptcy; Merger of the Sponsor*.

(a) The Sponsor shall not cease to be a Sponsor of the Trust merely upon the occurrence of its making an assignment for the benefit of creditors, filing a voluntary petition in bankruptcy, filing a petition or answer seeking for itself any reorganization, arrangement, composition, readjustment, liquidation, dissolution or similar relief under any statute, law or regulation, filing an answer or other pleading admitting or failing to contest material allegations of a petition filed against it in any proceeding of this nature or seeking, consenting to or acquiescing in the appointment of a trustee, receiver or liquidator for itself or of all or any substantial part of its properties.

(b) To the fullest extent permitted by law, and on sixty (60) days' prior written notice to the Shareholders of their right to vote thereon, if any such transaction is other than with an affiliated entity, nothing in this Trust Agreement shall be deemed to prevent the merger of the Sponsor with another corporation or other entity, the reorganization of the Sponsor into or with any other corporation or other entity, the transfer of all the capital stock of the Sponsor or the assumption of the rights, duties and liabilities of the Sponsor by, in the case of a merger, reorganization or consolidation, the surviving corporation or other entity by operation of law. Without limiting the foregoing, none of the transactions referenced in the preceding sentence shall be deemed to be a voluntary withdrawal for purposes of Section 6.10 or an Event of Withdrawal for purposes of Section 12.1(a)(iv).

ARTICLE VII

THE SHAREHOLDERS

SECTION 7.1 *No Management or Control; Limited Liability; Exercise of Rights through an Authorized Participant.* The Shareholders shall not participate in the management or control of the Trust nor shall they enter into any transaction on behalf of the Trust or have the power to sign for or bind the Trust, said power being vested solely and exclusively in the Sponsor. Except as provided in Section 7.3 hereof, no Shareholder shall be bound by, or be personally liable for, the expenses, liabilities or obligations of the Trust in excess of its Percentage Interest of the Trust Estate. Except as provided in Section 7.3 hereof, each Share owned by a Shareholder shall be fully paid and no assessment shall be made against any Shareholder. No salary shall be paid to any Shareholder in its capacity as a Shareholder, nor shall any Shareholder have a drawing account or earn interest on its Percentage Interest of the Trust Estate. By the purchase and acceptance or other lawful delivery and acceptance of Shares, each owner of such Shares shall be deemed to be a Shareholder and beneficiary of the Trust and vested with beneficial undivided interest in the Trust to the extent of the Shares owned beneficially by such Shareholder, subject to the terms and conditions of this Trust Agreement.

SECTION 7.2 *Rights and Duties.* The Shareholders shall have the following rights, powers, privileges, duties and liabilities:

(a) The Shareholders shall have the right to obtain from the Sponsor information on all things affecting the Trust, provided that such information is for a purpose reasonably related to the Shareholder's interest as a beneficial owner of the Trust.

(b) The Shareholders shall receive the share of the distributions provided for in this Trust Agreement in the manner and at the times provided for in this Trust Agreement.

(c) Except for the Shareholders' transfer rights set forth in Article IV and the Shareholders' redemption rights set forth in Article V hereof, Shareholders shall have the right to demand a redemption of their Shares only upon the dissolution and winding up of the Trust and only to the extent of funds available therefor, as provided in Section 12.2. In no event shall a Shareholder be entitled to demand or receive property other than cash upon the dissolution and winding up of the Trust. No Shareholder shall have priority over any other Shareholder as to distributions. The Shareholder shall not have any right to bring an action for partition against the Trust.

(d) Shareholders holding Shares representing at least a majority (over 50%) of the Shares may vote to appoint a successor Sponsor as provided in Section 6.10 or to continue the Trust as provided in Section 12.1(a)(iv).

Except as set forth above, the Shareholders shall have no voting or other rights with respect to the Trust.

SECTION 7.3 Limitation of Liability.

(a) Except as provided in Section 6.7(f) hereof, and as otherwise provided under Delaware law, the Shareholders shall be entitled to the same limitation of personal liability extended to stockholders of private corporations for profit organized under the General Corporation Law of Delaware and no Shareholder shall be liable for claims against, or debts of the Trust in excess of its Percentage Interest of the Trust Estate, except in the case of a Shareholder that is an Authorized Participant, in the event that the liability is founded upon misstatements or omissions contained in such Shareholder's Authorized Participant Agreement. In addition, and subject to the exceptions set forth in the immediately preceding sentence, the Trust shall not make a claim against a Shareholder with respect to amounts distributed to such Shareholder or amounts received by such Shareholder upon redemption of such Shareholder's Shares unless, under Delaware law, such Shareholder is liable to repay such amount.

(b) The Trust shall indemnify to the full extent permitted by law and the other provisions of this Trust Agreement, and to the extent of the Trust Estate, each Shareholder against any claims of liability asserted against such Shareholder solely because it is a beneficial owner of one or more Shares as a Shareholder.

(c) Every written note, bond, contract, instrument, certificate or undertaking made or issued by the Sponsor on behalf of the Trust shall give notice to the effect that the same was executed or made by or on behalf of the Trust and that the obligations of such instrument are not binding upon the Shareholders individually but are binding only upon the assets and property of the Trust, and no resort shall be had to the Shareholders' personal property for satisfaction of any obligation or claim thereunder, and appropriate references may be made to this Trust Agreement and may contain any further recital that the Sponsor deems appropriate, but the omission thereof shall not operate to bind the Shareholders individually or otherwise invalidate any such note, bond, contract, instrument, certificate or undertaking. Nothing contained in this Section 7.3 shall diminish the limitation on the liability of the Trust to the extent set forth in Section 3.6 hereof.

SECTION 7.4 *Derivative Actions*. Subject to any other requirements of applicable law including Section 3816 of the Delaware Trust Statute, no Shareholder shall have the right, power or authority to bring or maintain a derivative action, suit or other proceeding on behalf of the Trust unless two or more Shareholders who (i) are not Affiliates of one another and (ii) collectively hold at least 10% of the outstanding Shares join in the bringing or maintaining of such action, suit or other proceeding. This Section 7.4 shall not apply to any derivative claims brought under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended, or the rules and regulations thereunder.

SECTION 7.5 *Appointment of Agents*.

(a) By the purchase and acceptance or other lawful delivery, acceptance or holding of the Shares, the Shareholders shall be deemed to agree that the Sponsor may cause the Trust to appoint an agent to act on their behalf in connection with any distribution of Incidental Rights and/or IR Virtual Currency if the Sponsor has determined in good faith that such appointment is reasonably necessary or in the best interests of the Trust and the Shareholders in order to facilitate the distribution of any Incidental Rights and/or IR Virtual Currency. For the avoidance of doubt, the Sponsor may cause the Trust to appoint the Sponsor or any of its Affiliates to act in such capacity, subject to Section 6.2(a) of this Trust Agreement. Any Person appointed as agent of the Shareholders pursuant to this Section 7.5(a) (i) shall receive an in-kind distribution of Incidental Rights and/or IR Virtual Currency on behalf of the Shareholders of record with respect to such distribution and (ii) following receipt of any such distribution, shall determine, in such Person's sole discretion and without any direction from the Trust or the Sponsor (in its capacity as Sponsor of the Trust), whether and when to sell the distributed Incidental Rights and/or IR Virtual Currency on behalf of the record date Shareholders.

(b) Any agent appointed pursuant to Section 7.5(a) shall not receive any compensation in connection with its role as agent. The foregoing notwithstanding, any such agent shall be entitled to receive from any distribution of Incidental Rights and/or IR Virtual Currency, Incidental Rights and/or IR Virtual Currency with an aggregate fair market value equal to the amount of administrative and other reasonable expenses incurred by such agent in connection with such in-kind distribution of Incidental Rights and/or IR Virtual Currency, including expenses incurred by such agent in connection with any post-distribution sale of such Incidental Rights and/or IR Virtual Currency.

SECTION 7.6 *Business of Shareholders*. Except as otherwise specifically provided herein, any of the Shareholders and any shareholder, officer, director, employee or other Person holding a legal or beneficial interest in an entity that is a Shareholder, may engage in or possess an interest in business ventures of every nature and description, independently or with others, and the pursuit of such ventures, even if competitive with the affairs of the Trust, shall not be deemed wrongful or improper.

SECTION 7.7 *Authorization of Filings.* Each Shareholder (or any permitted assignee thereof) hereby agrees that the Trust, the Sponsor and the Trustee are authorized to (i) prepare and file registration statements with the SEC and take such action as is necessary from time to time to qualify the Shares for offering and sale under the federal securities laws of the United States, (ii) prepare and file any current or periodic reports that may be required under the Exchange Act, and (iii) execute, deliver and perform the agreements, acts, transactions and matters contemplated hereby or described in, or contemplated by, any such registration statements or such reports on behalf of the Trust without any further act, approval or vote of the Shareholders, notwithstanding any other provision of this Trust Agreement, the Delaware Trust Statute or any applicable law, rule or regulation.

ARTICLE VIII

BOOKS OF ACCOUNT AND REPORTS

SECTION 8.1 *Books of Account.* Proper books of account for the Trust shall be kept and shall be audited annually by an independent certified public accounting firm selected by the Sponsor in its sole discretion, and there shall be entered therein all transactions, matters and things relating to the Trust as are required by the applicable law and regulations and as are usually entered into books of account kept by trusts. The books of account shall be kept at the principal office of the Trust and each Shareholder (or any duly constituted designee of a Shareholder) shall have, at all times during normal business hours, free access to and the right to inspect and copy the same for any purpose reasonably related to the Shareholder's interest as a beneficial owner of the Trust. Such books of account shall be kept, and the Trust shall report its profits and losses on, the accrual method of accounting for financial accounting purposes on a Fiscal Year basis as described in Article IX.

SECTION 8.2 *Annual Updates, Quarterly Updates and Account Statements.*

(a) If the Shares are not then listed, quoted or traded on any Secondary Market or registered under the Securities Act or the Exchange Act, the Sponsor shall furnish each Shareholder with an annual report of the Trust within one hundred and eighty (180) calendar days after the Trust's fiscal year (or as soon as reasonably practicable thereafter) including, but not limited to, annual audited financial statements (including a statement of income and statement of financial condition), prepared in accordance with GAAP and accompanied by a report of the independent registered public accounting firm that audited such statements.

(b) If the Shares are then listed, quoted or traded on a Secondary Market or registered under the Securities Act or the Exchange Act, the Sponsor shall prepare and publish the Trust's Annual Reports and Quarterly Reports as required by the rules and regulations of such Secondary Market or the SEC, as applicable.

SECTION 8.3 *Tax Information.* Appropriate tax information (adequate to enable each Shareholder to complete and file its U.S. federal tax return) shall be delivered to each Shareholder following the end of each Fiscal Year but, to the extent possible, no later than April 1. All such information shall be prepared, and all of the Trust's tax returns shall be filed, in a manner consistent with the treatment of the Trust as a grantor trust. The Trust's taxable year shall be the calendar year. The Trustee shall comply with all U.S. federal withholding requirements respecting distributions to, or receipts of amounts on behalf of, Shareholders that the Trustee reasonably believes are applicable under the Code. The consent of Shareholders shall not be required for such withholding.

SECTION 8.4 *Calculation of NAV.* The Sponsor or its delegate shall calculate and publish the Trust's NAV on each Business Day as of 4:00 p.m., New York time, or as soon as practicable thereafter. In order to calculate the NAV, the Sponsor shall:

1. Determine the Index Price as of such Business Day;
2. Multiply the Index Price by the Trust's aggregate number of Ether owned by the Trust as of 4:00 p.m., New York time, on the immediately preceding day, less the aggregate number of Ether payable as the accrued and unpaid Sponsor's Fee as of 4:00 p.m., New York time, on the immediately preceding day;
3. Add the U.S. Dollar value of Ether, calculated using the Index Price, receivable under pending Creation Orders, if any, determined by multiplying the number of the Creation Baskets represented by such Creation Orders by the Basket Amount and then multiplying such product by the Index Price;
4. Subtract the U.S. Dollar amount of accrued and unpaid Additional Trust Expenses, if any;
5. Subtract the U.S. Dollar value of the Ether, calculated using the Index Price, which are either (i) to be distributed under pending Redemption Orders, if any, determined by multiplying the number of Redemption Baskets represented by such Redemption Orders by the Basket Amount and then multiplying such product by the Index Price, or (ii) to be distributed to Shareholders pursuant to a binding obligation of the Trust following the declaration of an in-kind dividend (including through interests in any liquidating trust or other vehicle formed to hold Ether) (the amount derived from steps 1 through 5 above, the "**NAV Fee Basis Amount**"); and
6. Subtract the U.S. Dollar amount of the Sponsor's Fee that accrues for such Business Day, as calculated based on the NAV Fee Basis Amount for such Business Day.

Notwithstanding the foregoing, (i) in the event that the Sponsor determines that the methodology used to determine the Index Price is not an appropriate basis for valuation of the Trust's Ether, the Sponsor shall use an alternative methodology as set forth in the Trust's filings with the SEC and (ii) in the event that the Trust holds any Incidental Rights and/or IR Virtual Currency, the Sponsor may, at its discretion, include the value of such Incidental Rights and/or IR Virtual Currency in the determination of the Trust's NAV, provided that the Sponsor has determined in good faith a method for assigning an objective value to such Incidental Rights and/or IR Virtual Currency.

SECTION 8.5 *Maintenance of Records.*

The Sponsor shall maintain for a period of at least six Fiscal Years (a) all books of account required by Section 8.1 hereof; (b) a list of the names and last known address of, and number of Shares owned by, all Shareholders; (c) a copy of the Certificate of Trust and all certificates of amendment thereto; (d) executed copies of any powers of attorney pursuant to which any certificate has been executed; (e) copies of the Trust's U.S. federal, state and local income tax returns and reports, if any; (f) copies of any effective written Trust Agreements, Authorized Participant Agreements, including any amendments thereto; and (g) any financial statements of the Trust. The Sponsor may keep and maintain the books and records of the Trust in paper, magnetic, electronic or other format as the Sponsor may determine in its sole discretion, *provided* that the Sponsor shall use reasonable care to prevent the loss or destruction of such records. If there is a conflict between this Section 8.5 and the rules and regulations of any Secondary Market on which the Shares are listed, quoted or traded or, if applicable, the SEC with respect to the maintenance of records, the records shall be maintained pursuant to the rules and regulations of such Secondary Market or the SEC.

ARTICLE IX

FISCAL YEAR

SECTION 9.1 *Fiscal Year.*

The fiscal year of the Trust for financial accounting purposes (the "**Fiscal Year**") shall begin on the 1st day of January and end on the 31st day of December of each year. The Fiscal Year in which the Trust shall terminate shall end on the date of such termination.

ARTICLE X

AMENDMENT OF TRUST AGREEMENT; MEETINGS

SECTION 10.1 *Amendments to the Trust Agreement.*

(a) *Amendment Generally.*

(i) Except as otherwise specifically provided in this Section 10.1, the Sponsor, in its sole discretion and without Shareholder consent, may amend or otherwise supplement this Trust Agreement by making an amendment, an agreement supplemental hereto, or an amended and restated declaration of trust and trust agreement. Any such restatement, amendment and/or supplement hereto shall be effective on such date as designated by the Sponsor in its sole discretion; *provided* that the Sponsor shall not be permitted to make any such amendment, or otherwise supplement this Trust Agreement, if such amendment or supplement would permit the Sponsor, the Trustee or any other Person to vary the investment of the Shareholders (within the meaning of Treasury Regulations Section 301.7701-4(c)) or would otherwise adversely affect the status of the Trust as a grantor trust for U.S. federal income tax purposes.

(ii) Any amendments to this Trust Agreement which materially adversely affects the interests of the Shareholders shall occur only upon the vote of Shareholders holding Shares equal to at least a majority (over 50%) of the Shares (not including Shares held by the Sponsor and its Affiliates). For all purposes of this Section 10.1, a Shareholder shall be deemed to consent to a modification or amendment of this Trust Agreement if the Sponsor has notified such Shareholder in writing of the proposed modification or amendment and the Shareholder has not, within twenty (20) calendar days of such notice, notified the Sponsor in writing that the Shareholder objects to such modification or amendment. Notwithstanding anything to the contrary herein, notice pursuant to this Section 10.1 may be given by the Sponsor to the Shareholder by email or other electronic transmission and shall be deemed given upon receipt without requirement of confirmation.

(b) Without limitation of the foregoing, the Sponsor may, without the approval of the Shareholders, amend the provisions of this Trust Agreement if the Trust is advised at any time by the Trust's accountants or legal counsel that the amendments made are necessary to ensure that the Trust's status as a grantor trust will be respected for U.S. federal income tax purposes.

(c) No amendment affecting the rights or duties of the Trustee shall be binding upon or effective against the Trustee unless consented to by the Trustee in writing. No amendment shall be made to this Trust Agreement without the consent of the Trustee if the Trustee reasonably believes that such amendment adversely affects any of its rights, duties or liabilities. The Trustee shall be under no obligation to execute any amendment to the Trust Agreement or to any agreement to which the Trust is a party until it has received an instruction letter from the Sponsor, in form and substance reasonably satisfactory to the Trustee (i) directing the Trustee to execute such amendment, (ii) representing and warranting to the Trustee that such execution is authorized and permitted by the terms of the Trust Agreement and (if applicable) such other agreement to which the Trust is a party and does not conflict with or violate any other agreement to which the Trust is a party and (iii) confirming that such execution and acts related thereto are covered by the indemnity provisions of the Trust Agreement in favor of the Trustee and do not adversely affect the Trustee.

(d) Upon amendment of this Trust Agreement, the Certificate of Trust shall also be amended, if required by the Delaware Trust Statute, to reflect such change. At the expense of the Sponsor, the Trustee shall execute and file any amendment to the Certificate of Trust if so directed by the Sponsor.

(e) To the fullest extent permitted by law, no provision of this Trust Agreement may be amended, waived or otherwise modified orally but only by a written instrument adopted in accordance with this Section 10.1.

SECTION 10.2 *Meetings of the Trust.* Meetings of the Shareholders may be called by the Sponsor in its sole discretion. The Sponsor shall furnish written notice to all Shareholders thereof of the meeting and the purpose of the meeting, which shall be held on a date, not less than ten (10) nor more than sixty (60) days after the date of mailing of said notice, at a reasonable time and place. Any notice of meeting shall be accompanied by a description of the action to be taken at the meeting. Shareholders may vote in person or by proxy at any such meeting.

SECTION 10.3 *Action Without a Meeting.*

Any action required or permitted to be taken by Shareholders by vote may be taken without a meeting by written consent setting forth the actions so taken. Such written consents shall be treated for all purposes as votes at a meeting. If the vote or consent of any Shareholder to any action of the Trust or any Shareholder, as contemplated by this Trust Agreement, is solicited by the Sponsor, the solicitation shall be effected by notice to each Shareholder given in the manner provided in Section 13.6. The vote or consent of each Shareholder so solicited shall be deemed conclusively to have been cast or granted as requested in the notice of solicitation, whether or not the notice of solicitation is actually received by that Shareholder, unless the Shareholder expresses written objection to the vote or consent by notice given in the manner provided in Section 13.6 and actually received by the Trust within twenty (20) days after the notice of solicitation is sent. The Covered Persons dealing with the Trust shall be entitled to act in reliance on any vote or consent that is deemed cast or granted pursuant to this Section 10.3 and shall be fully indemnified by the Trust in so doing. Any action taken or omitted in reliance on any such deemed vote or consent of one or more Shareholders shall not be void or voidable by reason of any communication made by or on behalf of all or any of such Shareholders in any manner other than as expressly provided in Section 13.6.

ARTICLE XI

TERM

SECTION 11.1 *Term.*

The term for which the Trust is to exist shall be perpetual, unless terminated pursuant to the provisions of Article XII hereof or as otherwise provided by law.

ARTICLE XII

TERMINATION

SECTION 12.1 *Events Requiring Dissolution of the Trust.*

(a) The Trust shall dissolve at any time upon the happening of any of the following events:

(i) a U.S. federal or state regulator requires the Trust to shut down or forces the Trust to liquidate its Ether or seizes, impounds or otherwise restricts access to the Trust Estate;

(ii) any ongoing event exists that either prevents the Trust from making or makes impractical the Trust's reasonable efforts to make a fair determination of the Index Price;

(iii) any ongoing event exists that either prevents the Trust from converting or makes impractical the Trust's reasonable efforts to convert Ether to U.S. Dollars; or

(iv) a certificate of dissolution or revocation of the Sponsor's charter is filed (and ninety (90) days have passed after the date of notice to the Sponsor of revocation without a reinstatement of the Sponsor's charter) or the withdrawal, adjudication or admission of bankruptcy or insolvency of the Sponsor (each of the foregoing events an "**Event of Withdrawal**") has occurred unless (i) at the time there is at least one remaining Sponsor or (ii) within ninety (90) days of such Event of Withdrawal Shareholders holding at least a majority (over 50%) of the Shares agree in writing to continue the affairs of the Trust and to select, effective as of the date of such event, one or more successor Sponsors.

(b) The Sponsor may, in its sole discretion, dissolve the Trust if any of the following events occur:

(i) the SEC determines that the Trust is an investment company required to be registered under the Investment Company Act of 1940;

(ii) the CFTC determines that the Trust is a commodity pool under the Commodity Exchange Act;

(iii) the Trust is determined to be a "money service business" under the regulations promulgated by FinCEN under the authority of the U.S. Bank Secrecy Act and is required to comply with certain FinCEN regulations thereunder;

(iv) the Trust is required to obtain a license or make a registration under any state law regulating money transmitters, money services businesses, providers of prepaid or stored value or similar entities, or virtual currency businesses;

(v) the Trust becomes insolvent or bankrupt;

(vi) the Custodian resigns or is removed without replacement;

(vii) all of the Trust's Ether are sold;

(viii) the Sponsor determines that the size of the Trust Estate in relation to the expenses of the Trust makes it unreasonable or imprudent to continue the affairs of the Trust;

(ix) the Sponsor receives notice from the IRS or from counsel for the Trust or the Sponsor that the Trust fails to qualify for treatment, or will not be treated, as a grantor trust under the Code;

(x) the Trustee notifies the Sponsor of the Trustee's election to resign and the Sponsor does not appoint a successor trustee within one hundred and eighty (180) days; or

(xi) the Sponsor determines, in its sole discretion, that it is desirable or advisable for any reason to discontinue the affairs of the Trust.

(c) The death, legal disability, bankruptcy, insolvency, dissolution, or withdrawal of any Shareholder (as long as such Shareholder is not the sole Shareholder of the Trust) shall not result in the termination of the Trust, and such Shareholder, his or her estate, custodian or personal representative shall have no right to a redemption of such Shareholder's Shares. Each Shareholder (and any assignee thereof) expressly agrees that in the event of his or her death, he or she waives on behalf of himself or herself and his or her estate, and he or she directs the legal representative of his or her estate and any person interested therein to waive the furnishing of any inventory, accounting or appraisal of the Trust Estate and any right to an audit or examination of the books of account for the Trust, except for such rights as are set forth in Article VIII hereof relating to the books of account and reports of the Trust.

SECTION 12.2 *Distributions on Dissolution.* Upon the dissolution of the Trust, the Sponsor (or in the event there is no Sponsor, such person (the "**Liquidating Trustee**") as the majority in interest of the Shareholders may propose and approve) shall take full charge of the Trust Estate. Any Liquidating Trustee so appointed shall have and may exercise, without further authorization or approval of any of the parties hereto, all of the powers conferred upon the Sponsor under the terms of this Trust Agreement, subject to all of the applicable limitations, contractual and otherwise, upon the exercise of such powers, and provided that the Liquidating Trustee shall not have general liability for the acts, omissions, obligations and expenses of the Trust. Thereafter, in accordance with Section 3808(e) of the Delaware Trust Statute, the affairs of the Trust shall be wound up and all assets owned by the Trust shall be liquidated as promptly as is consistent with obtaining the fair value thereof, and the proceeds therefrom shall be applied and distributed in the following order of priority: (a) to the expenses of liquidation and termination and to creditors, including Shareholders who are creditors, to the extent otherwise permitted by law, in satisfaction of liabilities of the Trust (whether by payment or the making of reasonable provision for payment thereof) other than liabilities for distributions to Shareholders, and (b) to the Shareholders *pro rata* in accordance with their respective Percentage Interests of the Trust Estate. Notwithstanding anything to the contrary herein, no distributions of Ether shall be made to Shareholders upon the dissolution of the Trust; provided that the Trust may distribute interests in any liquidating trust or other vehicle formed to hold Ether.

SECTION 12.3 *Termination; Certificate of Cancellation.* Following the dissolution and distribution of the assets of the Trust, the Trust shall terminate and the Sponsor or the Liquidating Trustee, as the case may be, shall instruct the Trustee to execute and cause such certificate of cancellation of the Certificate of Trust to be filed in accordance with the Delaware Trust Statute at the expense of the Sponsor or the Liquidating Trustee, as the case may be. Notwithstanding anything to the contrary contained in this Trust Agreement, the existence of the Trust as a separate legal entity shall continue until the filing of such certificate of cancellation.

ARTICLE XIII

MISCELLANEOUS

SECTION 13.1 *Governing Law.* The validity and construction of this Trust Agreement and all amendments hereto shall be governed by the laws of the State of Delaware, and the rights of all parties hereto and the effect of every provision hereof shall be subject to and construed according to the laws of the State of Delaware without regard to the conflict of laws provisions thereof; *provided, however,* that causes of action for violations of U.S. federal or state securities laws shall not be governed by this Section 13.1, and *provided, further,* that the parties hereto intend that the provisions hereof shall control over any contrary or limiting statutory or common law of the State of Delaware (other than the Delaware Trust Statute) and that, to the maximum extent permitted by applicable law, there shall not be applicable to the Trust, the Trustee, the Sponsor, the Shareholders or this Trust Agreement any provision of the laws (statutory or common) of the State of Delaware (other than the Delaware Trust Statute) pertaining to trusts that relate to or regulate in a manner inconsistent with the terms hereof: (a) the filing with any court or governmental body or agency of trustee accounts or schedules of trustee fees and charges, (b) affirmative requirements to post bonds for trustees, officers, agents, or employees of a trust, (c) the necessity for obtaining court or other governmental approval concerning the acquisition, holding or disposition of real or personal property, (d) fees or other sums payable to trustees, officers, agents or employees of a trust, (e) the allocation of receipts and expenditures to income or principal, (f) restrictions or limitations on the permissible nature, amount or concentration of trust investments or requirements relating to the titling, storage or other manner of holding of trust assets or (g) the establishment of fiduciary or other standards or responsibilities or limitations on the acts or powers of trustees or managers that are inconsistent with the limitations on liability or authorities and powers of the Trustee or the Sponsor set forth or referenced in this Trust Agreement. Section 3540 of Title 12 of the Delaware Code shall not apply to the Trust. The Trust shall be of the type commonly called a “statutory trust,” and without limiting the provisions hereof, but subject to Section 1.5 and Section 1.6, the Trust may exercise all powers that are ordinarily exercised by such a statutory trust under Delaware law. Subject to Section 1.5 and Section 1.6, the Trust specifically reserves the right to exercise any of the powers or privileges afforded to statutory trusts and the absence of a specific reference herein to any such power, privilege or action shall not imply that the Trust may not exercise such power or privilege or take such actions.

SECTION 13.2 *Provisions In Conflict With Law or Regulations.*

(a) The provisions of this Trust Agreement are severable, and if the Sponsor shall determine, with the advice of counsel, that any one or more of such provisions (the “**Conflicting Provisions**”) are in conflict with the Code, the Delaware Trust Statute, the Securities Act, if applicable, or other applicable U.S. federal or state laws or the rules and regulations of any Secondary Market, the Conflicting Provisions shall be deemed never to have constituted a part of this Trust Agreement, even without any amendment of this Trust Agreement pursuant to this Trust Agreement; *provided, however,* that such determination by the Sponsor shall not affect or impair any of the remaining provisions of this Trust Agreement or render invalid or improper any action taken or omitted prior to such determination. No Sponsor or Trustee shall be liable for making or failing to make such a determination.

(b) If any provision of this Trust Agreement shall be held invalid or unenforceable in any jurisdiction, such holding shall not in any manner affect or render invalid or unenforceable such provision in any other jurisdiction or any other provision of this Trust Agreement in any jurisdiction.

SECTION 13.3 *Counsel to the Trust.* Counsel to the Trust may also be counsel to the Sponsor and its Affiliates. The Sponsor may execute on behalf of the Trust and the Shareholders any consent to the representation of the Trust that counsel may request pursuant to the New York Rules of Professional Conduct or similar rules in any other jurisdiction (the “**Rules**”). The Shareholders acknowledge that the Trust has selected Davis Polk & Wardwell LLP as legal counsel to the Trust (“**Trust Counsel**”). Trust Counsel shall not represent any Shareholder in the absence of a clear and explicit agreement to such effect between the Shareholder and Trust Counsel (and that only to the extent specifically set forth in that agreement), and in the absence of any such agreement Trust Counsel shall owe no duties directly to a Shareholder. Each Shareholder agrees that, in the event any dispute or controversy arises between any Shareholder and the Trust, or between any Shareholder or the Trust, on the one hand, and the Sponsor (or an Affiliate thereof that Trust Counsel represents), on the other hand, that Trust Counsel may represent either the Trust or the Sponsor (or its Affiliate), or both, in any such dispute or controversy to the extent permitted by the Rules, and each Shareholder hereby consents to such representation. Each Shareholder further acknowledges that, regardless of whether Trust Counsel has in the past represented any Shareholder with respect to other matters, Trust Counsel has not represented the interests of any Shareholder in the preparation and negotiation of this Trust Agreement.

SECTION 13.4 *Merger and Consolidation.* Subject to the provisions of Section 1.5 and Section 1.6, the Sponsor may cause (i) the Trust to be merged into or consolidated with, converted to or to sell all or substantially all of its assets to, another trust or entity; (ii) the Shares of the Trust to be converted into beneficial interests in another statutory trust (or series thereof); or (iii) the Shares of the Trust to be exchanged for shares in another trust or company under or pursuant to any U.S. state or federal statute to the extent permitted by law. For the avoidance of doubt, subject to the provisions of Section 1.5, the Sponsor, with written notice to the Shareholders, may approve and effect any of the transactions contemplated under (i), (ii) and (iii) above without any vote or other action of the Shareholders.

SECTION 13.5 *Construction.* In this Trust Agreement, unless the context otherwise requires, words used in the singular or in the plural include both the plural and singular and words denoting any gender include all genders. The title and headings of different parts are inserted for convenience and shall not affect the meaning, construction or effect of this Trust Agreement.

SECTION 13.6 *Notices*. All notices or communications under this Trust Agreement (other than notices of pledge or encumbrance of Shares, and reports and notices by the Sponsor to the Shareholders) shall be in writing and shall be effective upon personal delivery, or if sent by mail, postage prepaid, or if sent electronically, by email, or by overnight courier; and addressed, in each such case, to the address set forth in the books and records of the Trust or such other address as may be specified in writing, of the party to whom such notice is to be given, upon the deposit of such notice in the United States mail, upon transmission and electronic confirmation thereof or upon deposit with a representative of an overnight courier, as the case may be. Notices of pledge or encumbrance of Shares shall be effective upon timely receipt by the Sponsor in writing. Any reports or notices by the Sponsor to the Shareholders which are given electronically shall be effective upon receipt without requirement of confirmation. Any notice to be given to owners of beneficial interests in the Shares shall be duly given if mailed or delivered to participants of The Depository Trust Company for delivery to such owners.

All notices that are required to be provided to the Trustee shall be sent to:

CSC Delaware Trust Company
Attention: Corporate Trust Administration
251 Little Falls Drive
Wilmington, DE 19808

All notices that the Trustee is required to provide shall be sent to:

if to the Trust, at

Grayscale Ethereum Mini Trust (ETH)
290 Harbor Drive, 4th Floor
Stamford, CT 06902
Attention: Grayscale Investments, LLC

if to the Sponsor, at

Grayscale Investments, LLC
290 Harbor Drive, 4th Floor
Stamford, CT 06902
Attention: Edward McGee

SECTION 13.7 *Counterparts; Electronic Signatures*. This Trust Agreement may be executed in one or more counterparts (including those by facsimile or other electronic means), all of which shall constitute one and the same instrument binding on all of the parties hereto, notwithstanding that all parties are not signatory to the original or the same counterpart. This Trust Agreement, to the extent signed and delivered by means of a facsimile machine or other electronic transmission, shall be treated in all manner and respects as an original agreement and shall be considered to have the same binding legal effect as if it were the original signed version thereof delivered in person.

SECTION 13.8 *Binding Nature of Trust Agreement.* The terms and provisions of this Trust Agreement shall be binding upon and inure to the benefit of the heirs, custodians, executors, estates, administrators, personal representatives, successors and permitted assigns of the respective Shareholders. For purposes of determining the rights of any Shareholder or assignee hereunder, the Trust and the Sponsor may rely upon the Trust records as to who are Shareholders and permitted assignees, and all Shareholders and assignees agree that the Trust and the Sponsor, in determining such rights, shall rely on such records and that Shareholders and their assignees shall be bound by such determination.

SECTION 13.9 *No Legal Title to Trust Estate.* Subject to the provisions of Section 1.7 in the case of the Sponsor, the Shareholders shall not have legal title to any part of the Trust Estate.

SECTION 13.10 *Creditors.* No creditors of any Shareholders shall have any right to obtain possession of, or otherwise exercise legal or equitable remedies with respect to, the Trust Estate.

SECTION 13.11 *Integration.* This Trust Agreement constitutes the entire agreement among the parties hereto pertaining to the subject matter hereof and supersedes all prior agreements and understandings pertaining thereto.

SECTION 13.12 *Goodwill; Use of Name.* No value shall be placed on the name or goodwill of the Trust, which shall belong exclusively to Grayscale Investments, LLC.

SECTION 13.13 *Alternative Procedures for Creation and Redemption.*

(a) Notwithstanding Sections 3.1, 3.3, 6.4(a) and 6.4(b), the Trust may, and the Sponsor shall have the power to cause the Trust to, create and issue Baskets in exchange for the receipt of cash from an Authorized Participant, but only if such creation and issuance is made in compliance with all of the following requirements:

(i) On the date and by no later than the specified time established for the settlement of such creation and issuance, which date and time shall be fixed, under procedures to be adopted by the Sponsor, on the date a Cash Order for creation is placed and accepted, the Trust shall have received and be simultaneously in possession of (A) from the applicable Liquidity Provider, Ether in an amount equal to the Total Basket Amount in respect of such Cash Order (the “**Required Creation Ether**”) and (B) from such Authorized Participant, cash in an amount at least equal to the full purchase price to be paid by the Trust to such Liquidity Provider in exchange for the Required Creation Ether (such purchase price, the “**Required Creation Cash**,” and such receipt and simultaneous possession of the Required Creation Ether and the Required Creation Cash at or prior to such specified time, the “**Creation Settlement Condition**”); *provided*, that such cash shall be held by the Trust in a non-interest bearing account established solely for the purpose of creating, issuing and redeeming Shares in accordance with the terms of this Section 13.13;

(ii) If the Creation Settlement Condition is met with respect to such Cash Order, the Sponsor shall cause the Trust to deliver, promptly and in full satisfaction of the Trust's obligations to the applicable Liquidity Provider and such Authorized Participant in respect of such Cash Order, (A) to the applicable Liquidity Provider, the Required Creation Cash, and (B) to such Authorized Participant, (x) the Shares comprising the Creation Baskets to be issued pursuant to such Cash Order and (y) to the extent that the amount of cash previously received by the Trust from such Authorized Participant in connection with such Cash Order exceeded the Required Creation Cash, the amount of such excess cash;

(iii) If, for any or no reason, the Creation Settlement Condition is not met with respect to such Cash Order, the Sponsor shall cause the Trust to return, promptly and in full satisfaction of the Trust's obligations to the applicable Liquidity Provider and Authorized Participant in respect of such Cash Order, any and all cash and Ether previously received by the Trust in connection with such Cash Order to such Authorized Participant (in the case of cash) or Liquidity Provider (in the case of Ether); and

(iv) The Sponsor, such Authorized Participant and the applicable Liquidity Provider shall have agreed, as a condition to the participation in the consummation of such Cash Order, (A) to fully (and without exception) exculpate the Trust with respect to, and to irrevocably waive any and all claims against the Trust or the Trust Estate arising from or in connection with, such Cash Order and (B) to fully indemnify and hold the Trust harmless against any failure by such person to perform its obligations in respect of such Cash Order.

(b) Notwithstanding Section 5.2, during any time at which the Sponsor has authorized a redemption program, the Trust may, and the Sponsor shall have the power to cause the Trust to, redeem Baskets in exchange for the delivery of cash to an Authorized Participant, but only if such redemption is made in compliance with all of the following requirements:

(i) On the date and by no later than the specified time established for the settlement of such redemption, which date and time shall be fixed, under procedures to be adopted by the Sponsor, on the date a Cash Order for redemption is placed and accepted, the Trust shall have received and be simultaneously in possession of (A) from the applicable Liquidity Provider, cash proceeds from the sale of Ether in an amount equal to the Total Basket Amount in respect of such Cash Order (the "**Required Redemption Cash**"), provided, that such cash shall be held by the Trust in a non-interest bearing account established solely for the purpose of creating, issuing and redeeming Shares in accordance with the terms of this Section 13.13, and (B) from such Authorized Participant, the Shares comprising the Baskets to be redeemed pursuant to such Cash Order (such Shares, the "**Required Redemption Shares**," and such receipt and simultaneous possession of the Required Redemption Cash and the Required Redemption Shares at or prior to such specified time, the "**Redemption Settlement Condition**");

(ii) If the Redemption Settlement Condition is met with respect to such Cash Order, the Sponsor shall cause the Trust to deliver, promptly and in full satisfaction of the Trust's obligations to the applicable Liquidity Provider and such Authorized Participant in respect of such Cash Order, (A) to the applicable Liquidity Provider, Ether in an amount equal to the Total Basket Amount in respect of such Cash Order, and (B) to such Authorized Participant, the Required Redemption Cash;

(iii) If, for any or no reason, the Redemption Settlement Condition is not met with respect to such Cash Order, the Sponsor shall cause the Trust to return, promptly and in full satisfaction of the Trust's obligations to the applicable Liquidity Provider and Authorized Participant in respect of such Cash Order, any and all cash and Shares previously received by the Trust in connection with such Cash Order to such Authorized Participant (in the case of Shares) or Liquidity Provider (in the case of cash); and

(iv) The Sponsor, such Authorized Participant and the applicable Liquidity Provider shall have agreed, as a condition to the participation in the consummation of such Cash Order, (A) to fully (and without exception) exculpate the Trust with respect to, and to irrevocably waive any and all claims against the Trust or the Trust Estate arising from or in connection with, such Cash Order and (B) to fully indemnify and hold the Trust harmless against any failure by such person to perform its obligations in respect of such Cash Order.

(c) The Sponsor from time to time may, but shall have no obligation to, modify or supplement the requirements set forth in Section 13.13(a) and Section 13.13(b), but only if the Sponsor, with advice of counsel, has determined that creating or redeeming Shares (as the case may be) pursuant to such modified or supplemented requirements should not cause the Trust to be treated other than as a grantor trust for U.S. federal income tax purposes.

(d) By the purchase and acceptance or other lawful delivery, acceptance or holding of the Shares, the Shareholders shall be deemed to have acknowledged and agreed that any action taken in the manner contemplated by this Section 13.13 shall be permitted under Section 1.5 and Section 6.4(m). For the avoidance of doubt, the definitions of any defined terms used in this Trust Agreement shall be deemed modified or supplemented to the extent necessary for the Sponsor and the Trust to effectuate any action taken in the manner contemplated by this Section 13.13; *provided, however*, that neither the Required Creation Cash nor the Required Redemption Cash shall be considered to be part of the Trust Estate.

SECTION 13.14 *Corporate Transparency Act.*

The Corporate Transparency Act (31 U.S.C. § 5336) and its implementing regulations (collectively, the "CTA"), may require the Trust to file reports with the U.S. Financial Crimes Enforcement Network. It shall be Sponsor's duty, and not the Trustee's duty, to prepare such filings, cause the Trust to make such filings, and to cause the Trust to comply with its obligations under the CTA, if any.

Re: Grayscale Ethereum Mini Trust (ETH)

Ladies and Gentlemen:

We have acted as special Delaware counsel to Grayscale Ethereum Mini Trust (ETH) (the “Trust”), a Delaware statutory trust, in connection with the matters set forth herein. This opinion is being delivered to you at your request.

We have examined and relied upon such records, documents, certificates and other instruments as in our judgment are necessary or appropriate to enable us to render the opinions expressed below, including the following documents:

- (a) The Certificate of Trust of the Trust, as filed with the Secretary of State of the State of Delaware (the “Secretary of State”) on April 23, 2024, (the “Certificate of Trust”);
- (b) The Declaration of Trust and Trust Agreement of the Trust, dated as of April 23, 2024 (the “Trust Agreement”), between Grayscale Investments, LLC, as sponsor (the “Sponsor”), and CSC Delaware Trust Company (formerly known as Delaware Trust Company), as trustee (the “Trustee”);
- (c) The Amended and Restated Declaration of Trust and Trust Agreement, dated as of July 17, 2024, between the Trustee and the Sponsor (as so amended and restated, the “Amended and Restated Trust Agreement”);
- (d) A form of the Authorized Participant Agreement to be entered into by the Sponsor, acting in its capacity as Sponsor of the Trust, The Bank of New York Mellon, a New York Banking corporation acting in its capacity as transfer agent of the Trust, and each authorized participant (the “Authorized Participant Agreement”);

One Rodney Square ■ 920 North King Street ■ Wilmington, DE 19801 ■ Phone: 302-651-7700 ■ Fax: 302-651-7701

www.rlf.com

- (e) Amendment No. 4 to the Registration Statement on Form S-1 (the “Registration Statement”), including a preliminary prospectus (the “Prospectus”), filed by the Sponsor and the Trust with the Securities and Exchange Commission (the “SEC”) filed on July 17, 2024, relating to an unspecified number of shares to be issued by the Trust representing units of fractional undivided beneficial interests in the assets of the Trust (each, a “Share” and collectively, the “Shares); and
- (f) A Certificate of Good Standing for the Trust, dated July 16, 2024, obtained from the Secretary of State.

With respect to all documents examined by us, we have assumed (i) the authenticity of all documents submitted to us as authentic originals, (ii) the conformity with the originals of all documents submitted to us as copies or forms, and (iii) the genuineness of all signatures. Capitalized terms used herein and not otherwise defined are used as defined in, or by reference in, the Amended and Restated Trust Agreement, except that references herein to any document shall mean such document as in effect on the date hereof.

Based upon and subject to the foregoing and subject to the assumptions, exceptions, qualifications and limitations set forth hereinbelow, it is our opinion that:

1. The Trust is validly existing as a statutory trust under the Delaware Statutory Trust Act, 12 Del. C. § 3801 et seq. (the “Act”) and has the power and authority to issue and deliver the Shares.
2. When the Shares to be issued by the Trust have been delivered and sold to and paid for by the subscribers thereof as contemplated in the Registration Statement, the Authorized Participant Agreement and the Amended and Restated Trust Agreement, such Shares will be validly issued and will be fully paid and nonassessable beneficial interests in the Trust.

The foregoing opinions are subject to the following assumptions, exceptions, qualifications and limitations:

- A. This opinion is limited to the laws of the State of Delaware (excluding the securities laws of the State of Delaware), and we have not considered and express no opinion on the laws of any other jurisdiction, including federal laws and rules and regulations relating thereto. Our opinions are rendered only with respect to Delaware laws and rules, regulations and orders thereunder which are currently in effect.

B. We have assumed (i) that the Amended and Restated Trust Agreement constitutes the entire agreement among the parties thereto with respect to the subject matter thereof, including, without limitation, the creation, operation and termination of the Trust and that the Amended and Restated Trust Agreement and the Certificate of Trust are in full force and effect and have not been amended, (ii) the due creation, due formation or due organization, as the case may be, and valid existence in good standing of each party to the documents (other than the Trust) examined by us under the laws of the jurisdiction governing its creation, formation or organization, (iii) the legal capacity of each natural person who is a signatory to the documents examined by us, (iv) that each of the parties to the documents (other than the Trust) examined by us has the power and authority to execute and deliver, and to perform its obligations under, such documents, (v) the due authorization, execution and delivery by all parties thereto of all documents (other than the Trust) examined by us, (vi) the due submission to the Sponsor or its delegate of a Creation Order by each Authorized Participant, (vii) the due acceptance by the Sponsor or its delegate of each Creation Order, (viii) the payment by each Shareholder to the Trust of the full consideration due from it for the Shares subscribed to by it, (ix) the Shares will be offered and sold as described in the Registration Statement, the Authorized Participant Agreement, and the Amended and Restated Trust Agreement, and (x) that any amendment or restatement of any document reviewed by us has been accomplished in accordance with, and was permitted by, the relevant provisions of said document prior to its amendment or restatement from time to time.

C. We have not participated in the preparation of the Registration Statement or the Prospectus (except for providing this opinion) and assume no responsibility for its contents.

D. We note that Section 6.7(f) of the Amended and Restated Trust Agreement provides that the Shareholders will indemnify the Trust in certain circumstances.

We consent to the filing of this opinion with the Securities and Exchange Commission as an exhibit to the Registration Statement. We hereby consent to the use of our name under the heading “Legal Matters” in the Prospectus. In giving the foregoing consents, we do not thereby admit that we come within the category of persons whose consent is required under Section 7 of the Securities Act of 1933, as amended, or the rules and regulations of the Securities and Exchange Commission thereunder.

Very truly yours,

/s/ Richards, Layton & Finger, P.A.

Grayscale Ethereum Mini Trust (ETH)
c/o Grayscale Investments, LLC
290 Harbor Drive, 4th Floor
Stamford, Connecticut 06902

Ladies and Gentlemen:

We have acted as special tax counsel for Grayscale Investments, LLC, a Delaware limited liability company (the “Company”), in connection with the preparation and filing under the Securities Act of 1933, as amended (the “Securities Act”), and the rules and regulations promulgated thereunder, a registration statement on Form S-3 (the “Registration Statement”), including the prospectus constituting Part I of the Registration Statement (the “Prospectus”). The Registration Statement relates to the proposed issuance by the Grayscale Ethereum Mini Trust (the “Trust”), a Delaware trust governed by the Amended and Restated Declaration of Trust and Trust Agreement dated July 17, 2024 between the Company, as Sponsor and CSC Delaware Trust Company, as Trustee (as amended from time to time, the “Trust Agreement”), of an unspecified amount of shares representing units of fractional undivided beneficial interest in and ownership of the Trust (the “Shares”).

We have examined the Prospectus and originals or copies, certified or otherwise identified to our satisfaction, of all such agreements, certificates and other statements of corporate officers and other representatives of the Company, and such other documents, as we have deemed necessary or appropriate in order to enable us to render this opinion. In such examination we have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of all documents submitted to us as originals, the conformity with the originals of all documents submitted to us as duplicates or certified or conformed copies, and the authenticity of the originals of such latter documents. We have, when relevant facts material to our opinion were not independently established by us, relied, to the extent we deemed such reliance proper, upon written or oral statements of officers and other representatives of the Company. We have assumed, with your permission, that all statements concerning the Trust set forth in the Prospectus and in the written and oral statements described above are true, correct and complete, and that each of the Company and the Trust has complied with, and will continue to comply with, the obligations, covenants, and agreements contained in the Trust Agreement without waiver or modification.

Based on and subject to the foregoing, we advise you that, subject to the limitations and qualifications, and based on the assumptions, described herein and therein, the statements of law and legal conclusions set forth in the discussion under the caption “Material U.S. Federal Income Tax Consequences” in the Prospectus constitute our opinion as to the material United States federal income tax consequences of the ownership and disposition of Shares that generally may apply to a “U.S. Holder” or a “non-U.S. Holder” (in each case, as defined in the material under such caption), as applicable, under currently applicable law.

We express our opinion herein only as to those matters specifically set forth above, and no opinion should be inferred as to the tax consequences of the ownership and disposition of Shares under any state, local or foreign law, or with respect to other areas of U.S. federal taxation. We are members of the Bar of the State of New York, and we do not express any opinion herein concerning any law other than the federal law of the United States.

We hereby consent to the filing of this opinion with the Securities and Exchange Commission as an exhibit to the Registration Statement, and to the references to our firm in the material under the caption “Legal Matters” in the said Prospectus. In giving this consent, we do not admit that we are in the category of persons whose consent is required under Section 7 of the Securities Act.

Very truly yours,

/s/ Davis Polk & Wardwell LLP
